

Telenor Group, Communication on Progress 2008

Dear Sir/Madam,

Telenor has been a committed member of the UN Global Compact since 2001 and we affirm our continued commitment to the ten principles of the Compact. Through our corporate governance principles and systems, we ensure that we maintain a high level of focus on respecting human rights, adhering to the standards of the core International Labour Organisation conventions, promoting environmental protection, and combating corruption in all forms.

Our reporting to the Global Reporting Initiative through our website, www.telenorgroup.com, also serves as our Communication on Progress to the UN Global Compact. During 2008, we continued our initiatives to extend the benefits of mobile communications to a wide audience and maintained our focus on combating climate change. Telenor also laid the foundations for a comprehensive approach to supply chain follow-up. In 2008, Telenor Group was named Sector Leader in Mobile communications on the Dow Jones Sustainability Indexes for the second year in a row. Please see <http://www.telenorgroup.com/en/corporate-responsibility/reporting-and-performance/griindex/> for a comprehensive report of our progress in these areas.

Yours faithfully,

Hilde Tonne
Executive Vice President, Communications and Corporate Responsibility
Telenor Group
