United Nations Global
Compact,

Re: Grace period for submission of COP

Dear Sir / Madam,

As a responsible corporate citizen, Indus Motor Company understands its responsibility towards all its stakeholders whether internal or external. We are mindful of the need for organizations to conduct themselves ethically and fulfill their obligations to the society at large.

Indus Motor Company (IMC) has always remained active participant in communicating UNGC principles to its stakeholders, but unfortunately due to recent devastating situation after earthquake in Japan, we were engaged in firefighting to cope up with disruption in supply chain and parts shortage.

We have already started work on next COP and hopefully will be completing it soon. We would like to have grace period to complete our COP and share information with our stakeholders.

As a member of UNGC we have attained a number of benefits during the last three years including being seen as demonstrating leadership by advancing responsible corporate citizenship, sharing best practices, producing practical solutions to contemporary problems in the automobile industry and related sectors concerning sustainable development and corporate responsibility in a multi-stakeholder context.

Sincerely,

Corporate Planning Department
Indus Motor Company
