## United Nations Global Compact - Statement of Continued Support

Sime Darby's business practices are driven by three key elements, namely, our Core Values, Business Principles and Sustainability Principles. We have embedded the principles of the UN Global Compact into Sime Darby's values and principles, and our overall approach to sustainability.

We have worked diligently to strengthen our approach to sustainability since January 2012, the date of our previous Communication on Progress (COP). This year we have integrated our COP with our annual sustainability report, which we are pleased to present.

We would like to confirm our continued support for the ten principles of the UN Global compact and look forward to sharing more on our journey in future COPs.
