

2018 SUSTAINABILITY REPORT

NORNICKEL

THE NEW NORNICKEL: STRATEGY IN ACTION

102-50 102-54

The 2018 Sustainability Report of Nornickel Group (the “Report”) has been prepared in accordance with the GRI Standards, Comprehensive option, and is a report on the progress of compliance with the United Nations (UN) Global Compact principles that discloses the policy of MMC Norilsk Nickel (the “Company” or “Nornickel”) towards achieving the UN Sustainable Development Goals up to 2030.

In producing the Report, the following documents were also used: GRI Mining and Metals Sector Supplement, Guidance on Social Responsibility ISO 26000:2010, Reference Performance Indicators of the Russian Union of Industrialists and Entrepreneurs (RSPP), AccountAbility Standards AA1000SES (2015) and AA1000AP (2018).

The Company has been publishing annual non-financial reports since 2003.

The Report covers activities of Norilsk Nickel Group (“Nornickel Group”), including MMC Norilsk Nickel and entities in the corporate structure.

102-48

Information provided herein was collected via the corporate reporting framework and special information requests in line with the GRI requirements and with regard to the materiality analysis results. The Report contains updates of the data for previous years, which is indicated in the text.

Each year, the Company’s Report undergoes external assurance procedures, including independent professional assessment of the Report’s compliance with the GRI Standards and the RSPP public verification procedure.

As part of the United Nations Conference on Trade and Development intergovernmental body (UNCTAD) from the Russian side, Nornickel is pilot-testing performance indicators quantifying companies’ contribution to achieving the UN Sustainable Development Goals.

The Company’s Social Policy Department and a dedicated working group along with the key units supervised the preparation of the Report. The Report has also been approved by MMC Norilsk Nickel’s Management Board and Board of Directors.

Statement of the President and Chairman of the Management Board 102-14

The year 2018 was in many ways important for Nornickel. First, we prepared for major production growth associated with the commissioning of new mining capacity, expansion of concentration facilities and greenfield development. Second, we launched a number of large-scale modernisation and environmental initiatives, the most important of which was the Sulphur Project at our Copper Plant.

I believe that we owe our last year's success to both favourable market for our metals and real progress achieved in labour productivity improvement. I am sure that Nornickel will continue enhancing production efficiency, while our best management practices, unique know-how, and digitalisation efforts will drive up the Company's value no less than our vast ore reserves do.

Last year we made great progress in developing human capital, our key resource. Similar to other business areas, we are working towards boosting staff performance and engagement and developing a safety culture. Nornickel maintains traditionally high social security standards guaranteed by a new collective bargaining agreement signed between the Company and its employees in 2018. The document preserves and standardises employees' rights and benefits, as well as enhances them by offering extended health insurance coverage and adding other companies of Norilsk Nickel Group to the agreement.

Nornickel's high social security benefits cement its leading position among the industry's most attractive employers. Wages and salaries, which the Company always pays in time, remain among the highest industry-wide and average over RUB 111,000.

Health and safety is another domain that saw some major changes. In 2018, we reinforced the trend towards reduction in the number of production-related accidents. For the first time in the Company's history, Polar Division saw zero fatalities in the reporting year. The lost time injury frequency rate (LTIFR) decreased by 48%, reaching

an all-time low. The management of the Company views occupational safety and zero workplace fatalities as its key strategic objective and keeps running dedicated health and safety programmes.

As for production, 2018 saw an increase in the output of our key metals, primarily copper, thanks to the overall improvement in production efficiency. After we reconfigured our production facilities, we were able to almost completely abandon the practice of low-margin third party feedstock processing and increase the output of nickel and copper from the Company's Russian feedstock. As a result, our revenue and EBITDA grew 28% and 56% to USD 11.7 bn and USD 6.2 bn respectively, making Nornickel one of the most profitable companies among global diversified mining majors. Strong performance in 2018 and current macroeconomic trends strengthen our robust position and secure investments in sustainable development, primarily in environmental initiatives.

In 2018, we launched the second stage of our ambitious environmental programme, which will help us to achieve a fourfold reduction of sulphur dioxide emissions in Norilsk by 2023. The Company plans to halve its emissions in the settlement of Nickel (Kola Peninsula) already by the end of 2019. To this end, we started constructing a concentrate separation facility in 2018 to reduce the throughput at our Smelting Shop.

All what is said above proves that after Nornickel joined the UN Global Compact in 2016 it has remained truly committed to the Ten Principles of the UN Global Compact in the areas of human rights, labour, environment and anti-corruption. Nornickel has always strived to keep pace with change and keeps looking to seize new development opportunities. With projects launched in 2018, Nornickel is well positioned to become a technology leader in the mining sector both nationally and internationally. The new strategic cycle we are currently entering will make Nornickel a growth story in the eyes of the investment community.

“

The new strategic cycle we are currently entering will make Nornickel a growth story in the eyes of the investment community.

About Norilsk Nickel Group

Overview 102-1 102-2

Norilsk Nickel Group is Russia's leading metals and mining company, the world's largest producer of palladium and refined nickel, and one of the biggest producers of platinum, copper and cobalt. On top of that, the Group produces rhodium, silver, gold, iridium, ruthenium, selenium, tellurium, and sulphur.

In 2018, the Company accounted for 0.7% of Russia's GDP, 2.6% of the national industrial output, 11.4% of metals production, and 2.6% of Russia's exports.

Nornickel is the largest industrial player in the Russian region of the Arctic, generating over 5.7% of its GDP. Around 60,000 of the Company's employees permanently reside and work beyond the Arctic Circle.

For the purposes of the 2018 Sustainability Report (the "Report"), Norilsk Nickel Group shall refer to MMC Norilsk Nickel and the entirety of operations forming Norilsk Nickel Group. Unless otherwise specified or required by the context, the terms "Company", "Group", "Nornickel" or "the Group companies" shall mean Norilsk Nickel Group. Quantitative indicators for certain areas of sustainable development pertain to the Group's specific operations in accordance with the Scope of Data Collection appendix.

Assets 102-4

Production units of the Group are located in three countries — Russia, Finland and South Africa.¹

Its core businesses are based in Russia and have a vertically integrated structure. Three main production sites in Russia are:

- Polar Division of MMC Norilsk Nickel ("Polar Division");
- Kola Mining and Metallurgical Company ("Kola MMC");
- Bystrinsky Mining and Processing Plant ("Bystrinsky GOK"), which in 2018 started ramp-up towards the target parameters.

The Company's Polar Division is located on the Taimyr Peninsula (Krasnoyarsk Territory) beyond the Arctic Circle. It is linked to other regions by inland waterways (the Yenisey River), marine transport (the Northern Sea Route) and air transport.

Kola MMC is located on the Kola Peninsula beyond the Arctic Circle. It is the leading industrial facility of the Murmansk Region and is completely integrated into the transport infrastructure of the Northwestern Federal District.

Bystrinsky GOK is located in the Gazimuro-Zavodsky District of the Trans-Baikal Territory and is linked to other regions by rail.

In Finland, Norilsk Nickel operates Norilsk Nickel Harjavalta (part of the Group), the country's only nickel refining plant.

In South Africa, the Company owns 50% of Nkomati, a nickel mine developed jointly with African Rainbow Minerals.

MMC Norilsk Nickel runs a global network of representative and sales offices in Russia, China, the USA, and Switzerland.

In addition to geology, energy, logistics, and support businesses, the Group comprises Gipronickel Institute, an R&D facility based in St Petersburg with branches in Norilsk and Monchegorsk. In total, the Group counts over 80 companies.

STRATEGY

24 Context

26 Mission and values

26 Corporate strategy

30 Sustainable development goals

NEW GROWTH OPPORTUNITIES

October 2018. Dedicated to meeting the growing demand for battery materials used in electric vehicles, the strategic partnership between BASF and Nornickel became a landmark event for achieving sustainable development goals. As BASF's new production facility will be constructed adjacent to Nornickel's refining facility in Harjavalta, Finland, this will provide BASF with exclusive access to local nickel and cobalt supplies.

2020 will see about 300,000 electric vehicles per year using batteries with components produced as part of the partnership between Nornickel and BASF.

Strategy

Context

102-15

Significant impact of large companies on the development of regional and national industries, as well as their integration at the global level has made business a key player in addressing modern challenges.

Norilsk Nickel Group is a leader of Russia's metals and mining industry. The Company meets the Russian and global economy's growing demand for materials required to manufacture products that are vital for improving the quality of life.

The Company's products are supplied to 34 countries and are in high demand in power generation, electronics, transportation, mechanical engineering, construction, consumer goods, healthcare, food, chemical and other industries.

As one of the largest employers and taxpayers in Russia, Nornickel plays an important role in the social and economic development of the regions where it operates.

MMC Norilsk Nickel considers social responsibility and commitment to the principles of sustainable development as key operational priorities for business development, community and investor relations, and environmental impact management.

The Company became one of the first Russian companies to sign up, in 2005, to the Social Charter of the Russian Business adopted by the Russian Union of Industrialists and Entrepreneurs (RSPP). In 2016, Norilsk Nickel Group joined the UN Global Compact, which marked the transition to a new strategic development cycle.

Supporting the United Nations' Sustainable Development Goals and sharing the UN's call to transform the business to the benefit of society, environment and the future of the planet, Nornickel started implementing its Long-Term Development Strategy until 2023, which drives its ambition to grow further as an advanced, cost efficient and environmentally responsible company.

NORNICKEL'S SUPPORT FOR SUSTAINABLE DEVELOPMENT INITIATIVES AND STANDARDS

102-12

102-13

 GRI Gold Community	Organisational member

Nornickel's products for better quality of life, environmental improvements and green economy

The Taimyr unique resource base seems to be made to respond to the challenges facing humanity in the 21st century.

Playing a vital part in contributing to the reduction of air pollutant emissions, platinum group metals (PGM) are used as catalysts for the production of key chemicals, including agricultural fertilisers, that are essential for providing the planet's growing population with foods. Platinum and palladium along with their co-metals are widespread in medicine, particularly in its forefront areas such as oncology and production of pacemakers and other implants.

The most common electronic products use nickel, copper, platinum, palladium, rhodium, iridium, ruthenium, cobalt, gold, silver and other metals produced by the Company.

It will be impossible to reduce air pollution in urban areas as planned or combat climate change as set out in the Paris Agreement unless hybrid cars with PGM catalysts are used extensively in the coming decades. In the long run, roads will be dominated by fully electric vehicles using lithium-ion batteries with high content of nickel and cobalt, as well as by hydrogen vehicles using platinum in their fuel cells. Electric vehicles will transform the global nickel and PGM industries. As the world's leading supplier of these metals, Nornickel is uniquely positioned to contribute to this change.

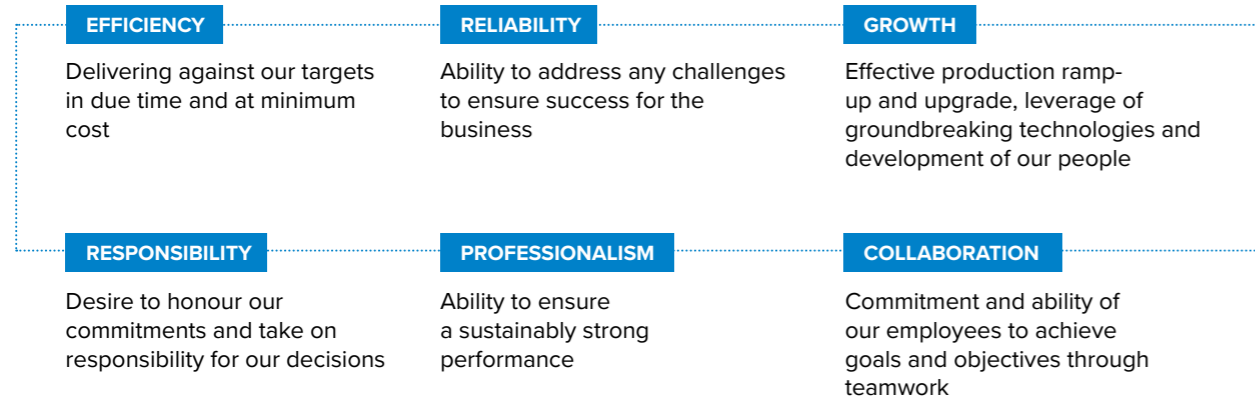

Development of renewable energy is also impossible without stainless steel, nickel alloys and fibreglass as key structural materials used in wind and solar farms or without special conductive pastes for solar cell surfaces. However, high-quality stainless steel cannot be made without nickel; fibreglass cannot be produced without equipment that uses platinum and rhodium, and no conductive paste for solar batteries is made without silver. Apart from renewable generation, metals produced by Norinickel are essential for environmentally friendly energy storage systems that use nickel- and cobalt-based batteries or gases (hydrogen or methane) which are stored and processed also using PGM.

The Company provides comprehensive support for the green economy both in Europe and worldwide and reaffirms its commitment to sustainable use of resources and its status as a responsible global supplier of materials for sustainability purposes.

Mission and values 102-16

The Company focuses on developing a group-wide corporate culture of mutual respect, trust and openness shared by its every employee. The corporate culture ensures effective implementation of the Company's strategy based on sustainable development principles.¹

Nornickel's corporate values

¹ See also the Business Ethics Code at www.nornickel.com/Investors/Internal Documents and Policies.

Our mission

Through the efficient use of natural resources and equity, we supply mankind with non-ferrous metals, which make the world a more reliable place to live in and help people realise their aspirations for development and technological progress.

Corporate strategy

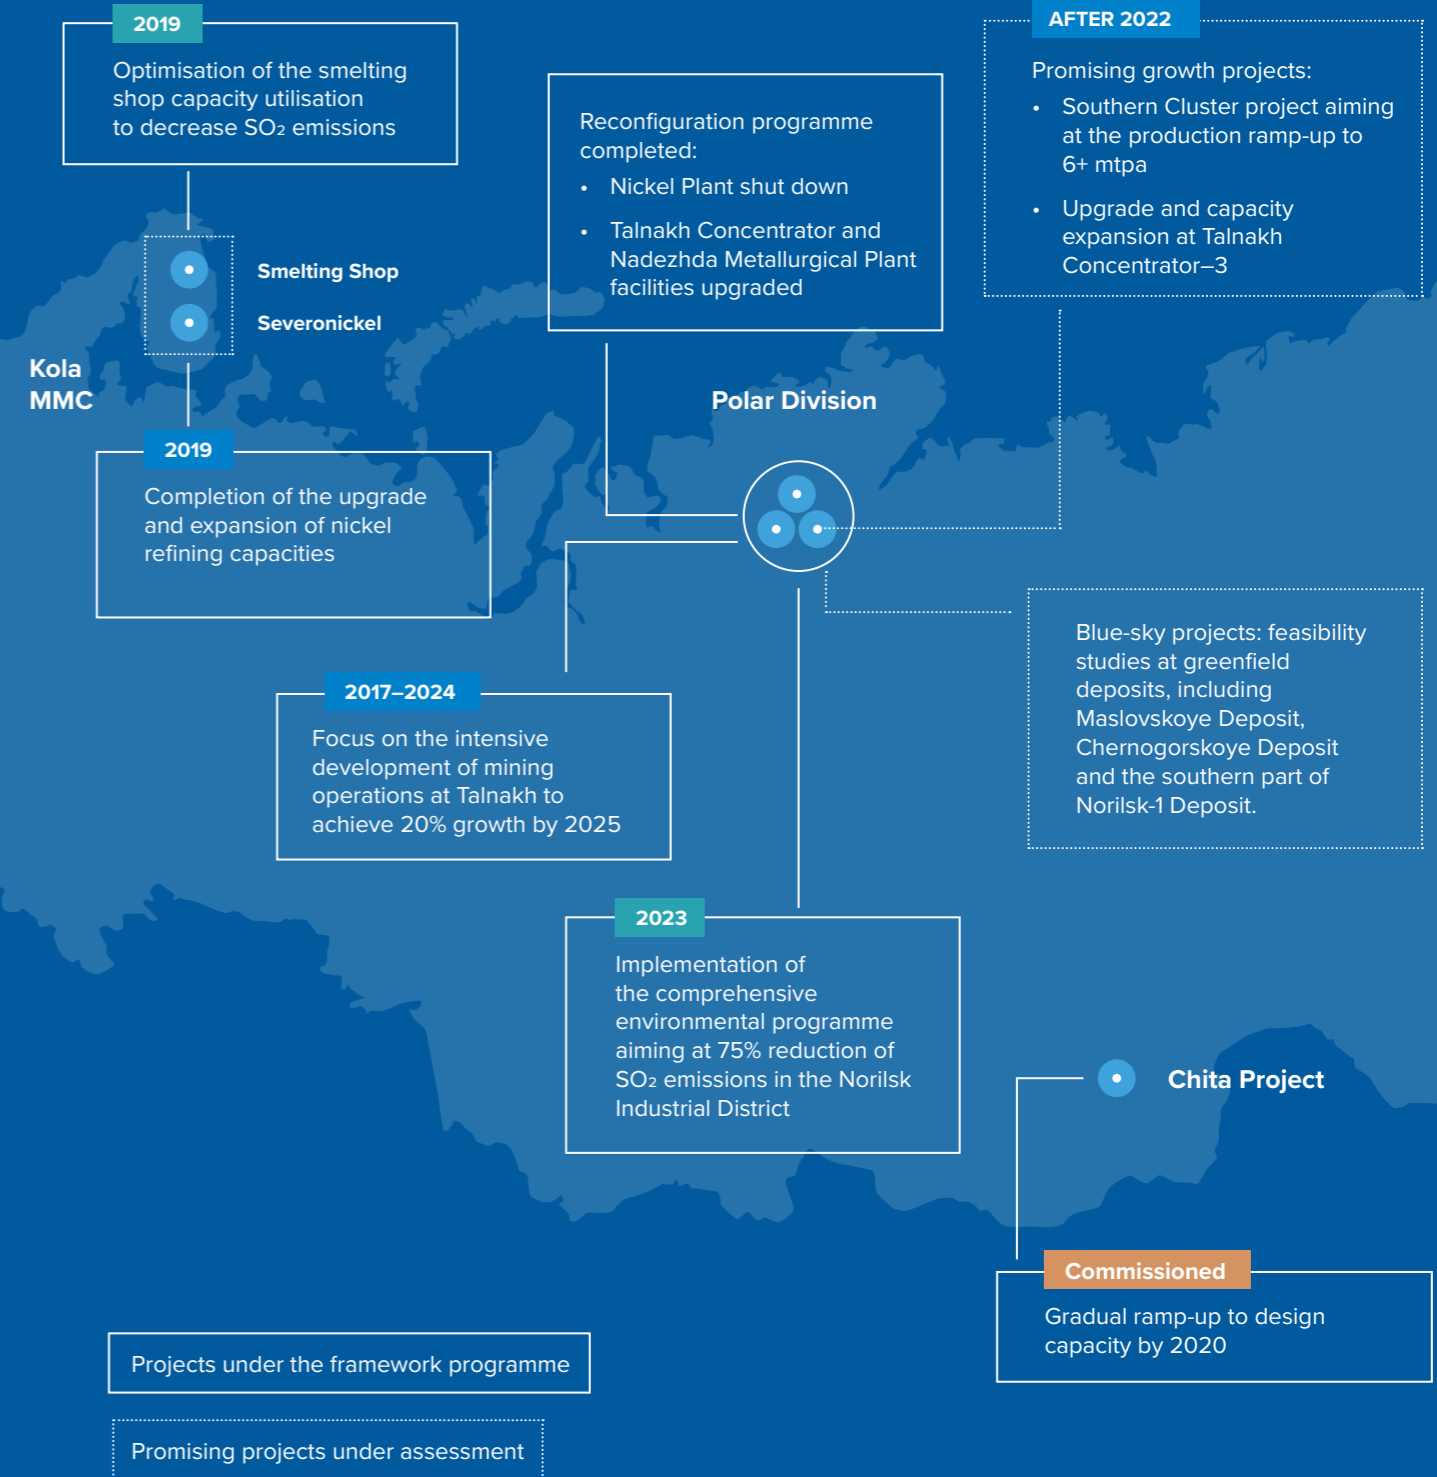

Adopted in 2013, Nornickel's corporate strategy primarily aims to unlock the resource potential of the Taimyr and Kola Peninsulas, improve the Company's operating efficiency and raise the quality of investment and capital management. In 2013–2017, MMC Norilsk Nickel ran a number of strategic initiatives that fundamentally changed the Company's technological landscape and can rightly be considered unique and pioneering. In 2017, the Company completed the first cycle of its development strategy. As a result, Polar Division upgraded dramatically its concentration facilities and reconfigured its metal production processes with Nickel Plant shut down. This significantly reduced environmental footprint of the Company in the region.

In 2018, the Company reaffirmed its ambition to grow further as an advanced, efficient and environmentally responsible company and presented Nornickel's strategic priorities in sustainable development and growth areas for the medium and long terms.

The next development cycle will be centred around an unprecedented RUB 150 bn environmental initiative focusing on the reduction of emissions and

environmentally friendly production. In 2018, the Company launched the large-scale Sulphur Project at Polar Division's Copper Plant as part of its environmental programme.

Roadmap to advanced, efficient and environmentally friendly production

NORNICKEL'S STRATEGIC PRIORITIES

- 20% LTIFR reduction each year
- Zero work-related fatalities
- Implementation of the comprehensive environmental programme aiming at a 75% reduction in SO₂ emissions in the Norilsk Industrial District

FOCUS ON SAFETY AND ENVIRONMENT

LONG-TERM PRODUCTION GROWTH BASED ON THE EXISTING ASSETS

- 15–20% growth in metals output in the long term (2025+)
- Mining projects at the existing deposits of the Talnakh Ore Cluster, development of the Southern Cluster, and construction of Talnakh Concentrator-3

EFFICIENCY IMPROVEMENT

- 5–8% growth in metals output in the short term
- Strict cost control to keep cost growth below the inflation rate
- Up to 15% increase in labour productivity (2020 vs 2017)

ANALYSIS OF NEW GROWTH OPPORTUNITIES

- Evaluation of potentially the world's largest greenfield PGM cluster, a unique blue-sky partnership project (Arctic Palladium)

The mid-term strategic priority for the Company is an efficiency improvement programme covering its entire production chain. Key focus areas of the programme are upgrade and reconfiguration of production facilities, introduction of new standards and processes, innovative management approaches, and comprehensive digitisation and automation of production processes. The programme aims at improving efficiency, increasing labour productivity, boosting industrial safety and transforming corporate culture. In 2018–2021, Nor Nickel plans to invest about RUB 5.3 bn in digital technology alone.

MMC Norilsk Nickel will continue increasing its share in new market segments and industries that are likely to generate demand for its products in the future. One of such fast growing industries is production of materials for electric vehicles and batteries.

103-2

When working towards its strategic development priorities, the Company factors in non-financial risks and principles of human rights and environment protection:

- unconditional respect for human rights;
- comprehensive measures to support indigenous peoples of the North;
- lower impact on the climate;
- alternative energy development (where applicable).

Sustainable development goals

In 2015, the United Nations adopted the 2030 Agenda for Sustainable Development, setting 17 Sustainable Development Goals (SDG) for the global community and 169 associated targets as enablers of the SDG achievement. Since the SDGs cannot be achieved by the efforts of only governments or public organisations, the UN encourages businesses to focus on the SDGs in their operations. “Business is a vital partner in achieving the Sustainable Development Goals. Companies can contribute through their core activities, and we ask companies everywhere to assess their impact, set ambitious goals and communicate transparently about the results” (Ban Ki-moon, United Nations Secretary-General).

103-2

Nornickel fully supports the 2030 Agenda for Sustainable Development and the UN SDGs, consistently integrating them into the Company’s strategy and everyday operations. In its public

2018 non-financial performance highlights:

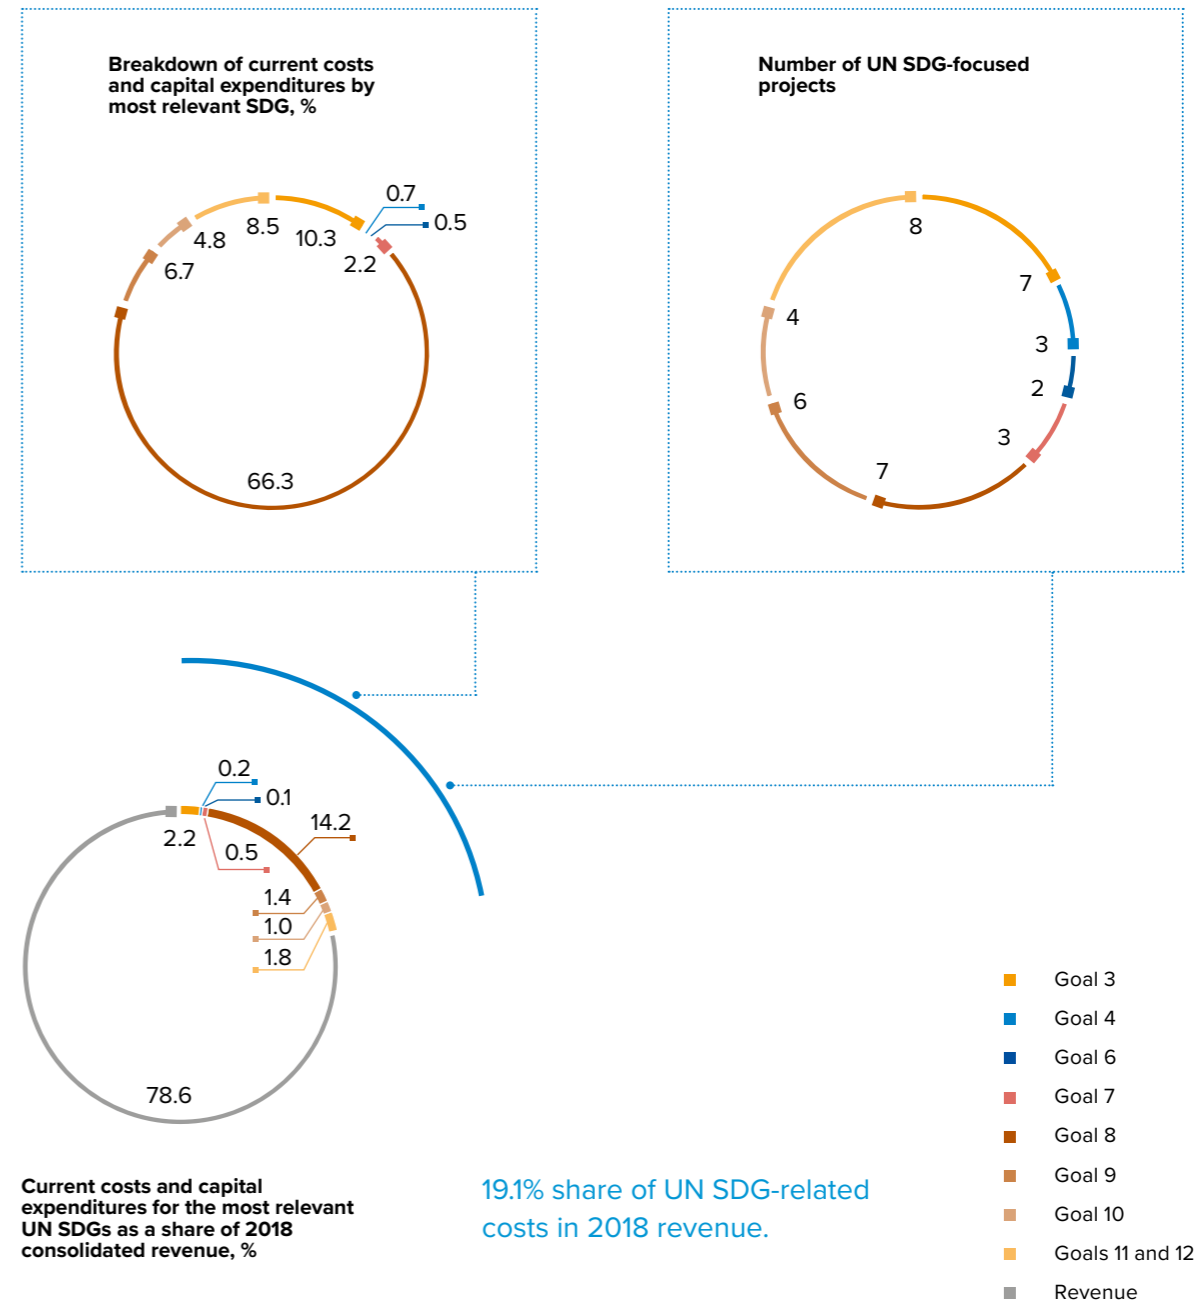

- dramatic improvements in industrial safety and health: in 2018, the lost time injury frequency rate (LTIFR) decreased from 0.44 to 0.23, down by 48% y-o-y, reaching the Company’s record low and remaining below the average across the metals and mining peers. Over 2013–2018, LTIFR dropped by 65%;
- production launch and phased capacity ramp-up at Bystrinsky GOK, a cutting-edge high-tech facility compliant with high environmental, technological and social standards;
- launch of the Sulphur Project at Polar Division’s Copper Plant, the Company’s most ambitious green initiative aimed at dramatic improvements in the regional environment.

non-financial reports for 2016 and 2017, the Company disclosed key sustainability targets and performance against relevant UN SDGs.

As the next step of integrating the UN SDGs, the Company grouped its major projects and programmes by SDG. For this purpose, 12 SDGs were selected on the basis of a survey conducted among stakeholders. The SDG-based grouping helped determine actual and budgeted costs per project/programme and assess the Company’s actual non-financial performance. The results achieved will be used in 2019 to analyse and prioritise SDGs and concentrate efforts on priority SDGs. National and international contexts of achieving such SDGs will also be analysed to assess their impact on business-related risks and opportunities.

The chart below presents current costs and capital expenditures for the most relevant SDG-related projects as a share of the Company’s consolidated revenue for 2018.

CURRENT COSTS AND CAPITAL EXPENDITURES FOR THE MOST RELEVANT UN SDGS AS A SHARE OF 2018 CONSOLIDATED REVENUE

Nornickel's contribution towards the achievement of the UN SDGs 103-2

UN SDG Strategic priority	SDG target	SDG integration in Nornickel's corporate governance framework	Key initiatives and projects implemented by Nornickel	Achievements of 2018	Plans for 2019	
 	<p>3.4 By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being</p>	Occupational Health and Safety Policy	<p>1. LEADERSHIP IN INNOVATION

Nornickel is on Forbes' Top 100 Most Innovative Companies list. The Company is committed to digitisation of every production stage. Most of the Company's processes will be digitised and automated by 2020.

Management

Sustainability management

Corporate governance

102-26

Nornickel's corporate governance framework is designed to take into account and balance the interests of shareholders, the Board of Directors, managers and employees, as well as other stakeholders.

The Company's approach to corporate governance, its key principles and the by-laws serving as a basis for an effective governance framework draw on the applicable Russian laws, including the Corporate Governance Code recommended by the Bank of Russia.

102-25

Nornickel's governance framework relies on the following principles:

- equitable and fair treatment of every shareholder;
- support for the shareholders to let them exercise their rights and lawful interests in the most reasonable and convenient manner;
- professionalism and leadership of the Board of Directors, and involvement of independent directors in governance;
- strategic management by the Board of Directors, its efficient control over executive bodies, and oversight of the risk management and internal control framework;

- sound, bona fide and efficient management of the Company's day-to-day operations by executive bodies accountable to the Board of Directors and the General Meeting of Shareholders;
- compliance with the Russian laws and the national laws of the countries of operation;
- corporate social responsibility;
- strong business ethics;
- zero tolerance to corruption and effective anti-corruption measures;
- full, transparent, reliable and timely disclosure;
- robust internal controls, internal and external audits;
- active collaboration with investors, creditors, and other stakeholders in order to increase Company's assets and market capitalisation.

102-27 102-28

These principles are reflected in Nornickel's official documents, including the Charter, Regulations on the Board of Directors, Information Policy Regulations, Anti-Corruption Policy, and other by-laws. All these documents are available on the Company's website.¹

Pursuant to MMC Norilsk Nickel's Charter, its governing bodies are:

- the General Meeting of Shareholders, the Company's supreme governing body;
- the Board of Directors, a collegial governing body in charge of strategic management of the Company and oversight of its executive bodies' activities;
- the Management Board and the President that represent the collegial and sole executive bodies of the Company, respectively, and manage its daily operations.

STATEMENT OF THE CHAIRMAN OF THE BOARD OF DIRECTORS' AUDIT AND SUSTAINABLE DEVELOPMENT COMMITTEE 102-20 102-21

At Nornickel, sustainability is at the core of our business. Our commitment to this cause means that we pursue our business goals in a socially responsible manner, making sure our footprint leaves a positive impact on the community.

Nornickel's sustainability goals are advanced through a range of initiatives and programmes designed to enhance corporate governance practices, further upgrade production, mitigate environmental impact and drive social development. In our efforts, we focus on projects that will benefit the well-being of communities across our operations.

The Company's sustainability agenda is steered by the Board of Directors and the Audit and Sustainable Development Committee (the Committee). The Committee is responsible for overseeing environment, social and governance (ESG) matters, risk management and internal control systems, and annual reporting. It also reviews the Group's quarterly risk reports, along with those of the Corporate Trust Service on human rights and other violations reported by the employees.

Nornickel has a set of internal regulations in place that address such areas as human rights, environment protection, industrial safety, stakeholder and local community engagement, and corruption prevention. Our activities are aligned with the best global practices and standards, including ISO 14001, ISO 9001, ISO 26000 and OHSAS 18001.

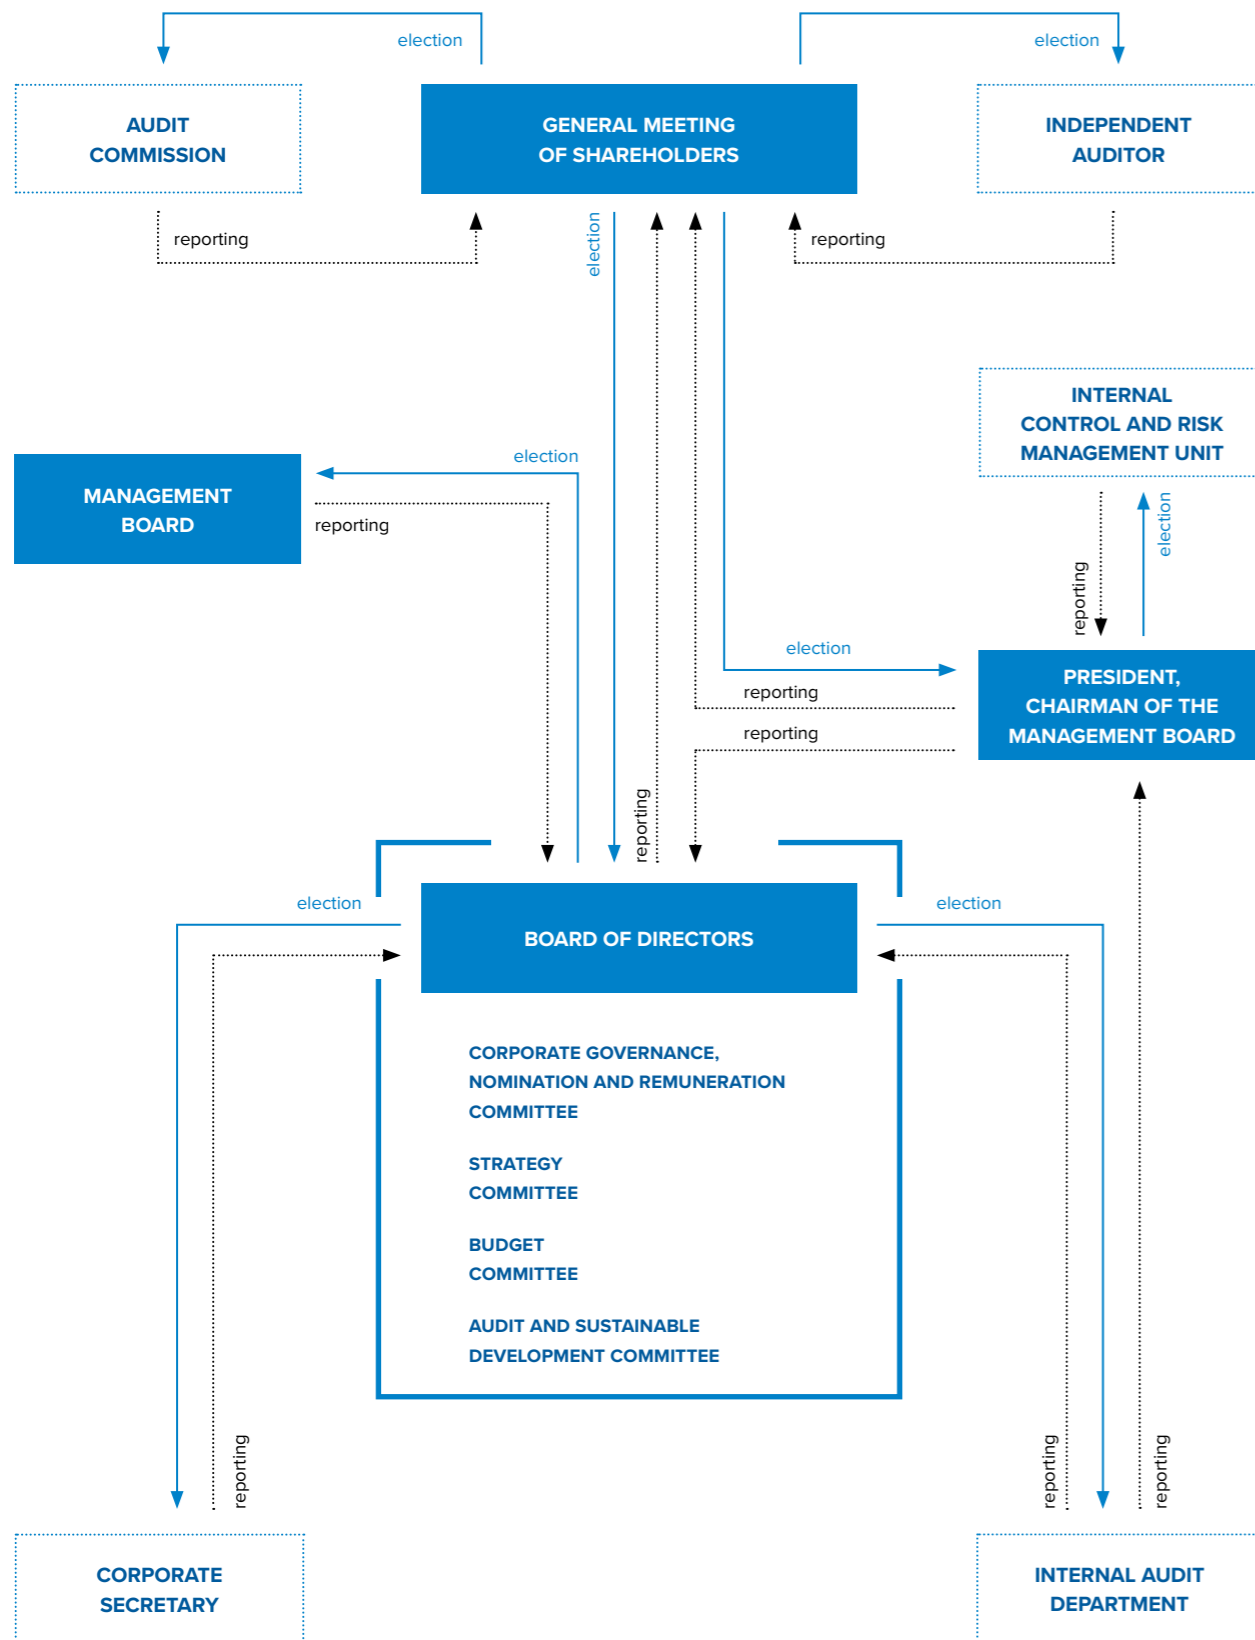

We regularly inform our stakeholders and the general public about all aspects of our operations. We have been reporting on our sustainability performance since 2004, with both recent and historical data available on our website.

Nornickel's Long-Term Development Strategy until 2023 drives our ambition to grow further as an advanced, efficient and environmentally responsible company. With these goals being the key deliverables for the Company and the Committee going forward, we will also ensure a continued focus on transparency of our business, keeping our stakeholders duly informed of all sustainability-related aspects of our operations. At the same time, we will keep reinforcing our sustainability governance by embedding more efficient practices and tools.

Roger Munnings
Chairman of the Board of Directors' Audit
and Sustainable Development Committee

¹ <https://www.nornickel.com/investors/disclosure/corporate-documents/>.

GOVERNANCE STRUCTURE 102-18 102-20

The Board of Directors has four committees: Audit and Sustainable Development Committee, Strategy Committee, Budget Committee, and the Corporate Governance, Nomination and Remuneration Committee.

102-19 102-29 102-31 102-33 102-34
 In overseeing the Company's management, financial and business affairs, the Board of Directors may instruct the executives on individual matters and monitor implementation of resolutions and tasks. Authorised executives are vested with powers and responsibilities to address economic, environmental and social issues and may delegate their powers to other employees based on their competences and functions.

The Board of Directors meets as and when required, but at least once every six weeks. In 2018, the Board

of Directors met on a quarterly basis to review the Company's financial results, strategy implementation progress, the management's HSE reports, and operational performance reports. In 2018, the Board of Directors of MMC Norilsk Nickel considered 175 matters, including 79 transaction approvals, 70 corporate governance matters, 11 economic and financial matters, 2 social and environmental matters, and 13 other matters.

The President and the Management Board are the Company's executive bodies. In the reporting period, the position of the Company's President was held by Vladimir Potanin who concurrently chaired the Company's Management Board. As at end of 2018, Vladimir Potanin held the position of the President (CEO before 2015) for 6 years and 13 days.

Committees of the Board of Directors	Directors	Chairman		Share of directors	
		Independent	Non-executive	Independent	Non-executive
Audit and Sustainable Development Committee	5	+	+	60%	40%
Budget Committee	5		+	60%	40%
Strategy Committee	5		+	60%	40%
Corporate Governance, Nomination and Remuneration Committee	5	+	+	60%	40%

Operational sustainability management

The governing and executive bodies of MMC Norilsk Nickel and its subsidiaries are in charge of implementing the Company's sustainability goals and objectives within the scope of their functions and in accordance with the legislation and internal regulations.¹

The Company has created an extensive regulatory framework of over 20 internal documents to help integrate sustainability aspects into the Company's management practices and day-to-day operations of its functional units.

All executive efforts are coordinated by the Management Board, the President and the following executive committees: the Budget Committee under the Management Board; the Charity Committee, Health, Safety and Environment Committee, Investment Committee, and the Nomination and Remuneration Committee.

Nornickel's management systems are aligned with best international practices and standards. For many years, the Company has been successfully running the Corporate Integrated Quality and Environmental Management System (CIMS). In 2017, Nornickel kicked off an efficiency improvement programme seeking, among other things, to introduce innovative management approaches.

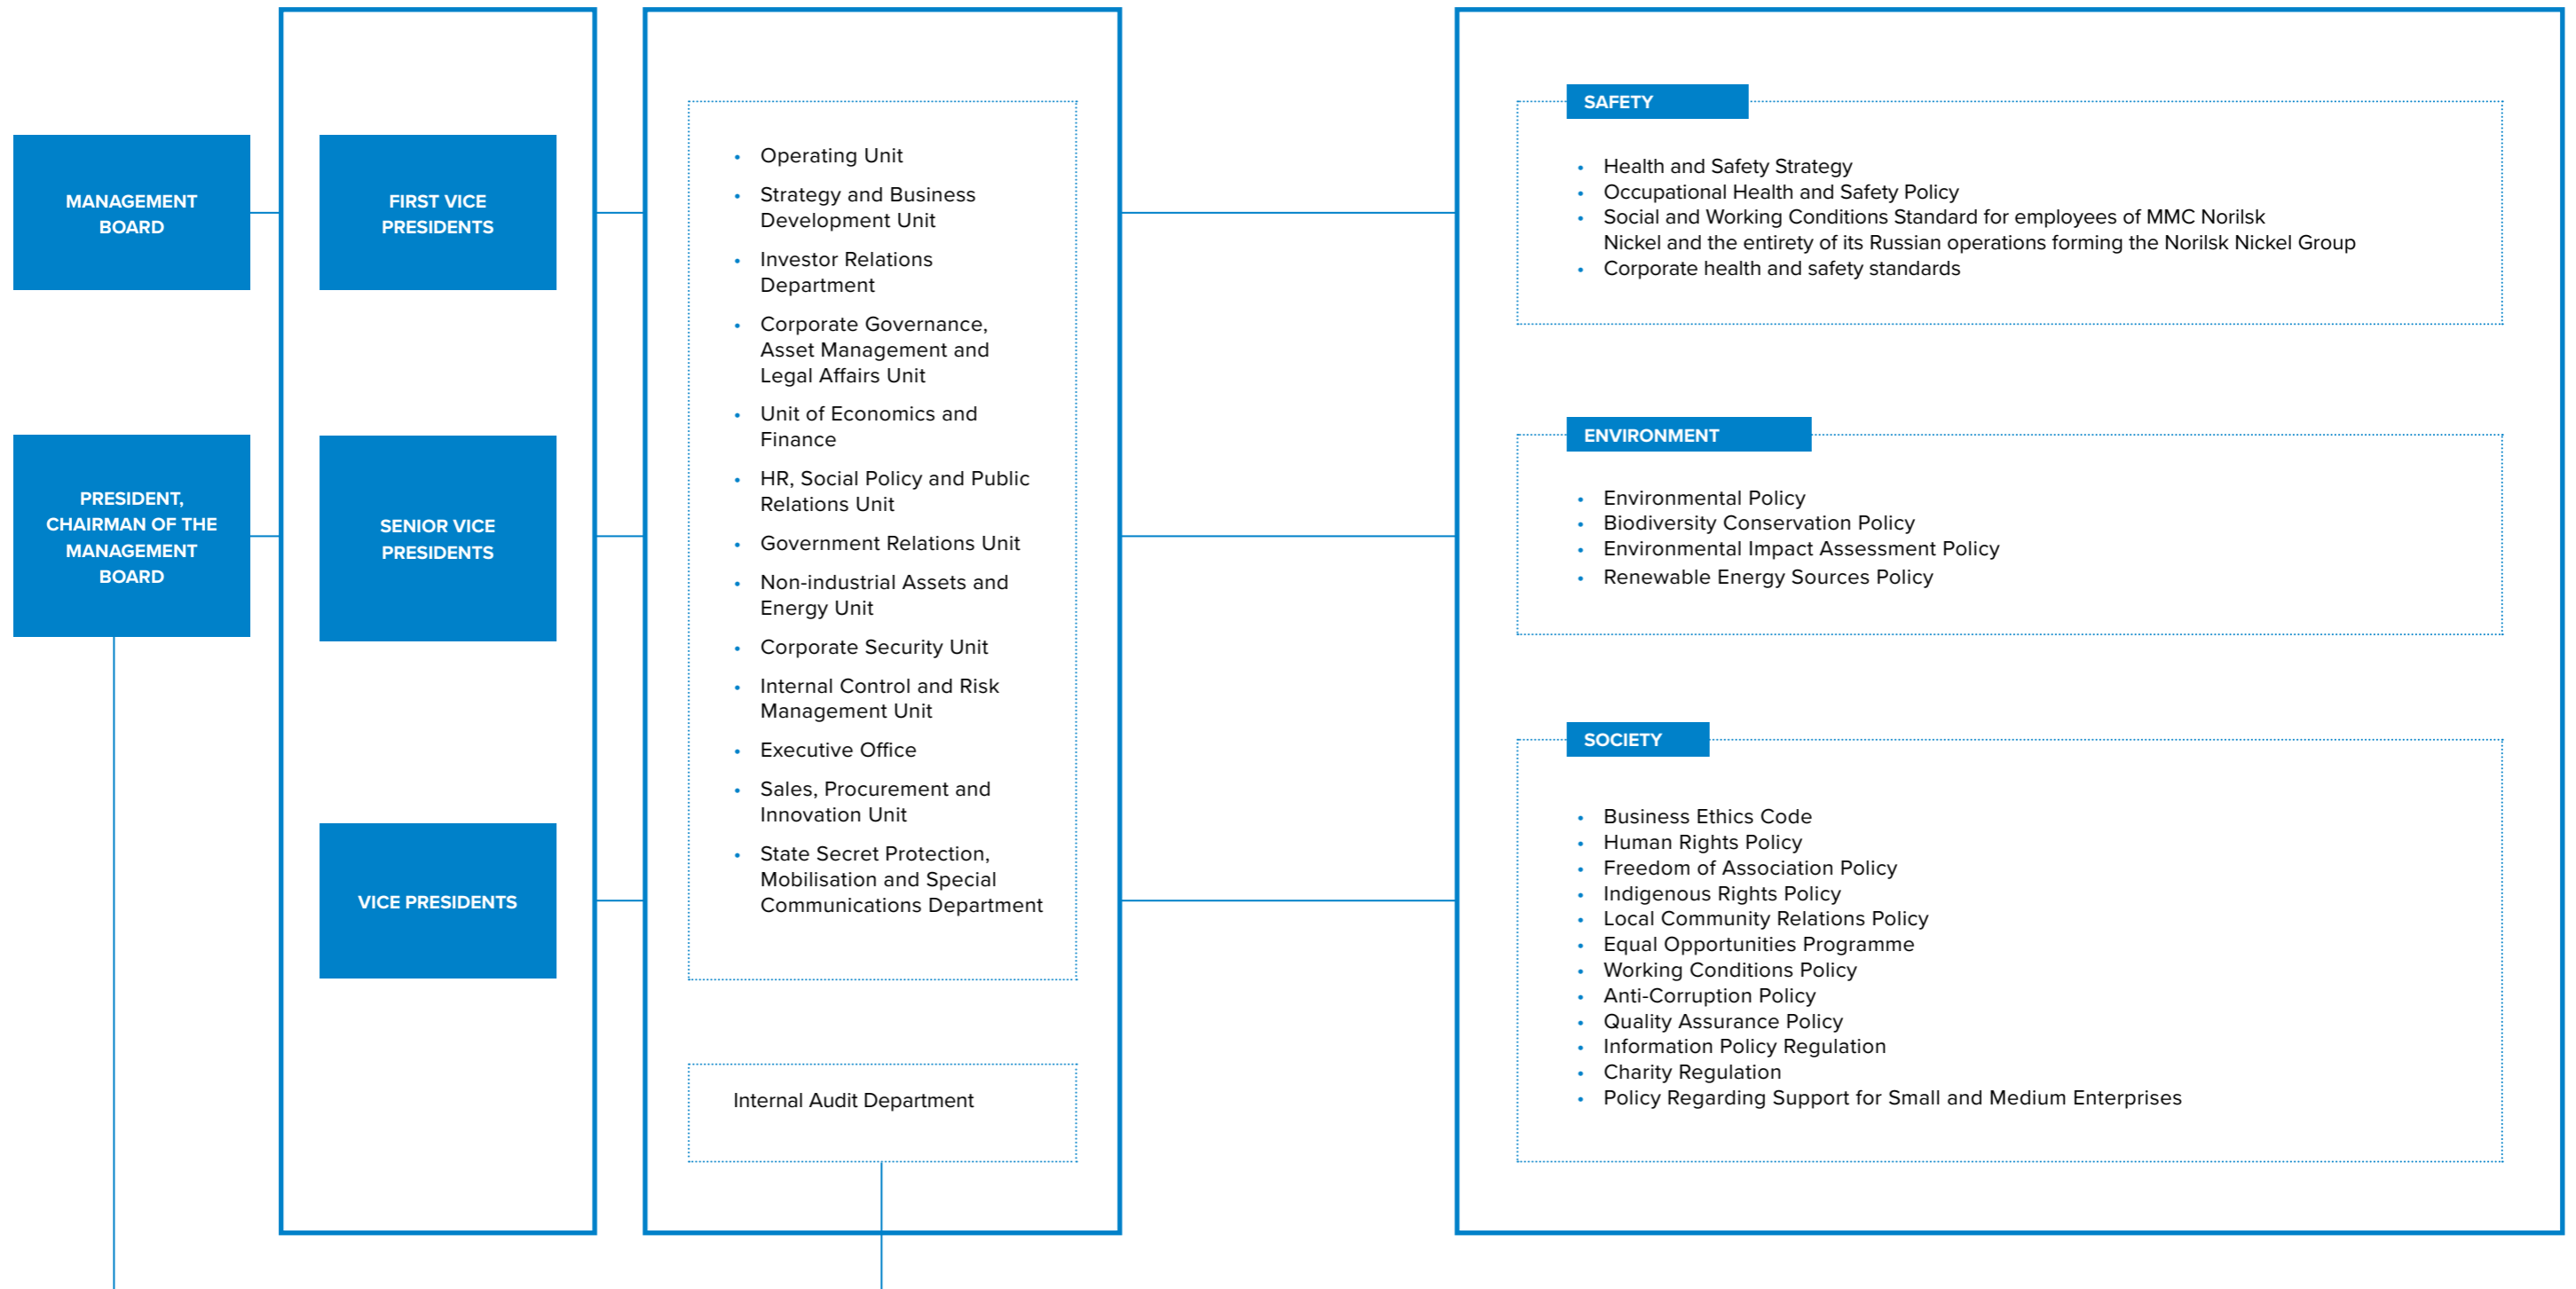

¹ Please see the corporate website at <https://www.nornickel.com/investors/disclosure/corporate-documents/>.

Remuneration

Remuneration of members of the supreme governing body

102-35 102-36 102-37

Principles and mechanics of remunerations due to executives are set out in the Charter, Regulations on the Management Board, and other by-laws of the Company.¹ The system of remunerations applicable in the Company is continuously and directly monitored by the Board of Directors.

The Board of Directors' annual remuneration is set out in the Remuneration Policy for Members of the Board of Directors¹ approved by the General Meeting of Shareholders. The annual remuneration for non-executive directors includes:

- base remuneration of USD 120,000 for the Board membership;

- additional remuneration of USD 50,000 for membership in a committee of the Board of Directors;
- additional remuneration of USD 150,000 for chairing a committee of the Board of Directors;
- reimbursement of expenses incurred by directors in discharge of their duties.

The Annual General Meeting of Shareholders for 2018 established remuneration for the Chairman of the Board of Directors, an independent director, in the amount of USD 1,000,000 per year, paid on a quarterly basis in equal instalments in roubles at the exchange rate of the Bank of Russia on the last business day of the reporting quarter.²

¹ <https://www.nornickel.com/investors/disclosure/corporate-documents/>.

² This amount is after taxes withheld in accordance with the applicable Russian laws.

According to the Company's Charter, decisions on remuneration and reimbursement payable to the Company's President and members of the Management Board are reserved to the Board of Directors. The total remuneration of the President¹ and members of the Management Board² consists of the base salary and bonuses (a variable part). Bonuses are linked to the Company's performance, including both financial (EBITDA, free cash flow) and non-financial indicators (workplace injury rates, labour productivity).

Employee performance management system

Performance management

103-3 404-3

The Company put in place the performance management system five years ago, with assessment relying on a variety of key performance indicators (KPIs), including occupational safety, operating efficiency and capital management. In 2018, the KPI-based assessment covered 9,800 employees.

The system helps streamline evaluation criteria, enables the management and employees to align the current year's priorities with performance

indicators of the Company/divisions/subsidiaries and link an employee's performance to their pay level.

The reporting year saw the Company continue implementing the performance assessment subsystem of the automated enterprise management system. By the year-end, the system ran at 19 Nornickel's divisions and subsidiaries. In 2019, the Company expects to roll it out across its energy assets and transport divisions.

Competency management

In 2018, the corporate competencies model was used to assess candidates at the recruitment stage, evaluate employee performance and potential, and add them to talent pool. The outcome of evaluating the managerial and leadership potential served as a key criterion for selecting managers with strong career growth prospects.

103-3

In 2018, the Company continued to train the Head Office's executives and high-potential managers from its facilities based on their individual development plans, with 50 of the latter completing the operating efficiency training at Moscow's Skolkovo School of Management. [WEB](#)

COMPETENCY ASSESSMENT IN 2018

Competencies	Participants	Outcome
Assessment of potential, current performance and development prospects of middle and top managers	Managers from a number of the Group's key organisations	455 managers listed as those with a high career growth potential
A 360-degree competency review using an updated model	270 unit heads of the Head Office	Development activities, tools and methods selected for the participants
Assessment of professional competencies for line managers employed at mining operations	722 managers	Areas for personal and professional development identified

¹ Total annual remuneration of the highest-paid officer (President) is not disclosed due to the confidential nature of information.

² For the remuneration amount, please see the 2018 Annual Report.

In 2019, the Company will proceed with the diagnostics and management of professional skill development across its facilities, building a professional competency model for a number of functional and production divisions, defining knowledge and skills requirements for each position, and developing a set of test questions to assess professional competencies of employees.

Risk management framework

102-30 102-15

The Company continuously manages risks that affect its strategic and operational goals. These efforts include identification and assessment of external and internal risks in terms of their impact on key financial and non-financial metrics, along with the development and implementation of response and minimisation measures.

The Company's risk management framework relies on the principles and requirements of Russian and international laws and professional standards, including the Corporate Governance Code recommended by the Bank of Russia, ISO 31000 (Risk Management) and COSO ERM (Enterprise Risk Management – Integrated Framework).

Its approach to risk management is outlined in its Corporate Risk Management Policy, Corporate Risk Management Framework Regulations, Risk Management Regulations, and other by-laws. The Company holds training sessions on risk management for its employees and managers at various levels.

102-30

Nornickel continuously manages its risks in all business areas and at all governance levels. Strategic risks are the responsibility of the Company's Board of Directors and senior executives who are also in charge of key operational risks, while other significant operational risks are managed by heads of business units and subunits. The corporate risk management framework (CRMF) implementation and improvement initiatives are spearheaded by the Company's Vice President and Head of Internal Controls and Risk Management and its Risk Management Service. The latter submits its quarterly reports to the Board of Directors' Audit and Sustainable Development Committee for review.

KEY RISKS OF NORICKEL 102-15

STRATEGIC RISKS

- Price risk
- Market risk
- Risk of toughened environmental requirements
- FX risk
- Investment risk

OPERATIONAL RISKS

- Workplace injury risk
- Information security risk
- Technical and production risk
- Compliance risk
- Risk of power blackouts at production and social facilities in the Norilsk Industrial District (NID)
- Social risk
- Risks related to changes in legislation and law enforcement practices
- Climate risks
 - risk of insufficient water resources
 - soil thawing risk

Nornickel was one of the first metals companies in Russia to start using the business continuity management system and develop relevant plans. The Group companies drafted more than 20 continuity plans for catastrophic production risks to describe interaction procedures for business units, measures to support or resume production, rehabilitate or reconstruct the affected assets in case of adverse events with an extremely low probability.

When it comes to risk management development in 2019, the Company plans to expand the continuity management scope to cover non-production risks, such as IT, security and staffing risks, and improve risk management components in strategic and operational planning, as well as in other areas. [WEB](#)

Corporate security

Nornickel is a global metals and mining leader and a strategically important company in most regions where it operates. This makes corporate security a priority area for the Company that seeks to ensure safe and smooth operation of its facilities.

Development and implementation of group-wide security measures fall under the remit of the Corporate Security Unit, acting in line with the Russian laws, applicable international regulations, internal standards and guidelines.

The corporate security system is structured and managed based on a number of targeted programmes to maintain economic, corporate, information, facility and transportation security along with transparency in procurement and contractor selection. The Company pays special attention to supporting socially significant investment and environmental projects.

205-3

A landmark achievement in 2018 was no confirmed incidents of corruption, which was attained through a comprehensive approach to corporate security and a zero tolerance policy towards corruption.

Nornickel is actively engaged in public-private partnerships to maintain high security levels and enhance social stability at its facilities in the regions of operation.

Also, the Company is enhancing cooperation with law enforcement and supervisory authorities. Nornickel representatives participate in public and advisory boards of the Ministry of Internal Affairs, Investigative Committee, Transport Prosecutor's Office and the Federal Security Service, and in interagency working groups.

- The Company helped stage the Regional Transport Security Forum attended by the representatives of the Krasnoyarsk Territory Government and Krasnoyarsk Transport Prosecutor's Office.
- In 2018, the Company held four drills and 123 training exercises together with the Federal Security Service, EMERCOM and the Russian Ministry of Defence.
- The Company implemented a comprehensive security framework at the all-weather Bobrov Log Fun Park (Krasnoyarsk), the main venue of the Winter Universiade 2019.
- Ongoing is the project to set up a system of analytical situation centres to be further integrated with regional Secure City systems.

The reporting year's milestones include the creation of the National Association of International Information Security actively backed by Nornickel.

In April 2018, Nornickel presented its in-house developed Information Security Charter for Critical Industrial Facilities at the information security forum in Germany and the OSCE's cyber security conference in Rome. The document was approved by 13 countries.

Going forward, Nornickel plans to set up and finance research grants in international information security.

The reporting year saw the Company adopt a number of key regulations on the information security of Nornickel's assets and operations:

- Freedom of Association Policy;
- Regulation on the Personal Data Protection Commission;
- Regulation on the Commission for Critical Information Infrastructure Categorisation. [WEB](#)

Information technologies

Nornickel leverages information technologies (IT) to continuously improve its production and business processes. While constructing new capacities and expanding the existing ones, the Company introduces advanced automatic systems to boost process efficiency, safety and manageability, optimise costs and increase productivity. Overall, the reporting year saw the Company implement over 40 IT projects, including:

- the Technology Breakthrough operating excellence initiative;
- Mining Control projects to allow for the online control of mining operations;
- the Economics and Finance Unit's strategic IT initiatives.

In 2018, the Company launched the SAP operations control centre to support the systems running at the Company's facilities. [WEB](#)

The Company's cutting-edge IT platform facilitates the introduction of advanced technologies and opens up new digitalisation opportunities. Nornickel runs pilot projects to implement potentially effective digital tools and solutions. 2018 saw the launch of Nornickel Digital Lab, a platform that helped test more than 10 technologies, including simulation modelling, optical

Nornickel won the 16th National IT Leader Award 2018 in the Non-Ferrous Metallurgy category for introducing personnel and machinery positioning and radiocommunications systems at Zapolyarny Mine.

The automation system installed at the mine scans individual tags of employees and self-propelled machinery and allows for wireless communication with each employee via their personal phones. It also features an anti-collision technology informing the driver of getting close to the deployed staff or equipment.

The staff or equipment location data is continuously transmitted to the control room ensuring real-time coordination of actions in case of emergencies.

character recognition, big data and internet of things. In 2019, the lab will expand its scope of work to add new projects to the pipeline and pilot launch the designed solutions.

of investment projects, this helped reduce our CAPEX by 22% to USD 1.6 bn. In 2019, the Company will make investment decisions on a number of promising growth projects. We also expect to see further positive effects from our programme to increase labour productivity. We estimate our CAPEX for 2019 at USD 2.2–2.3 bn.

Thanks to higher output and metal prices, the Company's consolidated revenue went up by 28% to USD 11.7 bn, while EBITDA rose by 56% to USD 6.2 bn driven by stronger revenues, the launch of Bystrinsky GOK and a decrease in operating costs as a result of our ongoing efforts to improve operating efficiency. EBITDA margin stood at 53%, which is one of the best results among global diversified metals and mining companies.

The Company honoured its commitments, providing timely and full payments to the budgets of all levels. Tax and non-tax payments¹ to budgets of various levels totalled RUB 115.6 bn, increasing by RUB 15.3 bn y-o-y.

The Company's stable financial position is confirmed by investment grade ratings from Moody's, and S&P Global and Fitch.

In January 2018, Moody's upgraded Nornickel's credit rating to Baa3 (investment grade) and raised its outlook from stable to positive following an increase in Russia's country ceilings for foreign currency debt to the same Baa3 level and a change in the outlook on Russia's rating from stable to positive.

Also, Nornickel received the highest creditworthiness rating according to the Russian national scale (ruAAA, outlook stable) from the RAEX (Expert RA) rating agency.

As at the year-end, the Company had credit ratings from the three leading international rating agencies and the Russian RAEX:

- Fitch Ratings: BBB–/Stable;
- Standard & Poor's: BBB–/Stable;
- Moody's: Baa3/Positive;
- Expert RA: ruAAA/Stable.

In February 2019, Moody's upgraded Nornickel's credit rating to Baa2, outlook stable, following an increase in Russia's country ceilings for foreign currency debt to the same Baa2 level and an upgrade in Russia's sovereign credit rating to Baa3 (investment grade), outlook stable.

Economic efficiency

103-2

Economic efficiency is essential for the Company to meet its strategic goals and deliver on its commitments to shareholders, employees, local communities and other stakeholders.

In 2018, the Company embarked on the second stage of its ambitious environmental programme, launching initiatives to upgrade infrastructure, accelerate digitalisation, etc. A year before, we had completed the construction of Bystrinsky GOK and reconfigured production capacities. Coupled with shifting deadlines for a number

In 2018, budgets of various levels saw the Group companies pay RUB 39.6 mln in fines under 334 imposed sanctions, including 29 for environmental impact, 22 for breach of labour laws, and 283 imposed on other grounds. [WEB](#)

Dividend policy

MMC Norilsk Nickel's Dividend Policy aims to balance the interests of the Company and its shareholders, enhance the Company's investment case and market capitalisation, and ensure respect of shareholder rights.

The Company put in place the Regulations on the Dividend Policy approved by its Board of Directors to ensure transparency on how dividends are calculated and paid out.

When calculating dividends, MMC Norilsk Nickel accounts for the cyclical nature of the metals market and for the need to maintain a high level of creditworthiness. As a result, the amount of dividends may change depending on the Company's operating profit and leverage.

DIVIDENDS PAID, RUB BN

¹ Calculated on an accrual basis under the IFRS. The Company used an in-house calculation methodology developed in line with the GRI Standards.

² Excluding CAPEX.

Stakeholder engagement

Stakeholders and interaction mechanisms

102-42 102-43 102-40 102-21

MMC Norilsk Nickel bases its interaction with stakeholders around making an ongoing dialogue with various groups a part of the Company's day-to-day operations, all in accordance with the AA1000AP¹, AA1000SES² and GRI standards. Nornickel's key stakeholders are employees, shareholders, investors, business partners, national and local

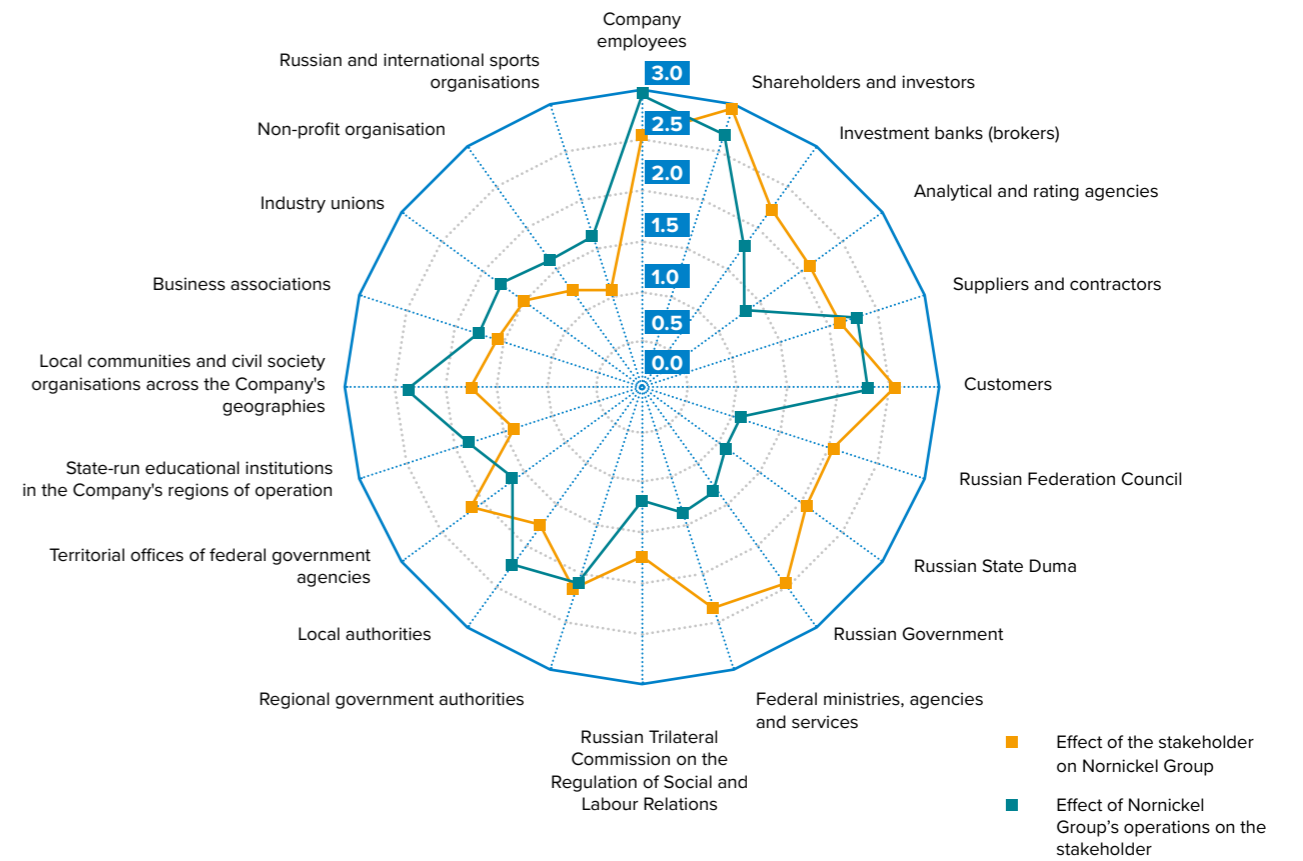

government authorities, local communities, Russian and international non-profit organisations. The Company identifies stakeholders based on the extent to which they interact, share interests and communicate with Nornickel.

Stakeholder engagement principles and procedures are set out in MMC Norilsk Nickel's Business Ethics Code.³

The Transparency Policy of MMC Norilsk Nickel aims to provide stakeholders with complete and accurate information about the Company's activities and ensure proper feedback.

Dialogue with shareholders and investors

102-5 102-10

The authorised capital of MMC Norilsk Nickel is made up of 158,245,476 ordinary shares with an aggregate market value of USD 29.7 bn as at 31 December 2018. The Company's ordinary shares are traded mostly on the Moscow Exchange, while ADRs are traded in the electronic trading system of OTC markets of the London Stock Exchange.

The reporting year saw minor changes in the shareholding structure. Olderey Holdings Ltd, the Company's major shareholder, increased its holding by 4.2% to 34.6% as at the year-end. The shares of the other major shareholders – UC Rusal Plc and Crispian Investments Ltd – remained unchanged at 27.8% and 4.2%, respectively. The shares and ADRs in free float accounted for 33.4%, owned by institutional and private investors from Europe, Asia, the USA, Russia and elsewhere.

In 2018, the Investor Relations Department kept diversifying the shareholder base and attracting new shareholders, organising over 350 meetings with institutional investors and an Investor Day in London followed by a road show in Europe and the USA.

Responsible investment

In recent years, the sustainable development agenda has been gaining ground, with an increasing number of investors and asset managers focusing on responsible investment. In 2018, the Company held around 20 target meetings with investors whose investments were primarily driven by environmental, social and governance (ESG) factors. In order to improve relations with responsible investors and agencies that evaluate companies using ESG criteria, the Company created a separate section on the corporate website with all pertinent information: <https://www.nornickel.com/investors/esg/>.

ESG ASSESSMENT: THE LARGEST RATINGS AND INITIATIVES

Our key ESG achievements in 2018:

- in December 2018, the Company's score in Sustainalytics' ESG rating went up to 69 against 58 in 2017;
- in December 2018, ISS affirmed Nornickel's Environmental and Corporate Governance ratings at 4, and Social – at 3 (1 and 10 standing for low and high risk, respectively);
- in June 2018, the FTSE index score was confirmed at 3.1 out of 5.

Dialogue with employees

Social partnership framework

103-2 103-3

Nornickel's companies run a social partnership framework aimed at reconciling interests of employees and employers on matters pertaining to the regulation of social and labour relations. The Company performs its obligations in compliance with the Labour Code of the Russian Federation, collective bargaining agreements, and joint resolutions. It has in place the Freedom of Association Policy approved by the Board of Directors.

In regulating labour relations, employee interests are represented by social and labour councils and trade union organisations. The Company has collective decision-making bodies representing the employer, employees and trade unions, including collective bargaining commissions, labour dispute commissions, social benefits commissions/committees, social insurance commissions, health and safety commissions/committees, social and labour relations committees, etc.

Trade Union of MMC Norilsk Nickel Employees, an interregional public organisation that includes territorial trade unions and trade unions of the Group companies, represents the Group's employee interests on an interregional level. The trade unions of transport and logistics divisions are members of the Yenisey Basin Trade Union of Water Transport Workers (Krasnoyarsk, Russia).

All the Group's major facilities located in the Norilsk Industrial District and Murmansk Region have put in place social and labour councils that represent the employees who are not trade union members. Chairs of the local councils make up the Social and Labour Council of MMC Norilsk Nickel and the Social and Labour Council of Kola MMC.

102-41

The Group companies have signed 21 collective bargaining agreements covering 81% of Nornickel's average headcount. As at the end of 2018, 10.8% of Nornickel's total headcount were members of trade unions, while 78% joined social and labour councils.

The absence of strikes and lockouts involving the Company's employees highlights the effectiveness of interactions and Nornickel's social policy, in general.

In order to develop interregional social partnership, Interregional Cross-Industry Association of Employers "Union of Entities of the Copper and Nickel and Supporting Industries" involving six of the Group's Russian companies was established in 2018. In November 2018, the Association of Employers and the Trade Union of MMC Norilsk Nickel Employees interregional public organisation initiated collective negotiations to develop and sign an interregional cross-industry agreement for the key players of the copper and nickel and supporting industries for 2019–2022. The signing is slated to take place in 2019.

Employee engagement survey

In 2018, for a second consecutive year, Norilsk Nickel Group organised a series of activities to manage employee engagement. The core initiative is a survey called "Let Everyone Be Heard. What Do You Think?" that includes questionnaires and focus groups, covering around 75,000 employees and 32 businesses of Nornickel. Its results are subject to review, action planning and implementation at all governance levels, from facilities to the Group as a whole.

Based on the completed survey, the Company compiled a series of initiatives to increase employee engagement and motivate staff to boost their performance. These initiatives are grouped as follows: top management, the employer's brand value, success factors, performance management, and career opportunities.

INITIATIVES TO INCREASE EMPLOYEE ENGAGEMENT

Top management	The employer's brand value	Success factors	Performance management	Career opportunities
Initiatives to increase engagement				
Corporate dialogues	Positive Life Experience project	Nornickel's Leaders programme	360-degree review	New comprehensive training system for employees in the talent pool
Communication training sessions	Corporate volunteer programme	IamHR programme	Training sessions for managers on providing feedback	Training course for mentors
Direct line with the Company's vice presidents	Guidebook for New Employees	New collective bargaining agreement	Keeping employees aware of the Company's priorities	
Interactions on personal matters	Onboarding programme	Interregional cross-industry agreement		
Engagement workshops at unit forums	National conferences	Social and working conditions at the facilities		

Offices for operating, social and labour relations

In addition to the Corporate Trust Service, the Company launched offices for operating, social and labour relations back in 2003. They are primarily tasked with response to employee queries, control of their processing, and prompt resolving of conflicts. The offices regularly monitor the staff's social status, enabling us to solve reported issues in a timely manner. In 2018, the Group's units in the Norilsk Industrial District ran 24 offices that received over 52,000 queries and requests mostly from employees (78%), former employees (21%) and local communities (1%).

QUERIES BY TOPIC IN 2018, %

Dialogue with authorities and non-profit organisations

103-2

Norilsk Nickel Group's guiding principles in cooperating with government bodies, local authorities and non-profit organisations are strict compliance with Russian laws, regional and municipal regulations and the social responsibility principle, collaboration, and mutual respect of interests.

Following the information transparency principle, Norilsk Nickel maintains an open dialogue with the authorities to build constructive and effective cooperation. The Company is represented in 21 committees, commissions, expert and working groups established by government bodies in association with the business community, thus

supporting socially important projects. Representatives of the Company take part in parliamentary sessions and round table discussions organised by the Federation Council and State Duma of the Federal Assembly of the Russian Federation, Government of the Russian Federation, Russian Union of Industrialists and Entrepreneurs, Chamber of Commerce and Industry of the Russian Federation, Association of Managers interregional public organisation, etc.

Nornickel is an active participant of conferences, forums and business events involving policymakers and government officials, and drafts hands-on proposals to optimise and develop the legal framework.

Starting 2017, the Company's top management attends regional authorities' public meetings to report on the results and plans of Nornickel. In January 2018, the Company presented its results and plans on implementing investment projects to the Economic Council headed by the Murmansk Region's Governor.

Over the past year, the Company backed large international and domestic conferences and forums:

- International Forum "The Arctic: Territory of Dialogue" (Arkhangelsk, official partner);
- Krasnoyarsk Economic Forum (Krasnoyarsk, general partner);
- Nevsky International Ecological Congress (St Petersburg, partner);
- St Petersburg International Economic Forum (St Petersburg, partner);
- Eastern Economic Forum (Vladivostok, business programme partner);
- ECOTECH International Exhibition and Forum (Moscow, official partner);
- Murmansk International Business Week (Murmansk, partner).

Cooperation agreements

In 2018, Nornickel signed a number of agreements with regional and local authorities as well as major Russian companies. The agreements covered a wide range of social and economic issues, including infrastructure projects.

Partners	Goals of the agreement
Federal Agency for Ethnic Affairs	Interaction and cooperation aimed at preserving the traditions and lifestyle of the indigenous peoples of the North, Siberia and Far East of Russia living in the regions of the Company's operations
Rosatom State Atomic Energy Corporation	Interaction and cooperation to implement strategic projects in the Russian region of the Arctic
Government of the Trans-Baikal Territory	Support for small and medium-sized enterprises, development of partnerships with industrial organisations
Chita Administration	Cooperation as part of the Year of Volunteer
Krasnoyarsk Administration	Interaction and cooperation on projects to improve Krasnoyarsk city landmarks; cooperation as part of the Year of Volunteer
Norilsk Administration	Cooperation as part of the Year of Volunteer
Monchegorsk Administration	Cooperation as part of the Year of Volunteer

Relocation programme

Since 2011, the Company has been contributing to a long-term targeted federal programme to relocate people living in Norilsk and Dudinka to other Russian regions with favourable climate conditions.

The programme envisages relocation, in the span of 10 years, of over 11,000 families. The Company participates in the programme as a benefactor, with its donation totalling RUB 8.3 bn. Since the launch of the programme, the Company has contributed a total of RUB 6,991 bn to the Krasnoyarsk Territory budget, including RUB 0.830 bn in 2018.

During 2011–2018, 7,107 families purchased apartments on the "mainland" and moved there, including 5,847 families from Norilsk and 1,260 families from Dudinka.¹

Public-private cooperation on corporate security

As part of its responsibilities, the Company's Corporate Security Unit actively liaises with government agencies. One of the key forms of interaction is the Unit's participation in industry conferences, forums, and business meetings with direct involvement of the legislative and executive authorities.

Also, the Company is enhancing cooperation with law enforcement and supervisory authorities. Nornickel representatives participate in public and advisory boards of the Ministry of Internal Affairs, Investigative

Committee, Transport Prosecutor's Office and the Federal Security Service, and in interagency working groups.

In 2018, the Company systematically collaborated with:

- the Federal Security Service of the Russian Federation on anti-terrorism and anti-sabotage security of the Company's critical infrastructures (fuel and energy utilities, transport infrastructure, etc.);
- the Ministry of Internal Affairs of the Russian Federation to prevent stealing of products and materials containing precious and non-ferrous metals, maintain security at public events and take addiction prevention measures;
- the Federal Customs Service of Russia to prevent cross-border smuggling of metal-bearing materials;
- the Ministry of the Russian Federation for Civil Defence, Emergencies and Elimination of Consequences of Natural Disasters (EMERCOM) to drill emergency response plans and disaster relief operations;
- the Federal Security Service and the Ministry of Defence of the Russian Federation to organise multi-service tactical training sessions on the Taimyr Peninsula;
- the Ministry of Foreign Affairs of the Russian Federation to foster international information security.

¹ As of January 2019.

Environmental dialogue

Measures for reducing MMC Norilsk Nickel's environmental footprint are constantly on the agenda of the Company and its stakeholders. In the course of the year, both internal and public events feature environmental discussions.

In 2018, the following items were on the agenda of various forums and platforms:

- sustainable development of regions;
- preservation of ecosystems across the footprint of production sites;
- improvement of environmental laws and regulations;
- promotion of best practices in environmental protection;
- the Company's environmental programmes and initiatives;
- industrial ecology problems.

At Norinickel's milestone event for the year — Investor Day 2018 in London on 19 November — the Company presented its long-term development programme, which sets out environmental protection as one of the strategic priorities.

Ecology was also at the top of the agenda at multiple international and domestic forums backed by Norinickel and attended by government representatives, captains of industry, investors, experts, and analysts:

- Environment Protection and Sustainable Development in the North VII environmental forum;
- VIII International Forum Arctic: Today and the Future;
- Arctic Days in Moscow federal forum.

MMC Norilsk Nickel maintains active dialogue with various levels of the government and the professional community on matters of application and improvement of the regulatory framework governing environmental protection. In 2018, the most significant venues for this dialogue were:

- parliamentary sessions of the State Duma Committee on Ecology and Environmental Protection devoted to Improvement of the Government Policy on Air Protection;
- meetings of the joint working group made up of the Federal Service for the Oversight of Consumer Protection and Welfare (Rosпотребнадзор) and the Russian Union of Industrialists and Entrepreneurs (RSPP) representatives to discuss draft regulations on establishing and changing sanitary protection zones;

- the Environmental Aspects of Industrial Development international conference devoted to law enforcement in regard to approved informational and technical reference books on the best available technologies;
- the Environmental Legislation: Problems and Implementation Practices workshop.

Over the years, Norinickel has successfully used volunteer movements to promote dialogue on environmental protection with its employees and local communities. Russia declared 2018 the Year of Volunteer, and the Company launched its third Let's Do It environmental marathon. It spanned Norilsk, Monchegorsk, the Pechengsky District, and Moscow, as well as the Trans-Baikal Territory that hosted the marathon for the first time.

Nornickel's awards and achievements:

- Certificate of Honour from the Federation Council for the Company's environmental achievements;
- first place in the Business Leaders: Environmental Expenses category of a RAEX rating agency ranking;
- top 10 position in an ESG ranking by RAEX.

In June 2018, Norinickel held an environmental campaign to mark the World Environment Day as a way to reduce the plants' environmental footprint. The smelting capacities of Nadezhda Metallurgical Plant were suspended for 60 minutes, and Kola MMC idled its smelting and conversion department of the Metallurgical Shop at the Monchegorsk site for the same amount of time. In the town of Nickel, one-hour shut downs were arranged on three ore-thermal furnaces and two converters of Kola MMC's smelting shop.

In late 2018, Norinickel's two main production sites Polar Division and Kola MMC joined the Zero Negative Environmental Impact campaign, with Kola MMC idling the operation of the smelting and conversion section and three ore-thermal furnaces on 29 November. Polar Division joined the environmental campaign on 1 December. Nadezhda Metallurgical Plant's smelting shop idled its second processing line for three days, and the operation of slag cleaning furnace No. 3 was suspended for seven days.

Dialogue in public non-financial reporting 102-43 102-46

Each year starting from 2003, the Company has been engaging in dialogues with stakeholders while drafting sustainability reports. Since 2014, these dialogues have been staged as part of the We Are the City! social technologies forum.

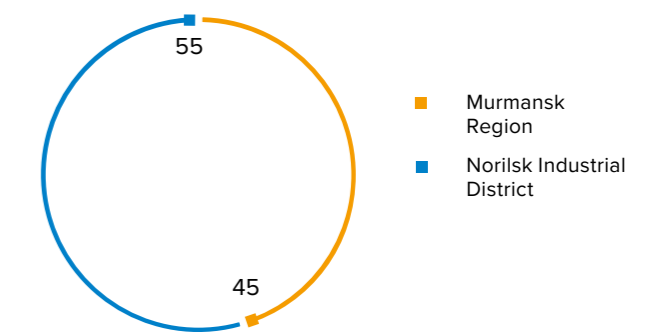

The dialogues held during the preparation of the 2018 Sustainability Report included discussion points related to identifying the goals and targets within the UN's 2030 Sustainable Development agenda that were most relevant for the Company's operations and non-financial reporting.

These dialogues took place in Norilsk and Monchegorsk and were attended by Norinickel employees, local authorities and members of the general public. The forum helped identify the UN Sustainable Development Goals and targets most relevant for the Company and the regions where it operates.

NUMBER OF DIALOGUE PARTICIPANTS, PPL¹

DIALOGUE PARTICIPANTS BY TERRITORY, %

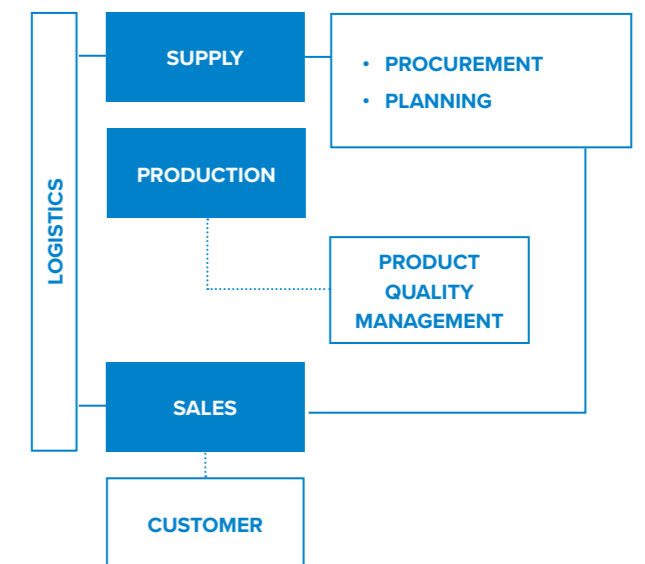

Supply chain management 102-9

Supply chain is a set of interrelated resources and processes leveraged by Norinickel to create value all the way from obtaining goods, materials and services to delivering end products to the consumers. Supply chain management at Norinickel seeks to ensure continuous operation of the Group companies, high product quality and reliability of shipments to customers.

The Company continuously improves the efficiency of its supply chain by adopting best practices and standards and through business process automation.

KEY ELEMENTS OF NORINICKEL'S SUPPLY CHAIN

¹ External stakeholders are representatives of regional and local authorities, communities, and non-profit organisations, while internal stakeholders refer to managers of various levels from the Head Office, Polar Division, and Kola MMC.

Supply

Given the diverse businesses and geography of operations of Norilsk Nickel Group, the supply management function is designed to fully cater to the Company's resource needs in a timely and efficient manner securing seamless operation of all production units and negotiating the best available procurement terms.

The importance of supply management at Nornickel is dictated by the impact it has on:

- achievement of the Company's strategic goals. The supply function plays a crucial role in the programme to enhance efficiency and cut costs;
- occupational health and safety. The quality of sourced products and timely supplies have a material impact on occupational health and are directly linked to the workplace safety;
- ¹⁰³⁻² environment. An environmental impact is exerted throughout the life cycle of sourced products (production, transportation, storage, use and disposal) and is directly linked to demand planning, inventory management and logistics;
- financial performance of Nornickel across the footprint. As Nornickel is the only or key customer for many local businesses, partnership with the Group

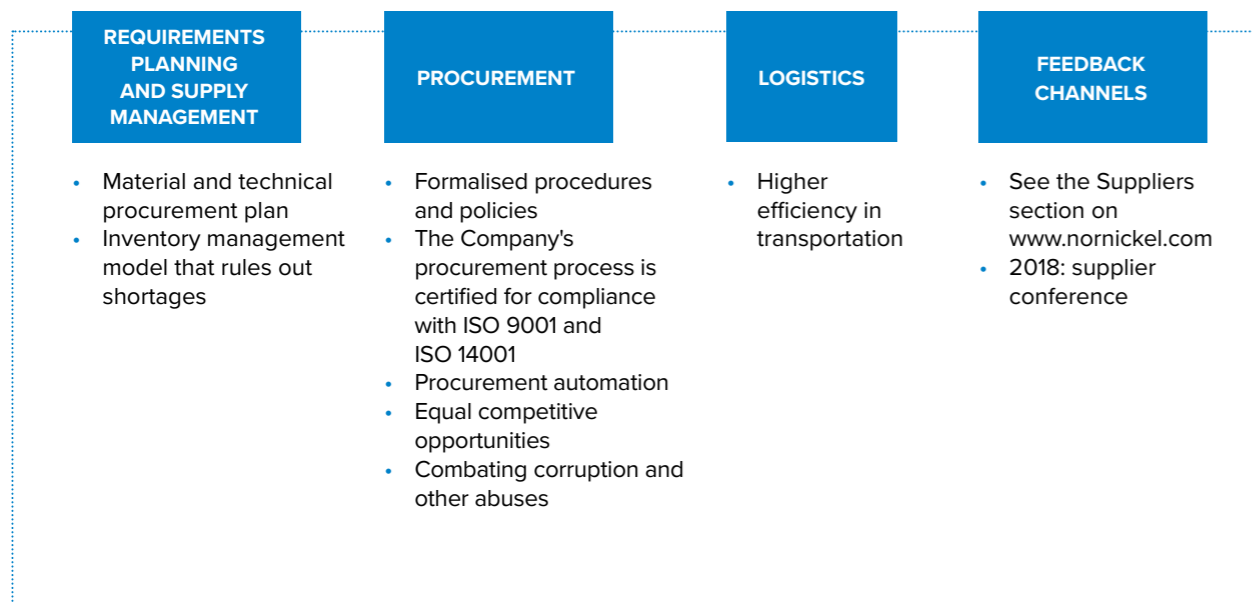

In 2018, based on an independent survey by the RAEX rating agency and the Association of Procurement Directors, the Head of MMC Norilsk Nickel's Procurement Department was included in the list of the most prominent heads of procurement according to the professional community.

does not only give suppliers an opportunity to ensure seamless operation of their enterprises, but also provides incentives for further growth.

Nornickel pays close attention to developing relations with manufacturers of equipment and materials, as they ensure the Company's ability to meet its strategic targets. Nornickel is committed to working with more local suppliers. To this end, it developed a centralised pilot testing procedure enabling it to phase out imported equipment with that manufactured locally. As at the end of 2018, Nornickel had 57 ongoing and 15 completed pilot tests. The Company established cross-functional commissions to determine promising directions for scheduled pilot tests aimed at achieving import substitution.

As at the end of 2018, the Company had 457 domestic and 35 foreign suppliers.

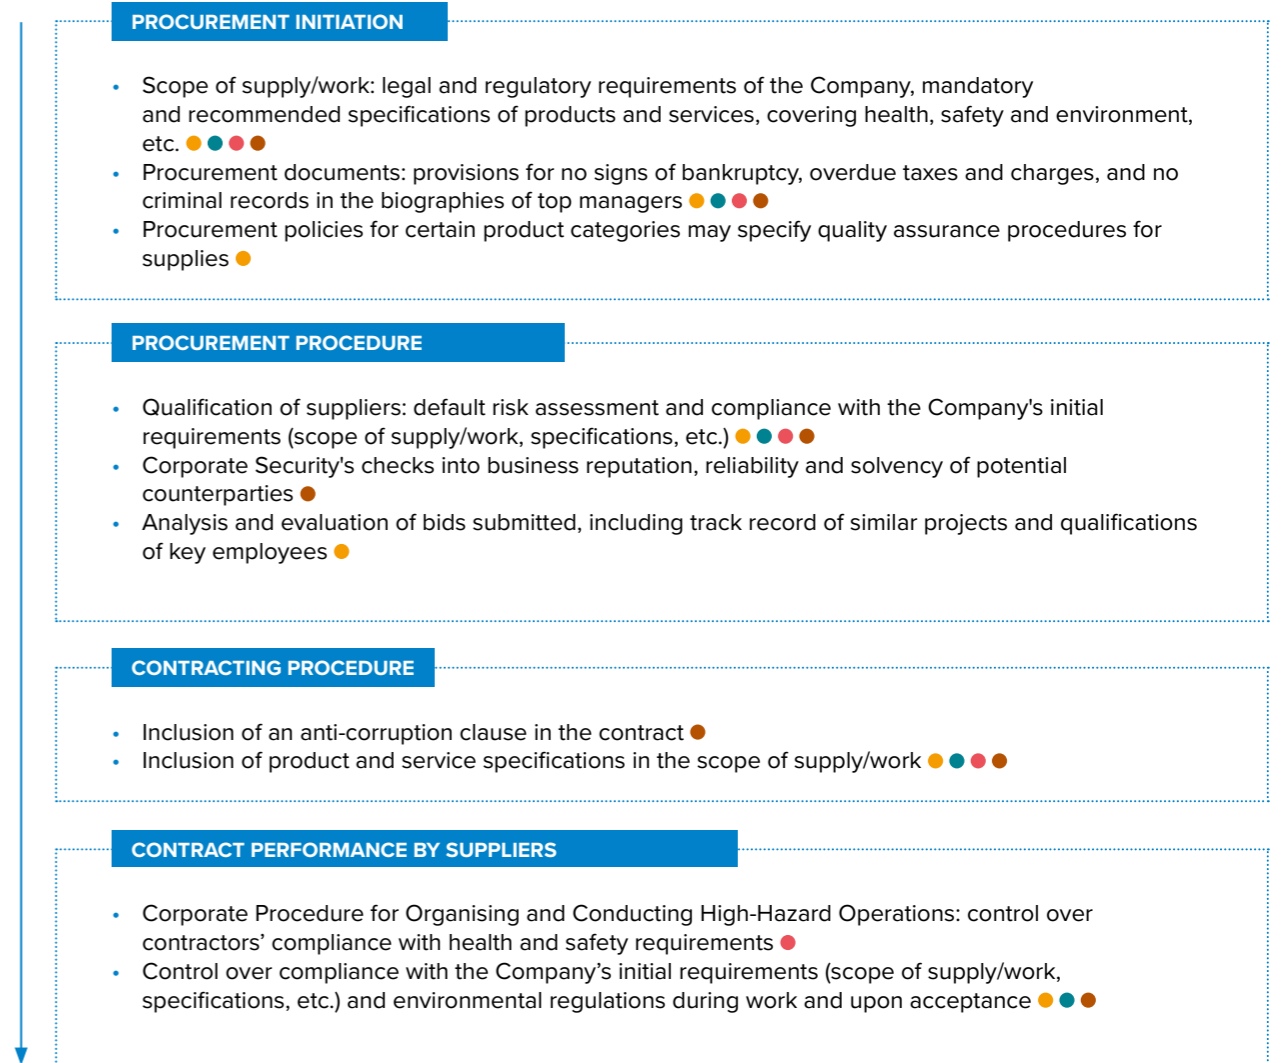

SUPPLY MANAGEMENT

Nornickel strives to create an environment of shared culture, visions and values in its relationships with suppliers. An ESG clause is incorporated into the standard agreement with suppliers and contractors. The Company adheres to a number of codes of conduct applied by its business partners and devised by foreign manufacturers. There is also ongoing work to develop Nornickel's Charter for Suppliers that is expected to be signed by the Company's suppliers and contractors.

Our procurement team together with experts from other departments are looking into alternative technologies (alternative fuel and energy sources) that can reduce the Company's environmental footprint and cut costs. The results of this can already be used in procurement. The current tender procedure, in particular, includes a criterion of the supplier's readiness to participate in the Company's alternative energy initiatives. ^{WEB}

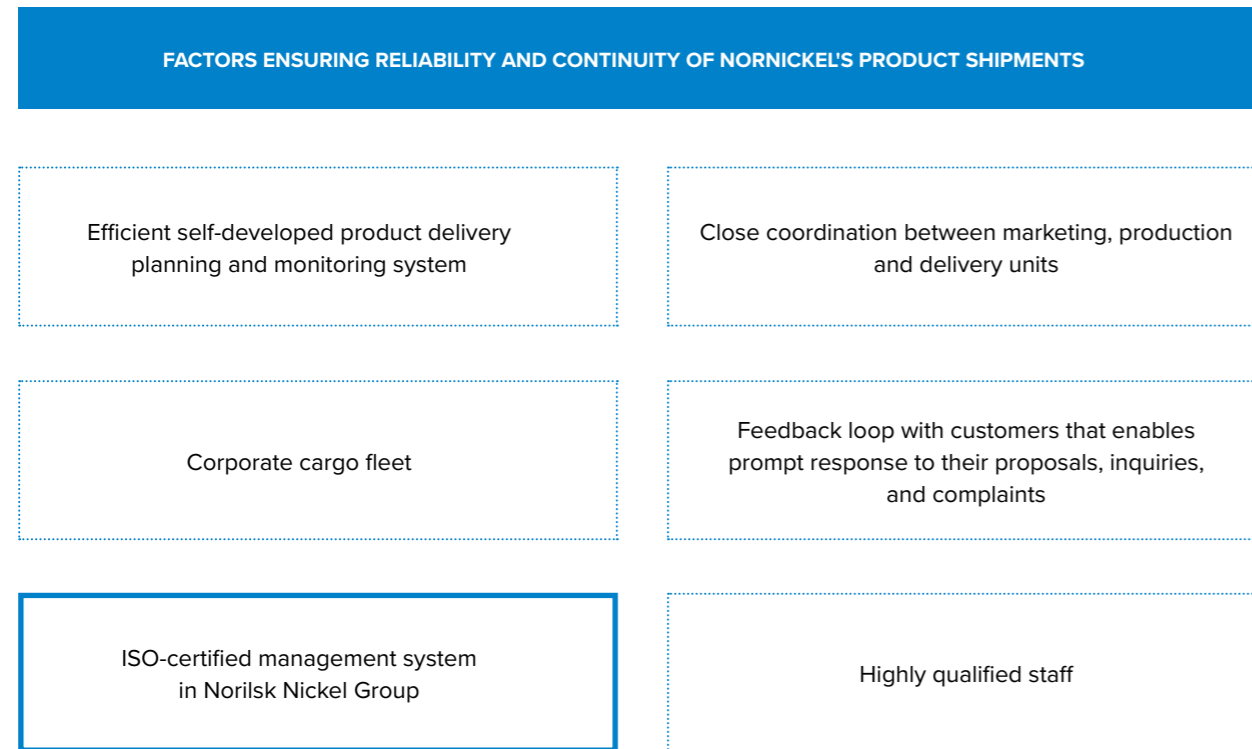

CONTROL OF NON-FINANCIAL FACTORS IN SUPPLIER RELATIONS ¹⁰³⁻²

Key non-financial factors

- Quality of products, works and services
- Occupational health and safety
- Environmental protection
- Legal compliance

Product quality and supply reliability

Norilsk Nickel Group has achieved utmost efficiency in its production operations to provide the volumes, quality, and product range¹ that meet the needs of society while also fully complying with all applicable laws and HSE requirements.

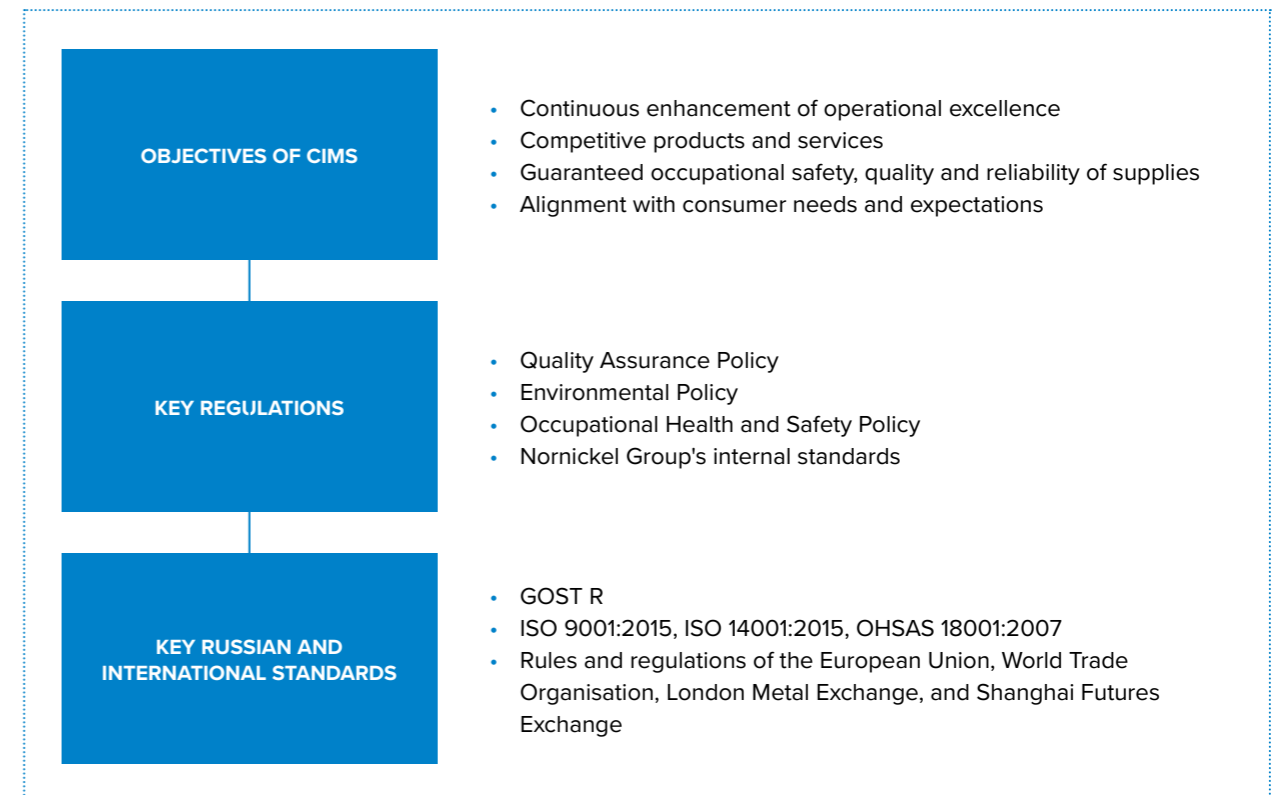

Environmental and quality-related goals and objectives are in line with the Company's strategic goals and formulated in the management's resolutions based on annual Corporate Integrated Management System performance reviews. To achieve the goals and objectives, the Company develops plans and programmes and then implements them, monitors the status of target parameters, and assesses performance.

In 2018, Nornickel's management systems successfully passed a surveillance audit, while the systems of GiproNickel Institute and Norilsk Nickel Harjavalta were subjected to recertification audits. As part of the second surveillance audit, Kola MMC migrated to the new ISO 9001:2015 and ISO 14001:2015 standards. A total of 104 employees (14 in the Head Office and 90 in the Group companies) underwent training in quality management.

The Company has in place the Corporate Integrated Quality and Environmental Management System (CIMS).

¹ The Company's products, when used as intended, fall in the category of those that change their properties almost completely: **nickel** is used in alloys; **copper** is mostly used in construction and manufacturing of electric and electronic devices; **cobalt** is used in electrical engineering and chemical industries as well as alloy production; **platinum** and **palladium** as chemical compounds are mainly used in autocatalysts; **selenium** is used in metallurgy, chemical, electrical engineering and glass industries; **tellurium** is used in solar batteries and photovoltaics and thermoelectrical materials; **nickel** and **cobalt** salts are used in a variety of industries.

CORPORATE INTEGRATED MANAGEMENT SYSTEM (CIMS)

102-2

Saleable products offered by MMC Norilsk Nickel's Polar Division include copper cathodes, technical selenium (powder), platinum group metal concentrates (powder), crude silver (powder), commercial lump sulphur, tellurium for thermoelectrical materials (bars) and copper-nickel converter matte (bars). M00k copper cathodes (GOST 859-2014 and GOST 546-2001) are certified in the GOST R certification system for compliance with the applicable product regulations and are registered on the London Metal Exchange under the NORILSK brand.

Kola MMC's commercial products (electrolytic nickel, carbonyl nickel powder, carbonyl nickel pellets, electrolytic copper, electrolytic cobalt, cobalt concentrate, precious metal concentrates, and sulphuric acid) do not require mandatory certification and are not certified against Russian regulatory standards. Products are labelled in accordance with the GOST and TU requirements. At the same time, Kola MMC's cathode nickel brands of SEVERONICKEL COMBINE H-1Y and SEVERONICKEL COMBINE H-1 are registered on the London Metal Exchange and Shanghai Futures Exchange. In the reporting year, nickel cathodes were registered on the London Metal Exchange under the NORILSK brand.

By 2020, around 300,000 electric vehicles per year will be using batteries with components manufactured as part of the strategic partnership between Nornickel and BASF.

Commercial products offered by Norilsk Nickel Harjavalta Oy include nickel cathodes, nickel briquettes, nickel powder, nickel salts, cobalt salts, and ammonium sulphate. Nickel brands of NORILSK NICKEL HARJAVALTA CATHODES and NORILSK NICKEL HARJAVALTA BRIQUETTES are registered on the London Metal Exchange.

In terms of sustainable development, the prospective application areas for Nornickel metals include lithium-ion batteries, electric engines for vehicles, autocatalysts, electronics industry, hydrogen fuel cells and healthcare.

In 2018, the Company faced no fines for failure to comply with product supply rules and requirements. [WEB](#)

Sales policy

102-4 102-6

In sales, the Company focuses on building long-term strategic relationships with key market players. The Company's customer base includes 434 companies, mostly industrial consumers. Nor nickel sells its products on all key markets, with its footprint spanning 34 countries as at the end of 2018.

When it comes to nickel products, the sales strategy focuses on achieving a balance between supplies to stainless steel manufacturers and to other industry stakeholders.

As the world's largest producer of palladium, the Company continues to implement the strategy of entering into direct long-term contracts with end consumers to ensure sustainable and strong demand for platinum group metals.¹

Customer satisfaction monitoring

Consumers of the Company's key products are surveyed to assess their satisfaction on an annual basis, while

Customer satisfaction has improved by 6% compared to 2017.

buyers of sulphuric acid are asked to complete relevant questionnaires once every three years. Compliance with contractual obligations is audited and analysed on an ongoing basis.

The main criterion for customer satisfaction is maintaining or exceeding the target satisfaction level at 2.5 points (out of 3 points). Key customer satisfaction surveys must cover at least 50% of the Company's total product sales. According to the 2018 survey, the customer satisfaction level stood at 2.73 points.

In 2018, the Company received 38 complaints and grievances about its product or service quality and achieved out of court settlement for 36 of them by meeting the demands of consumers (18 complaints were deemed unfounded). As at 31 December 2018, two grievances were being processed, with remedial action plans developed to address all 18 well-grounded and 10 rejected grievances. [WEB](#)

Dialogue with business partners

Nornickel has always paid close attention to building effective cooperation with business partners both in the course of joint projects and at various economic and industry forums.

The Company's expertise and solid track record in creating powerhouse industrial businesses that leverage cutting-edge technologies have laid the groundwork for successful implementation of projects with partners in both traditional and emerging industries.

In 2018, Nornickel and Russian Platinum signed a framework agreement on strategic partnership to set up a joint venture (JV) for developing disseminated ore deposits in the Norilsk Industrial District. The JV aims to establish one of the world's largest PGM producers with the output of 70–100 t of PGMs per year.

Dedicated to meeting the growing demand for battery materials used in electric vehicles, the strategic partnership between BASF and Nornickel became a landmark event for achieving SDGs and supporting green economy. As part of the long-term agreement, the Company will supply nickel and cobalt feedstock for battery production in Europe.

Nornickel forms a key link in creating a global mechanism to ensure reliability of precious metals supplies. In this area, the Company successfully collaborates with the International Platinum Group Metals Association (IPA), where it chairs the Security Committee, and with the United Nations Interregional Crime and Justice Research Institute (UNICRI). In particular, the Company's cooperation with UNICRI and IPA yielded a draft UN resolution on combating illegal production and trafficking of precious metals.

Developed by the Company's Office for Chemical Forensic Analysis, the procedure for identifying the origin of precious metals in any product crossing the border gained international recognition. In the future, these unique identification methods can become an international best practice (following appropriate validation by the European Network of Forensic Science Institutes).

In terms of both infrastructure and methodology, Norinickel makes a significant contribution to the

promotion of responsible consumption in the segment of precious metals and metal-bearing products. In 2018, as part of the International Nickel Institute's programme, Norinickel and other producers jointed efforts to systematically update the data on the nickel and nickel-containing products life cycles.

As a member of the International Information Security Research Consortium, Norinickel can participate in crafting of the global information security agenda.

Innovations

R&D plays a key role in implementing Norinickel's strategic priorities such as reducing the environmental impact, improving production efficiency and setting stage for the Company's sustainable development in medium and long run.

Today, Norinickel operates two business units responsible for the production development and upgrade. These are Gipronickel Institute, one of Russia's largest research and engineering centres for mining, metallurgy, concentration and processing of minerals, and Norinickel Digital Lab established in 2018 to focus on research in information technologies. The Company also hires Russian and foreign R&D and engineering companies and Russian universities to carry out its projects.

To improve the quality of decisions related to research and technology, the Company established an R&D Panel back in 2013.

Gipronickel Institute comprises four divisions in St Petersburg, Norilsk, Monchegorsk and Chita. In terms of facilities and equipment, the Institute is on a par with the most technologically advanced international peers. In 2018, updated design documents drafted by the Institute for Bystrinsky GOK were approved by Russia's State Expert Review Board (Glagosexpertiza). The draft provides for the plant to be constructed in 49 steps.

In its everyday activities, Gipronickel Institute concentrates on the development of standard operating procedures for key shop areas, such as ore mining, concentration, pyrometallurgy and hydrometallurgy.

Norinickel Digital Lab set up in 2018 has already delivered a number of projects and created prototypes for digital systems. These include a copper electrolysis short circuit detection system, a digital twin of Copper Plant's main aisle to streamline in-shop logistics, and others. Currently, there are about one hundred initiatives in the lab's pipeline.

On 16 October 2018, Norinickel and Skolkovo Foundation signed a partnership agreement providing for Norinickel Digital Lab to be housed in the Skolkovo Innovation Centre. The lab will track new technologies and business models, collect, classify and analyse digital initiatives, and prototype solutions based on digital technologies. According to the agreement, the Company will invest RUB 350 mln in the laboratory over 2019–2021.

Transparency

Enhanced transparency and information availability are the key guiding principles of MMC Norilsk Nickel in all of its pursuits. The Company has put in place the Information Policy Regulations and Procedure for the Interaction between MMC Norilsk Nickel's Officers and Russian and International Mass Media (updated in 2018), which govern its material disclosures to stakeholders and serve as a testament to Norinickel's commitment to go beyond the mandatory disclosure requirements of the Russian law and regularly inform the public about its strategy and mission, policies, key events and performance, as well as make clear the Company's position on certain topics.

In its application of the information policy, the Company is guided by the principles of regularity, timeliness, accessibility, reliability, completeness, balance, and impartiality, all the while taking appropriate measures to ensure protection of its information resources. The key annual disclosure events aimed at the target audiences are publication of the sustainability and annual reports and presentation of Norinickel's updated strategy and its implementation progress at Investor Day.

The key channels used to relay information to the public, investment and expert communities are publications on the Company's official website www.nornickel.com, press conferences, briefings,

conference calls, and meetings with stakeholders. Norinickel takes care with its media relations, making sure to provide the Company's position on events (including emergencies) that call for comments from the Company's representatives, press conferences, briefings, or press releases.

Over the past year, the number of media publications about Norinickel increased by over 27% compared to 2017. In total, Russian outlets mentioned the Company 95,820 times. This rise in coverage was spread out across all of the Group's geographies, with the outlets focusing mainly on the social and production activities of the Company, its environmental and sporting initiatives, as well as charitable projects and support for local communities.

Media coverage peaked in February, April and September of 2018. Throughout the year, Russian outlets reported on the Company's investing activities, agreements with the Murmansk Region and Trans-Baikal Territory, support of Universiade-2019, and the launch of the Sulphur Project, as well as social and charitable programmes and initiatives of Norinickel.

An important focus area of 2018 was the continued enhancement of the Company's social media presence in light of the step-up in coverage of Norinickel's social and charitable projects and especially the 2019 Winter Universiade in Krasnoyarsk, where the Company acted as the general partner.

PEOPLE MAKE ALL THE DIFFERENCE

Nornickel received the international Randstad Award as the best employer in the metals and mining sector. The recognition came as a result of Nornickel's successful HR strategy.

Compliance with the UN Global Compact

Human rights

Human Rights Policy

UN GLOBAL COMPACT PRINCIPLES

Principle 1: Businesses should support and respect the protection of internationally proclaimed human rights.

Principle 2: Businesses should make sure that they are not complicit in human rights abuses.

Respect for human rights is one of fundamental principles of Nornickel's operations. Being a socially responsible business, a major employer and a taxpayer operating in the territories with a mature legal culture, the Company promotes human rights. No operations are run in and nor raw materials procured from areas involved in military conflicts.

The Company complies with the applicable laws of the Russian Federation and other countries of its presence and respects both international standards for human rights protection and labour standards set out in the International Bill of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work and the UN Guiding Principles on Business and Human Rights.

Nornickel takes steps to prevent and remedy any human rights violations, if any, across its assets and operations, including those engaged in exploration, production, concentration, refinement, output of end products, marketing and sales of

non-ferrous and precious metals, as well as upon shut down of the Company's mining operations, various production units and divisions across its locations. The Company expects its contractors to uphold human rights as well, which is formalised in a number of internal policies.

The protection of human rights is reflected in the Company's by-laws governing the HR, environmental, social and other matters.

The Company's President is responsible for ensuring that Nornickel respects human rights. The Company's employees are committed to respecting human rights and complying with the Russian and international laws and the Company's by-laws on human rights. The Company has a clear management structure alongside escalation and reporting lines to address human rights.

All of the Company's new projects are screened for compliance with national and international legislation and, by extension, human rights laws. These checks span over ten of Nornickel's functional divisions. The Company is mindful of human rights risks, so in addition to ensuring full compliance with the applicable requirements it also implements best practices: signs employment contracts and collective bargaining agreements, creates favourable work and rest conditions for its employees, including through carrying out new social infrastructure projects (housing, transport infrastructure, cultural and recreational facilities).

Information on alleged human rights violations is collected via Nornickel's Corporate Trust Service, employee questionnaires, and sentiment surveys among local population. The Company guarantees confidentiality for whistle-blowers and respondents. Report statistics are reviewed by the Audit and Sustainable Development Committee of the Board of Directors on a quarterly basis.

In 2018, there were no incidents involving human rights violations. No disputes with the local population over land use were recorded. The Company does not plan any ramp-up in works related to acquiring land from the population and forced relocation.

NORNICKEL'S HUMAN RIGHTS PROTECTION PROCEDURES¹

Interaction with indigenous northern minorities

103-2 103-3

Nornickel respects the rights, traditions, long-standing values and interests of indigenous northern minorities inhabiting the Company's regions of operation. Nornickel's operations and companies located in traditional settlement areas of indigenous northern minorities include the Polar Transportation Branch, Norilskgazprom, Taimyrgaz and Norilsktransgaz. Nornickel's key commitments to further strengthen and develop relations with indigenous northern minorities that benefit both parties are set out in the Indigenous Rights Policy,² which is aligned with the Indigenous and Tribal Peoples Convention of the International Labour Organisation.

MM6

Representatives of the Group companies are members of indigenous northern minority commissions organised by local authorities.

Key areas of interaction with indigenous northern minorities

Nornickel's key projects in the Arctic are focused on reducing air emissions, coastal cleanup and restoration of ecosystems, biodiversity preservation (including aquatic bioresources), development of transport infrastructure and Arctic shipping, ensuring transport accessibility of the Arctic, and implementing the Northern Supply Haul programme. Nornickel is active in promoting renewable energy sources in the Arctic, with the Taimyr HPP Cascade upgrade being one of the Company's major investment projects.

The Company has been supporting initiatives to improve living standards of the Taimyr Peninsula's indigenous people. The initiatives cover housing

construction, maintenance and social projects in small and separated settlements on the Taimyr Peninsula, along with delivery of social aid for indigenous northern minorities and food for children of reindeer herders, and other projects.

To preserve national traditions and culture of indigenous northern minorities, the Company participates in staging the Big Agrish ethnic celebration, as well as annual professional festivals for tundra inhabitants on the occasion of Reindeer Herder's Day and Fisherman's Day.

Since 2017, Nornickel has been implementing the Comfortable Taimyr project as per its agreement with the Taymyrsky Dolgano-Nenetsky Municipal District authorities. Under the project, the Company is to fund the building of 2,500 sq m of housing in the Tukhard settlement, where housing stock disrepair was a serious issue. Pursuant to the agreement, Nornickel will build new and modern housing, as well as a utilities and social infrastructure with a school, kindergarten, hospital, boiler, power plant, and local treatment facilities. The location for the new housing was determined by a residents meeting based on their lifestyle.

In 2018, Nornickel and the Federal Agency for Ethnic Affairs (FAEA) signed an agreement on cooperation aimed at providing support to the indigenous peoples of the North who live in areas where the Company operates. Nornickel is supporting the Siberian Federal University's work to revive the written language of the indigenous peoples of the North as part of the International Year of Indigenous Languages (2019).

In 2018, there was no record of the Company violating the rights of indigenous minorities. 411-1

¹ For more details, please see the Human Rights Policy approved by the Board of Directors at <https://www.nornickel.com/investors/disclosure/corporate-documents/#corporate-codes-and-policies>.

² Approved by the resolution of the Board of Directors in February 2018.

RESPECT FOR HUMAN RIGHTS ACROSS NORNICKEL'S OPERATIONS

Key human rights ¹	Nornickel's by-laws													Nornickel's contribution

Freedom of movement															The Company does not restrict the freedom of movement of its employees. It reimburses round trip travel expenses and baggage fees as part of the benefits package
Right to shelter, right to own property															The Company does not implement or plan to implement projects related to taking land from the population and forced relocation
Right to a healthy environment															The Company continuously works to reduce its environmental footprint and implements a comprehensive environmental policy
Rights of indigenous peoples															The Company supports projects aimed at preserving the traditional lifestyle and culture of Taimyr's indigenous peoples while fostering their economic and social development

Labour relations

UN GLOBAL COMPACT PRINCIPLES

Principle 3: Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining.

Principle 4: Businesses should uphold the elimination of all forms of forced and compulsory labour.

Principle 5: Businesses should uphold the effective abolition of child labour.

Principle 6: Businesses should uphold the elimination of discrimination in respect of employment and occupation.

Employees and social policy

103-2

Human capital is a key driving force behind the Company's growth. In recognising this, the management of Norilsk Nickel Group seeks to create conditions that would boost employee performance and engagement, and exercises a comprehensive approach to HR management.

Respect for employees and their rights lies at the heart of the Group's business. The protection of human rights is guaranteed in a number of the Company's documents, including the Business Ethics Code, Personal Data Policy, Anti-Embezzlement Regulation and Human Rights Policy. [WEB](#)

HR management assessment

103-3

To assess HR management and make efficient decisions, the Company continuously monitors HR metrics, analyses the structure of staff costs, labour productivity, and performance of social, adaptation and other programmes. The Company plans to introduce continuous monitoring of staff engagement and satisfaction.

Staff composition

Nornickel received the international Randstad Award as the best employer in the metals and mining sector. The recognition came as a result of Nornickel's successful HR strategy.

This was not the first time that Nornickel won this prestigious award. In 2016, the Company received Randstad's Grand Prix as the Best Employer in the Russian metals and mining industry.

¹ According to the International Bill of Human Rights, the Indigenous and Tribal Peoples Convention of the International Labour Organisation, and the Constitution of Russia.

² The Company expects its contractors to also adhere to these documents.

103-2

The Company is a major employer in the Norilsk Industrial District and the Kola Peninsula and as such has a significant impact on these regions' labour markets. The Company has no policies in place providing for the preferential hiring of locals; staff selection takes into account candidates' skills, qualifications, and education.

In 2018, the Company employed 509 new permanent staff members from other regions of Russia.

202-2

The share of top executives representing local communities stood at 98.0%. Russian citizens accounted for 99.6% of the Russian operations' total headcount. [WEB](#)

⁴ The ratio of resignations, dismissals for breach of labour discipline, and negotiated terminations, to the average annual headcount.

⁵ The ratio of all separations to total employments as at the end of the period.

Personnel development

The Company views its people as its key asset and keeps investing in their professional and personal development. Our personnel development policy focuses on creating an environment that helps fully unlock the professional and creative potential of each employee while also fostering team spirit and commitment to the Company's goals. With this in mind, the Company plans the professional and career growth of its people, builds a talent pool for managerial positions, trains and promotes pool members.

Training

103-2 404-2

With our reconfigured production cycle, modernised operations, new technologies and approaches, we need to make sure our employees meet the new expertise, skill and competency requirements. This is why training plays an important role in Norilsk Nickel's personnel development.

In 2018, 54 key employees, heads of production units and the Head Office of Norilsk Nickel completed an innovative operating efficiency training programme organised jointly with Moscow's Skolkovo School of Management. The programme aims to make production management more efficient, among other things, by developing key managerial competencies, looking into the latest technologies, approaches and best practices in the area, and identifying ways to apply them.

KEY PERSONNEL TRAINING INDICATORS 404-1

• including white-collar employees	8.8	9.5	11	15	16.8

Nornickel launched the lamHR development programme for HR professionals. The programme seeks to improve their professional skills, strengthen interactions between business and HR, and educate the staff about state-of-the-art solutions and available practices in HR management.

The Company introduced staff training programmes across all functional areas and staff categories – from top managers to workers. Training is an ongoing process that takes place throughout an employee's career.

MMC Norilsk Nickel has the Model Regulation on Professional Training in place, which the Group companies use a basis to develop their internal training regulations.

The Group's employees can benefit from free staff training, retraining, skills improvement, and internship programmes funded by the Group companies. The Company engages external education providers (universities, professional development institutions, research institutes, training centres, and consultants), and trains employees at its own corporate training centres. The Group's key training hubs are the Norilsk Nickel Corporate University (Norilsk) and the Kola Staff Development Centre (Monchegorsk), which provide training to more than 52,000 employees a year.

Talent pool

The reporting year saw the Company continue to roll out the talent pool management programme at its Norilsk site. We launched a training and development programme for talent pool members and their mentors based on cutting-edge education technologies and a combination of classroom and online sessions.

On top of that, we provided the pool members with a roadmap of development activities and recommendations on how to strengthen competencies covered by the corporate model.

Over the year, Polar Division and the Kola Peninsula facilities introduced an SAP HCM-powered system to automate and boost the efficiency of talent pool management, among other things, through the consolidation of relevant data into a shared database.

DEVELOPMENT PROJECTS FOR TARGET PERSONNEL CATEGORIES

Target category	Project	Priorities	Coverage in 2018, thousand employees
Highly qualified workers	Mentor Academy	<ul style="list-style-type: none"> Professional skills competitions Mentor training Recognition, corporate forum of mentors Participation of Norilsk Nickel's best workers in WorldSkills Russia 	7.6

Young employees aged 18 to 35	Leader, movement of young professionals	<ul style="list-style-type: none"> NIKoNN (mind sports and quests) Creativity (contests, festivals and KBNN) Induction and Career Guidance (support for young employees, meetings with school students) Initiatives (projects to address social issues) The Leader of the Year annual competition for the most promising young talent teams 	18

¹ The y-o-y decrease in 2018 is due to large-scale training held in the previous year to improve employee skills and grades of the blue-collar staff. In the reporting year, no such training was needed.

Career guidance, cooperation with educational institutions

The Company runs an array of programmes to attract and train staff. The major ones are the Career Start-Up internship programme, Conquerors of the North internal case competition, and the First Arctic leadership programme. The Company's career guidance initiatives are integrated into the relevant regional programmes and target children and youths aged below 35.

The Company prioritises the following training areas:

- underground (subsurface) ore mining;
- mine surveying;
- mineral processing;
- mining electrification and automation;
- mine and underground construction;
- industrial and civil construction;
- ground vehicles, hoisting/conveying and road machinery;
- mining machinery and equipment;
- power and electrical engineering;
- operation of transportation vehicles and systems.

The Company has established close cooperation with educational institutions. Its facilities invite students to

take part in the Career Start-Up programme of pre-graduation internships and work placements. The programme cooperates with 25 Russian universities. In 2018, 311 students joined the programme, with 118 top-performing ones awarded Nor Nickel's corporate scholarship and 88 hired by the Company after graduation. In 2019, the Company's facilities will offer internships to 312 students.

In summer 2018, more than 200 students took part in the Conquerors of the North team business game to try and tackle some of the Company's real tasks. Nor Nickel was the first metals and mining company in Russia to use this methodology with students.

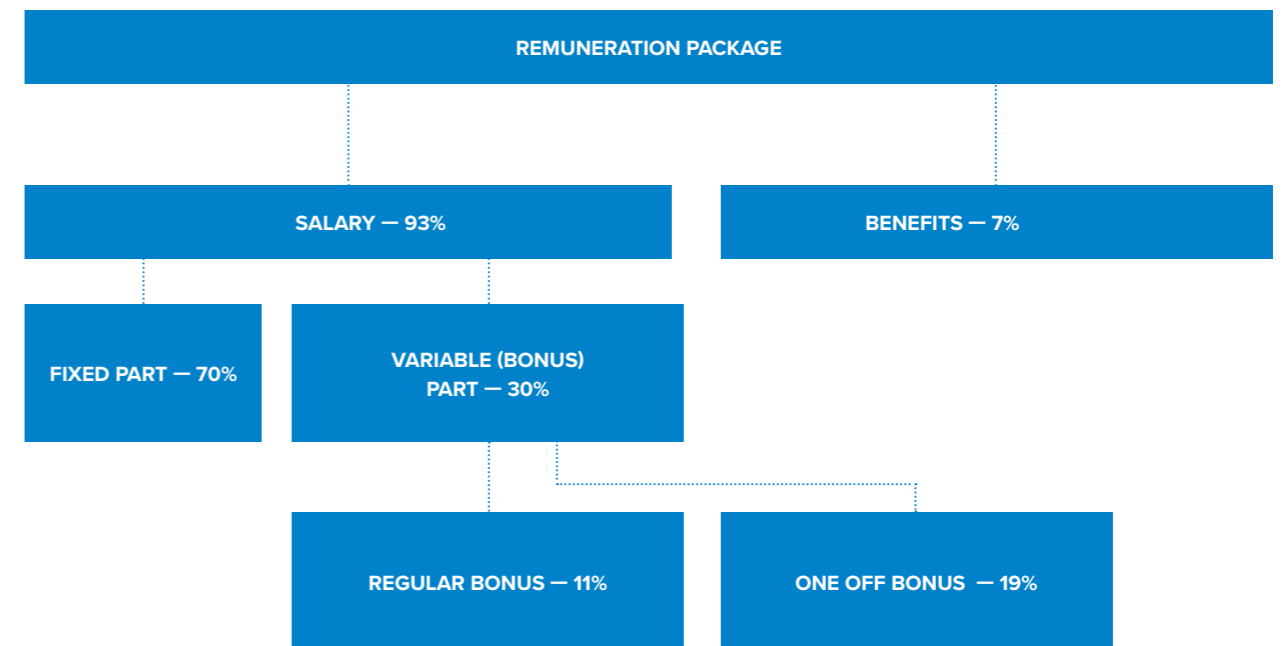

The Company places a strong emphasis on engineering education in Russia, contributing to the promotion of relevant professions. In 2018, we supported Cup Technical and Metal Cup Championship 2018, case-solving championships among students of Russian technical universities. During the contest, students dealt with cases related to Nor Nickel's operations, gaining insight into the Company's business processes.

Also, we run a number of career guidance events for schools, such as the Arctic.PRO R&D marathon, ARCTIC WAVE festival of R&D discoveries, I Make competition for young inventors, and the School of Urban Competencies, attended by over 4,000 school children annually.

In 2018, the Company implemented the job grading framework linking each job and related remuneration to its significance for business processes. This is a key tool that should help the Company to secure maximum return on investment in human capital, engage and retain the

best talent. Grading relies on the points factor method of job evaluation that takes into account knowledge and skills, the complexity of tasks, and the level of responsibility.

REMUNERATION PACKAGE ACROSS THE GROUP'S RUSSIAN OPERATIONS IN 2018, %

Incentives and rewards

Remuneration policy goals

- Recruitment
- Retention
- Encouragement of productive attitude to work
- Administrative efficiency and transparency
- Compliance with legal requirements

Remuneration policy principles

- Internal equity — remuneration management is based on the job description and grading methodology. The Company has a unified grade system across all functions
- External competitiveness — remuneration is determined based on the labour market data, with adjustments made for the company's focus area, business location and job grades
- Performance-based incentives — pay level is reviewed subject to the annual performance assessment outcome
- Simplicity of the remuneration system — pay level calculation and review procedures are transparent, and every employee knows how to improve their remuneration

Employee awards

To motivate and financially incentivise its employees to work efficiently and productively, and deliver the highest operational results, the Company has put in place a structured system of incentives and rewards of various categories and levels: government awards, ministry and agency awards, regional and municipal awards, corporate Norilsk Nickel awards, and internal awards granted by Norilsk Nickel Group companies.

In 2018, MMC Norilsk Nickel approved its Award Policy, which sets out the goals, principles, rules, requirements and limitations of the Company's awarding activities.

The Company recognises employees for their outstanding professional achievements and contribution, innovations that drive growth, add economic value or boost the operating efficiency of a specific facility or the Group in general, efforts going beyond formal agreements with the Company,

and business improvement initiatives. The Company praises and distinguishes employees showing exceptional production, engineering and managerial competencies by awarding those who delivered remarkable operational or management performance and contributed a lot to advancing production.

The best employees may be nominated for agency (industry) and government awards. The Company welcomes the recognition of its employees' accomplishments by the government and its agencies, while also distributing its own accolades for prodigious operational and management achievements, and significant contribution to production growth.

In 2018, 4,304 Company's employees were awarded for outstanding production results and many years of diligent service, including 83 and 286 honoured with government and ministry/ agency awards, respectively, 1,664 who received awards from regional and municipal authorities, 275 and 1,996 who were granted corporate and local awards of the Group companies. [WEB](#)

Social policy

The social policy of Norilsk Nickel Group is implemented in a consistent manner based on the feedback principle. To make changes to the existing programmes, develop new ones and close those that have achieved their goals and objectives, the Company conducts an in-depth comprehensive review and selects the best solutions in terms of social interests, economics of the Company, and the interests of its employees. We are constantly monitoring the performance of our programmes to ensure timely identification of possible weaknesses.

The social package includes the following benefits and compensations:

- health resort treatment and vacation to employees and their families at subsidised prices;
- payment of return travel and baggage costs to a place of vacation to employees in the Far North and

equivalent areas, and their families;

- one-off financial aid in the face of certain life events, or hardships;
- additional employee pensions and other types of social guarantees under the existing collective bargaining agreements and local regulations.

SOCIAL EXPENSES, RUB MLN

Health improvement programmes

For many years, Norilsk Nickel Group has been running a programme of rehabilitation and health resort treatment for its employees and their families. The harsh climate of the Far North and the nature of the Group's operations

require special care of the employee health, which makes health improvement and wellness a priority of the corporate social policy.

Co-Funded Pension Plan programme

2013

Co-Funded Pension Plan, a corporate private pension programme, has been running since 2007. As at the end of 2018, it saw 13,900 participants from among employees of 22 companies, with over 6,000 receiving pensions.

The programme provides for two pension plans: Parity and Corporate. Under the Parity Plan, pension savings are co-funded by the employee and the Company on a par (equal) basis. The Corporate Plan is designed for highly skilled employees and/or employees with highly sought-after occupations; within this plan, the Company finances private pension plans for such employees. In 2018, an average participant contribution amounted to 2.9% of the employee's salary or the Group's monthly average of RUB 3,000. [WEB](#)

Housing programmes

In the reporting period, the Company continued with its Our Home and My Home corporate social programmes launched back in 2010 and 2011, respectively.

The programmes now run as a single Our Home/My Home programme covering the employees of Polar Division, Polar and Murmansk Transport Divisions, Kola MMC and 18 more Group companies operating in Norilsk, the Taimyrsky Dolgano-Nenetsky Municipal District and the Murmansk Region. Since the start of the programme, 3,804 apartments have been granted to the Company's employees. In total, the Company has purchased 4,348 ready-for-living apartments, including 522 in 2018. As part of the programmes, the Company purchases ready-for-living apartments in various Russian regions at its own expense and provides them to eligible employees under co-financing agreements. The Company pays up to a half of the apartment cost (but in any case no more than USD 54,000), with the rest paid

by the employee within a certain period of employment with Nor Nickel Group (from five to ten years). The cost of housing remains unchanged for the entire period of the employee's participation in the programmes. Ownership rights are registered at the end of the programmes, but the employee may move in immediately after receiving the apartment.

In 2014–2018, the apartments were purchased in Moscow and Tver regions, as well as in the Krasnodar Territory, with the Company seeking to buy properties located in close proximity to enhance the employees' living standards by developing additional infrastructure and optimising the scope of maintenance tasks assigned to the property management company.

Assistance to employees in acquiring housing

The Company also runs the Corporate Social Subsidised Loan Programme for Employees of Nor Nickel that was phased from a pilot to an ongoing project. This programme was developed primarily as a tool to retain highly qualified staff, with employees at Polar Division and Kola MMC entitled to an interest-free loan to make a down payment and to reimbursement of a certain share of interest on their mortgage loan. Overall, more than 200 employees took part in the programme.

Support to new employees

Nor Nickel provides financial support to newly employed staff relocating to Norilsk and the Taimyrsky Dolgano-Nenetsky Municipal District, including young specialists, workers, engineering staff and managers.

The Company reimburses the following expenses of newly employed staff:

- travel expenses;
- baggage transportation;
- living costs for the first three years.

On top of that, the Company also pays a one-time relocation allowance to support the employee at the new place of work.

With 379 employees joining the relocation support programme in 2018, it now boasts 1,520 participants.

Sporting and mass public events programme

The Company promotes sports and healthy lifestyle to solidify the corporate team spirit and maintain a positive work environment. It organises sporting events and competitions attended by its employees, their families, and the local community.

The events include the annual Polar Division Olympics, Kola MMC Olympics in 16 sports, Norilsk Nickel Ski Track health marathon, "Dad, Mum and I – a Sporty Family" corporate competition, swimming, ice hockey, futsal, volleyball, basketball, alpine skiing, snowboarding competitions, and sport events dedicated to the Metallurgist Day and other high days and holidays.

To promote amateur hockey, Norilsk hosted the Night Hockey League (Northern Conference) in 2018, with 11 teams comprising Nor Nickel employees among the participants.

The reporting year saw some 27,000 people take part in Nor Nickel's sports events. Also, the Company's facilities in Norilsk feature gyms.

Programmes supporting former employees and their families

The ongoing support of its former employees is part of the Company's corporate social policy.

The Company's Veterans programme has been designed to support unemployed pensioners who permanently reside in Norilsk. The terms of participation depend on the employee's length of service or permanent disability status. Financial aid is paid from the charitable contributions made by the Company.

Under the programme of financial aid to retiring employees, benefits are provided to employees at the time of retirement, with the amount linked to their employment period.

The Pensioner Financial Aid Fund extends financial aid to former employees who retired prior to 10 July 2001 provided they had been employed at the Company's divisions for more than 25 years and permanently reside outside of the Norilsk Industrial District. The Fund relies on voluntary monthly contributions from employee salaries and equal charitable contributions from the Company's budget.

The Company also provides targeted assistance to its former employees and their families to pay for health improvement and medications, funeral services, and helping in financial distress.

Support of employees with disabilities

The Company fully complies with the legislation regarding employment of people with disabilities. As per the employment quotas that vary depending on the region and company size, the share of such employees may come up to 2% of the average headcount.

The Company takes steps to secure jobs for people with disabilities and ensure necessary working conditions, including work and rest schedule, annual and additional paid leaves, and specialised workspace equipment.

Occupational health and safety

103-2

Occupational health and safety is one of Nor Nickel's strategic priorities. The Company is aware of its responsibility for ensuring health and safety of all employees engaged in its operations, both its own and third party.

Nornickel's Occupational Health and Safety Policy gives precedence to the life and health of employees over operational performance while also demonstrating the Company's commitment to creating a safe and healthy environment and fostering sustainable employee motivation for safe workplace behaviour.

Zero work-related fatalities and an ongoing reduction in overall workplace injuries are the Company's key strategic priorities in OHS.

HEALTH AND SAFETY MANAGEMENT

REGULATION

- Applicable Russian laws aligned with international laws
- Occupational Health and Safety Policy
- Occupational Health and Safety Strategy
- 15 Corporate OHS standards
- OHS sections in collective bargaining agreements for the Group's Russian operations
- Regulations and guidelines for all production processes
- Project implementation plans and specifications for repair, construction and installation works
- Health and safety guidelines for specific jobs and types of work at all Company's facilities

RESPONSIBILITY 103-3 403-1

- Board of Directors: monitoring the Company's performance on a quarterly basis and identifying areas for improvement
- First Vice President and COO: overseeing the development of initiatives and compliance with the OHS legislation, reporting to the Board of Directors
- HSE Committee: review and improvement of the OHS management system, assessment of OHS initiatives
- HSE Department: development of OHS initiatives and monitoring compliance with the relevant legislation
- Joint OHS committees (councils) made up of management, employees, and trade union representatives: >67,900 employees of relevant Group companies, or 90% of the Company's headcount
- Authorised trade unions and staff representatives in OHS: >1,000 representatives, >27,000 inspections, >7,200 improvement proposals

CERTIFICATION

- Polar Division and Pechengastroy: GOST R 54934-2012 (OHSAS 18001)
- Kola MMC: OHSAS 18001
- Norilsknickelremont: GOST 12.0.230-2007 (ILO-OSH 2001)

PRIORITIES

- Implementation of corporate standards
- OHS training: over 34,300 employees of the Group companies trained in 2018, including 3,600 new employees and those with less than three years of experience
- Special assessment of working conditions held annually; 7,800 workplaces of over 14,000 employees assessed in 2018
- Provision of necessary personal protective equipment and its preliminary testing: average Group's costs of around RUB 40,000 per employee in 2018
- Safety communication campaign
- Prevention of occupational diseases
- Safety management in contractors

Nornickel put in place 15 corporate occupational health and safety (OHS) standards:

- Prevention and Control Activities with regard to Health and Safety Processes;
- Safety Behaviour Audit;
- Power Source Insulation;
- High Altitude Operations;
- Provision of Personal Protective Equipment;
- Safety Requirements for Boarding and Alighting Company's Motor Vehicles during Inter-Facility Transportation;
- OHS Communication, Accounting and Reporting Procedures;
- Accident Investigation;
- Procedure for Organising and Conducting High-Hazard Operations;
- Safety Requirements for Interaction of Vehicles and Pedestrians at Production Sites and Facilities;
- Hazard Identification, Assessment and Management of Occupational Health and Safety Risks;
- Management of Technical, Technological, Organisational and HR Changes;
- Requirements for Demarcation of Hazardous Areas and Visualisation of the Working Space;
- Contractor OHS Management;
- OHS Contest Arrangements.

103-2

The Company continues to improve OHS management processes, among other things, by drafting and implementing corporate standards. In 2018, the Company proceeded with the projects to control risks and implement the framework to manage technological and organisational changes. The projects seek to build an effective system to continuously identify and control significant OHS risks and changes within the Group.

The reporting year saw the Company start implementing an automated system for OHS management monitoring, with its first stage put on stream at Kola MMC, Pechengastroy, and the Head Office.

Nornickel regularly takes preventive and control measures, including:

- second-party OHS management audits (cross-company audits of the Group companies involving the OHS heads and experts from other Group companies). There were 45 audits in 2018;

- internal OHS management audits;
- activities as part of the OHS monitoring system at each facility, including:
 - multi-stage control;
 - ad hoc, targeted and comprehensive OHS inspections;
- safety behaviour audits;
- compliance and certification audits as part of the OHSAS management system;
- independent external audits of the corporate OHS management system and occupational safety culture.

Prevention of occupational diseases

The Company implements measures to prevent occupational diseases. Employees undergo compulsory pre-employment, regular and ad hoc medical examinations and check-ups organised at the Company's expense. Those that have contact with hazardous materials are subject to additional examinations held at least once in five years by occupational pathology centres or other organisations authorised to conduct pre-employment and regular check-ups. These serve to assess occupational health fitness and determine if the disease is job-related. In 2018, the Group's costs related to medical examinations and maintenance of medical aid posts amounted to RUB 437.1 mln and RUB 221.5 mln, respectively.

The Company's facilities have their own medical aid posts to perform pre-shift and pre-trip checks and provide medical assistance to employees.

To automate the process, the Company started introducing an electronic health check-up system in 2018, piloted at Kola MMC and GRK Bystrinskoe.

The Company provides employees working in harmful and hazardous conditions with free foods, milk, and other equivalent food products for therapeutic purposes in compliance with the applicable Russian legislation and corporate policies. In 2018, foods and milk costs across the Group amounted to RUB 1,247.9 mln.

In case of hazardous production factors identified by the special assessment of working conditions, the Company provides employees with personal protective equipment (PPE).

In 2018, the Company put in place Alcoframes, contactless breath alcohol screening devices, to prevent intoxicated employees from accessing production facilities. The devices are running at Polar Division (Copper Plant), Medvezhy Ruchey, GRK Bystrinskoe and Norilsk Support Complex. The Company continues to work in this area.

Contractor safety management

Contractor operations (repair, construction and installation works at the existing facilities) are classified as high-hazard and governed by the respective corporate standard. Work permits, operations certificates and work execution plans (process sheets,

guidelines, etc.) must contain safety requirements to be met when organising and performing work. The Company checks compliance with these requirements during each shift. Prior to commencement of work, contractors' staff receive pre-job and ad hoc health and safety briefing, including security measures set forth in work execution plans.

In 2018, Nornickel developed and introduced the STO KISM 121-222-2018 standard to improve control and safety of work performed by contractors at its facilities. The standard sets out relevant requirements applicable to contractors at the selection stage and onwards.

KEY INJURY INDICATORS [403-2](#)

Indicator	UoM	2014	2015	2016	2017	2018
FIFR		0.07	0.12	0.11	0.07	0.05
LTIFR		0.48	0.62	0.35	0.44	0.23
Total workplace injuries in accordance with the Russian labour laws	pcs	64	88	56	60	32
Fatal workplace injuries	pcs	8	14	13	8	6
Minor injuries	pcs	305	411	719	719	1,043 ¹
Potentially dangerous incidents ²	pcs	349	976	1,845	1,711	2,270
Occupational diseases	pcs	226	271	339	361	318
Total work-related accidents among the contractors' employees engaged at the Group's sites, in accordance with the Russian labour laws ²	pcs	13	19	17	16	19
• including fatalities	pcs	5	5	7	1	2
Occupational health and safety expenses	RUB mln	7,446	10,748	8,515	8,708	10,563
• including per employee	RUB thousand	95	134	106	114	141

¹ The increase in the number of minor injuries and potentially dangerous incidents was due to the introduction of the corporate Accident Investigation Standard, awareness-raising activities, and better understanding among employees of how reporting minor injuries and potentially dangerous incidents helps eliminate their causes and, therefore, prevent incidents with more severe implications.

² The indicator has been recorded since 2014.

In 2018, the Company registered one fatality that took place in 2017. The fatality was further investigated and recorded on the basis of a court ruling.

Fatalities breakdown in 2018 by type of accident: exposure to hazardous substances – two incidents, injuries caused by falling from heights, rockfalls in mines, impact of vehicles on pedestrians and other injuries — one incident each.

All workplace accidents are investigated in accordance with the applicable Russian laws. Investigation results serve as a basis for developing measures to be taken promptly to eliminate the root causes. [WEB](#)

In 2018, the lost time injury frequency rate (LTIFR) decreased from 0.44 to 0.23, down by 48% y-o-y, reaching the Company's record low and remaining below the industry average. The number of lost time injuries halved, from 52 to 26, while fatalities fell by 25%, from 8 to 6, on the back of initiatives to ensure compliance with core occupational safety requirements and improve safety standard management.

HEALTH AND SAFETY PERFORMANCE INDICATORS FOR ACCIDENT PREVENTION

Employees subject to disciplinary action for the violation of health and safety requirements (thousand)	7.6	6.9	8.3	8.8	7.9	6.8
Employees with reduced bonus payments (thousand)	> 17	> 14	> 15	> 15	> 13.6	> 13
Total (RUB mln)		> 67	> 56	> 55	> 74	> 70
Employees incentivised for health and safety involvement and lower workplace injury rate as per the audit results (thousand)	> 7	> 5	> 9	> 5	> 5.6	> 6.4
Total (RUB mln)	> 42	> 35	> 78	> 51	> 41	> 52

¹ Removal of coupons is a preventive measure that enables the Company to register the number of gross health and safety violations which did not cause accidents, and subject the culprits to disciplinary actions and financial penalty.

Engagement of employees in safety management

403-1

Most of the Group companies (including subsidiaries, divisions and structural production units) put in place official joint health and safety committees (councils) made up of the management, employee and trade union representatives. The Group companies running such joint committees employ over 67,800 people (around 90% of the Group's total headcount).

Authorised representatives of trade unions and staff in occupational health and safety (1,146 employees) were elected to participate in preventive activities across the Group's production units. In 2018, they took part in over 27,000 audits and submitted more than 7,200 health and safety improvement proposals.

Health and safety topics covered in formal agreements with trade unions

403-4

The Company and most of its production units, including Kola MMC, Norilsknickelremont, Polar Construction Company, NTEK, Yenisey River Shipping Company, Norilskpromtransport and Norilsk Support Complex,

entered into collective bargaining agreements with employee representatives (including trade union organisations). The collective bargaining agreements contain occupational health and safety provisions and are in place at the companies that employ some 81% of the Group's staff. [WEB](#)

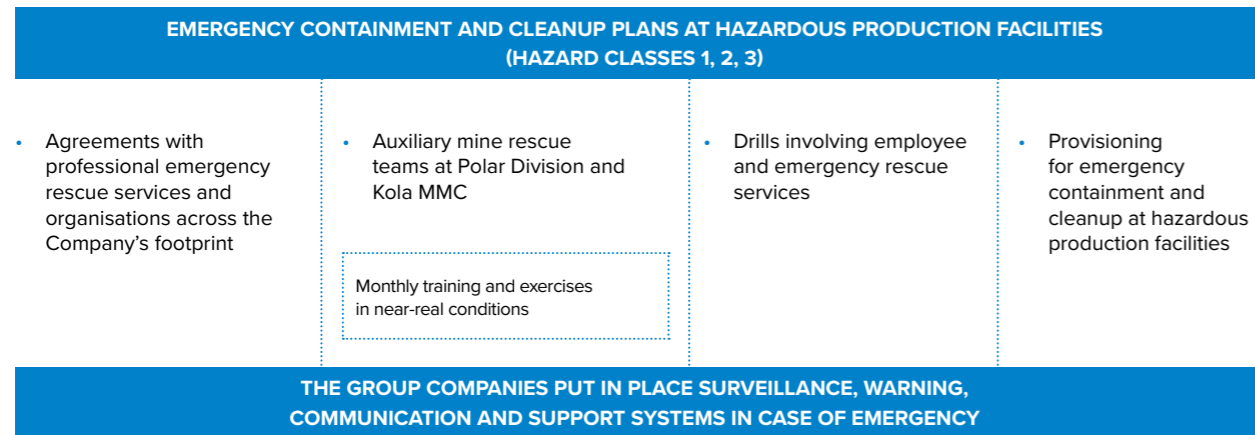

Emergency preparedness

403-3 103-2

The Group companies take great care in maintaining emergency preparedness, as the Group embraces mining, concentration and smelting operations, operates over 300 hazardous production facilities, and uses various hazardous substances (toxic, explosive, oxidising, etc.) in its processes.

The Company complies with Federal Law No. 116-FZ On Industrial Safety of Hazardous Production Facilities dated 21 July 1997, and ensures preparedness for emergency containment and response at hazardous production facilities. [WEB](#)

EMERGENCY PREPAREDNESS SYSTEM AT HAZARDOUS PRODUCTION FACILITIES

Improvement of social and working conditions

The Group companies operate more than 2,100 sanitary, amenity, sports and fitness, catering, healthcare, and recreational facilities with a total area of over 340,000 sq m. The Company is committed to providing comfortable social and working conditions.

From 2003, the Group has been implementing the programme to improve social and working conditions. Since its launch, we have overhauled 253 social facilities and purchased 408 relocatable buildings, investing a total of RUB 4,876.2 mln.¹

In 2018, the programme covered ten divisions and Group's Russian companies located in Norilsk, the Taimyrsky Dolgano-Nenetsky Municipal District, and

the Murmansk Region. They completed the overhaul of 25 social facilities and purchased 14 relocatable buildings to be used by employees to change, warm up and take meals. The Company renovated a total of 7,285 sq m and improved social and working conditions for 2,698 employees.

Total costs amounted to RUB 645.3 mln, including RUB 514.3 mln invested in design and overhaul, and RUB 131.0 mln spent on equipment.

The programme will be running over a mid-term horizon of three years, with investments in 2019–2021 to exceed RUB 2,000 mln. During this time, the Company expects to repair and equip over 80 social facilities.

Anti-corruption

UN GLOBAL COMPACT PRINCIPLES

Principle 10: Businesses should work against corruption in all its forms, including extortion and bribery.

Preventing and fighting corruption

103-2

Nornickel's delivering on strategic goals is based on the trust and engagement of shareholders, investors, partners, employees, state, Russian and international business communities, and society in the Company's operations. Therefore, corruption of any nature is unacceptable.

The Company consistently builds the compliance framework focusing on priority anti-corruption areas, key actions and the role of the governing bodies.

Starting 2017, MMC Norilsk Nickel implements a revised Anti-Corruption Policy that applies to the Company's representatives and contractors, including foreign public officials and officials of international public organisations. The respective responsibilities are stipulated in agreements made with contractors or expressly provided for by the applicable laws.

Through the efforts of its representatives, Nornickel takes active part in developing and implementing domestic and international policies on combating corruption.

Andrey Bugrov, the Company's Senior Vice President, is a member of a number of top-level organisations that supervise this area, in particular:

- Expert Council of the Presidential Anti-Corruption Directorate;
- B20's anti-corruption task forces;
- Expert Council on Corporate Governance at the Russian Ministry of Economic Development;
- representative of the Russian Union of Industrialists and Entrepreneurs engaged in groups and committees of the Business and Industry Advisory Committee to the OECD (BIAC); the Anti-Corruption Task Force and the Corporate Governance Committee.

Anti-corruption matters are an integral part of the functions of other entities where Andrey Bugrov serves as a member.

Russian companies in Norilsk Nickel Group adopt and implement their own anti-corruption regulations that are in line with the Company's anti-corruption policy.

The Company takes all the necessary and reasonable steps to cause organisations in the corporate structure and located outside Russia to comply with the key principles and requirements of the anti-corruption policy.

205-1

The Company assesses corruption risks on an annual basis, conducting quarterly risk monitoring. In 2018, corruption risk assessments were performed across all the Group's business units and companies. No confirmed incidents of corruption were identified.

205-2

When recruited, all of the employees are familiarised with the corporate Anti-Corruption Policy and related regulations, and starting 2015, sign addenda to their employment contracts that set out anti-corruption responsibilities. The Company has the e-learning course On Preventing Corruption in place for new employees. As at the end of 2018, the share of employees informed about the Group's existing corruption prevention policy is 100%. In 2018, the dedicated training on the requirements and provisions of the corporate anti-corruption regulations was received by 3,505 people (4.72% of the Group's employees as at the end of 2018).

PREVENTING AND FIGHTING CORRUPTION AT NORNICKEL

REGULATION

- Anti-corruption laws of the Russian Federation and other countries where the Company operates
- Applicable international laws
- Anti-Corruption Charter of the Russian Business
- Anti-Corruption Policy of MMC Norilsk Nickel
- Business Ethics Code
- Directors' Code of Corporate Conduct and Business Ethics
- Regulation on the Prevention and Management of Conflicts of Interest in the Company
- Regulation on the Conflict of Interest Commission
- Regulation on Business Gifts
- Standard anti-corruption agreement (appendix to the employment contract)
- Procedure for Anti-Corruption Due Diligence on Internal Documents at the Head Office of MMC Norilsk Nickel Information Policy Regulation, etc.

RESPONSIBILITIES

- Board of Directors — determining key strategic priorities in countering corruption and following up related activities
- President — organising measures set to meet the requirements and principles of the anti-corruption policy
- Corporate Relations Department — identifying and documenting risks related to corruption, developing and controlling risk management measures
- Corporate Trust Service — providing prompt response to reports of violations, abuses and embezzlement
- HR Services — organising staff training on combating corruption
- Corporate Security Unit — checking counterparties and candidates to vacancies, responding to corruption incidents
- Heads of the Group's branches and companies — ensuring compliance with the principles and requirements of the Anti-Corruption Policy

FOCUS AREAS

- Prevention and management of conflicts of interest
- Anti-corruption due diligence of by-laws
- Counterparty due diligence to confirm their reliability, solvency and financial stability; anti-corruption clauses in contracts
- Procurement procedure
- Government cooperation, promotion of justice and the rule of law
- Recording and monitoring hospitality expenses, establishing criteria for acceptable business gifts
- Staff training in preventing and fighting corruption
- Awareness of the Company's corruption management policy among stakeholders

Nornickel's anti-corruption initiatives are regularly covered in corporate press releases. The Company maintains the Preventing and Fighting Corruption page on the corporate website www.nornickel.com containing information on anti-corruption regulations adopted, measures taken, preventive procedures introduced, legal training sessions organised and law-abidance awareness among staff and counterparties. [WEB](#)

Corporate Trust Service

103-2

The Corporate Trust Service was established at Nornickel back in 2010 to ensure prompt response to reported violations, abuses and embezzlement. The Service's scope of responsibility covers all business units of the Company and Group companies. The Service is governed by the Procedure on the Corporate Trust Service of MMC Norilsk Nickel approved by the

Company's President. Report statistics are submitted to the Audit and Sustainable Development Committee of the Board of Directors and the Company's operations on a quarterly basis.

The principles underlying the Corporate Trust Service include guaranteed confidentiality for whistle-blowers, independent consideration of reports, and timely and unbiased consideration of all reports irrespective of the position and employment period of the person mentioned therein.

Nornickel's Corporate Trust Service: toll-free hotline available 24/7: +7 800 700 1941 and +7 800 700 1945, email: skd@nornik.ru.

Information about the Corporate Trust Service is posted on the Company's official website: www.nornickel.com, intranet site, salary slips, calendars, posters with the Service's logo.

Persons in charge of the Service have processing performance of incoming reports as their individual KPIs.

REPORTS RECEIVED IN 2018, ITEMS (394 ITEMS IN TOTAL)

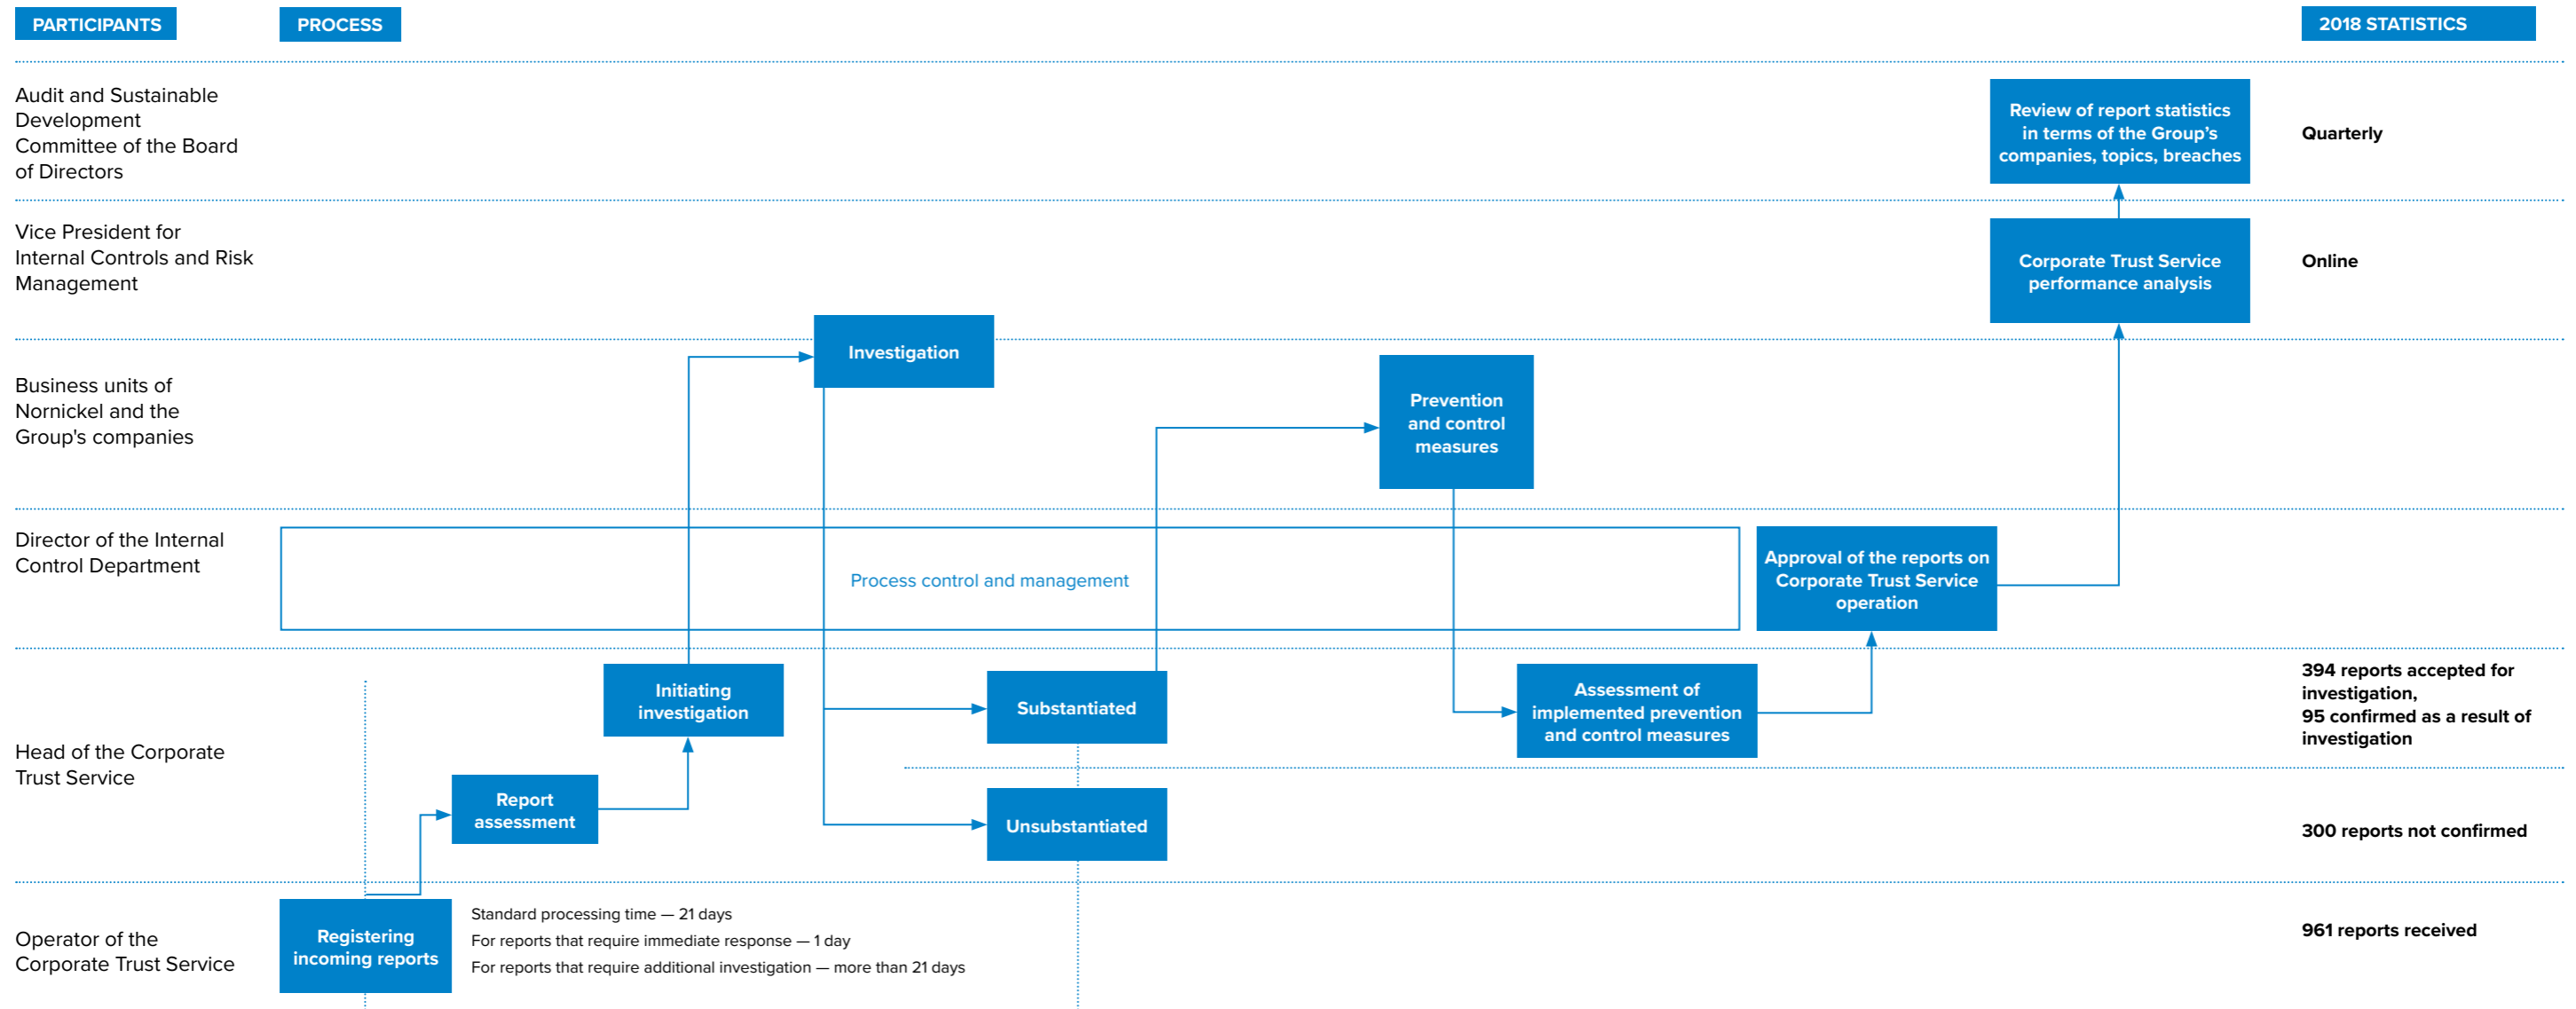

REPORTS CONFIRMED IN 2018, ITEMS (95 ITEMS IN TOTAL)

- Payroll abuses
- Production related abuses
- Technology and safety abuses (excluding environment)
- Corruption
- Commercial and contractual abuses
- Breaches of job descriptions
- Labour disputes
- Social issues
- Conflict of interest
- Embezzlement

FRAMEWORK FOR REGISTERING AND REVIEWING REPORTS BY THE CORPORATE TRUST SERVICE

Environment

UN GLOBAL COMPACT PRINCIPLES

Principle 7: Businesses should support a precautionary approach to environmental challenges.

Principle 8: Businesses should undertake initiatives to promote greater environmental responsibility.

Principle 9: Businesses should encourage the development and diffusion of environmentally friendly technologies.

2018–2023 strategic cycle

Targets	<p>2020</p> <ul style="list-style-type: none"> Reduction of SO₂ emissions in Nickel by 50% Significant reduction in effluents containing sulphates, sodium chloride and boron/boric acid <p>2023</p> <ul style="list-style-type: none"> Reduction of SO₂ emissions in Polar Division by 75%
Environmental expenditures, RUB bn	CAPEX for the Sulphur Project around RUB 150 bn by 2023
Projects	<ul style="list-style-type: none"> Sulphur Project (Polar Division, emissions) Upgrade of smelting equipment, discontinuation of low-grade concentrate processing at Kola MMC (Kola MMC, emissions) Upgrade and expansion of refining capacity and migration to chlorine dissolved tube furnace nickel powder technology (Kola MMC, emissions) Treatment of salt effluents from nickel refining operations (Kola MMC, effluents)

Environmental Management System

Nornickel's management considers environmental protection an integral part of the production process. The Company complies with the applicable laws and international agreements and is committed to reducing emissions, on a phased basis, and sustainable use of natural resources.

The Environmental Management System is part of the Group's integrated quality and environmental management system, which enables the Group to harmonise environmental and quality

management initiatives with operations of other functions (production management, finance, health and safety, etc.). This approach is beneficial both for environmental security and for overall performance across the Company.

During 2018, the Company carried out internal audits within the framework of CIMS. In line with international standards and Nornickel's by-laws, internal audits were conducted by specially trained and competent personnel.

The Company has drafted and keeps updating a register of corporate and internal auditors. [WEB](#)

ENVIRONMENTAL MANAGEMENT AT NORNICKEL 102-30 201-2

REGULATION

- Environmental legislation: Federal Laws on Protection of the Environment and on Protection of Atmospheric Air, the Water Code, etc.
- Nornickel's Environmental Policy
- Environmental Impact Assessment Policy
- Biodiversity Conservation Policy
- Renewable Energy Sources Policy
- Established maximum permissible environmental impact and its limits
- Plans for reducing pollutant emissions
- Plans for reducing pollutant effluents

RESPONSIBILITIES

- Board of Directors** approves environmental policies
- First Vice President and COO** oversees preparation of initiatives and compliance with environmental laws, prepares reports for the Board of Directors, and assesses effectiveness of the environmental management system
- HSE Department** ensures compliance of the Company's operations with the applicable environmental laws, environmental policy and ISO 14001:2015 and mitigates administrative and financial risks related to environment protection
- Production units** implement environmental initiatives and prepare federal statistical and corporate reports (immediate, quarterly and annual)
- Health, Safety and Environment Committee** analyses and improves the environmental management system and assesses effectiveness of initiatives
- Sulphur Project office**

CERTIFICATION

- MMC Norilsk Nickel: **ISO 14001:2015**
- Kola MMC: **ISO 14001:2015**
- Norilsk Nickel Harjavalta: **ISO 14001:2015**

ENVIRONMENTAL MANAGEMENT PRIORITIES

- Phased reduction of pollutant air emissions, primarily sulphur dioxide and solids
- Progressive reduction of effluents into water bodies
- Development of waste disposal sites to reduce human impact on the environment
- Zero pollution in maritime cargo transportation and vessel operation
- Sustainable use of natural resources and introduction of eco-friendly technologies
- Involvement with environmental public-private partnership projects
- Biodiversity conservation across regions of operations

Precautionary approach

102-11

In accordance with its Investment Project Risk Management Regulations, Nor nickel analyses risks and assesses impacts and potential consequences using qualified expert review during both project initiation and implementation. In the event material risks are identified, mitigation initiatives are developed, and a decision may be taken to abandon the project. During state expert review, FEED documents for all the projects being implemented by the Company undergo mandatory assessment for compliance with the applicable law.

When planning its operations, the Company ensures compliance with the requirements of the applicable Russian environmental laws and regulations.

Environmental protection expenditures

103-2 307-1

The Group's total environmental protection expenditures stood at RUB 32.5 bn in 2018, up 117.9% year-on-year. The largest spending items were current environmental protection expenditures (RUB 19.2 bn) and capital investments to ensure environmental protection and sustainable use of natural resources (RUB 12.6 bn).

ENVIRONMENTAL COSTS AND EXPENDITURES, RUB MLN

Expenditure item	2016	2017	2018
Current environmental protection expenditures	15,405.17	20,907.06	19,161.00
Capital investments to ensure environmental protection and sustainable use of natural resources	9,567.83	4,981.95	12,607.28
Charges for permissible and surplus emissions (effluents) and disposal of production and consumption waste	745.77	626.79	695.18
Charges paid by the Company to remedy damages arising from non-compliance with environmental laws (excluding environmental fines)	4.19	244.31	1.53
Environmental expenditures and costs	25,722.96	26,760.22	32,464.99

In 2018, the Company paid a total of RUB 3,187,000 in environmental fines and received 35 improvement notices from regulators.

Performance indicators

Air protection

103-2 413-2

Norilsk is the primary area affected by multifaceted operations of Polar Division. 54 pollutants are emitted into the air in this area. The key pollutant is sulphur dioxide accounting for 98% of all emissions.

Kola MMC's operations have environmental implications mostly for Monchegorsk and Zapolyarny towns and Nickel settlement. The key pollutants resulting from copper and nickel feedstock processing are sulphur compounds and dust containing heavy non-ferrous metals such as nickel and copper.

Reduction of air emissions (especially those of sulphur dioxide and dust containing non-ferrous metals) is the key objective pursued by the Company's operational units in terms of environmental management.

To communicate its environmental efforts to the people of Norilsk, Polar Division has been running an automatic toll-free enquiry service offering short-term forecasts on the environmental situation in the city.

To raise the stakeholders' awareness of its large-scale environmental initiative, the Company opened a Sulphur Project showroom in 2017. The showroom functions at Nadezhda Metallurgical Plant and uses the latest exhibition technology. The exhibits include:

- architectural models of the facilities to be used to utilise sulphur dioxide emissions at the plant;
- building models with augmented reality elements to demonstrate solutions and technology;
- interactive stands providing information about the existing projects, Polar Division, Nadezhda Metallurgical Plant and the Company's environmental initiatives;
- screens with information videos about the projects.

In 2017, a roadmap to reduce air pollutant emissions at Polar Division in 2018–2023 was developed, with Rosprirodnadzor's approval obtained. The roadmap takes into account the current state of emission sources following the shutdown of Nickel Plant and completion of reconfiguration at Polar Division's production facilities. It covers major projects (sulphur projects at Copper Plant and Nadezhda Metallurgical Plant, and the conversion

shop area upgrade at Copper Plant), timely progress on which will allow Nor nickel to keep emissions down to maximum permissible rates.

Official deadlines for reaching maximum permissible emission rates at Polar Division were set forth in a decree of the government of the Krasnoyarsk Territory.

AIR POLLUTANT EMISSIONS, KT 305-7

REDUCTION OF SO₂ EMISSIONS AT KOLA MMC, TONNES

In 2018, the Group's pollutant emissions increased 5%, while Kola MMC's emissions went down 3.6%.

Implementation of emission reduction initiatives in 2018

Polar Division

In 2018, the Company continued bringing emissions gradually down to below the maximum permissible concentration levels set for MMC Norilsk Nickel's Polar Division.

One of the projects aimed at achieving this goal was completed at Copper Plant's Smelting Shop. The flue gas extraction process was rearranged to bring gas from holding furnaces, slag siphons and charging doors of Vanyukov's furnaces 2 and 3 to DT-1 flue gas stack. With the new process introduced in 2018, nearly 11 ktpa of emissions from shut-down low-height sources at Copper Plant (gas bleeders of matte and slag holding baths of Vanyukov's furnaces) were eliminated and redirected to DT-1 flue-gas stack. Estimated ground level concentrations of pollutants in Norilsk residential areas were reduced by 2.65 permissible limit values for sulphur dioxide and by 0.36 permissible value for lead.

During 2018, much work was done at Polar Division's facilities to overhaul and repair gas cleaning units, dust exhausting units and dust collectors, which resulted in the reduction of dust emissions from stationary emission sources:

- Copper Plant (Smelting Shop, Drying Shop, and PGM Concentrator): routine repair of dust exhausting units at Converters 2–7;
- Nadezhda Metallurgical Plant (Smelting Shop 1, Feedstock and Charge Makeup Shop, Elemental Sulphur Production Shop 1).

In 2018, the Company continued its efforts to control pollutant emissions during unfavourable weather conditions. During the reporting period, a total of 140 emission control interventions were made at Norilsk's metallurgical operations.

On 28 December 2018, Deputy Prime Minister Aleksey Gordeyev approved the Integrated Action Plan to Reduce Air Pollutant Emissions in 2019–2024 that requires Polar Division to invest a total of RUB 123.2 bn to cut its gross emissions by at least 75% by 2023. Additionally, the action plan provides for the Federal Budget and the Krasnoyarsk Territory Consolidated Budget to allocate RUB 210 mln in 2019–2024 to finance Rosprirodnadzor's and Rosgidromet's air monitoring activities in Norilsk and Rospotrebnadzor's social hygiene monitoring system.

Kola MMC

An upgrade project started at Zapolyarny Concentrator. The project provides for the construction of a facility to separate low-grade (marketable quality) concentrate and high-grade concentrate and construction of a new building to dehydrate and ship low-grade concentrate to third-party consumers. High-grade concentrate will go through a new high-performance thickener and will be further processed at the Concentrator's briquetting line and at Kola MMC's smelting facilities using the existing technology. The project has environmental implications. When it is completed, the utilisation rate of Smelting Shop in Nickel will decrease substantially enough to decommission one of its ore-thermal furnaces and bring sulphur dioxide emissions in Nickel down to the maximum permissible level (31 ktpa).

In Monchegorsk, the Company continued working on the project named Nickel Electrowinning from Chlorine Dissolved Tube Furnace Nickel Powder with 145 ktpa Electrolytic Nickel Output. The project provides for the redesign of cathode nickel production in Nickel Tankhouse and replacement of the existing soluble anode electrorefining technology with nickel electrowinning from chlorine solutions. The new technology will reduce air emissions thanks to the elimination of anode smelting.

Climate risk management

Climate change risks are increasingly gaining attention of the investment and financial community. They are subject to government regulation in many countries. Russia is in the process of developing its regulatory framework in this area. As it evolves, the Company will additionally integrate these requirements into its CAPEX plans.

To minimise its impact on the climate, the Company implements a long-term strategy providing for the upgrade of its production facilities using the best available technologies, improving energy efficiency, and implementing measures that encourage energy saving and lower energy consumption. The Company's strategy already addresses key non-financial risks, including climate risks, and factors in recent trends in this area.

Nornickel has adopted a proactive approach in responding to GHG regulatory risks in Russia and abroad by:

- keeping record of GHG emissions;
- developing and implementing a corporate GHG emission management system;
- disclosing information on GHG emissions on a voluntary basis;
- monitoring domestic and international climate regulations;
- assessing the prospects of GHG reduction.

The Board's Audit and Sustainable Development Committee examines climate change risk data published in Norilsk Nickel Group's quarterly risk reports. The Board of Directors reviews climate risks while discussing the Company's Environmental Development Framework and progress reports on major investment projects and treats them as a priority in setting Nornickel's targets and development strategy. Climate change matters are overseen by the First Vice President and Chief Operating Officer.

305-1 305-4

Direct GHG emissions of Norilsk Nickel Group total about 10 mt of CO₂ equivalent.¹

The direct GHG emission intensity is 13.7 tonnes of CO₂ equivalent per RUB 1 mln of consolidated revenue.

The Group uses mostly low-carbon fuels in its production and power generation processes, with natural gas accounting for about 90% of fuels used. The Company also generates renewable energy at its Taimyr HPP Cascade. In 2017, the Company's HPPs generated 51% of total power consumed in the Norilsk Industrial District. Electricity produced by the HPPs account for 44% of the Group's total power consumption.

Use of ozone-depleting substances

305-6

The Group neither produces nor uses ozone-depleting substances (ODS), except for extremely limited amounts used as a chemical agent for laboratory-based chemical analysis as well as for filling and topping compressors in air conditioning units and carbonated water machines that produce water used as a cooling agent for medium- and low-temperature refrigerating equipment. The Company reports on the use of ODS to the Russian Ministry of Natural Resources as required.

Protection of water bodies

103-2 306-5

The Group uses water from surface and underground sources for its drinking, production and process supply needs as well as for community and shipping needs. Water is withdrawn in compliance with the pre-approved limits, without any major impacts on water bodies. No water is withdrawn either from the Ramsar Wetlands or from other protected natural areas.

The Company's wastewater effluents generally do not exceed the pre-approved limits, including admissible impact limits, or have any major impact on biodiversity of water bodies and related habitats.

¹ An estimate that includes carbon dioxide (CO₂) and methane (CH₄) emissions.

The Company holds stakes in many subsidiaries so that most production processes emitting greenhouse gases fall within the Company's perimeter, i.e. part of direct emissions from the fuel and energy assets will be considered indirect emissions of the production assets in so far as energy is supplied for production needs, etc. Also, when calculating its emissions, the Company takes into account its transport and logistics units that ship cargoes and commercial products for the Company's benefit (e.g. Murmansk Transport Division). Therefore, the entire Group produces approximately the same amount of Scope 1 and 2 GHG emissions in terms of the Greenhouse Gas Protocol.

TOTAL WATER WITHDRAWAL,¹ MCM 303-1

In 2018, the Group's water withdrawal² grew 6.3% year-on-year and totalled 356.8 mcm. This was mostly associated with an increase in power generation and resulting growth of water consumption to cool turbine generating units at NTEK's TPP 2.

Besides, the natural inflow of mine water increased by 2.3 mcm at Polar Division and Medvezhy Ruchey and by 1.3 mcm at Kola MMC.

TOTAL WATER CONSUMPTION, MCM

Group-wide use of recycled water increased by 73 mcm (6.6%) due to enhanced water recycling at NTEK's TPP 2 and Kola MMC.

Water consumed by Polar Division decreased by 48 mcm because Zapolyarny Mine and Norilsk Concentrator were transferred to the Medvezhy Ruchey mine.

Reused and recycled water makes 85.7% of total water consumed by the Group.

¹ The total for Polar Division, Norilskenergo Branch and other operations of the Group includes water withdrawal from NTEK.

² Water withdrawal is measured with flow metering instruments.

TOTAL EFFLUENTS, MCM

306-1

In 2018, the Group's effluents grew by 17 mcm (11.4%) year-on-year and reached 164.4 mcm. This was mainly due to a 13.4 mcm increase in the discharge of standard-quality treated water used to cool turbine generating units at NTEK's TPP 2.

The amount of effluents treated to standard quality at treatment facilities grew by 457,000 m³ (7.5%).

Pollutants in effluents discharged by Polar Division and Norilskenergo (branch of MMC Norilsk Nickel) decreased by 0.3 kt to 72.7 kt.

In 2018, Kola MMC's effluents grew 16.45% year-on-year, mainly due to an increase in wastewater discharge at the Monchegorsk site where water intake for its production needs increased. At Zapolyarny and Nickel sites, effluents increased on the back of growing discharge of mine drainage and wastewater. Pollutants discharged grew by 5 kt as effluents increased.

In 2018, the Company continued implementing its plan to bring effluents in Norilsk gradually down to maximum permissible discharge rates for each controlled pollutant:

- local treatment plants were built at wastewater outlets 61 and 62 of United Motor Transport Enterprise;
- multiple activities are in progress to optimise water utilisation and disposal at Talnakh Concentrator;
- a wastewater treatment technique was developed to treat industrial effluents in the mixed storm water collector and utility tunnel of Nadezhda Metallurgical Plant;
- design documents were developed to upgrade Copper Plant's Cooling Tower 2;
- pilot tests on the technology developed by Srednyaya Volga to treat Mayak Mine's drained water delivered positive results; it was decided to use this technology as a basis for the Mayak Mine Water Treatment Project;
- search for an appropriate technique is in progress to treat water from Kayerkansky Open Pit and Limestone mine and utility effluents from Copper Plant; work is in progress to develop an alternative treatment method for drained water from Anhydride mine.

Waste management

MM3 103-2

Over 90% of the Group's production waste is classified as hazard class 5 waste (almost non-hazardous waste). This includes rock and overburden, tailings, and metallurgical slags. To minimise the environmental impact, mining waste and tailings are stored at special waste disposal sites and are used (utilised) at the Group's facilities or by other licensed specialist companies. Mining waste and tailings are used to make filling compounds or smelting fluxes, construct and reinforce tailing dumps or railroad groundwork, as road filling, etc.

All of the Group's waste disposal sites are listed on the national disposal site register. The sites are regularly monitored in line with designated environmental programmes. Tailings pits are monitored additionally as required by safety standards for hydraulic structures.

Production and consumption waste is treated in accordance with waste generation standards and waste disposal limits.

WASTE GENERATION AND RECYCLING, MT 306-2

In 2018, the Group generated 1.2 mt less waste than in 2017. The 7.55 mt reduction of waste generation at Polar Division and 1.96 mt decrease in waste recycling is explained by the spin-off of Zapolyarny Mine (both the underground and open-pit mines) and Norilsk Concentrator, which were transferred to Medvezhy Ruchey.

The year-on-year reduction of waste generation at Kola MMC in 2018, specifically the 0.3 mt decrease in overburden generation and the 0.5 mt decline in waste reuse, was due to the shutdown of open-pit operations

and decreased utilisation of overburden rock to rehabilitate depleted open pits.

In 2018, Norilsk Nickel Group re-used 70% of all produced waste and is committed to increasing this share. [WEB](#)

Per-unit indicators of environmental impact

Most per-unit environmental impact indicators of the Group show consistent downward trends.

Indicator	UoM	2014	2015	2016	2017	2018
Per-unit air emissions	t/RUB mln	4.404	4.077	3.530	3.438	2.643
Per-unit water withdrawal	thousand m ³ /RUB mln	0.772	0.689	0.599	0.625	0.489
Per-unit water consumption	thousand m ³ /RUB mln	3.109	2.808	2.668	2.500	1.937
Per-unit effluents	thousand m ³ /RUB mln	0.319	0.277	0.262	0.275	0.226

Indicator	UoM	2014	2015	2016	2017	2018
Pollutants in effluents, per unit	t/RUB mln	0.308	0.302	0.352	0.404	0.319
Per-unit waste generation	kt/RUB mln	0.077	0.066	0.061	0.059	0.042

All RUB mln figures are hereinafter given per RUB mln of consolidated revenue.

Biodiversity conservation103-2

Nornickel recognises the importance of biodiversity and seeks to minimise any potential negative environmental impact of its operations. The Company's approach is documented in its Biodiversity Conservation Policy approved by the Board of Directors.

Its focus areas include land rehabilitation, cooperation with nature reserves, and reproduction of aquatic bioresources. The Let's Do It environmental marathon plays an increasingly important role and brings together thousands of Company employees and local community members to support nature reserves, clean up certain areas, transplant young trees, and carry out other environmental initiatives.

Nornickel supports programmes aimed to study and preserve rare and endangered species listed on Russia's Red Data Book, including Siberian bighorn sheep, polar bears, lesser white-fronted geese and others.

Land rehabilitation

The Company is developing Oktyabrskoye, Talnakhskoye and Norilsk-1 Deposits on the Taimyr Peninsula, Zhdanovskoye, Zapolyarnoye, Kotselvaara and Semiletka Deposits on the Kola Peninsula, and Bystrinskoye Deposit in the Trans-Baikal Territory.

Pursuant to the Russian laws, design documents for capital construction projects, including field development, must have a section describing environmental protection and monitoring initiatives to track changes across the ecosystem resulting from ongoing development, construction or accidents.

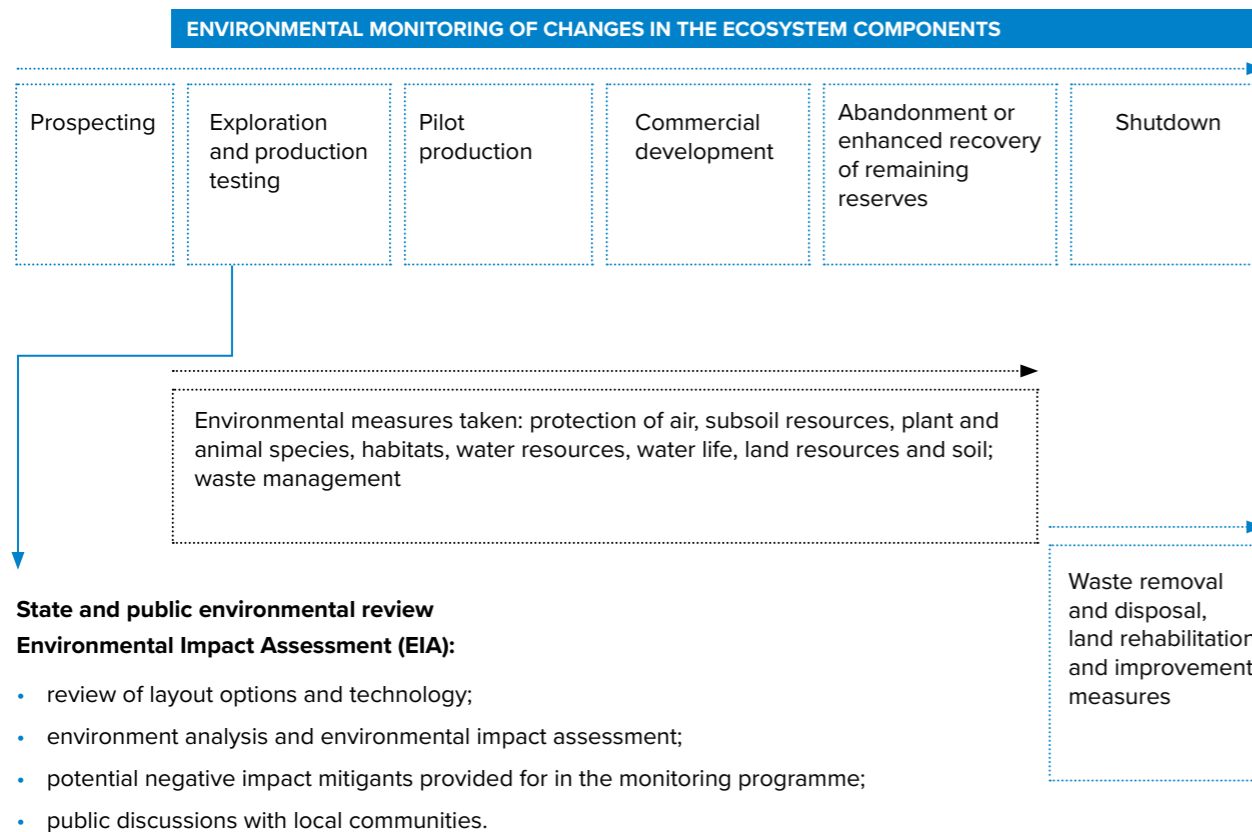

The Company has field development, mine liquidation and land rehabilitation project documents in place for all of its deposits, with special provisions made for rehabilitation activities. The project design documents provide for layouts, slopes, hydraulic and irrigation structures, and other technical measures. Importantly, the Company's deposits are in commercial development, exploration or production test stages with liquidation or abandonment not expected until 2050.

The Company complies with all applicable regulations for land rehabilitation and other environmental protection initiatives associated with field development, construction and other operations.

DISTURBED AND REHABILITATED LAND AREA IN 2018, HA¹ MM1

Indicator	Total	Including			
		during mining	during construction	during disposal of solid domestic and industrial waste	during other activities

Total rehabilitated area	31.70	31.70	0.00	0.00	0.00
Total disturbed area in the reporting period	0.10	0.10	0.00	0.00	0.00
Total disturbed area, end of period	14,915.33	12,724.32	430.75	591.84	1,168.40

ENVIRONMENTAL PROTECTION AND MONITORING MEASURES TAKEN DURING THE DEPOSIT LIFE CYCLE 304-3 MM1

¹ Medvezhy Ruchey was included in the reporting perimeter in 2018.

Nornickel traditionally takes part in urban greening projects in Norilsk, Dudinka, Monchegorsk, Zapolyarny, and Nickel. The disturbed area reclamation programme is implemented in cooperation with local authorities and volunteers and seeks to clean up and improve public spaces and areas around motorways, protect water bodies and water reserves, and revamp tourist camping sites.

In 2003, Kola MMC started implementing a land rehabilitation programme as advised by nature reserves. In just 14 years, Kola MMC had over one million trees and bushes planted over an area of about 100 ha, including as part of a pilot project to restore damaged land adjacent to the Company's production site in Monchegorsk implemented jointly with Kola Science Centre of the Russian Academy of Sciences.

Cooperation with nature reserves

304-1 304-2 Kola MMC is located 15 km from the Pasvik Nature Reserve and 10 km from the Lapland Biosphere Reserve, while Polar Division's sites are some 80–100 km away from the buffer zone of the Putoransky Nature Reserve. Bystrinsky GOK is located 160 km away from the Relict Oaks State Reserve (the Trans-Baikal Territory). At present, the Company's operations do not produce any significant impact on areas that are in relative vicinity to the nature reserves and areas of high biodiversity value outside protected areas. The Company's cooperation with nature reserves focuses on developing research and technology and supporting their social, volunteering and environmental awareness programmes.

Taimyr Peninsula

The **Putoransky State Nature Reserve** has been on the UNESCO world heritage list since 2010. It is one of the biggest nature reserves in Russia with a total area of over 1,887,000 hectares. The reserve is part of the Joint Directorate for Taimyr Nature Reserves, which also includes the Taimyrsky and Big Arctic reserves, as well as the Purinsky and Severozemelsky natural protected areas.

The Joint Directorate for Taimyr Nature Reserves implements environmental projects selected under Nornickel's World of New Opportunities charitable programme to support socially important initiatives. The projects focus on raising environmental awareness, environmental protection, engagement of local communities, land improvement, and landscaping.

In 2018, the Company helped Taimyr's nature reserves to organise environmental raids and transport research groups to remote locations.

Kola Peninsula

The Company cooperates with the Lapland and Pasvik Nature Reserves in multiple areas. The key ones are environmental monitoring and vegetation restoration in the vicinity of Kola MMC's production sites.

The Pasvik State Nature Reserve is featured as one of the Wetlands for the Shadow List of Ramsar Sites under the name of Fjarvann — Schaanning's Field Base. It covers a total area of over 14,000 ha. **Pasvik** is the only Russian nature reserve holding the EUROPARC Federation's certificate, which is awarded to the best protected areas worldwide. Such certification is an important condition for international cooperation with foreign nature reserves.

Since 2006, the Pasvik Nature Reserve has been carrying out an assessment of the natural environment in the area of Pechenganickel Plant (including Zapolyarny, Nickel and their suburbs, as well as the Pasvik State Nature Reserve), and developing a long-term environmental monitoring programme. The reserve is also working on several projects that received grants under the World of New Opportunities charitable programme. The projects seek to reach out to Russian and Norwegian audiences and cover a variety of topics, including traditional use of natural resources, raising environmental awareness among schoolchildren, and promoting research. In 2018, the Company donated a mobile environmental laboratory that is based on a four-wheel drive KAMAZ vehicle and fully adapted to work in the Arctic conditions.

Pasvik's Visitor Centre, which was built with support of the Company, is an international platform for academic forums and educational activities focused on environmental protection issues.

With an area of 278,000 ha, the **Lapland State Nature Biosphere Reserve** is one of the largest protected areas in Europe and also one of Russia's oldest nature reserves (founded in 1930). In 1985, it was included in the UNESCO Network of Biosphere Reserves.

In 2002, Kola MMC and the Lapland Biosphere Reserve signed contracts for the development of a methodology to reclaim disturbed natural environments in the areas affected by permanent emissions from Severonickel Plant and monitoring of the Monchegorsk District and the Lapland Biosphere Reserve. Research results provided a basis for further rehabilitation of disturbed lands and for sanitary and fire protection improvements in forest areas.

The Company supported creation of multiple ecotrails, including the first ecotrail for children called "A Curious Child out in the Woods," and publication of books on the reserve founders.

In the **Rybachy and Sredny Peninsulas Natural Parks**, environmental routes and information facilities are developed on the territory covering over 83,000 ha under an agreement between the Company and the Murmansk Region Government.

Trans-Baikal Territory

The oak grove in the Gazimuro-Zavodsky District is Siberia's only grove of natural origin that has survived to the present day. The grove spans 30,000 ha and is located along the Argun River. As part of the agreement with the region's government, Nor Nickel provides financial aid in effectively protecting and exploring the ecosystems within the Relict Oaks State Reserve. The Company financed the acquisition of video monitoring devices and camera traps for the reserve. It also plans to help put in place research facilities and run educational programmes for children and adults. [WEB](#)

Impacts from transport operations [WEB](#)

Fleet	Transported products	Social and environmental responsibility	Outcome
Group's own fleet	Products of the Group companies Products procured to meet the Group's internal needs Commercial and social cargo	Compliance with international conventions, codes, guidelines, Russian laws, regulations and requirements Four freight-forwarding licences, all environmental permits in place Multi-stage control from the Group companies, other transportation participants and supervisory bodies Security and industrial health and safety management systems in place at facilities	No significant environmental impact produced by the Company's freight and personnel transportation
Fleet chartered by the Group's Metal Trade Overseas	Norilsk Nickel Group's products	Compliance of the fleet's environmental parameters with the requirements of international environmental conventions	

Reproduction of aquatic bioresources

The Company provides annual financing for the measures to breed valuable fish species, including those listed on Russia's Red Data Book, and release them into natural water bodies. Every year, certain populations of juvenile Siberian sturgeon and grayling are released into the Yenisey River in the Krasnoyarsk Territory; Atlantic salmon is released into the Uмба River in the Murmansk Region. Specialised fish farms and research institutions are engaged in taking these measures. Another "green" project to restore and preserve the fish population will be implemented in the Trans-Baikal Territory.

Impacts from foreign operations

Norilsk Nickel Harjavalta has necessary environmental permits and an integrated management system certified to ISO 9001, ISO 14001, and OHSAS 18001.

Norilsk Nickel Harjavalta's main environmental impact consists in the emissions of ammonia (NH₃) and nickel (Ni), and discharges of nickel, sulphates (SO₄²⁻) and ammonia ions (NH₄⁺)

ENVIRONMENTAL IMPACT METRICS OF NORILSK NICKEL HARJAVALTA

Indicator	2016	2017	2018
Industrial wastewater (thousand m ³)	771	899	988
Pollutants in industrial wastewater (t)			
• Ni	0.4	0.5	0.6
• SO ₄ ²⁻	22,457	25,853	30,189
• NH ₄ ⁺ (rebased to nitrogen)	49.5	60.3	70
Total water consumption (mcm)*	10.9	11.1	11.8
Total air pollutant emissions (t)	71.6	70.7	85.2
• Ni	1.6	1.7	1.2
• NH ₃	70	69	84
Waste generation (kt)	7.0	5.5	2.8
Waste disposal (kt)	0.8	0.8	1.1
Power consumption (GWh)	180	182	209
Power consumption for heating/cooling (GWh)	130	145	150
Steam consumption (GWh)	225	235	327
Environmental expenses, USD mln	2.7	1.0	0.7

* Over 95% is water withdrawn from surface sources (Kokemäenjoki River).

In 2018, Norilsk Nickel Harjavalta met all permit requirements for emissions, discharges and waste disposal volumes. Lower waste volumes resulted from switching to the Company's feedstock that is less contaminated with impurities as compared to third-party materials. The increase in effluents and pollutant emissions was driven by the growing output.

Energy saving and energy efficiency

103-2

The Company's distinguishing feature is that most of its production facilities and workforce operate and live in the harsh Arctic climate. Nor Nickel uses an integrated approach to the energy infrastructure development, combining goals of reliability

improvement with those of low-carbon economy. Nor Nickel makes continuous efforts to reduce consumption of such fuels as diesel fuel, coal and natural gas, as well as to provide its subsidiaries with reliable and efficient energy sources in the long term.

The Company's priority renewable source of energy is hydropower generated at the Ust-Khantayskaya and Kureyskaya HPPs (481 MW and 600 MW of installed capacity respectively). These unique HPPs are among the world's northernmost ones constructed in the Arctic. The use of other renewables such as

solar, geothermal and wind energy is constrained by geographic factors, such as long polar night and unsteady wind intensity.

Development of the fuel and energy assets is governed by the Fuel and Energy Development Strategy and the Programme to Upgrade, Revamp and Replace the Norilsk Industrial District's Power Facilities through 2025. For the purposes of implementing a uniform R&D policy and meeting the targets of the Fuel and Energy Development Strategy, the Company established an energy section with its R&D Council.

NORNICKEL'S FUEL AND ENERGY ASSETS

- **NTEK** supplies electric power, heat and water to Norilsk and all facilities in the Norilsk Industrial District
- **Taimyrgaz** develops the Pelyatkinskoye Gas Condensate Deposit
- **Norilskgazprom** develops the Severo-Soleninskoye Gas Condensate Field, Yuzhno-Soleninskoye Gas Condensate Field, and Messoyakhskoye Gas Field
- **Norilsktransgaz** transports natural gas and condensate produced by Norilskgazprom and Taimyrgaz
- **Arctic-Energ** is Kola MMC's default supplier based in Monchegorsk

Gasoline and aviation fuel ¹	–	–	3,789	5,178	4,127

To achieve its energy development goals and targets, the Company runs investment projects approved by the Investment Committee. In 2018, the Company continued to enhance the reliability of generating equipment, grid and gas transportation infrastructure and boost gas output.

The Ust-Khantayskaya HPP is implementing a large-scale project to replace equipment in hydroelectric units. The fourth unit was commissioned in 2018. In 2012, the Company made a decision to replace adjustable blade hydroelectric units that had been

operating for over 40 years. The new units boast better reliability and a service life of at least 50 years.

The Company was also implementing its Polar Division Energy Saving and Energy Efficiency Programme for 2013–2018, which was approved by Polar Division's First Deputy Director and Chief Engineer.

Each year, the Company develops and implements organisational and technical action plans to save fuel, heat, power and water.

SUPPORT AND DEVELOPMENT OF SPORTS

For many years, MMC Norilsk Nickel has provided support to the international university sports movement. Since 2015, the Company has been a general partner to the 2019 International Winter Universiade in Krasnoyarsk. In total, Norilsk Nickel contributed in excess of RUB 2.1 bn to the 2019 Winter Universiade.

Regional development 103-2

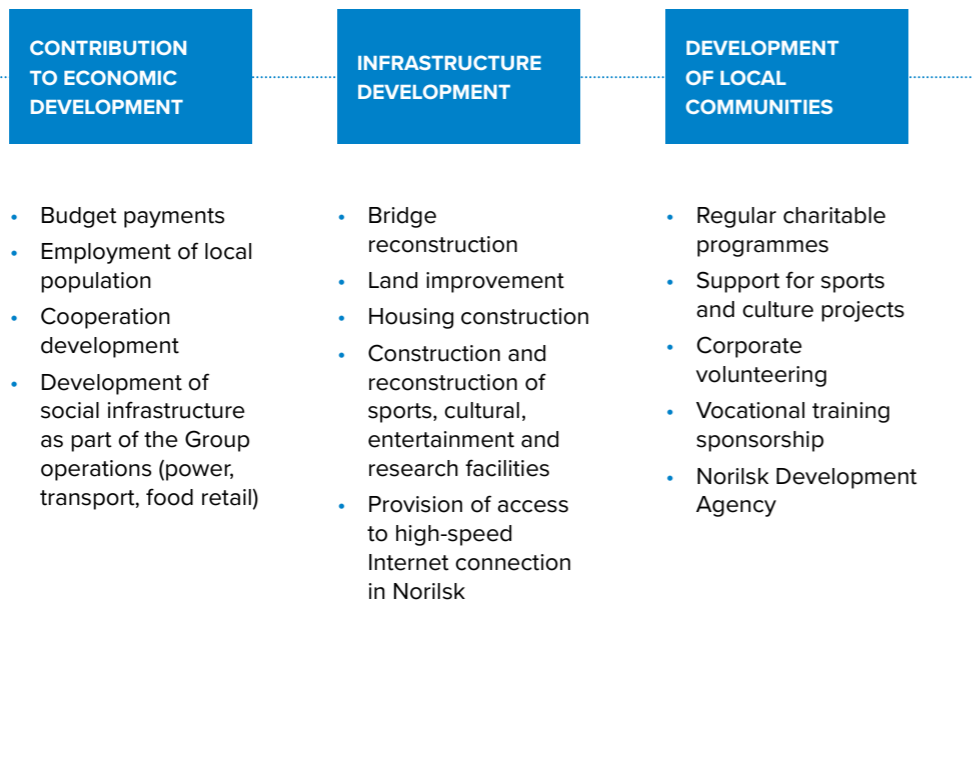

Nornickel is one of the major employers and taxpayers in Russia.¹

The Company makes a significant contribution to the development of local communities by implementing a range of social programmes that address current and potential future issues.

THE COMPANY'S CONTRIBUTION TO THE DEVELOPMENT OF LOCAL COMMUNITIES

The Group's operations as a backbone of local economies 203-2

The Company's key regions of operation in Russia include the cities of Norilsk and Monchegorsk, the Taimyrsky Dolgano-Nenetsky Municipal District of the Krasnoyarsk Territory, the Pechengsky District of the

Murmansk Region, the Tazovsky District of the Yamal-Nenets Autonomous Area, and the Gazimuro-Zavodsky District of the Trans-Baikal Territory. Saratov hosts Nornickel's Shared Services Centre. In the Tver Region, the Company is engaged in the construction of housing for its employees under My Home and Our Home programmes.

SPENDING ON SOCIAL, CHARITABLE AND SOCIAL INFRASTRUCTURE PROGRAMMES, RUB MLN 203-1

Budget payments

TAX AND NON-TAX PAYMENTS¹ TO LOCAL, REGIONAL AND FEDERAL BUDGETS, RUB BN

Budget	2014	2015	2016	2017	2018
Total tax and non-tax payments, including	79.2	88.7	91.5	100.3	115.6
Federal budget	13.5	11.9	14.1	14.3	18.3
Krasnoyarsk Territory consolidated budget	37.1	43.6	41.6	47.8	55.9
Norilsk budget	4.1	5.5	4.7	5.0	5.2
Murmansk Region budget	7.0	8.2	7.8	8.2	10.6
Trans-Baikal Territory budget ²	-	-	-	0.9	1.2

Changes in the tax and non-tax payments for 2018 were due to the higher income tax (on the back of increased revenue) and property tax (as a result of growing CAPEX), as well as the planned payroll budget increase.

Employment of local population

As the major employer across its footprint, the Company provides ample career guidance and job opportunities for local communities, including younger population groups.

The main target audience of career guidance events are children and young people under 35 years old. The Company builds partnerships with educational organisations and engages young workers, while also providing robust support for talented teachers, engineering training and whipping up interest in engineering and blue-collar jobs.

To reduce unemployment, MMC Norilsk Nickel and Norilsk Employment Centre signed an agreement aimed at retraining those out of work for the most needed blue-collar jobs.

¹ The information presented in this section refers to the Company's Russian operations.

¹ Tax and non-tax payments include all taxes paid, net of VAT and dividend income tax, as well as insurance payments and customs duties.

² Payments to the Trans-Baikal Territory budget have been presented separately since 2017.

Cooperation development

As part of its social and economic partnership agreements signed in 2009 and 2016, the Company has been cultivating cooperation with the companies of the Krasnoyarsk Territory and the Murmansk Region. Integration of local businesses into the Group's production chain (mainly through long-term contracts) makes a sizeable contribution to the development of the regions of operation, particularly by supporting small and medium-sized businesses.

UNEMPLOYMENT IN KEY COMMUNITIES,¹ %

food supplies	859.3	0

Podsolnukh store chain

The Podsolnukh store chain, a part of Norilsk Nickel Group, takes its fair share of the retail market in the Norilsk Industrial District with nine stores, including one hypermarket. The SKU range of the chain includes socially significant goods (vegetables, fruit,

cereals, dairy products, meat, canned foods, eggs, sugar, etc.) that are offered at substantially lower prices than in other regional stores. The average retail prices in the Podsolnukh store chain grew notably slower than the official inflation rate.

¹ As at the end of the reporting year.

Infrastructure development

The Company is actively involved in the development and renovation of social infrastructure, looking to create accessible and comfortable environments for working and living in the regions. Nor Nickel sponsors improvement of public areas, supports construction and renovation of sports facilities, transport infrastructure and housing, and promotes

development of educational infrastructure. While delivering these initiatives, the Company is committed to creating a barrier-free environment for individuals with mobility impairments, including physically challenged and elderly people, pregnant women, etc.

The Company's expenses on social infrastructure development projects totalled RUB 3.6 bn in 2018.

KEY SOCIAL INFRASTRUCTURE DEVELOPMENT PROJECTS IN 2018

Region	Focus area	Projects
Krasnoyarsk Territory	Land improvements	Architectural lighting at the Kommunalny Bridge over the Yenisey River, a landmark structure in Krasnoyarsk
		Improvement of left embankments of the Yenisey River and Kacha River and adjacent territories
		Installation of smart bus stops fitted out with safety and surveillance systems, mobile chargers, Wi-Fi hotspots and other capabilities in Krasnoyarsk
	Sports	Landscaping of the Dolgoye Lake embankment in Norilsk
		Construction of a multi-purpose sports and recreation centre for team sports in Norilsk
		Development of a golf field in Krasnoyarsk
Education	Supporting the Development Laboratory for Dynamic Mining and Processing QC System with the Siberian Federal University	
Transportation	Reconstruction of road bridges in Norilsk	
	Reconstruction of Norilsk airport	
Housing	Implementation of the Comfortable Taimyr project to construct housing in Tukhard, Taimyrsky Dolgano-Nenetsky Municipal District	
Trans-Baikal Territory	Land improvements	Reconstruction of Dekabristov Square in Chita
		Improvement of public areas in the Trans-Baikal Territory

Development of local communities

Charitable programmes

Since 2014, the Company has been implementing World of New Opportunities, a charitable programme to encourage and promote sustainable development of local communities. The programme is designed to develop soft skills in local communities, demonstrate and introduce new social technologies, support and promote public initiatives, and encourage cross-sector partnerships.

In 2018, after the commissioning of Bystrinsky GOK in the Trans-Baikal Territory, the World of New Opportunities geography expanded to cover the Gazimuro-Zavodsky District, which now hosts Nor Nickel's Socially Responsible Initiatives Competition, Arctic.PRO R&D marathon and School of Urban Competencies.

Partnership, Innovations and Development are three focus areas of the World of New Opportunities programme.

Partnership focuses on supporting volunteer initiatives of local activists, fostering new skills and developing local expertise.

Its key initiatives comprise:

- workshops on social design, expert review and assessment of projects/programmes, creative thinking, and social engineering;
- a socially responsible initiatives competition;
- School of Urban Competencies for schoolchildren;
- We Are the City! social technologies forum;
- School of Urban Event Managers for local activists;
- We Are the City! PicNick urban event. [WEB](#)

All events arranged by the Company served to raise charity awareness in local communities and encourage public-private partnerships. In 2017, the Socially Responsible Initiatives Competition, which aims to support public initiatives, received 426 project bids, 116 of which were approved for funding. The pool of grants totalled RUB 125 mln.

Another focus area, **Innovations**, centres around the implementation of advanced technologies, R&D potential and innovations in engineering. Its target audience are schoolchildren, university students and adult activists interested in science and frontier technologies.

Its key initiatives comprise:

- Arctic.PRO R&D marathon;
- FabLab R&D creativity laboratories;
- Science 0+ festival in Krasnoyarsk and Murmansk;
- I Make young inventors competition. [WEB](#)

The third focus area, **Development**, targets active citizens and SMEs with the goal of addressing local communities' social issues with the benefit of business processes.

Its key initiatives comprise:

- Social Entrepreneurship training course;
- Convention of Social Entrepreneurs from the North. [WEB](#)

The World of New Opportunities programme had the following social impact:

- local communities became the driving forces of social activity and change;
- more young people were involved in community affairs;
- new services emerged in education, culture, physical

activity and sports, and so did new forms of recreation for both children and adults;

- strong partnerships were established;
- a pool of local social engineering and project assessment experts was formed;
- travel grants were established for community leaders to participate in regional and national conferences and forums and grow professionally;
- social technologies.

The World of New Opportunities charitable programme shows the Company's commitment to migrating from the paternalistic model to social partnerships and active community involvement. A competition-based approach helps selecting the most interesting projects, achieving specific results in social issues and using social investments in the most efficient way. Along with providing financial assistance, the Company shares knowledge with the programme participants and creates an environment for the development of community initiatives and support of innovative ideas.

Targeted charitable support

The Company continued providing targeted charitable donations in response to special requests from organisations. In 2014, Polar Division and Kola MMC set up dedicated charity committees to review such requests. Certain donations are also approved by the Company's management. The Company supports entities dealing with vulnerable groups of population (veterans of World War II, disabled people, multi-child families, children with special needs, financially disadvantaged citizens) and finances the participation of local non-profit organisations and institutions in various sports competitions, creativity contests, etc.

Vocational training sponsorship

Every year Polar Division provides financial support to Norilsk's institutions of secondary and higher vocational education by buying books and specialised equipment for students, contributing to the maintenance works, and thus improving the quality of training. The Company primarily focuses on the training of specialists for the most in-demand jobs.

Corporate volunteer programme

Volunteering is a vital part of the Company's corporate culture as it unites employees based on shared values and helps identifying and developing employee competencies that are essential for the purposes of sustainable development, particularly mobility, responsibility and leadership.

In 2018, about 400 initiatives were carried out in Moscow, Norilsk, the Kola Peninsula, and Chita as part of the Plant of Goodness corporate volunteer programme. Volunteers participate in environmental activities, such as clean-up campaigns, master classes and other training events, hospital clowning, charitable runs, performances and fairs. In addition, the Company launched an employee personal donation programme that collected nearly RUB 4.3 mln in 2018.

In 2018, Andrey Urgant presented his volunteer play entitled Travel Notes about Norilsk Volunteers. Income from ticket sales was donated to the House with Tail animal shelter in Monchegorsk and the Giving

Hope charity foundation helping stray animals. Leading roles were played by the volunteers who participated in Let's Do It, Norilsk's environmental marathon.

Started as a local movement in Monchegorsk in 2015, the Let's Do It environmental marathon transformed into a large year-round event uniting thousands of employees, local volunteers and concerned citizens from across the regions where the Company operates. As part of the marathon, the Company organises clean-up days, shoreline garbage collection initiatives, bush and tree planting, support of natural reserves, and eco-friendly lifestyle workshops.

The Plant of Goodness programme won prizes at several prominent Russian and international competitions, receiving acclaims from the expert community. [WEB](#)

Norilsk Development Agency¹

Activities of the Norilsk Development Agency are yet another example of how the regional social policy is implemented and how the government and businesses collaborate in social impact areas.

The Agency's mission is to lay the foundation for accelerated development of the city's service economy as a way of improving Norilsk's living standards and promoting local products and services on external markets. The Norilsk Development Agency is a long-term partnership project of Norilsk, Norilsk municipal authorities and Vladimir Potanin Foundation.

CORPORATE VOLUNTEER PROGRAMME: 2018 HIGHLIGHTS

Initiatives	Results/participants
Andrey Urgant's Travel Notes about Norilsk Volunteers	50 corporate volunteer actors RUB 361,540 collected for charity
Let's Do It environmental marathon	375 environmental campaigns and initiatives 43 corporate environmental teams 25,000 trees planted 12,000 local residents participated
Personal donations	RUB 4,295,303 collected for charity
Catch the Eco Wave environmental quest	450 participants 78 environmental teams
Dobronickel festival	1,500 employees and their family members participated
Norilsk, Run with Me! charity run	3,300 participants RUB 930,000 collected for charity

¹ For more details on the Norilsk Development Agency activities, please visit www.arnorilsk.ru.

The Agency's key focus areas are as follows:

- Business (Norilsk as a city of developed service economy);
- Development (Norilsk as a city of modern selling spaces);
- Tourism (Norilsk as a city attractive for tourists);
- Social and Cultural Projects (Norilsk as a city of rich social and cultural life).

In 2018, the Agency carried out a total of 21 projects and 35 initiatives that involved 46,470 people. The Norilsk Development Agency is a partner to more than 100 organisations.

Among its 2018 achievements were a spatial development concept for the city of Norilsk, a website for the Ready-Made Business and Franchising Centre, and a survey entitled the City Resident's Social Portrait.

The Agency also developed the first-ever municipal programmes for the promotion of tourism in Norilsk and the Taimyrsky Dolgano-Nenetsky Municipal District in 2019–2025.

The plans for 2019 are to launch an SME Business Navigator website, organise training courses for entrepreneurs, develop a sketch design of the Arctic Museum of Contemporary Art, establish a vocational training infrastructure for the tourism industry personnel, assist in the establishment of tourist information centres, etc.

Support for sports projects¹

As an active supporter of sports, Norinickel sponsors major Russian and international sports organisations and provides financing for the upgrade of sports facilities, construction of sports schools and playgrounds.

29th International Winter Universiade in Krasnoyarsk (2–12 March 2019)

For many years, MMC Norilsk Nickel has provided extensive support to the international university sports movement. Since 2015, Norinickel has been a general partner to the 2019 International Winter Universiade in Krasnoyarsk.

According to current estimates, the Company will spend over RUB 2.1 bn to organise and hold the 2019 Winter Universiade.

In 2018, several large projects were implemented by the Company in the run-up to the 2019 Winter Universiade in Krasnoyarsk:

- a large-scale upgrade of the Bobrov Log Fun Park, including a comprehensive renovation of its security systems;
- establishment of a landscaped park along the Bazaikha River in Krasnoyarsk;
- sponsorship of training courses for mid- and top-level managers and volunteers involved in the preparation for the Winter Universiade;
- promotion of the 2019 Winter Universiade in the media. [WEB](#)

Support for cultural projects

Cultural projects are an integral part of the Company's general strategy to improve the quality of life across the regions of operation. Consistent efforts in this area are integrated into the World of New Opportunities programme, activities of the Norilsk Development Agency and other initiatives.

The Follow up Siberia! project was short-listed by the Eventiada IPRA Golden World Awards, the largest communications award in Eastern Europe. This cross-cultural initiative was launched by Norinickel in the run-up to the 29th International Winter Universiade 2019 in Krasnoyarsk.

Along with holding corporate events and competitions attracting tens of thousands of employees and their families each year, the Company also supports prominent all-Russian cultural projects. In 2018, such projects were:

- Follow up Siberia! international cross-cultural initiative in support of the 29th International Winter Universiade 2019;
- Golden Mask festival, the main annual theatrical event in Russia, held in Chita for the first time. The Zabaikalsky Regional Drama Theatre hosted famous directors, scriptwriters, theatre and cinema stars. The festival programme also included workshops;
- Dancing Sky pan-Russian dancing competition (Norilsk);
- Intermuseum 2018 international festival (Moscow);
- Nordic Character: Green Screen international environmental and social cinema festival (Nickel, the Murmansk Region);
- Living Classics young readers competition;
- a series of meetings with prominent art professionals from Europe, the USA and Russia as part of the Culture Unlimited. Dialogues with Present-Day Cultural Leaders programme (Moscow);
- 3rd Taburetka International Literature Festival (Monchegorsk, the Murmansk Region);
- Centres for Social Innovation in Culture, a competition aimed at finding and promoting successful social and cultural models (Russia);
- Museum for Everyone!, a pan-Russian inclusive initiative aimed at creating a comfortable museum environment for each visitor. This is the second

large-scale event arranged as part of the Inclusive Museum project (Russian cities);

- Museum 4.0 Competition to support national museums (Russia);
- Museum Leaders professional development programme as part of the Museum. Power of the Place initiative. The event was attended by 30 representatives from 16 Russian cities (Moscow).

In 2018, Andrey Urgant presented his Travel Notes about Norinickel Volunteers, a unique play featuring volunteers as leading actors. The play became a link between the Year of Volunteers and the Year of Theatre in Russia.

Assessment of social programmes

103-2 103-3

The Company has a comprehensive assessment system for social programmes and projects in place. The key criterion used to select social projects for implementation is their social impact, i.e. effects they have on various aspects of life and society. The social impact is assessed throughout the lifecycle of the programme or project implemented and upon their completion. Assessment tools vary from targeted stakeholder surveys and opinion studies to actual performance indicators, including those set out in the programme specifications or social and economic cooperation agreements.

Nornickel's strong social and environmental commitment involves a framework of social programmes and benefits going far beyond the minimal statutory programmes required by law. When developing and implementing its social policy, the Company carries out the following:

- assessment of social climate in teams through designated meetings on social and labour issues;
- annual employee engagement surveys;
- annual polls among social programme participants (health resort treatment, children's vacation, corporate gifts programmes, cultural, entertainment and sports events);
- quarterly surveys and annual assessment of My Home/Our Home and Corporate Subsidised Loan housing programmes;
- regular performance assessment of the World of New Opportunities charitable programme;
- performance assessment of the social projects financed with the Company's grants (at the financing decision stage, during the monitoring and implementation).

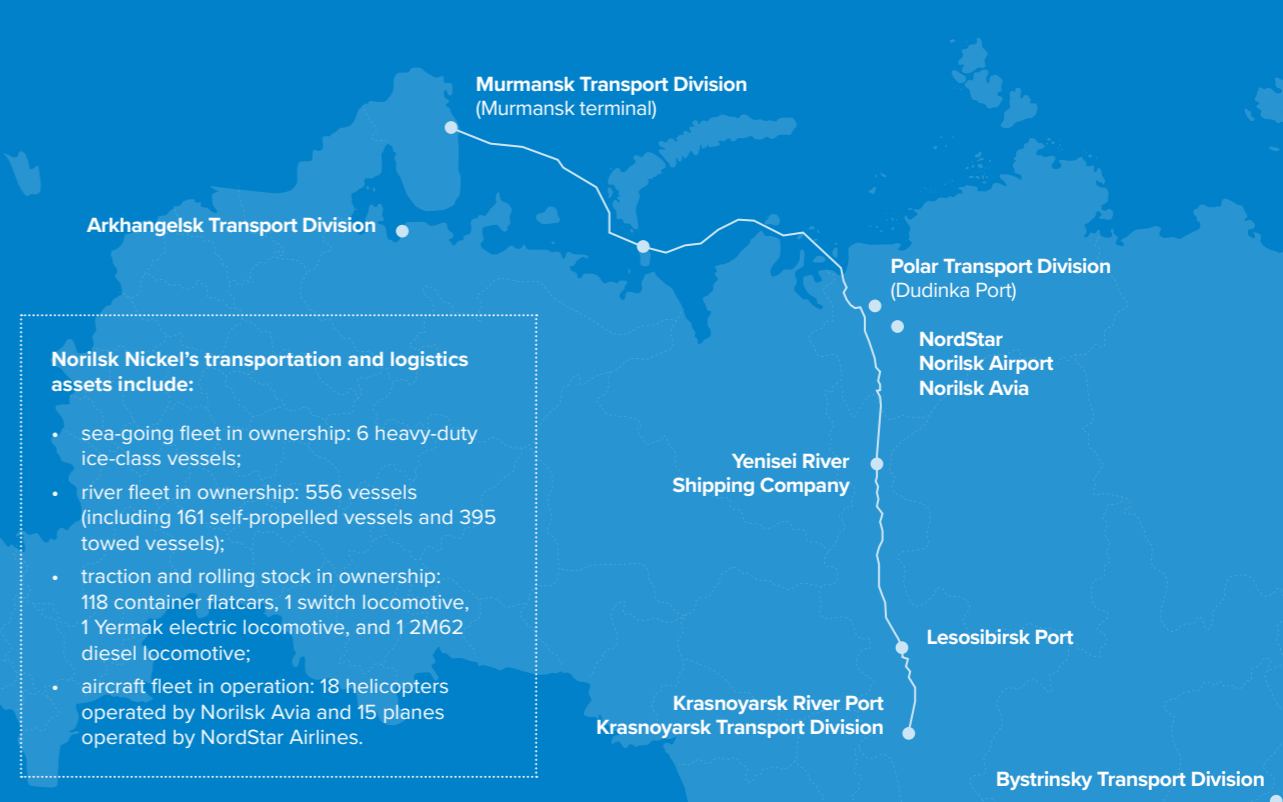

The Company also makes a monthly report on the social climate in the regions of its operations and participates in competitions to have its initiatives independently assessed and publicly recognised.

Public-private partnerships are assessed at different management levels to support optimal sustainability decisions in the regions where the Company operates.

Transport accessibility

With its reliable state-of-the-art transport infrastructure, Nor nickel is capable of meeting any freight logistics challenges and ensures continuity and sustainability of operations and well-being of local communities.

The Company's **dry cargo fleet** provides year-round freight shipping services between Dudinka, Murmansk, Arkhangelsk, Rotterdam, and Hamburg sea ports while also covering other destinations.

The **Yenisey tanker** is used to transport gas condensate from the Pelyatkinskoye Gas Condensate Deposit to European ports and other destinations.

Dry cargo transported by the Company's fleet amounted to 1.4 mt in 2018, up 7.7% year-on-year. Transportations by the Yenisey tanker rose to 222 kt, a 37.2% increase year-on-year.

The Company and other companies of the Group handle cargo in the ports of **Dudinka, Murmansk, Lesosibirsk and Krasnoyarsk**.

Dudinka Port (Polar Transport Division) is the world's only port flooded every year during spring high water and accessible by both sea and river vessels. Its cargo turnover in 2018 increased 9.3% year-on-year.

Bystrinsky Transport Division is responsible for the operation and maintenance of the 227 km Naryn (Borzya) — Gazimursky Zavod railway line (Trans-Baikal Territory).

Yenisey River Shipping Company transports socially important cargoes to destinations across the Krasnoyarsk Territory. During the short period of spring floods, it delivers fuels and lubricants, food and other goods to locations with limited transport accessibility on the Podkamennaya and Nizhnyaya Tunguska rivers and in other areas, including Dikson, Russia's northernmost settlement. The shipping

company operates its own search and rescue fleet and takes part in emergency response missions on internal water routes of the Yenisey Basin.

Murmansk Transport Division is responsible for local shipments in the lower reaches of Yenisey, to the north of Dudinka Port. Dudinka Port receives foods and delivers socially important cargoes for local residents, including indigenous peoples of the North, ships cargoes for the Russian Emergency Situations Ministry and transports residents of remote coastal areas.

Destinations covered by NordStar Airlines include more than 30 Russian and CIS cities. With passenger traffic in excess of 1 million people per year, **NordStar** operates year-round direct flights from Norilsk to over 10 destinations in Russia and annually reaffirms its status of Russia's major air carrier. In 2018, the air carrier transported 1.44 million passengers. It offers regular and charter flights and transports passengers to interregional budget subsidised destinations, with tickets sold at reduced tariffs.

Norilsk Avia is the only air operator capable of responding to both industrial and social emergencies in the region (the Norilsk Industrial District and the Taimyrsky Dolgano-Nenetsky Municipal District). The Company meets regional demand for passenger and commercial traffic, including emergency ambulance flights as part of search and rescue operations spanning up to 280 km from Norilsk Airport. According to regulations, emergency flights are a mandatory condition for all air transportation services in the region, including long-haul flights.

In 2018, the third construction season, the upgrade of **Norilsk (Alykel) Airport's** runway was finally completed. Today, the runway meets the latest flight safety requirements. It was reconstructed while the airport continued its operations, which had never been done before either in Russia or abroad.

Awards and accolades 103-3

Awards of MMC Norilsk Nickel

Safety and security:

- letter of gratitude from the Russian Union of Industrialists and Entrepreneurs (RSPP) for a significant contribution to improving industrial safety regulations and creating a favourable investment climate;
- 16th National IT Leader Award 2018 in the Non-Ferrous Metallurgy category for introducing personnel and machinery positioning and radiocommunication systems at Zapolyarny Mine.

Environment:

- letter of recognition from the Russian President for the contribution to the Year of the Environment in Russia;
- certificate of honour from the Federation Council for a major contribution to reducing the environmental impact;
- ranked by RAEX rating agency as the winner of the Business Leaders: Environmental Expenses nomination;
- Best Environmental Volunteer Team (Let's Do It environmental marathon award).

Society:

- Vladimir Putin, President of the Russian Federation, honoured Nor nickel's employees with government awards for the construction of a fibre optic communication line between Novy Urengoy and Norilsk;
- Annual Innovation Time 2018 award (Follow Up Siberia! international communication initiative won the Project of the Year in the Mass Media and Mass Communications category);
- grand prize of the Skolkovo Trend Award 2018 for corporate educational initiatives;
- HR Brand of the Year award by HeadHunter and RBC Media Group (the corporate volunteering programme won the Big Heart nomination);
- Russia's Best Employers ranking by HeadHunter and RBC Media Group (winner in the Best Employer in the Russian metals and mining industry category);

¹ The scope of data collection is set in such a way as to describe all of the Group's material impacts. The scope has not undergone any significant changes compared to the previous reporting period. The Report provides results for all the companies within the scope against each aspect. In addition to the Occupational Health and Safety, the working group has classified the following aspects beyond the Group as material: Anti-Corruption, Product and Service Quality Compliance, Emergency Preparedness. These have been described in the Report by disclosing the Company's approaches to implementation of responsible practices in its supply chain.

² For the purposes of data collection, foreign assets mean Norilsk Nickel Harjavalta.

³ As regards pension plans, the reporting perimeter includes only the Group's business units benefiting from the Co-Funded Pension Plan.

⁴ As regards nationality, the reporting perimeter includes all business units of the Group.

⁵ As regards energy conservation, the reporting perimeter includes Polar Division, Kola MMC and NTEK.

⁶ As regards benefits offered to employees, the reporting perimeter includes only Polar Division and Kola MMC.

⁷ As regards staff assessment, the reporting perimeter includes only the Head Office, Polar Division, Kola MMC and Pechengastroy.

■ Information is collected on all companies of the business block
■ information is collected on key companies of the business block

The detailed table including the names of the Group companies and branches can be found in the interactive version of this Report. [WEB](#)

Appendix 3
Map of material GRI topics (aspects)¹ 102-46 103-1

Integral assessment of materiality for stakeholders and materiality of impacts by the Group companies

- Immaterial but relevant topic
- Material topic
- Material topic with the highest priority
- Economic aspect
- Environmental aspect
- Social aspect
- Aspect materiality increased following the poll

102-47

1. Economic performance
2. Market presence
3. Indirect economic impacts
4. Anti-corruption practices
5. Energy
6. Water
7. Biodiversity
8. Sulphur dioxide and solid emissions²
9. Greenhouse gas (GHG) emissions
10. Emissions of ozone-depleting substances (ODS)
11. Emissions of other substances
12. Effluents³
13. Waste
14. Supplier environmental assessment
15. Environmental compliance
16. Employment
17. Occupational health and safety
18. Training and education
19. Freedom of association and collective bargaining
20. Human rights: Rights of indigenous peoples⁴
21. Local communities
22. Supplier social assessment
23. Public policy
24. Socioeconomic compliance
25. Emergency preparedness
26. Closure planning

² Topics 8–11 are covered by the GRI Emissions standard.

³ Topics 12–13 are covered by the GRI Effluents and Waste standard.

⁴ Topic 20 is covered by the GRI Rights of Indigenous Peoples standard.

¹ In order to update the materiality matrix, the Company polls external and internal stakeholders, monitors mass media coverage and stakeholder dialogues, and holds interviews with top executives. Stakeholders were polled in 2018 (as part of the 2017 Sustainability Report preparation process).

Appendix 4 GRI indicators

Environmental performance

Total water withdrawal 303-1

Indicator, mcm		Total water withdrawal:	Including					from municipal and other water utilities (excluding Norilsk-Taimyr Energy Company)	from Norilsk-Taimyr Energy Company ¹
			from surface water bodies	from under-ground sources	effluents from third parties	natural water inflow

¹ Work under a fixed-term employment contract.

² According to the collective bargaining agreement and local regulations, such categories of employees are not excluded from benefits; however, in practice, travel expenses are not reimbursed since no vacation is granted to such employees.

³ According to the local regulations such categories of employees are excluded from the reimbursement of expenses associated with relocation.

⁴ According to the collective bargaining agreement and local regulations such categories of employees are not excluded from the reimbursement of expenses associated with relocation, it is practically possible. No severance pay is provided by mutual agreement.

⁵ Work under a fixed-term employment contract.

⁶ At Kola MMC, there is no seasonal work; employees do not work seasonally.

⁷ In-house employees doing bywork can be granted benefits by their primary employer.

Appendix 10 Opinion of RSPP Council on Non-Financial Reporting 102-56

Opinion of the RSPP Council on Non-Financial Reporting on Norilsk Nickel Group's 2018 Sustainability Report for the purposes of public verification

The Council on Non-Financial Reporting of the Russian Union of Industrialists and Entrepreneurs (the "Council") established as per the Management Bureau's Resolution dated 28 June 2007, reviewed, at the request of MMC Norilsk Nickel (the "Company", the "Group", "Norilsk Nickel") Norilsk Nickel Group's 2018 Sustainability Report (the "Report").

The Company requested the RSPP to arrange for the public verification of the Report, with the Council on Non-Financial Reporting providing an opinion on the materiality and completeness of the Report's information about the Company's operations from the perspective of the Social Charter of the Russian Business. The Charter sets out key principles of responsible business conduct aligned with those of the UN Global Compact, as well as domestic and international CSR standards.

From 29 April to 20 May 2019, the Council members reviewed the content of the Company's Report and issued this Opinion in accordance with the Council's Procedure for Public Verification of Corporate Non-Financial Reports.

The Council members possess all the required competencies in corporate responsibility, sustainable development and non-financial reporting, comply with the ethical requirements for independence and impartiality, and provide their personal expert opinion rather than the opinion of organisations they represent.

The Report was assessed based on the below-listed criteria of information completeness and materiality.

Information is considered to be material if it reflects the company's efforts to implement the principles of responsible business conduct set out in the Social Charter of the Russian Business (see www.rspp.ru).

Completeness implies that the company provides a comprehensive overview of its operations, including the underlying values and strategic benchmarks, governance systems and structures, accomplishments and key results, and the stakeholder relationship framework.

The procedure for the public verification of the Report factors in the Company's application of international reporting frameworks; this Opinion does not, however, purport to assess the Report's compliance with such international frameworks.

The Company is responsible for the information and statements provided in the Report. The accuracy of the Report's information is beyond the scope of the public verification procedure.

This opinion has been prepared for MMC Norilsk Nickel. The Company may use it for both corporate and stakeholder communication purposes by publishing the original version without any changes.

CONCLUSIONS

Based on the review of the Report and the information publicly available on the Company's official website, and following a collective discussion of the results of the Report's independent assessment undertaken by the members of the Council on Non-Financial Reporting, the Council confirms as follows.

Norilsk Nickel Group's 2018 Sustainability Report covers the key areas of responsible business conduct in accordance with the principles set out in the Social Charter of the Russian Business, and provides sufficient information about the Company's operations in relation thereto.

The recommendations made by the Council following the public verification of Norilsk Nickel Group's 2017 Report were largely implemented in the 2018 Report. In particular, the report offers more detailed comments on changes in indicators and provides additional references to information sources, including the annual report. The report also addresses the performance of the Norilsk Development Agency, covers the sustainability efforts of the Board of Directors' dedicated committee, and provides more information on the alignment of the Company's activities with the UN 2030 Agenda for Sustainable Development.

The Company's 2018 Report contains relevant information relating to the below-listed aspects of responsible business conduct.

Economic freedom and responsibility. The Report presents the Company's operational and financial results, highlighting its contribution to Russia's economy and its engagement in the Arctic. It notes the rise in the output of key metals and revenue driven by greater production efficiency across the board. Information is provided on the commissioning of advanced Bystrinsky GOK and the launch of the Sulphur Project at Polar Division's Copper Plant. Other highlights include a significant improvement in health and safety performance. The Report outlines the Company's strategic priorities. It states that Norilsk Nickel embarked on the second stage of its environmental programme, launching initiatives to upgrade infrastructure, accelerate digitalisation, and other projects. The Report discloses the Company's corporate governance structure and approaches to sustainable development management. It highlights Norilsk Nickel's contribution to achieving the UN Sustainable Development Goals. Information is presented on recertification audits for compliance with international standards of the quality and environmental management system. Also included is information on the employee performance management and competence assessment systems, and the risk management system. The Report informs that the Company has adopted a number of regulations on the information security of Norilsk Nickel's assets and operations. It also identifies focus areas and outlines the Company's efforts in preventing and combating corruption, including the corruption risk assessment performed across the Group's business units.

Business partnerships. The Report presents a stakeholder map together with the description of key stakeholder engagement mechanisms and initiatives. It specifies the details of meetings with institutional and target investors focused on responsible investment, and the launch of a dedicated section of the corporate website with a view to improving investor relations and those with ESG assessment agencies. The Report prioritises personnel development and describes respective management approaches and programmes implemented in employees' interests, as well as health and safety strategy and performance. It also covers social partnership framework across the Group and discloses information on feedback channels for employees. The Report provides information on supplier relations with a focus on equal competition, corruption control, and feedback channels. It states that ESG requirements are incorporated into standard master agreements with suppliers and contractors, and presents information on the monitoring of contractors' compliance with health and safety requirements when carrying out the work, as well as on incorporating a binding anti-corruption clause into supplier agreements. It also provides information on quality assurance measures, customer satisfaction monitoring, new formats of interaction with regional authorities, continuous engagement in expert and consulting working groups established by government authorities to implement socially important projects, as well as on close interaction with business associations and NPOs. It describes strategic partnerships with Russian and foreign organisations set up with a view to achieving sustainable development goals and promoting green economy, and covers cooperation in creating a global mechanism to ensure reliability of precious metals supplies and addressing the global information security agenda.

Human rights. The Report covers regulatory and managerial aspects of the Company's respect of human rights, noting that Nor Nickel has a Human Rights Policy in place and that the principle of respecting human rights is set out in the Company's by-laws governing the HR, environmental, social and other matters. The Report also focuses on the respect of employees' social and labour rights, offering them a competitive salary, social benefits, decent working conditions, professional development, and career growth. It describes the procedures in place for identifying human rights violations, stating that no such violations were recorded in the reporting period. It covers key areas of Nor Nickel's interaction with indigenous northern minorities and the Company's relevant commitments set forth in its Indigenous Rights Policy. In 2018, Nor Nickel and the Federal Agency for Ethnic Affairs (FAEA) signed a cooperation agreement to provide support to indigenous northern minorities who reside in the areas where the Company operates.

Environmental protection. The Report includes information on starting the second stage of the Company's environmental programme, approving the Integrated Action Plan to Reduce Air Pollutant Emissions at Polar Division in 2019–2024, and launching a concentrator upgrade project at Kola MMC. It presents details on the environmental

management system and efforts to manage the climate impact, reduce greenhouse emissions, save energy, improve energy efficiency and develop the Company's energy infrastructure. It traces changes in quantitative indicators associated with the Company's environmental impact, broken down by key facilities, including its foreign asset Norilsk Nickel Harjavalta, as well as environmental expenditures and costs. The Report evaluates the impact of the Company's vehicle fleet as insignificant and describes Nor Nickel's approaches to biodiversity conservation, land rehabilitation and other environmental protection initiatives associated with field development, construction and other operations. It offers insights into cooperation with nature reserves, employee involvement in environmental initiatives, and environment-related interaction between the Company and broader community.

Contribution to the development of local communities.

The Report highlights the Company's contribution to the development of local communities as the largest taxpayer and employer and also as participant of important regional and federal programmes and major infrastructure projects. It specifies the key focus areas of implementing social and economic agreements with government authorities in five regions across the Group's footprint (Krasnoyarsk Territory, Murmansk Region, Trans-Baikal Territory, Tver Region and Saratov Region). It presents information on key socially important economic and environmental projects implemented in these regions and covers the details of fostering cooperation with local businesses. The Report notes the Company's career guidance focus seeking to facilitate the employment of population, including young people. It discloses the performance results of the Norilsk Development Agency and provides the list of key social infrastructure development projects of 2018. It details the results of the World of New Opportunities charitable programme across three focus areas — Partnership, Innovations, and Development, along with major projects implemented by the Company as the General Partner of the 29th International Winter Universiade 2019 in Krasnoyarsk. It also addresses the Plant of Goodness corporate volunteer programme, describes approaches to the assessment of social programmes and public-private partnerships, and discloses information on social spending.

Final provisions

Information in the Report generally reflects the Company's consistent work towards the integration of corporate social responsibility and sustainable development principles into its business practices. The Report contains a significant amount of information about the Company's impact on the society and environment, its strategy and policies in the key focus areas, and the effect of the related programmes. It covers the main focus areas and formats of stakeholder engagement, including those used as part of the reporting process.

The Report was prepared using internationally and domestically recognised reporting tools (e.g. the GRI

Standards, Comprehensive option, GRI Sector Disclosures and the RSPP Reference Performance Indicators), which ensures comparability of the Group's information with that of other Russian and international companies. The Report is also in line with the UN Global Compact and the UN 2030 Agenda for Sustainable Development.

The 2018 Report is the Company's fifteenth non-financial report, which demonstrates its determination to consistently develop reporting processes and enhance transparency. The Company uses various forms of independent assessment and confirmation of disclosed information (professional audit and public verification). This reflects the Company's commitment to keeping stakeholders informed and maintaining the high quality of disclosures.

RECOMMENDATIONS

While acknowledging the Report's strengths, the Council calls attention to some aspects of disclosures' materiality and completeness, which should be addressed in the future reporting cycles.

The Report outlines Nor Nickel's strategic priorities and we regard this data as material for the stakeholders. However, the Company's strategy deserves a more detailed disclosure in the sustainability report, and it is therefore recommended to use more references to the sources where the relevant information is presented in more detail (e.g. the annual report). Cross-references in the Company's public reports ensure a more complete disclosure of material information without a significant increase in the size of reports, while also enabling comparability of information contained in different sources.

The Report reflects the results of the inventory of significant projects and programmes in line with the UN 2030 Agenda for Sustainable Development. Nor Nickel is advised to continue disclosing information on the progress towards the UN 2030 Agenda for Sustainable Development, using it among other criteria for assessing implementation of the goals and objectives of the Company's strategic priorities.

The Report states that the Company's by-laws provide for the control over compliance with the anti-corruption clause in agreements with suppliers and contractors, as well as their implementation of the work safety recommendations. It is advised that future reports describe the Company's impact on their business ethics, and social and environmental

responsibility practices in more detail. It would be useful to provide examples of how ESG aspects are monitored as part of assessing the reliability of business partners, and how the latter implement relevant policies and standards into their business practices. Taking into account the new practice of the Company's adherence to the codes of conduct devised by foreign manufacturers, it seems reasonable to describe the Company's experience in this area going forward.

The Report highlights the Company's high degree of transparency and the use of various formats of stakeholder engagement. It would be appropriate to add a description of how feedback from stakeholders is used in management practices, namely in improving business processes and refining social programmes. In particular, this also applies to disclosing the results of the Company's Social Portrait of a City Resident analytical survey in the Krasnoyarsk Territory and the Murmansk Region.

The Company's reports generally provide full information on energy consumption and environmental impact across all key divisions. To improve this area of disclosure, it is further advised to report on the relevant performance of support functions (transportation, gas production, electricity generation) and smaller units, such as Bystrinsky GOK.

The Report contains information on Nor Nickel's efficiency improvement programme seeking, among other things, to introduce innovative management solutions. In future reporting cycles, it is advisable to give more detailed information on the achievements in this area, including the set of KPIs related to sustainable development.

Taking into account the Company's active role in implementing national priorities as stated in the Report, it would be useful to provide more details on its further participation in national projects, such as the Environment, the Digital Economy, and the Smart City initiatives, going forward. This would enable a more complete understanding of the Company's social and environmental impact as one of the major players in the Russian business market.

The RSPP Council on Non-Financial Reporting hereby takes a positive view of this Report, supports the Company's commitment to responsible business practices, notes consistency in developing the reporting process, and confirms that Norilsk Nickel Group's 2018 Sustainability Report has passed the public verification procedure.

RSPP Council on Non-Financial Reporting

Appendix 11 Independent assurance report¹

102-53

INDEPENDENT PRACTITIONER'S LIMITED ASSURANCE REPORT [TRANSLATION FROM RUSSIAN ORIGINAL]

To the management of Public Joint Stock Company "Mining and Metallurgical Company "Norilsk Nickel".

We have undertaken a limited assurance engagement of nature and level of Public Joint Stock Company "Mining and Metallurgical Company "Norilsk Nickel" (hereinafter referred to as MMC Norilsk Nickel) compliance with the principles of the AA1000 Accountability Principle (2018) (hereinafter referred to as AA1000 AP 2018) in the process of stakeholder engagement in sustainability activities as well as compliance of the accompanying Norilsk Nickel Group's 2018 Sustainability Report (hereinafter referred to as the Report)¹ with the requirements of GRI Sustainability Reporting Standards to the report prepared in accordance with the Comprehensive option.

Responsibility of MMC Norilsk Nickel

MMC Norilsk Nickel is responsible for its compliance with the principles of the AA1000 AP 2018 in the process of stakeholder engagement in sustainability activities as well as preparation of the Report in compliance with the requirements of GRI Sustainability Reporting Standards to the report prepared in accordance with the Comprehensive option. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of the Report that is free from material misstatement, whether due to fraud or error.

Our Independence and Quality Control

We have complied with the independence and other ethical requirements of the Rules of Independence of the Auditors and Audit Organizations and The Code of Professional Ethics of the Auditors, which are in accordance with Code of Ethics for Professional Accountants issued by the International Ethics Standards

Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior, and we have fulfilled our other ethical responsibilities in accordance with these requirements

The firm applies International Standard on Quality Control 1, Quality Control for Firm that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Our Responsibility

Our responsibility is to express a limited assurance conclusion on nature and level of MMC Norilsk Nickel compliance with the principles of the AA1000 AP 2018 in the process of stakeholder engagement in sustainability activities as well as compliance of the Report with the requirements of GRI Sustainability Reporting Standards to the report prepared in accordance with the Comprehensive option based on the procedures we have performed and the evidence we have obtained. We conducted our limited assurance engagement in accordance with International Standard on Assurance Engagements 3000 (Revised), Assurance Engagements Other than Audits or Reviews of Historical Financial Information, as well as in accordance with AA1000 Assurance Standard 2008 (type 2, as defined by AA1000AS 2008). These standards require that we plan and perform this engagement to obtain limited (moderate as defined by AA1000AS 2008) assurance about whether MMC Norilsk Nickel complies with the principles of the AA1000 AP 2018 in the process of stakeholder engagement in sustainability activities and whether the Report is free from material misstatement.

A limited assurance engagement undertaken in accordance with these standards involves assessing the following criteria (hereinafter referred to as Criteria):

- Nature and level of MMC Norilsk Nickel compliance with the principles of the AA1000 Accountability Principle 2018 – inclusivity, materiality, responsiveness and impact – in the process of stakeholder engagement in sustainability activities;
- Compliance of the Report with the requirements of GRI Sustainability Reporting Standards to the report prepared in accordance with the Comprehensive option.

A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both the risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks.

The procedures we performed were based on our professional judgment and included inquiries, inspection of documents, analytical procedures, evaluating the appropriateness of quantification methods and reporting policies, and agreeing or reconciling with underlying records.

Given the circumstances of the engagement, in performing the procedures listed above we have performed the following procedures:

- Study and selective testing of systems and processes implemented by MMC Norilsk Nickel to ensure and analyze the compliance of the activities with the AA1000 AP 2018 principles; collection of evidence confirming practical implementation of these principles.
- Interviewing the management and employees of MMC Norilsk Nickel and obtaining documentary evidence.

¹ The Report includes information on MMC Norilsk Nickel, its Russian subsidiaries and Norilsk Nickel Harjavalta. Information on the total number of employees and revenue (within consolidated revenue) of other abroad subsidiaries is also included in the Report

TRANSLATION NOTE: Our report has been prepared in Russian and in English. In all matters of interpretation of information, views or opinions, the Russian version of our report takes precedence over the English version.

1 из 2

- Attending the 'We Are the City' social technologies forum in Norilsk (on February 15, 2019) and in Monchegorsk (on March 2, 2019), including dialogues with stakeholders.
- Study of information available on the websites of companies of Norilsk Nickel Group related to their activities in the context of sustainable development.
- Study of public statements of third parties concerning economic, environmental and social aspects of the Norilsk Nickel Group activities, in order to check validity of the declarations made in the Report.
- Analysis of non-financial reports of companies working in the similar market segment for benchmarking purposes.
- Selective review of documents and data on the efficiency of the management systems of economic, environmental and social aspects of sustainable development in Norilsk Nickel Group.
- Study of the existing processes of collection, processing, documenting, verification, analysis and selection of data to be included into the Report.
- Analysis of information in the Report for compliance with the requirements of Criteria.

The procedures were performed only in relation to data for the year ended 31 December 2018.

The evaluation of reliability of the information on performance in the Report was conducted in relation to compliance with the requirements of Standards to the report prepared in accordance with the Comprehensive option and information referred to in the annex to the Report "GRI Content Index". In respect to the quantitative performance indicators the conformity assessment to external and internal reporting documents provided to us was performed.

The procedures were not performed in relation to forward-looking statements; statements expressing the opinions, beliefs and intentions of MMC Norilsk Nickel as the parent company of Norilsk Nickel Group to take any action relating to the future; as well as statements based on expert opinion.

The procedures were performed in relation to the Russian version of the Report, which includes information to be published in a hard-copy form as well as in digital form on the MMC Norilsk Nickel website.

We had no chance to verify that the report was published on the MMC Norilsk Nickel website as well as that Global Reporting Initiative was notified of the use of the Standards in the Report preparation, due to the fact that the date of signing this Assurance Report preceded the planned dates of these procedures completion.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance opinion about MMC Norilsk Nickel adherence to the principles of the AA1000 AP 2018 as well as about compliance of the Report, in all material respects, with the Criteria.

Limited Assurance Conclusion

Nature and extent of compliance of MMC Norilsk Nickel with AA1000 AP 2018 principles

Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that MMC Norilsk Nickel stakeholder engagement in sustainability activities has not complied, in all material aspects, with the criteria of AA1000 AP 2018 in respect to adherence of MMC Norilsk Nickel to the principles (Inclusivity, Materiality, Responsiveness and Impact).

Compliance of the Report with the GRI Sustainability Reporting Standards (Comprehensive option)

Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that the Report has not complied, in all material aspects, with requirements of GRI Sustainability Reporting Standards to the report prepared in accordance with the Comprehensive option.

Recommendations

Based on the results of the limited assurance engagement we recommend:

- It is reasonable to disclose GRI indicators in relation to target values and plans for the future.
- Increase the extent of disclosure of indicators in relation to which requirements of GRI Standards is not fully taken into account (disclosures with omissions).
- In case of disclosure with omissions due to absence of a recording system, provide more specific information about plans to obtain data in future.

The recommendations are not intended to detract from the practitioner's conclusion. Our conclusion is not modified in respect of the matters referred to in the recommendations.
