New York, NY 10017
USA

Dear Secretary-General,

Canada Nickel, a Canadian junior exploration company, is a firm supporter of the Ten Principles of the United Nations Global Compact on human rights, labour, environment, and anti-corruption. These Principles form the foundation of our strategic decision making, providing unwavering guidance and purpose to our day-to-day operations and individual performances.

This letter serves as our commitment to the meaningful and continued integration of the Principles into all facets of our business. We will fulfill our responsibilities as a partner in the global pursuit of the UN Sustainable Development Goals, and make our commitments and intentions known to our Indigenous Nations, stakeholders, partners, and the broader public.

Aligned with our own intentions towards transparency, open dialogue, and accountability, we commit to providing a Communication on Progress addressing our company's efforts to implement the Ten Principles. Beginning in the calendar year following our commitment to the UN Global Compact, and annually thereafter, Canada Nickel will provide a Communication on Progress incorporating:

- A statement signed by the chief executive expressing continued commitment to the UN Global Compact and its principles, distinct from the letter of commitment to join the UN Global Compact.
- Completion of the online questionnaire of the Communication on Progress disclosing our continuous efforts to integrate and address the Ten Principles through our business performance, strategy, and targets, and our ongoing contributions to the Sustainable Development Goals.

Canada Nickel prioritizes the health, wellbeing, and prosperity of our environment, our communities, and the global ecosystem at all times. Our commitment to the UN Global Compact marks a tremendous stride in our pursuit of sustainable development objectives, fostering accountability and enabling valuable contributions to global, collaborative sustainability initiatives.

Sincerely,

Mr. Mark Selby
CEO
