

Metito teaches UAE youth to be environmentally savvy

Metito, the international desalination, water and wastewater treatment company, has recently led three educational events which have assisted in the development of the UAE's undergraduates, and highlighted their responsibility to the environment and the commitment of Metito to the United Nations Global Compact Initiative.

Civil engineering students from
AUS visiting Metito

The three events included a site visit to the Metito sewage treatment plant in the Meadows and two separate interactive seminars. Civil engineering students from the American University of Sharjah visited the Metito treatment plant and also took part in an interactive seminar regarding the benefits of water re-use. From Abu Dhabi Women's College, Ethics students were involved in a seminar highlighting the Metito corporate and social responsibility initiatives.

The students of both institutes learned about the importance of environmental awareness and the advantages of water reuse for the environment. The students were then educated on the Metito technical operation, in which they discussed the significance of water reuse on world conservation. Metito intends to constantly increase environmental awareness and emphasize the benefits of water reuse.

Budoor Hunnoon, Marketing Executive, Metito said, "To re-affirm our commitment to the United Nations Global Compact Initiative, Metito has had great pleasure in organizing the various events and educating the students. The company firmly believes that the younger generation should be the main focus in creating environmental awareness to the public and promoting each persons responsibility to the environment."

Metito is one of the founding members of the socially responsible community of the Global Compact in the GCC region. ■

قامت شركة ماتيتو الرائدة عالمياً في مجال تحلية ومعالجة مياه الصرف الصحي مؤخرًا بتنظيم ثلاث ندوات تعليمية ساهمت في تنمية معارف طلاب الجامعات الإماراتية من خلال تسليط الضوء على مسؤوليتهم تجاه البيئة، فضلاً عن التزام ماتيتو بمبادرة "الإلتحاق العالمي" الصادرة عن الأمم المتحدة. وتضمنت الفعاليات الثلاثة زيارة محطة ماتيتو لمعالجة مياه الصرف في المروج وعقد ندوتين تفاعليتين منفصلتين.
