United Nations Global Compact – Statement of Continued Support

Sime Darby is a diversified multinational and a key player in the Malaysian economy, with businesses in key growth sectors, namely, plantation, industrial equipment, motors, property and logistics, with operations in 26 countries and 4 territories. Committed to developing a sustainable future, Sime Darby strives to maintain an equitable balance between increasing value for shareholders and responsible development that brings value to society and safeguards the environment by embedding the principles of the United Nations Global Compact into Sime Darby's values and principles, and our overall approach to sustainability.

We have worked diligently to strengthen our approach to sustainability since November 2015, our previous submission of Communication on Progress (COP). Again this year, we have integrated our COP with our Sime Darby Berhad Annual Report, which we are pleased to present.

We would like to confirm our continued support for the ten principles of the United Nations Global Compact and look forward to sharing more on our journey in future COPs.
