Re: Reporting Cycle Adjustment – United Nations Global Compact (UNGC) Communication on Progress (COP)

Barloworld is a signatory to the UNGC and has for a number of years submitted its COP prior to the submission deadline date to avoid any application related and/or connectivity issues close to submission deadline.

Given this practice and the fact the current year's submission deadline date is set on the anniversary of the previous year's submission date, the submission date has crept forward over the years.

The date on which Barloworld's COP is uploaded onto the system is traditionally aligned to the 'go-live' date of its integrated reporting. For this financial period, the 'go-live' date is anticipated to be the third week of December 2017. The current COP submission date is reflected as the 9th December 2017 which precedes the 'go-live' date of Barloworld's integrated reporting.

As such, we request that the 2017 COP submission deadline be adjusted to the 27th December 2017.

Should you have any queries regarding our request above, please contact Kavendrin Naidoo.
