

TITAN GRI INDEX 2015

Integrated
Annual Report
2015

This Report is in accordance with the Global Reporting Initiative's (GRI) G4 Sustainability Reporting Guidelines at "Core" level. We aim to move to GRI "Comprehensive" by 2017. To this aim we have reported on additional indicators not required by "Core". All "Core" indicators are indicated using the color gray. In this Index, "the Report" refers to the TITAN Integrated Report 2015 Full Report.

General Standard Disclosures: (Pages 2–6)
 Specific Standard Disclosures: (Pages 7–39)
 Data Tables: (Pages 40–50)

GENERAL STANDARD DISCLOSURES

General Standard Disclosures	Description	Location and response
STRATEGY AND ANALYSIS		
G4-1	CEO statement.	CEO message (page 2)
ORGANIZATIONAL PROFILE		
G4-2	Description of key impacts, risks, and opportunities.	Corporate governance: Managing risks (page 52)
G4-3	Name of the organization.	TITAN Group
G4-4	Primary brands, products, and/or services.	Strategic review: About us (page 4)
G4-5	Location of organization's headquarters.	Headquarters: Athens, Greece.
G4-6	Number of countries where the organization operates, and countries with major operations or relevant to sustainability issues.	Strategic review: Where we operate (page 4)
G4-7	Nature of ownership and legal form.	TITAN Group Parent Company is TITAN Cement Co S.A.
G4-8	Markets served.	Strategic review: Where we operate (page 4)
G4-9	Scale of the reporting organization.	Strategic review: About us (page 4) Strategic review: Where we operate (page 4) In total, we operate 253 plants, quarries and distribution terminals. Group statements: Financial statements: (page 65) Group performance: Financial performance (page 16) Regional performance (page 37)

GENERAL STANDARD DISCLOSURES continued

General Standard Disclosures	Description	Location and response												
G4-10	Employees by employment contract and gender.	<p>Non-financial performance: Social: Employment and development: Equal opportunities, gender and age equality (page 25)</p> <p>TITAN's employment model is based on long-term employment for employees, and long-term relationships with our contractors. Self-employed workers are specialists or experts providing certain types of services, such as lawyers and doctors. Self-employed workers do not represent a significant proportion of our workforce. Nevertheless, we are looking to track the number of self-employed workers by 2020.</p> <p>Total number of employees by employment type and gender (average per year)</p> <table border="1"> <thead> <tr> <th></th> <th>Male</th> <th>Female</th> </tr> </thead> <tbody> <tr> <td>Number of full-time employees</td> <td>4,870</td> <td>630</td> </tr> <tr> <td>Number of part-time employees</td> <td>25</td> <td>0</td> </tr> <tr> <td>Number of temporary employees</td> <td>46</td> <td>13</td> </tr> </tbody> </table>		Male	Female	Number of full-time employees	4,870	630	Number of part-time employees	25	0	Number of temporary employees	46	13
	Male	Female												
Number of full-time employees	4,870	630												
Number of part-time employees	25	0												
Number of temporary employees	46	13												
G4-11	Percentage of employees covered by collective bargaining agreements.	All TITAN employees, except those in the USA, are covered by collective bargaining agreements. This amounts to 42% of total employment at TITAN Group.												
G4-12	Description of supply chain.	<p>Non-financial performance: Social: Our value chain and business partners (page 29)</p> <p>We extract raw materials such as limestone, clay, aggregates, pozzolan and gypsum. Along with the raw materials we use to make our products, we use thermal and electrical energy in our extraction and manufacturing processes. We crush, grind, heat and cool raw materials to produce clinker, which is then processed further to produce cement. We combine cement, water and aggregates to produce ready mix concrete. In specific plants we also process fly ash, which can be used as an alternative raw material.</p> <p>Our supply chain comprises a variety of business partners who provide us with services (as contractors or licensees) and products (as brokers or wholesalers). We mainly use local contractors for the maintenance of machinery and operations, which are largely capital intensive activities, as well as cleaning and catering, which are labor intensive activities. We also source centrally through international suppliers who provide goods such as fuels, technology and machinery.</p>												
G4-13	Significant changes to size, structure, or ownership.	<p>Strategic review: Where we operate (page 4)</p> <p>No changes have been recorded during the reporting period in the equity base of TITAN Group.</p>												
G4-14	Whether and how the precautionary approach or principle is addressed.	Our approach to reducing our emissions is guided by the Precautionary Principle, in that we tackle the possible risks even where our scientific understanding may be incomplete.												
G4-15	Externally developed economic, environmental, and social charters, principles, or initiatives the organization subscribes or endorses.	<p>Strategic review: Achieving sustainable growth together (page 7)</p> <p>Non-financial performance: Social: Our value chain and business partners (page 29)</p> <p>The Company Charter of the Cement Sustainability Initiative</p> <p>TITAN Group Code of Conduct</p> <p>TITAN Group Code for Procurement</p>												

GENERAL STANDARD DISCLOSURES continued

General Standard Disclosures	Description	Location and response
G4-16	Association memberships.	We co-lead both the CSR Europe's portal for buyers and suppliers and the Cement Sustainability Initiative's Task Force 10. See G4-15 for details of our membership with UN Global Compact, Cement Sustainability Initiative and CSR Europe. Appendices: Group memberships and cooperations (page 74) The Company Charter of the Cement Sustainability Initiative

IDENTIFIED MATERIAL ASPECTS AND BOUNDARIES

G4-17	Entities included in consolidated financial statements and if any are not in report.	Annual Financial Statements: Note 14 – Principal subsidiaries, associates and joint ventures http://integratedreport2015.financial.titan.gr/notes/14.principal-subsidiaries
G4-18	Process to define report content and aspect boundaries. How Defining Report Content principles was implemented.	Strategic review: Focusing on material issues (pages 10–12)
G4-19, G4-20 and G4-21	Material aspects and boundaries.	We have attributed each of our material issues to a relevant material aspect outlined in the Global Reporting Initiative (GRI) G4 Guidelines . The table on page 12 (at end of GRI index) describes the boundary for each of these aspects, indicating where the impacts of each one is felt, inside and outside of our business. The stakeholders who form the external boundaries are those nearby or with a close interest in TITAN's operations, such as governments and local communities in the countries and regions in which we work.
G4-22	Effect of restatements.	Appendices: Report development and methodology (page 57)
G4-23	Significant changes from previous reporting period.	Appendices: Report development and methodology (page 57)
G4-24, G4-25, G4-26 and G4-27	Stakeholder groups engaged by the organization; how stakeholders are identified and selected; approaches to stakeholder engagement, including frequency of engagement by type and by stakeholder group; and key concerns raised through stakeholder engagement, and how the organization responded.	Strategic review: Engagement process (pages 10–12). See table on pages 42–43 at the end of this GRI index
G4-28	Reporting period.	01 January 2015 – 31 December 2015
G4-29	Most recent report.	19 June 2015
G4-30	Reporting cycle.	The reporting cycle is annual.
G4-31	Contact for integrated report.	This Report is directed at key stakeholders, namely shareholders, employees, customers, suppliers, government and regulatory authorities, local communities and NGOs. It is also directed at potential investors, analysts and any other interested party. We welcome feedback via our website: integratedreport2015.titan.gr For more information, please visit our website: www.titan-cement.com or contact: Maria Alexiou, TITAN Group CSR Senior Manager, Secretary of the TITAN Group CSR Committee, at csr@titan.gr or as 22A Halkidos Street, 111 43 Athens, Greece.
G4-32	Table with Standard Disclosure locations.	GRI Index
G4-33	External assurance statement.	Appendices: Report assessment and verification (page 62)

GENERAL STANDARD DISCLOSURES continued

General Standard Disclosures	Description	Location and response
GOVERNANCE		
G4-34	Governance structure.	Corporate governance: Good governance (page 48) BOD Report 2015
G4-35 and G4-36	Process for delegating authority for economic, environmental and social topics and executive-level position with responsibility for economic, environmental and social topics.	Corporate governance: Good governance (page 48) BOD Report 2015 An overview of our governance and management structure is detailed in the Corporate Governance section. Along with our Board Committees (Audit, Remuneration, and Nomination and Corporate Governance), we have established management committees, among which is our Executive Committee and a CSR Committee, demonstrating how important social responsibility is to the Group.
G4-37	Processes for consultation between stakeholders and the highest governance body on economic, environmental and social topics.	Strategic review: Engagement process (pages 10-12) The Group CSR Committee discusses the key outcomes and results from stakeholder engagement undertaken. The Group CSR Committee is a committee that reports directly to the Board of Directors (BOD). Five members of the Group CSR Committee are also members of the BOD. Only one of them is a non-executive member of the BOD. The stakeholder engagement results are also included in the BOD's risk assessment discussions. See G4-24, G4-25, G4-26 and G4-27.
G4-38 and G4-39	Composition of the highest governance body and its committees and whether the Chair of the highest governance body is also an executive officer.	Corporate governance: Good governance (page 48) BOD Report 2015 See table on page 45 (at end of GRI index) and G4-34 for further detail on the Board and Board Committees.
G4-40	Nomination and selection processes for the highest governance body and its committees.	BOD report 2015
G4-41	Processes for the highest governance body to ensure conflicts of interest are avoided and managed.	BOD report 2015
G4-42	The highest governance body's and senior executives' roles in the development, approval, and updating of the organization's purpose, value or mission statements, strategies, policies, and goals related to economic, environmental and social impacts.	BOD report 2015 Corporate governance: Good governance (page 48)
G4-43	Measures taken to develop and enhance the highest governance body's collective knowledge of economic, environmental and social topics.	BOD report 2015 The Board's knowledge in regard to economic, environmental, and social issues is developed through its active involvement in CSR Europe, WBCSD/CSI and UNGC, as well as its long-term experience at TITAN and in the cement sector.
G4-44	Processes for evaluation of the highest governance body's performance with respect to governance of economic, environmental and social topics.	BOD report 2015

GENERAL STANDARD DISCLOSURES continued

General Standard Disclosures	Description	Location and response
G4-45 and G4-46	The highest governance body's role in the identification and management of economic, environmental and social impacts, risks, and opportunities; and in reviewing the effectiveness of the organization's risk management processes for economic, environmental and social topics.	BOD report 2015 Corporate governance: Managing risks (page 52) The Board is accountable for ensuring that risk is effectively managed across the Group, while the Audit Committee reviews the effectiveness of our processes, ensuring that we have systems in place to monitor and anticipate potential material risks. We manage our risks proactively, allowing the Group to respond and adapt to new dynamics in our business environment. Having expanded the scope of our risk assessment processes in recent years, we have a stronger understanding of the concerns and expectations of our key stakeholders, along with the risks we face and the opportunities that may arise.
G4-47	Frequency of the highest governance body's review of economic, environmental and social impacts, risks, and opportunities.	Environmental, social and economic risks and opportunities are reviewed by the Board on a monthly basis. BOD report 2015
G4-48	The highest committee or position that formally reviews and approves the organization's integrated report.	Reporting statements: Report development and methodology (page 57) Reporting statements: Report assessment and verification (page 61)
G4-49	The process for communicating critical concerns to the highest governance body.	Corporate governance: Good governance (page 48) Strategic review: Engagement process (pages 10-12) See G4-24, G4-25, G4-26 and G4-27.
G4-50	The nature and total number of critical concerns that were communicated to the highest governance body.	Strategic review: Focusing on material issues (page 10) Strategic review: Engagement process (pages 10-12)
G4-51	Remuneration policies for the highest governance body and senior executives.	BOD report 2015
G4-52	Process for determining remuneration.	BOD report 2015
G4-53	How stakeholders' views are sought and taken into account regarding remuneration.	BOD report 2015

ETHICS AND INTEGRITY

G4-56	Organization's values, principles, standards and norms of behavior such as codes of conduct and codes of ethics.	TITAN Group Code of Conduct TITAN Corporate Values Corporate governance: Managing risks (page 52) Corporate governance: Good governance (page 48) Non-financial performance: Social: Employment and development (page 21)
G4-57	Internal and external mechanisms for seeking advice on ethical and lawful behavior.	TITAN Group Code of Conduct Non-financial performance: Social: Employment and development (page 21)
G4-58	Internal and external mechanisms for reporting concerns about unethical or unlawful behavior.	TITAN Group Code of Conduct Non-financial performance: Social: Employment and development (page 21)

Identified omissions relate to GRI indicator compilation criteria, with full details available at <https://g4.globalreporting.org/specific-standard-disclosures/Pages/default.aspx>

SPECIFIC STANDARD DISCLOSURES continued

DMAs and indicators	Description	Location	Notes and omissions
G4-EC2	Financial implications and other risks and opportunities due to climate change	Corporate Governance: Managing risks (page 52) Non-financial performance: Environmental (page 30)	<p>Mitigating climate change</p> <p>Thermal and electrical energy, along with raw materials, are fundamental resources for high-intensity cement and construction materials producers. What we do can impact climate change and have significant implications on populations and biodiversity. We address this through the use of alternative fuels and raw materials, and systematic monitoring and recording of quantities of energy resources consumed. Our approach to reducing our emissions is guided by the Precautionary Principle, in that we tackle the possible risks even where scientific understanding may be incomplete.</p> <p>Risks associated with climate change</p> <p>Like many energy-intensive manufacturing industries, cement production generates significant greenhouse gas (GHG) emissions. TITAN is subject to the EU Emission Trading Scheme cap and trade quotas. Climate change may cause physical risks to our operations.</p> <p>Mitigating activities</p> <ul style="list-style-type: none"> TITAN is a member of the World Business Council of Sustainable Development and an active member of the Cement Sustainability Initiative. We have set targets for CO₂ emissions reductions and identified actions to reduce our ecological footprint. TITAN has identified that our Florida plant is at risk from climate change. TITAN is looking to identify and conduct additional climate change risk assessments for our Florida plant and other operations by 2020.
G4-EC3	Coverage of the organization's defined benefit plan obligations	<u>BOD report 2015: Annual financial statements note 25</u> <u>TITAN America 2015 financial statements note 19</u>	<p>The minimum percentage of salary contributed by TITAN to our employees' pensions is 15%. The amount contributed by TITAN and by our employees varies depending on the country in which we operate. TITAN's contributions to our employees' pensions ranges from 15 to 50% depending on country and role.</p> <p>Identified omission: d. The percentage of salary contributed by employee or employer.</p> <p>Reason for omission: The information is subject to specific confidentiality constraints.</p> <p>Explanation for omission: The percentage of salary contributed by TITAN to our employees' pensions varies by country. We have provided a range. The exact percentage contribution by country is deemed to be business sensitive due to the competitive nature of the cement industry and thus cannot be disclosed for confidentiality reasons.</p>
G4-EC4	Financial assistance received from government		No financial support was received from government in 2015.

SPECIFIC STANDARD DISCLOSURES continued

DMAs and indicators	Description	Location	Notes and omissions
MATERIAL ASPECT: MARKET PRESENCE			
G4-DMA	Disclosure on management approach	Non-financial performance: Social: Employment and development (page 21)	
G4-EC5	Ratios of standard entry level wage by gender compared to local minimum wage at significant locations of operation		<p>In all countries the ratio of basic salaries and remuneration is in line with market standards and collective agreements where applicable. There are no subjective differences in pay for the same job. TITAN defines significant locations of operations as locations with TITAN cement plants.</p> <p>Identified omission: a. The ratio of the entry level wage by gender at significant locations of operation to the minimum wage.</p> <p>Reason for omission: The information is subject to specific confidentiality constraints.</p> <p>Explanation for omission: TITAN operates in three main and distinctive activities, cement, ready mix concrete and quarrying of aggregates. For each of these activities we require different technical and professional expertise. We aim to be the employer of choice across all three activities, and thus follow a policy of providing new employees with premiums over the minimum wage. This is calculated country by country considering the history of each country, its level of industrialization and other factors. In countries where there is neither a minimum wage nor a collective bargaining agreement covering the sector, the wages provided by the public sector in the country of interest are estimated as a reference.</p>
G4-EC6	Proportion of senior management hired from the local community at significant locations of operation		<p>Global business with local expertise</p> <p>Although the Group operates globally, over 51% of our employees are from the local community, and most of them are local nationals. This excludes data from the USA, as data is not available as it is subject to confidentiality restraints. Most of our local management teams are local nationals.</p> <p>Most of the senior managers are hired from the local community. Expatriates support the integration of new plants or acquisitions into the Group. In 2015, only 24 senior managers were expatriates.</p> <p>Identified omission: a. Report the percentage of senior management at significant locations of operation that are hired from the local community.</p> <p>Reason for omission: The information is currently unavailable.</p> <p>Explanation for omission: We are looking to report on this by 2020 when we upgrade our data collection processes.</p> <p>TITAN defines significant locations of operations as locations with TITAN cement plants.</p> <p>“Local” refers to the administrative region within which lies a cement plant, a ready-mix unit, a quarry, a terminal, company offices or other premises that belong to the Group or one of its subsidiaries.</p>

The total number of IUCN Red List species and national conservation list species with habitats in areas affected by the operations of the organization, by level of extinction risk</p> <p>Reason for omission: The information is currently unavailable.</p> <p>Explanation for omission: We plan to report the total number of IUCN Red List species and national conservation list species with habitats in areas affected by our operations by 2020.</p>						

SPECIFIC STANDARD DISCLOSURES continued

DMAs and indicators	Description	Location	Notes and omissions
MATERIAL ASPECT: EMISSIONS			
G4-DMA	Disclosure on management approach	Non-financial performance: Environmental (page 30) TITAN Environmental Policy	
G4-EN15	Direct greenhouse gas (GHG) emissions (Scope 1)	Appendices: WBCSD CSI environmental progress review (page 68)	Total direct carbon emissions from our cement and grinding plants in 2015 were 10.5 million metric tons. In addition, 66,100 metric tons of biogenic CO ₂ is also emitted. Our direct CO ₂ emissions are calculated and reported in accordance with the corresponding WBCSD/CSI protocol (CO ₂ and Energy Accounting and Reporting Standard for the Cement Industry, version 3.0, May 2011). According to the protocol, no other greenhouse gas (GHG) is considered material to cement plant operations. The base year for CO ₂ emissions is 1990 in accordance with the Kyoto Protocol.
G4-EN16	Energy indirect greenhouse gas (GHG) emissions (Scope 2)	Appendices: WBCSD CSI environmental progress review (page 68)	Total indirect carbon emissions from our cement and grinding plants in 2015 were 1.1 million metric tons. Our indirect CO ₂ emissions, are calculated and reported in accordance with the corresponding WBCSD/CSI protocol (CO ₂ and Energy Accounting and Reporting Standard for the Cement Industry, version 3.0, May 2011). Indirect CO ₂ emissions are related to emissions released for the production of the electrical energy consumed at our facilities. For their calculation we use emission factors provided by the supplier of the electrical energy or other publicly available data. If no such data are available, the most recent data provided by CSI are used.
G4-EN17	Other indirect greenhouse gas (GHG) emissions		<p>Identified omission: Other indirect greenhouse gas (GHG) emissions (Scope 3)</p> <ol style="list-style-type: none"> Report gross other indirect (Scope 3) GHG emissions in metric tons of CO₂ equivalent, excluding indirect emissions from the generation of purchased or acquired electricity, heating, cooling, and steam consumed by the organization (these indirect emissions are reported in Indicator G4-EN16). Exclude any GHG trades, such as purchases, sales, or transfers of offsets or allowances. Report gases included in the calculation, if available. Report biogenic CO₂ emissions in metric tons of CO₂ equivalent separately from the gross other indirect (Scope 3) GHG emissions. Report other indirect (Scope 3) emissions categories and activities included in the calculation. Report the chosen base year, the rationale for choosing the base year, emissions in the base year, and the context for any significant changes in emissions that triggered recalculations of base year emissions. Report standards, methodologies, and assumptions used. Report the source of the emission factors used and the global warming potential (GWP) rates used or a reference to the GWP source, if available. <p>Reason for omission: Data unavailable.</p> <p>Explanation for omission: Relevant data are currently not available as we currently do not collect Scope 3 emissions data. We look to report on our Scope 3 emissions by 2020.</p>
G4-EN18	Greenhouse gas (GHG) emissions intensity	Appendices: WBCSD CSI environmental progress review (page 68) Appendices: Report development and methodology (page 57)	Specific direct CO ₂ emissions were 706.1kg/t _{Product} .

SPECIFIC STANDARD DISCLOSURES continued

DMAs and indicators	Description	Location	Notes and omissions
G4-EN19	Reduction of greenhouse gas (GHG) emissions	Non-financial performance: Environmental: Carbon emissions (page 31) Appendices: WBCSD/CSI environmental progress review (page 68) Regional performance (page 37)	
G4-EN20	Emissions of ozone-depleting substances (ODS)		Our operations are not correlated to emissions of ozone-depleting substances (ODS).
G4-EN21	NOx, SOx, and other significant air emissions	Appendices: WBCSD CSI environmental progress review (page 68)	Following the revised CSI guidance on air emissions reporting, this year for the second time we provide information regarding our performance on Hg, PCDD/F and heavy metals emissions as well as the overall and specific coverage rates.

MATERIAL ASPECT: EFFLUENTS AND WASTE

G4-DMA	Disclosure on management approach	Non-financial performance: Environmental (page 30) TITAN Environmental Policy													
G4-EN22	Total water discharge by quality and destination	Appendices: WBCSD CSI environmental progress review (page 71)	<p>At Group level, a total of 22.7 million m³ discharged in 2015. Total water discharge from our cement and grinding plants was 3.2 million m³.</p> <p>TITAN's reporting on water is compliant with the requirements set out in the WBCSD/CSI Protocol for Water Reporting.</p> <p>Identified omission: a: Quality of the water including treatment method. Whether it was reused by another organization.</p> <p>Reason for omission: Suitable index is not currently available.</p> <p>Explanation of omission: Quality of water discharge is monitored in accordance to local legal requirements as well as other specific obligations. Data are available at local level; however, there is no suitable indicator to quantify them at Group level.</p>												
G4-EN23	Total weight of waste by type and disposal method	Non-financial performance: Environmental: Recycling waste (page 36)	<table border="1"> <thead> <tr> <th colspan="2">Waste disposal</th> </tr> </thead> <tbody> <tr> <td>Off-site recycled</td> <td>294,000</td> </tr> <tr> <td>Landfilled</td> <td>79,600</td> </tr> <tr> <td>Off-site storage</td> <td>560</td> </tr> <tr> <td>Other</td> <td>10,000</td> </tr> <tr> <td>Total</td> <td>384,160</td> </tr> </tbody> </table> <p>Disposal method was based on information provided by the waste disposal contractor.</p> <p>Identified omission: a. Waste disposal															
Off-site recycled	294,000														
Landfilled	79,600														
Off-site storage	560														
Other	10,000														
Total	384,160														

SPECIFIC STANDARD DISCLOSURES continued

DMAs and indicators	Description	Location	Notes and omissions
G4-EN24	Total number and volume of significant spills		No significant spills were reported during 2015.
G4-EN25	Weight of transported, imported, exported, or treated waste deemed hazardous under the terms of the Basel Convention Annex I, II, III, and VIII, and percentage of hazardous waste shipped internationally		Waste materials used in or produced by our operations are not considered to be hazardous under the terms of the Basel Convention.
G4-EN26	Identity, size, protected status, and biodiversity value of water bodies and related habitats significantly affected by the organization's discharges of water and runoff		See G4-EN11 and G4-EN12. Based on the assessment tools available to us, no water body was significantly affected by our operations.

MATERIAL ASPECT: PRODUCT AND SERVICES

G4-DMA	Disclosure on management approach	Non-financial performance: Environmental (page 30) TITAN Environmental Policy	We aim to develop more sustainable products and services for our customers to minimize the impact our products have on society and the environment as demonstrated by our ProAsh® product.
G4-EN27	Extent of impact mitigation of environmental impacts of products and services	Strategic review: Delivering value far beyond the cement plant (pages 8–9)	Innovations in our products and in our engagement with local customers help to give us a competitive edge in the markets we work in. We actively promote new products that will improve quality and durability, such as ProAsh®, as well as methods and materials that will make construction easier or help to reduce its environmental impact.
G4-EN28	Percentage of products sold and their packaging materials that are reclaimed by category		Due to the nature of our main product and its long life cycle, currently, there are no effective mechanisms to estimate the amount that is reclaimed at the end of its useful life. There are certain initiatives that aim to collect construction materials during demolishing of buildings and structures, but they are still at an early stage. Mechanisms to reclaim packaging materials are in place in some areas, such as Greece and Bulgaria. These mechanisms are external collection systems that collect such materials under a national plan on material recycling and cannot provide specific data on the amount of our products reclaimed.

MATERIAL ASPECT: COMPLIANCE

G4-DMA	Disclosure on management approach	Non-financial performance: Environmental (page 30) TITAN Environmental Policy	
G4-EN29	Monetary value of significant fines and total number of non-monetary sanctions for non-compliance with environmental laws and regulations		The total amount of significant fines paid by the Group in 2015 in relation to non-compliance with environmental laws and regulations was €60,778. This included a €44,778 fine at Separation Technologies in 2015 for failing to make proper immediate notifications relating to a sulfuric acid spill at its TECO facility which occurred on 6 September 2014. The second was a €16,000 fine for infringement of a quarry legislation at Xirorema Aspropirgos in Greece. There were no non-monetary sanctions or environmental cases brought against the Group in 2015.

SPECIFIC STANDARD DISCLOSURES continued

DMA and indicators	Description	Location	Notes and omissions																
MATERIAL ASPECT: TRANSPORT																			
G4-DMA	Disclosure on management approach	Non-financial performance: Environmental (page 30) TITAN Environmental Policy	We rely on contractors and suppliers to deliver to us the goods and services we need to run our business. Transporting our products in a safe, timely fashion to our customers while minimizing safety, social and environmental risks is of great importance to our business.																
G4-EN30	Significant environmental impacts of transporting products and other goods and materials for the organization's operations, and transporting members of the workforce		<p>The environmental impacts of transporting our products, materials used in our operations and our employees are mainly GHG emissions, fugitive dust and noise. We actively implement programs adopting best practices to reduce these impacts, such as the introduction of trucks with low emission engines and the installation of covering mechanisms as well as truck washing prior to leaving our facilities premises to reduce fugitive dust.</p> <p>Reason for omission: Not applicable.</p> <p>Explanation of omission: Based on past studies, the environmental impact of such activities was deemed not material compared to the impact of our direct operations. We therefore do not currently collect data on transport impacts. By 2020, we look to re-evaluate our position and develop a monitoring system as necessary.</p>																
MATERIAL ASPECT: OVERALL																			
G4-DMA	Disclosure on management approach	Delivering value far beyond the cement plant (pages 8-9) Non-financial performance: Environmental (page 30) TITAN Environmental Policy	Our efforts to address environmental concerns such as water and energy use, biodiversity, CO ₂ emissions and waste management are not add-ons to our business, but are central to what we do. They underpin both our operational efficiency and our focus on sustainability. They also help us secure the permits we need to run our business.																
G4-EN31	Total environmental protection expenditures and investments by type		<p>Environmental expenditure across all our operations (including emissions treatment, waste and remediation costs) in 2015 was €67.8 million.</p> <table border="1"> <thead> <tr> <th>Expenditure</th> <th>(million €)</th> </tr> </thead> <tbody> <tr> <td>Environmental management</td> <td>14.8</td> </tr> <tr> <td>Reforestation</td> <td>0.4</td> </tr> <tr> <td>Rehabilitation</td> <td>0.5</td> </tr> <tr> <td>Environmental training and awareness building</td> <td>0.2</td> </tr> <tr> <td>Application of environmental friendly technologies</td> <td>49.9</td> </tr> <tr> <td>Waste management</td> <td>2.0</td> </tr> <tr> <td>Total</td> <td>67.8</td> </tr> </tbody> </table>	Expenditure	(million €)	Environmental management	14.8	Reforestation	0.4	Rehabilitation	0.5	Environmental training and awareness building	0.2	Application of environmental friendly technologies	49.9	Waste management	2.0	Total	67.8

G4-DMA	Disclosure on management approach	TITAN Code of Conduct for Procurement	
		Non-financial performance: Social: Our value chain and business partners (page 29)	
G4-EN32	Percentage of new suppliers that were screened using environmental criteria		100% of new suppliers are screened using the criteria of compliance with environmental legislation.
G4-EN33	Significant actual and potential negative environmental impacts in the supply chain and actions taken		<p>Identified omissions: a. The number of suppliers subject to environmental impact assessments. b. The number of suppliers identified as having significant actual and potential negative environmental impacts. c. The significant actual and potential negative environmental impacts identified in the supply chain. d. The percentage of suppliers identified as having significant actual and potential negative environmental impacts with which improvements were agreed upon as a result of assessment. e. The percentage of suppliers identified as having significant actual and potential negative environmental impacts with which relationships were terminated as a result of assessment, and why.</p> <p>Reason for omissions: The information is currently unavailable.</p> <p>Explanation for omissions: We are looking to report against this indicator by 2020 once we have our new supplier program in place.</p>
G4-EN34	Number of grievances about environmental impacts filed, addressed, and resolved through formal grievance mechanisms	Regional performance: Eastern Mediterranean (pages 45 and 47)	In 2015, one grievance was filed and signed by three local NGOs in Egypt in relation to our switch from natural gas to coal energy as a result of a natural gas shortage in the country. TITAN has taken the necessary actions to address this grievance by undertaking a detailed Social and Environmental Impact Assessment, and is doing everything it can to minimize the impact of this switch on the environment. The impact assessment identified the switch to coal as the best option from the possible options identified. The resolution of this grievance is ongoing. There were no other grievances received in relation to the environment.

G4-LA10	Programs for skills management and lifelong learning that support the continued employability of employees and assist them in managing career endings	Non-financial: Social: Employment and development (page 21)	<p>TITAN Group invests in steady long-term work relationships with its employees and thus builds the intellectual capital of the Company on multiple levels:</p> <ul style="list-style-type: none"> The “C-Mentors” program is a three-year industrial development program for TITAN newcomers with technical roles. By interactively transferring know-how, it enables them to become first-rate cement professionals, fully fledged cement employees and, ultimately, highly valued cement mentors. Quality of leadership is critical to the Group’s success. That is why we commit significant resources to training and developing high-potential employees throughout the organization, giving them the knowledge and skills to deliver the Group’s performance and growth objectives. We designed and launched a new Leadership Platform in 2015, “Leading the TITAN Way”, encompassing the essence of our culture and describing the fundamentals of good leadership within TITAN. “Leading the TITAN Way” has been shared and discussed with our top managers at engagement events, so that they can communicate it to their own teams and eventually to all employees in 2016. We also continue to expand successful Group initiatives such as our Self-Training E-learning Program (STEP). In 2015, 17 employees from all business units participated, making a total of 99 employees that have now taken part in this program. <p>Out of 110,776 training hours provided to our 5,584 (average) employees in 2015, 88% are related to topics that build management skills.</p>
G4-LA11	Percentage of employees receiving regular performance and career development reviews, by gender and by employee category		On average 49% or 2,747 employees of TITAN Group were covered by performance appraisals in 2015. We are looking at expanding the number of employees receiving performance appraisals to 100% by 2020.

DMAs and indicators	Description	Location	Notes and omissions
MATERIAL ASPECT: SUPPLIER HUMAN RIGHTS ASSESSMENT			
G4-DMA	Generic disclosures on management approach	Non-financial performance: Social: Our value chain and business partners: our partnership approach (page 29) <u>TITAN Code of Conduct for Procurement</u>	Identified omissions: b. How the organization manages the material Aspect or its impacts. c. Evaluation of the management approach. Reason for omissions: The information is currently unavailable. Explanation for omissions: We have set ourselves the target of assessing our supply chain against human rights risks by 2020 and reporting against this by 2020.
G4-HR10	Percentage of new suppliers that were screened using human rights criteria	<u>TITAN Code of Conduct for Procurement</u>	Identified omissions: a. The percentage of new suppliers that were screened using human rights criteria Reason for omission: The information is currently unavailable. Explanation for omissions: We have set ourselves the target of assessing our supply chain against human rights risks by 2020 and reporting against this by 2020.
G4-HR11	Significant actual and potential negative human rights impacts in the supply chain and actions taken	<u>TITAN Code of Conduct for Procurement</u>	Identified omissions: a. The number of suppliers subject to human rights impact assessments. b. The number of suppliers identified as having significant actual and potential negative human rights impacts. c. The significant actual and potential negative human rights impacts identified in the supply chain. d. The percentage of suppliers identified as having significant actual and potential negative human rights impacts with which improvements were agreed upon as a result of assessment. e. The percentage of suppliers identified as having significant actual and potential negative human rights impacts with which relationships were terminated as a result of assessment, and why. Reason for omissions: The information is currently unavailable. Explanation for omissions: We will report against this indicator by 2020 once we have gathered the data on our human rights risks in our supply chain.
MATERIAL ASPECT: HUMAN RIGHTS GRIEVANCE MECHANISMS			
G4-DMA	Generic disclosures on management approach	Non-financial performance: Social: Employment and development (page 21)	All our cement plants and most of our installations have mechanisms for employees to report grievances through their ISO 14001 management systems. For example, our sites either have a yellow safety box for employees to communicate with management or other written procedures that can be followed. Our employees in Greece and in the USA, or 56% of all of our employees, have access to an anonymous grievance hotline. In the USA this is called "Ethics Point" and in Greece it is called "The Hotline". These hotlines consist of an anonymous email and telephone number that enables employees to raise concerns in confidence directly to senior management. When a concern is raised through these hotlines, it is immediately investigated to see if the concern is a justified grievance. If it is deemed to be justified, a thorough investigation is undertaken and necessary actions are taken by TITAN to remediate the grievance.
G4-HR12	Number of grievances about human rights impacts filed, addressed, and resolved through formal grievance mechanisms	Non-financial performance: Social: Employment and development (page 21) Regional performance: Eastern Mediterranean (pages 45 and 47)	In 2015, one human rights grievance was filed and signed by three local NGOs in Egypt in relation to our switch from natural gas to coal energy as a result of a gas shortage in the country. The grievance was in relation to the energy switch's impact on the human rights of the local community living near our cement plant in Alexandria. TITAN has taken the necessary actions to address this grievance by undertaking a detailed social and environmental impact assessment, and is doing everything it can to minimize the impact of this switch on the local community. The resolution of this grievance is ongoing. There were no other grievances received in relation to human rights.

DMA and indicators	Description	Location	Notes and omissions
SUB-CATEGORY: SOCIETY			
MATERIAL ASPECT: LOCAL COMMUNITIES			
G4-DMA	Disclosure on management approach	Non-financial performance: Social: Community relations and development: Supporting communities and local development (page 27)	
G4-SO1	Percentage of operations with implemented local community engagement, impact assessments, and development programs	Non-financial performance: Social: Community relations and development (page 27) Regional performance (page 37) WBCSD/CSI environmental progress review (page 68)	In 2015, we reassessed our material issues with respect to their impact on the Group and its main stakeholders. In 2016, we will conduct local materiality assessments at all business units apart from the USA, which was reviewed in 2015. The first of these assessments was in Bulgaria in April 2016. This help ensure that the development of any new sustainability goals and activities remain inclusive and responsive to community needs.
G4-SO2	Operations with significant actual and potential negative impacts on local communities	Non-financial performance: Social: Community relations and development (page 27) Regional performance: Eastern Mediterranean (pages 45 and 47)	We work closely with local communities at each site to ensure any potential negative environmental or social risks are managed effectively.
MATERIAL ASPECT: ANTI-CORRUPTION			
G4-DMA	Disclosure on management approach	Corporate governance: Managing risks (page 52)	
G4-SO3	Total number and percentage of operations assessed for risks related to corruption and the significant risks identified	TITAN Code of Conduct for Procurement	100% of operations have been assessed for risk of corruption.
G4-SO4	Communication and training on anti-corruption policies and procedures		Our Code of Conduct training includes our expectations regarding anti-corruption. The Code of Conduct is translated into all languages spoken by TITAN employees and contractors. It is signed by managers and employees every time it is reviewed and updated by the Board. The Code of Conduct is also provided as part of the "personnel file" given to any new employee and they are required to read and sign it with their contract. The Code of Conduct is also an important element of induction courses provided to employees, and Group HR runs periodically a training program for managers in all countries to help them train employees appropriately and ensure they are familiar with it.
G4-SO5	Confirmed incidents of corruption and actions taken		No such incident was recorded in 2015.

SPECIFIC STANDARD DISCLOSURES continued

DMA and indicators	Description	Location	Notes and omissions
MATERIAL ASPECT: PUBLIC POLICY			
G4-DMA	Disclosure on management approach		Working with government and being transparent in our relationship with government and our stance on regulatory issues is part of being a transparent business.
G4-SO6	Total value of political contributions by country and recipient/beneficiary		TITAN does not provide any political contributions to any of the governments in which we operate directly or through our trade bodies.
MATERIAL ASPECT: ANTI-COMPETITIVE BEHAVIOR			
G4-DMA	Disclosure on management approach	Corporate governance: Our corporate governance principles and organization: Fair Competition (page 49)	
G4-SO7	Total number of legal actions for anti-competitive behavior, anti-trust, and monopoly practices and their outcomes		There have been no incidents of legal action for anti-competitive behavior, anti-trust or monopoly practices during the reporting period.
MATERIAL ASPECT: COMPLIANCE			
G4-DMA	Disclosure on management approach	Non-financial performance: Environmental (page 30)	
G4-SO8	Monetary value of significant fines and total number of non-monetary sanctions for non-compliance with laws and regulations		<p>TITAN paid €3,776 in fines and sanctions related to non-compliance with laws and regulations. Specifically:</p> <ul style="list-style-type: none"> In Bulgaria at the Zlatna cement plant we received a €2,600 sanction from the Labor Office for a labor accident of an injured worker. In the USA, TITAN paid €1,176 for proposed fines from the Mining Safety and Health Administration (\$1280.89) because north and south sides of coal belt 241 BC 250 had spilled material. Southside walkway of the same belt had also wet material. There were no non-monetary sanctions or social cases brought against TITAN Group in 2015.

Reason for omissions: The information is currently unavailable. Explanation for omissions: We have set ourselves the target of assessing our supply chain using social criteria and reporting against this indicator by 2020.

MATERIAL ASPECT: GRIEVANCE MECHANISMS FOR IMPACTS ON SOCIETY

G4-DMA	Disclosure on management approach	Non-financial performance: Social: Community relations and development (page 27)	We conduct community needs assessments in many different countries to determine the local need for infrastructure and other services. Local stakeholder forums and panels are organized annually and local stakeholders are invited to provide feedback on programs implemented within the framework of TITAN's community policy and to address new needs or other opportunities on which to engage with us.
G4-SO11	Number of grievances about impacts on society filed, addressed, and resolved through formal grievance mechanisms	Non-financial performance: Social: Community relations and development (page 27) Regional performance: Eastern Mediterranean (pages 45 and 47)	All of our operations have mechanisms for members of the community to report grievances through our ISO14001 management system. Communities in the USA have access to the same ethics hotline as our employees. In 2015, one social grievance was filed and signed by three local NGOs in Egypt in relation to our switch from natural gas to coal energy as a result of a gas shortage in the country. The grievance was in relation to the energy switch's impact on the human rights of the local community living near our cement plant in Alexandria. TITAN has taken the necessary actions to address this grievance by undertaking a detailed social and environmental impact assessment, and is doing everything it can to minimize the impact of this switch on the local community. The resolution of this grievance is ongoing. There were no other grievances received in relation to impacts on society.

SPECIFIC STANDARD DISCLOSURES continued

DMAs and indicators	Description	Location	Notes and omissions
SUB-CATEGORY: PRODUCT RESPONSIBILITY MATERIAL ASPECT: CUSTOMER HEALTH AND SAFETY			
G4-DMA	Disclosure on management approach	Non-financial performance: Social: Our value chain and business partners (page 29)	All our operations have established management systems certified according to ISO 9000 and relevant country management systems, and for cement and ready-mix products we comply with relevant European quality standards. However, we adapt our customer service policy according to local market conditions. Our managers meet regularly with customers to transfer know-how and expertise regarding product use. This includes everything from health and safety best practice to explaining the advantages of using different products, such as blended cements or other more advanced products, and promoting their environmental and other benefits.
G4-PR1	Percentage of significant product and service categories for which health and safety impacts are assessed for improvement		100% of our products are assessed accordingly for health and safety impacts during development, production, transportation and use.
G4-PR2	Total number of incidents of non-compliance with regulations and voluntary codes concerning the health and safety impacts of products and services during their life cycle, by type of outcomes		There were no incidents of non-compliance with regulations or voluntary codes in 2015.
ASPECT: PRODUCT AND SERVICE LABELING			
G4-DMA	Disclosure on management approach		We continuously assess our ability to meet and exceed legal requirements on the labeling of our products to ensure that they are safe for our customers' use. Given recent changes to regulations such as EU Directive 67/548/EEC regarding the labeling of substances and mixtures, TITAN has assessed its risk and ability to comply with them, and has determined that we currently meet all regulatory requirements. We are currently undertaking a review of our operations in the USA to ensure this part of our business is able to comply as well.
G4-PR3	Type of product and service information required by the organization's procedures for product and service information and labeling, and percentage of significant product and service categories subject to such information requirements		Our procedures for product and service labeling spells out a number of requirements for the type of information that must be on the label including information regarding the sourcing of materials in our products, content of our products and their related environmental and social impacts, safe use and application, and logos regarding the safety and amounts of silica in our cement. 100% of our products meet all existing legal requirements and are certified against our labeling procedures. For aggregates, the only labeling requirements are related to their source and safe use. As cement is used to make long-term infrastructure projects, the safe disposal of infrastructure is out of our direct control. However, for products that are not used, we have specific disposal procedures in place.
G4-PR4	Total number of incidents of non-compliance with regulations and voluntary codes concerning product and service information and labeling, by type of outcomes		There were zero incidents of non-compliance with regulations and voluntary codes concerning product and service information and labeling in 2015.

SPECIFIC STANDARD DISCLOSURES continued

DMA and indicators	Description	Location	Notes and omissions
G4-PR5	Results of surveys measuring customer satisfaction		<p>Meeting and exceeding our customers' expectations is of utmost importance to our business. We build long lasting relationships with our customers, for example working with them to build the largest skyscraper in America. In addition to our ongoing engagements with customers we undertake customer satisfaction surveys at market level. In 2015, we received mixed results depending on local market conditions. The areas which customers found most important included: low stable prices, reliability and on time delivery.</p> <p>Identified omission: a. The results or key conclusions of customer satisfaction surveys</p> <p>Reason for omission: The data is currently unavailable.</p> <p>Explanation for omission: We are currently undertaking a major IT development project which aims to develop a common platform for managing global data and enable easy collection and aggregation of data including customer satisfaction results. We look to report against this Indicator more fully by 2017.</p>

MATERIAL ASPECT: COMPLIANCE

G4-DMA	Disclosure on management approach	<p>Non-financial performance: Social: Our value chain and business partners (page 29)</p> <p>Strategic review: Delivering value far beyond the cement plant (page 8)</p>	
G4-PR8	Total number of substantiated complaints regarding breaches of customer privacy and losses of customer data		There were no such incidents in 2015.
G4-PR9	Monetary value of significant fines for non-compliance with laws and regulations concerning the provision and use of products and services		There were no such fines in 2015.
