

Leveraging financial capabilities to help Japan recover and Asia develop

We would like to extend our deepest sympathies to those affected by the Great East Japan Earthquake. We are supporting the solid recovery of the affected region through financial and capital markets as well as corporate citizenship initiatives.

The most important facet of corporate social responsibility for the Daiwa Securities Group is to use our financial capabilities to contribute to sustainable development. The earthquake, which was a national crisis, not only caused the loss of many precious lives, but also seriously hurt communities in the Tohoku region, damaged the Japanese economy, and significantly affected the global economy.

As a group of Japan's leading comprehensive financial service companies, we see it as our special mission to encourage economic activity contributing to the creation of a sustainable society and help create future prospects through capital markets in Japan, Asia, and worldwide to revitalize the economies in Japan and other regions.

The Daiwa Securities Group has always been a pioneer in reforming the Japanese securities industry. We have developed and offered Eco Funds, SRI Funds and other socially responsible investment (SRI) products with environmental or social elements since 2001. In 2008, we introduced Vaccine Bonds and other impact investment¹ products in Japan,

1 Investment with social objectives such as poverty reduction and environmental protection that also generates financial returns for investors.

taking a leading role in this field. These products are aimed at financially supporting social objectives such as alleviating poverty and protecting the environment.

We have been providing a steady flow of information to investors through seminars and reports, seeking to foster a broad understanding of microfinance², poverty in developing nations, and other problems in society that need to be resolved. This has also been important in creating broad awareness among Japanese investors that both social returns and financial returns can be achievable from investments. We are supporting the reconstruction through financial instruments, and the Japan-version of impact investment products.

Another important social responsibility is to contribute to the development of sound capital markets by gaining the confidence of more customers through even stronger compliance.

Regarding business in Asia, we have strategically enhanced networks, systems and boosted our human resources and capital to strengthen the relationships with regional communities and local customers. We expect this to reinforce our business and help it grow at an unprecedented speed. Meanwhile, it is also important to consider resolving environmental and other issues affecting communities amid Asia's economic growth. We are contributing to sustainable development in the region through impact investment products and services funding the resolution of problems such as climate change and poverty.

The cornerstone of these efforts is fostering human resources. It is necessary to develop people with a high awareness of global concerns such as environmental problems and poverty and regional issues even for post-earthquake reconstruction. Also, offering high-quality products and services able to help resolve problems gives executives and employees a sense of pride.

We are actively encouraging employees to establish a good work-life balance as we believe this is the foundation for such high-quality personnel as well as products and services. Part of our Asia strategy is to put more effort into creating a workplace that makes the most of the advantages of a diverse staff.

The Daiwa Securities Group is highly conscious of the importance of maintaining long-term reconstruction support following major disasters. We are carrying out a ten-year reconstruction support program following the 2004 Sumatra earthquake and tsunami. Daiwa Institute of Research has proposed a reconstruction support fund scheme in the wake of the recent earthquake in Japan. Using the power of the whole group to provide long-term support, we will contribute to social reconstruction and development, for example by helping facilitate regional financial institutions' funding and developing the Japan-version of impact investments. We hope these efforts make our executives and employees feel part of the Daiwa Securities Group and help our stakeholders feel greater pride in our companies.

We would like to ask for your understanding and continued support because these efforts will come to fruition only if we communicate with and have the cooperation of our stakeholders.

日此野 隆司

Takashi Hibino President and CEO Daiwa Securities Group Inc.

² General term for small-scale financial services to encourage their economic independence of impoverished people.

Editorial Policy

The Daiwa Securities Group has been publishing this report annually since 2002 with the aim of clearly disclosing our CSR activities, which are intended to support the creation of a sustainable society. We also use this opportunity to evaluate the company's current status and the challenges it is facing.

The 2011 CSR Report focuses on SRI because we wish to convey to many stakeholders that the way money is used is key to resolving society's problems.

An important objective of this report is to prompt awareness, thought, and action among stakeholders reading the report to cause money to be channeled to creating a sustainable society in order to resolve problems such as global warming and poverty.

We strive to provide accurate, easily understood information by publishing the information we would most like to convey in the Highlight Edition and comprehensive information based on the guidelines of the global reporting initiative (GRI)* on our website to ensure accountability.

* GRI (Global Reporting Initiative): An organization dedicated to proposing and promoting common international guidelines for sustainability reports.

Scope of Report

Intended Readership

This report is intended for Daiwa Securities Group's stakeholders, which primarily include customers, shareholders and investors, executives and employees, as well as business partners, government agencies, non-profits (NPOs, NGOs), local communities where Daiwa Securities has offices, educational institutions, and the families of executives and employees.

Scope of Reporting

This report basically covers the principal companies of the Daiwa Securities Group (see page 29). The report does not, however, include all data from the Group's principal companies on items reported; the information is selected based on the respective companies' size and type of business. Each set of numerical data specifies the scope of coverage.

Period Covered by Report

Fiscal 2010 (April 1, 2010 to March 31, 2011). The report also includes information on events and activities carried out prior to fiscal 2009, as well as those scheduled to take place during fiscal 2011.

Date of Publication

August 2011 (The previous report was published in August 2010; the next report is planned for August 2012).

Daiwa Securities Group Corporate Principles and Key Issues

The Daiwa Securities Group's mission is to contribute to the sustainable development of society and the economy through daily operations, including wealth management for investors and supporting corporate clients' activities with various financial tools.

The strong bond of trust we share with our stakeholders, including customers, shareholders, employees and society, is essential to the accomplishment of our mission and sustainable growth.

Daiwa Securities Group Corporate Principles

Building Customer Trust

We stand on the trust of our customers. Prudently putting customer interests first and achieving a high standard of professional competence, we intend to become Japan's most appealing securities group at home and abroad.

Valuing Human Resources

People are the source of our competence. We highly value creative initiative by the individual, we cherish the challenging spirit, and we appreciate the capability and contributions of the individual.

Contributing to Society

Our mission is to contribute to society and the economy through our daily operation in the financial and capital markets. We will maintain high standards of ethics and self-discipline and will contribute to the sustainability of society.

Earning Sound Profits

Our fundamental objective is to enhance shareholder value through sound business operations. We will offer valuable services to our customers and earn adequate rewards for distribution to our shareholders.

Key Issues for Daiwa Securities Group

To achieve its corporate principles and realize a sustainable society, the Daiwa Securities Group seeks to initiate even more effective CSR activities. Based on the requests and opinions we have received from our stakeholders thus far, we have addressed the following key challenges:

- 1. Leveraging financial capabilities to contribute to a sustainable society.
- 2. Developing sound financial and capital markets for the next generation.

People are the key to addressing these issues. We believe keeping each and every one of our executives and employees motivated and proud of their work is essential for tackling these key issues.

In addition to these two issues,

the Group strives to create a rewarding workplace in which our executives and employees can take pride.

To achieve its corporate principles, the Daiwa Securities Group anchors its CSR activities in these goals.

Daiwa Securities Group Stakeholders Issuers Investors For private-sector enterprises, public corporations, and **Customers** other entities seeking to raise funds through equity, debt, or We are committed to improving customer satisfaction by offering products and services that other sources, we propose optimal solutions from a wide range of financing options and provide full-scale support, meet the needs of individual investors, institutional from planning to execution. investors, and potential investors who are considering investing in the future Investors Issuers **Shareholders** Business Partners We maintain fair relationships with all Shareholders our business partners and work To earn the confidence of our together to create a sustainable society. **Business** shareholders, we aim to provide fully **Shareholders Partners** transparent information disclosure, and meet their expectations by continually **Daiwa** creating value. **Securities Group** Government We fulfill our tax obligations and offer policy suggestions to create Government a better society Society **Employees** NPOs/ **Employees** NPOs/NGOs **NGOs** We collaborate with NPOs and NGOs in such Employees fields as financial and economic education We are endeavoring to create a workplace where Local and disaster relief. Leveraging financial capabilities to resolve global issues

Changing the flow of money can change the world. Kumi Fujisawa, who is trying to create new social systems as vice president of the think tank SophiaBank, and Daiwa Securities Group Chairman Shigeharu Suzuki (then president & CEO) discussed how financial institutions are uniquely positioned to make certain efforts, such as offering products and services for impact investing and that are compliant with the Convention on Cluster Munitions.

Finance is social infrastructure: Fulfilling our own role contributes to society

Fujisawa: When I attended the World Economic Forum at Davos this year, the term CSR was already outmoded—the focus has turned to how companies, as global citizens, can help resolve society's problems through their core operations. What kinds of opportunities are there in the financial business? Suzuki: We do not treat CSR as an accessory to our business. We have positioned contributing to society through our daily operations as the foundation of our activities. Companies have a role to play in society because they operate in the public sphere. Finance is social infrastructure and financial service companies' role is to link unevenly distributed capital with the companies and countries that need it. I believe companies' core value lies in contributing to society in the process of pursuing their own objectives.

Fujisawa: What can financial service companies do to help resolve the problems that exist in the world today? Suzuki: Donations are the most widely recognized form of social contribution, but there are other options. The impact investments we offer allow clients to pursue profits while contributing to society and also generate profit for our company. I believe it is the role of companies to expand their business in areas that also contribute to society.

Fujisawa: I recently mentioned the Daiwa Microfinance Fund on Twitter because I thought it was fantastic when I heard about it. It is possible to apply for amounts starting from ¥1,000 in-store or online. Comments I received included, "It's great that there is a company creating such products" and "I would like to support this."

Impact investment also for employees

Fujisawa: Creating BRIC* Funds seems like a better idea for generating revenues efficiently, but creating and offering products that meet the criteria of socially responsible investment has different advantages than those of ordinary financial products.

Suzuki: In some ways, these products are also for employees. We do important work by offering financial products and services that support the foundation of society, but in our daily operation, often cannot easily recognize the value it has in society.

Fujisawa: The significance of impact investment is clear to both employees offering the products and customers purchasing them.

Suzuki: I think employees prefer to find their jobs meaningful, rather than just work to support themselves. Also, customers who may want to make donations face uncertainty about how and where the money will be used. With our products, it is clear that the money will be used where it is necessary. As financial products, they naturally entail risks, but being investments rather than donations, they also offer prospective returns. I believe they are a positive product offering significant benefits for our company, our staff, our customers, and the recipients of the funds.

Fujisawa: I think it is difficult to take the first step because impact investment type products are not highly profitable products for a financial company.

Suzuki: A company has no reason to exist if it does not generate profits. However, companies should meet various social responsibilities as well as pursuing profit. We will keep working to offer products with high social payoffs in line with our role, as a financial service company, as a part of social infrastructure and to provide our employees with rewarding work.

Fujisawa: You're planning to offer more impact investment products, right?

Suzuki:Yes. Our microfinance products were commercialized from a plan created by a front-line employee concerned about poverty. This example of a good idea being turned into a product has served as an inspiration to employees to put in their best effort, creating a virtuous cycle.

Fujisawa: What has been the reaction from employees? Suzuki: I think many employees in the sales departments feel they play a meaningful role in society. Fujisawa: It's wonderful for the sales staff of a financial service company to feel this way about their work, isn't it?

*BRIC stands for Brazil, Russia, India, and China.

Impact investing—a good match for the unmatched Japanese national character

Fujisawa: I've heard that doctors were major buyers of Vaccine Bonds. I imagine that offering impact investment products broadens your customer base.

Suzuki: I believe Japanese people are the most kind-hearted in the world in terms of national character. Impact investing is extremely well-suited to Japanese people because they provide the opportunity to pursue social as well as financial returns. They are likely to spread more as they become known to people who have not previously been involved in investing.

Kumi Fujisawa

Cofounder and Vice President of the think tank SophiaBank

Established Japan's first investment trust rating company in 1996 after working at investment trust firms. Co-founded the think tank SophiaBank in 2000. Trying to create new social systems through a wide range of media such as seminars, TV, and magazines.

Fujisawa: It looks like you are developing products based on a belief in the good qualities of Japanese people. Creating products valuable to society sends a positive message to employees and to the Japanese people. It also sends a message abroad about the virtues of Japan. I believe it enhances the Daiwa Securities brand.

Exercising social responsibility by not investing in undesirable companies

Fujisawa: The Oslo Convention on Cluster Munitions entered into force August 2010. On July 30, 2010, Daiwa Asset Management publicly announced that it would prohibit the inclusion of securities issued by cluster munitions producers in active funds. This surprised me when I first heard it, but it's great, isn't it? Suzuki: We cannot invest in companies involved in unacceptable or banned products and services. We exclude such companies at the due diligence stage prior to underwriting and are putting in place procedures to ensure sales personnel do not recommend them to clients.

Fujisawa: That's terrific. For a country like Japan, which has the greatest financial assets, to create the safety valve of not directing money to companies that are not beneficial to society sends a strong message to the world. This is another way in which the Daiwa Securities Group is taking the lead.

Suzuki: I think more companies are taking social responsibility seriously, but I am proud of our leading role.

Fujisawa: The Daiwa Securities Group's initiative is remarkable given the strong tendency of the Japanese, particularly in the financial and capital markets, to avoid uncharted territory. What has been the response within the company? It is generally said that middle-management opposes changes in corporate strategy.

Suzuki: I believe and hope that there has been no opposition. I have long said that we should not engage in socially unacceptable businesses even if they are not against the law or other rules, and I believe this way of thinking has permeated our company. General managers in particular showed strong support when establishing the principles for cluster munitions producers.

To create an atmosphere allowing employees to work effectively is a management mission

Fujisawa: The number of female sales personnel seems to be rising.

Suzuki: Female sales staff are highly effective in dealing with individual investors, who require meticulous service and explanations. Financial service companies have a reputation for being male bastions, but this is now completely untrue.

Fujisawa: Has the increase in female employees been deliberate or spontaneous?

Suzuki: Both, I think. We certainly deliberately set out to create a rewarding work environment. This led to greater engagement by female employees and a gradual increase in numbers.

Fujisawa: What prompted you to create a female employee-friendly environment?

Suzuki: A few things struck me poorly when I entered the company. One was the messy state of offices. Front office spaces were different, but back offices were in an awful state. I ordered a company-wide revamp when I took up the position of president.

Fujisawa: Your female employees must be happy to have someone who cares about this leading the company.

Suzuki: Another thing I didn't like was that there was no set time to leave the office. Employees are now encouraged to go home before 7:00 p.m. It is particularly difficult for women to work if they don't know what time they will return home.

Fujisawa: You have improved the things that you personally observed needed improvement. It's the leader's job to also consider shaping the environment and creating opportunities from various angles, don't you think?

Suzuki: We have been able to attract many excellent employees because our company now ranks high in surveys of desirable employers. It just goes to show what can be achieved if you offer the proper workplace. I believe it is the role of senior management to create such a workplace and atmosphere.

Fujisawa: I've learned that you have placed great importance on employees enjoying their work. This is probably why the Daiwa Securities Group can do work that contributes significantly to society.

Shigeharu Suzuki Chairman of the Board, Daiwa Securities Group Inc.

Global Compact principles also not an accessory

Fujisawa: Finally, I'd like to ask about the Daiwa Securities Group's commitments as a member of the UN Global Compact.

Suzuki: The principles of the Global Compact are factors that should be routinely considered in managing a company. They are consistent with our mission and useful in carrying out our activities aiming for a social impact.

Fujisawa: So there was no reason not to join.

Suzuki: I think it is important for companies to be good citizens even if they don't go as far as becoming members of the Global Compact. This should be natural for managers with a Japanese mindset.

Fujisawa: I am highly impressed with what I've heard today. Thank you very much.

The Nature of Money and Finance

What is finance?

Financial textbooks define finance as "making money available." But what significance does making money available have for the economy and society? The role of finance in the economy is often compared to the role of blood in the body. Just as circulating blood keeps the body functioning, the flow of money through financial functions sustains the economy.

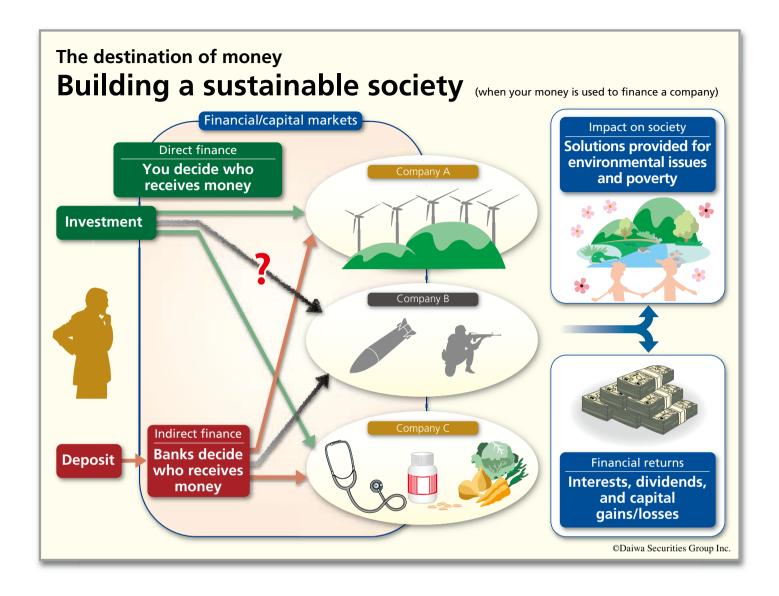

Changing money flows change society

Veins in the body keep blood circulating through a fixed route. Channels for money flow, though, change according to the economy and society. To which fields the money flows and in what form affects the functioning of the economy and society.

For example, investment has been increasing in emerging markets, such as China, as well as in environmental businesses over the past few years, due to their growth potential. Increased investment boosts production thanks to the accumulation of capital, leading to higher incomes and accelerating economic growth. If the industries of emerging nations and environmental businesses expand, it can generate gains for investors. Progress can also be expected in environmental protection that reduces the burden on the earth.

What happens if a preoccupation with high returns leads to massive funds flow to companies and industries cutting environmental protection costs by engaging in indiscriminate deforestation and discharging waste with no effort to prevent pollution, while reducing labor costs by using child labor at plants in developing countries? Investors will no doubt earn returns.

However, such money flows are highly likely to further destroy the environment, and expand the underclass hurt by cheap child labor in developing countries—burdening the earth and society. While investors may earn the same profits regardless, the

nature of the businesses and industries in which they invest could have a major impact on future society.

Responsibilities in investing and lending

Investors need to treat their own returns seriously. At the same time, they have a social responsibility to be aware that their investments wind up affecting society in various ways. This also applies to banks' lending activities. Investments are made according to investors' decisions on where to invest their money based on risks and returns, while lending involves banks making decisions on depositors' behalf about where to direct their money.

If the money is provided to companies that are reducing environmental impact through renewable energy, preservation of forests, and development of environmental technology, or those working to improve society by helping reduce poverty in developing nations and providing educational and

medical support, it could generate returns for investors and depositors while also resolving environmental and social problems.

Daiwa Securities Group's Mission

Finance is commonly considered a method of asset management by the party providing the money, but its real role is to promote the development of society by directing funds to businesses resolving environmental and social problems or to the development of new technologies. The mission of financial institutions is to maximize the profits of the party supplying the money while also creating money flows that contribute to social development.

At the Daiwa Securities Group, we consider it our mission to offer investors financial products that contribute to society and the environment. Providing information about the environment and society that is useful in investing is also a significant task.

What Is Socially Responsible Investment?

Investment decisions that lead to money flows improving environmental, social and corporate governance (ESG) issues

SRI is an approach to making equity investment decisions incorporating an assessment of a company's environmental and social efforts—i.e., corporate social responsibility—in addition to financial data. It also includes taking an active role as a shareholder in prompting a company to become involved in social issues and operate ethically.

SRI started in the 1920s, when Christian churches in the US wanted to exclude businesses incompatible with their religious beliefs from their investments. Amid the anti-war and civil rights movements in the 1960s, the scope of SRI expanded to include shareholder advocacy—direct requests for companies to contribute to improving environmental issues and human rights. In the late 1990s, ESG became commonly accepted among investors as an essential part of assessing corporate value as firms' efforts regarding environmental management, corporate ethics, child labor in developing countries, and corporate governance came into focus. These days it is also known simply as responsible investing.

This approach of reflecting ESG issues is also useful for bond and real estate investments. SRI, characterized by ESG criteria in screening and shareholder advocacy activity, is now applied not only to stock investments, but also to investments in bonds and investment trusts, as well as to project finance, real estate investment, and community investing (investment aimed at healthy development of local communities).

SRI is aimed at gaining financial returns through investments that take into account environmental and social issues. A new approach that has evolved from SRI in recent years is impact investing—making investments targeting clear and direct contributions to solving social challenges.

World trends in socially responsible investment US and Europe ahead in SRI, Japan catching up

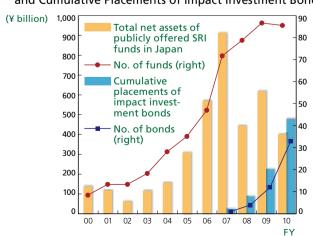

SRI has gradually transformed into investing with a focus on sustainability¹. Sustainable activities are those that fulfill the needs of current generations without reducing the capacity of later generations to meet their own needs. The question is how to address issues that

could threaten humanity's survival, such as the problems of environmental destruction worldwide and poverty in developing nations. In the US and Europe, the SRI market is already worth several hundred trillion yen, backed by laws requiring the disclosure of SRI information to institutional investors and the spread of lifestyles of health and sustainability (LOHAS) among individuals. In Japan, the SRI market has not yet reached ¥1 trillion (as of end-December 2010). One of the various reasons for this is that awareness of the ability of finance to affect society is not as well established as in the West. However, there has recently been a renewed push for SRI. Japan's Ministry of the Environment has decided to create guidelines for sustainable financial activities² and the Japanese Trade Union Confederation has issued Guidelines on Responsible Investment of Workers' Capital³ to encourage pension funds to make socially responsible investments.

Another major reason SRI has not grown in Japan is that financial institutions have not developed enough SRI products or provided enough information. The Daiwa Securities Group has endeavored to communicate with various stakeholders, for example participating in the UNEP Finance Initiative and other international initiatives⁴ as well as in the drafting of the Ministry of the Environment's guidelines, while making an effort to offer socially responsible investment products that are able to pursue financial returns.

- 1 Sustainability (sustainable development): A concept raised in a 1987 report entitled *Our Common Future*, published by the World Commission on Environment and Development (a.k.a. Brundtland Commission).
- 2 Guidelines for sustainable financial activities: please see page 16.
- 3 Guidelines on Responsible Investment of Workers' Capital: Guidelines on the responsibility of workers (unions), as owners of financial assets, to support fair markets. The guidelines prohibit the investment of capital contributed by or on behalf of workers in corporate activities that are harmful to society or the environment.
- 4 Other international initiatives: please see page 15.

Total Net Assets of Publicly Offered SRI Funds in Japan and Cumulative Placements of Impact Investment Bonds

Daiwa Securities Group's Engagement in SRI

The Daiwa Securities Group has developed and offered products aimed at promoting socially beneficial investment. This section introduces some of the innovative products we have offered so far in SRI and impact investment.

SRI funds support companies that exercise social responsibility

SRI funds evaluate potential component stocks and bonds for their social and environmental efforts, ethics, and other non-financial performance as well as the level of sales and profit. These include eco-funds, for which the only non-financial criteria relate to environmental performance or those that invest only in companies operating environment-related businesses. Investing in such funds enables investors to indirectly support countries and firms actively engaged in environmental conservation efforts and CSR activities via the financial market.

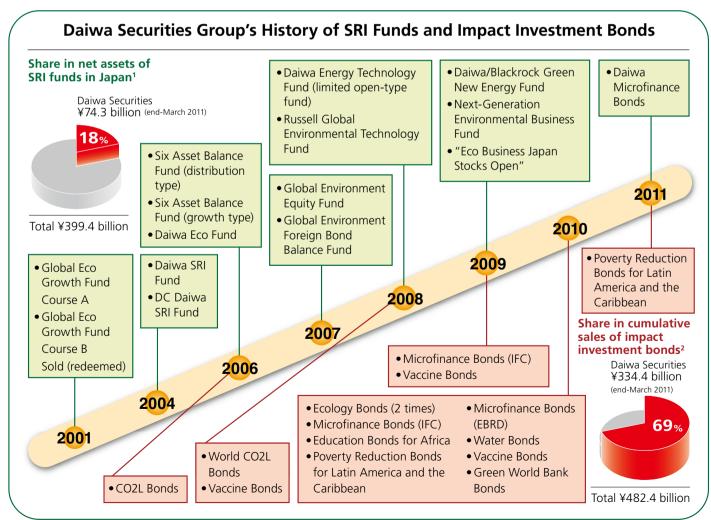

Total net assets held in the Daiwa Securities Group's SRI funds stood at ¥74.3 billion at end-March 2011¹.

Impact investment bonds help resolve society's problems through bond issues

Impact investing differs from SRI in that it places emphasis on investments directly affecting society. It is a way of allocating assets solely to activities targeted at resolving society's problems, such as poverty and environmental issues, in combination with generating economic gains.

As a financial institution, we have supported the resolution of problems in society by selling various types of impact investment bonds.

Cumulative sales of impact investment bonds in Japan amounted to ¥482.4 billion as of end-March 2011, of which ¥334.4 billion, or 69% was sold by the Daiwa Securities Group²

¹ Based on Social Investment Forum Japan data.

² Source: Daiwa Securities

SRI Efforts in Product Development and Sales Teams

Developing products acceptable to customers and investors and ensuring they are understood before being purchased are important in promoting SRI. Here, we introduce how employees designing and selling SRI products view SRI.

In product development

Believing in the power of money and developing products with new themes

So far, I have been involved in designing vaccine and microfinance bonds. I was confident we would be able to sell these products because they have high credit ratings and an easily understood structure in addition to the potential to benefit society. Still, I was surprised at the extent of the response these bonds received—people in their 30s and 40s, as well as female customers overall, showed especially strong interest. I also sensed that such products capture the interest of people who have not previously considered securities investments.

In the future, I would like to develop products with new themes or capacities to solve problems in Japanese society. For example, I am hoping to create mechanisms that use the power of finance to alleviate food supply problems and counter the declining birthrate, centered on

the private sector. I am also interested in products that are low in risk and seem familiar to customers—for example, products denominated in yen rather than foreign currencies. I hope to enliven the market by encouraging individual investors to buy more SRI products and by cultivating SRI business from institutional investors.

Sayaka Ikegami Director, Product Planning Department, Daiwa Securities Co. Ltd.

Fine-tuning until bond issuance to ensure money used for intended purpose

My job is to convince international institutions such as the IFC to issue bonds designed in Japan.

To determine which is the most important of the projects under way at international institutions, we hold repeated discussions with the institutions' employees. The most important thing is that structures are put in place to ensure the money raised is used appropriately. We repeatedly discuss and revise plans to ensure this happens.

I expect to see more microfinance and other products funding water supply and educational support for poor communities, as well as climate change mitigation. Before issuing bonds, I research exhaustively, together with the employees of the issuer entities, to assess how effectively the bonds can rectify social problems so that the issuer

Carlos Perezgrovas Executive Director Daiwa Capital Markets Europe Limited

can fully appreciate the significance of the bonds.

We first give explanations to the organization issuing the SRI bond, to have them understand our aims regarding things like providing finance to poor people and supporting developing countries, and then hold repeated negotiations to converge our aims and those of that organization. Microfinance bonds have so far made the strongest impression on me. I have heard many times about the importance of education and clean water from

my parents who are migrants from Cuba. I keep my parents and relatives in Cuba in mind when I explain such things to bond issuers.

I am proud that my work makes a contribution in areas like these, and consider it my mission to keep facilitating the issuance of bonds that solve problems.

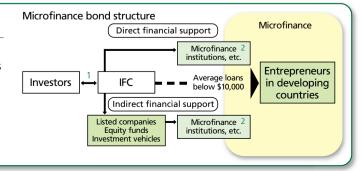

Jose Padilla Executive Director, Daiwa Capital Markets America Inc.

Microfinance bonds

Bonds issued by the IFC to fund micro-entrepreneurs to foster economic independence by offering small-scale financial services without collateral. The Daiwa Securities Group arranged and sold the first microfinance bonds in November 2009.

- 1 Microfinance bond interest and principal paid based on creditworthiness of IFC alone.
- 2 Financial institutions providing microfinance.

In sales

Proposing meaningful ways to use money in simple terms

I believe SRI products are essential in conveying the role and importance of financial service companies as providers of social infrastructure and ensuring people know about our efforts to contribute to society.

When offering microfinance bonds, I felt many customers agreed with the bonds' objectives, but felt uneasy about providing finance in developing countries or could not imagine how the product could produce profit. My customers are individual investors and many are elderly. I see it as my job as a professional to give people a deeper understanding of the bonds and convince them that the bonds duly provide returns. There is no obligation to provide bond buyers with performance reports, but I believe it is important to report to buyers of impact investment bonds the use to which money has

been put to demonstrate their effects. I think such efforts will help spread SRI products and increase confidence in Daiwa Securities.

I hope sales personnel and the product-planning staff continue to cooperate to develop proposals that will make meaningful use of customers' money.

Takeshi Yaguchi Executive Director, Asset Consultant Department, Daiwa Securities Co. Ltd.

Reconfirming our own position in the flow of money

SRI products easily catch people's interest when I start to explain, but even if they support the aim of the product, this does not readily turn into a decision to buy. For example, many customers, when told that microfinance bonds are designed to provide funds to poor people in developing countries, become doubtful about borrowers' capacity to repay. There are also customers that say the explanations are difficult to understand because there are many unfamiliar terminologies. These factors suggest the products are not yet well understood.

Customers are most interested in investment returns, but many would also like to know how the money they have invested is being used. I think mechanisms for feedback to clients about the use of the capital are needed to further increase uptake of SRI products.

Meanwhile, I would like to continue providing customers with correct information about SRI and communicating the Daiwa Securities Group's vision.

In our day-to-day sales activities, we tend to forget the ability of money flows to solve problems troubling the world and our own part in that money flow. I am happy that SRI products have given me a renewed opportunity to appreciate how meaningful my work is.

Aki Takeuchi Asset Consultant Department, Ikebukuro Branch, Daiwa Securities Co. Ltd.

Not only bonds—Daiwa Microfinance Fund launched

We launched the Daiwa Microfinance Fund in February 2011.

The fund directly invests in microfinance institutions (MFI) and in bonds issued by international institutions working to change MFI's operating environment. The fund thus directly contributes capital to alleviate poverty in developing countries.

It combines the advantages of a strong social contribution, convenience, and reliability—customers who buy shares in the fund are sent asset management reports, and day-to-day trading is possible. The fact that the fund targets investments that contribute to society makes it no less beneficial for investors compared to conventional foreign bond funds.

It should be possible to use money flows to correct society's flaws and change the world. Finance has that power. We are hoping to spread this idea among more people.

Shuichiro Tanaka

Director, Investment Trust Department, Daiwa Securities Co. Ltd.

Please visit our website for more details. http://www.daiwa.jp/products/fund/microfinance/

Fulfilling Our Social Responsibilities as a Financial Institution

The Daiwa Securities Group has agreed to international initiatives to create mechanisms to direct money flows to activities supporting the creation of a sustainable society. As a financial service company, we have also integrated our research analysis unit into our ESG unit in order to provide information useful for investing.

Corporate social responsibility

Participant in UN Global Compact

In 2010, the Daiwa Securities Group became the first Japanese securities company to join the UN Global Compact, which is a global framework to create sustainable growth.

Members are required to work to adhere to the compact's ten principles. These principles are in accord with the Daiwa Securities Group's principles and most of their spirit is already reflected in our practices. However, we continue to make a group-wide effort to become a higher-quality company trusted by society.

On April 25 and 26, 2010, the UN Global Compact held a "Public Forum on the Role of the Private Sector for Peace and Development." Mariko Kawaguchi, Managing Director of CSR Promotion at the Daiwa Securities Group, joined an expert workshop on day one. Also, as a panelist in a panel discussion, then-Executive Officer Keiko Uehara spoke about the impact investment products we have developed and offered.

Keiko Uehara speaks during panel discussion

Promoting SRI

Participating in Carbon Disclosure Project

The Carbon Disclosure Project (CDP), which has been set up by institutional investors interested in climate change, requires global companies to disclose their stance on and actions regarding environmental problems. The Daiwa Securities Group became a member of the CDP as an investor in March 2004. Daiwa Asset Management has been a member since July 2009.

Joined UNEP Financial Initiative

The United Nations Environment Programme Financial Initiative (UNEP FI), a partnership between UNEP and the global financial sector, works to identify and promote the adoption of the best environmental and sustainability practices in operating financial institutions based on the knowledge that environmental problems cannot be significantly improved without the participation of financial institutions.

Having become a UNEP FI member in November 2004, the Daiwa Securities Group also signed the Declaration on Climate Change by the Financial Services Sector in May 2007.

Signatory to Principles for Responsible Investment

The Principles for Responsible Investment (PRI), announced in April 2006 by the UNEP FI and the UN Global Compact, is a set of investment principles for institutional investors incorporating ESG into the decision-making process.

Daiwa Asset Management signed on to the PRI in May 2006 in the belief it should take the initiative as an asset management company. It had established many SRI funds and other investment trusts incorporating ESG considerations. Signing on to the principles also prompted Daiwa Asset Management to revise its guidelines for exercising shareholder voting rights, promote internal communications, and organize a non-financial information evaluation system. There were 18 Japanese signatories as of April 2011.

Daiwa Securities Group's efforts

Established investment policy against cluster munitions producers

Since the implementation of the Oslo Convention on Cluster Munitions in August 2010, Daiwa Asset Management, as an asset management company operating in a signatory country, has followed the principles outlined below when investing in or otherwise dealing with cluster munitions producers.

- 1. Do not include the securities of cluster munitions producers in active funds. Promptly sell those already included.
- 2. In exercising voting rights associated with shares issued by cluster munitions producers, vote in favor of any shareholder proposals to withdraw from, or scale down, cluster munitions production.

Specialist lectures were given to units in the field. Further, we have removed companies to which the criteria apply from lists of stocks allowed to be offered to customers and those eligible for investment.

Helped draft principles for sustainable finance

The principles for sustainable finance are aimed at promoting financial activities that take into account ESG in the Japanese context. The Daiwa Securities Group has been involved in drafting the principles from the early stages.

Providing information useful in resolving society's problems

Daiwa Institute of Research's ESG Research Section

The world we live in is facing major challenges such as the rising risk posed by global warming and other climate change and global energy and food shortages as emerging nations' economies grow. These conditions are changing the roles and functions expected of companies in creating sustainable social and economic systems. Meanwhile, investors, who underpin corporate finance, are engaging with SRI, which uses a multifaceted approach to valuing companies.

With the limited supply of natural resources available for human use, it will be increasingly important for companies to create true wealth on a global scale by tackling human rights problems and social inequalities. We believe capital markets should correctly value companies adopting a proactive stance on such issues.

In August 2010, Daiwa Institute of Research established an ESG Research Section within its Capital Market Research Department. Its main purpose is to enliven capital markets by presenting the new role and activities of companies, stating new approaches to valuing companies, and providing information about new methods of communication between companies and investors.

There are many solutions to the many problems facing society. SRI, which attempts to provide solutions through finance, also encompasses many themes and activities. To make SRI more familiar without sacrificing any of that diversity, the ESG Research Section of the Capital Market Research Department aims to provide information to promote investments that will create a better society while also focusing on value and the interests of customers.

Exploiting information in asset management and product design

Daiwa Asset Management research structure

Daiwa Asset Management has directed asset management and research staff, among others, to undertake research and development for evaluation of non-financial information since March 2010. Purposefully evaluating non-financial information, which has been merely one indicator of corporate value, makes evaluations more accurate.

In fiscal 2010, we held internal and external discussions as part of preparation to install a non-financial information evaluation system befitting an asset management company. We carried out in-depth discussions on evaluation of Japanese stocks with our analysts and fund managers, referring to studies of ESG and other non-financial information disclosures. It will be necessary to evaluate the corporate value provided by non-financial measures such as reducing environmental impact or contributing to society from a long-term perspective. We hope to focus on building a foundation for evaluating the intrinsic value of companies by analyzing non-financial information.

Employee Round Table Discussion

Ways to Promote SRI

Using finance to support sustainable social systems—socially responsible investment is the key to accomplishing this important task. On February 15, 2011, Daiwa Securities Group employees exchanged opinions on why SRI has not taken off in Japan as well as future challenges and possibilities.

* Positions are those held at time of discussion

SRI a return to basics for valuing companies; yet to gain popularity, momentum

Moderator: What are your impressions of SRI in your work?

Kikuchi: I have been involved in SRI since we established our Eco Fund in March 2006. The strongest impression I have of managing SRI funds is that it constitutes a return to basics. It is a fund manager's job to gauge companies' value. Rather than just looking at profits, SRI gives us the opportunity to revisit companies' characteristics and strengths, which are the source of those profits.

Suzuki: I also see SRI as a return to basics. Among the variety of factors that need to be considered in evaluating companies' profit are ESG activities that could present risks. With investors now using a broader range of factors to evaluate companies, I think the importance of environmental and social factors is growing.

Katsuya Kikuchi Senior Fund Manager, Equity Management Department, Daiwa Asset Management Co. Ltd.

Tanaka: My approach to SRI incorporates an NPO perspective, as I am a director at an NPO bank in a private capacity. I also take into consideration the direct effects on society. For the first time, we have been able to establish a fund that contributes directly to society by channeling capital straight to microfinance institutions. I would like to create a structure in which we are able to contribute directly to social objectives through core operations, like this microfinance fund.

Yanagisawa: I believe institutional investors have become aware of concepts such as CSR and ESG through seminars for institutional investors and corporate IR officers. However, their views and what they put into practice differ widely.

Saito: Right now, the sales teams are putting effort into selling microfinance funds. It seems that the importance of such funds is now much better appreciated. But it seems that, in contrast to the sales staff's high sense of purpose, awareness of SRI is still limited among individual investors.

Sluggish Japanese issues one reason SRI not growing; this offers potential for breakthrough

Moderator: Why do you think SRI hasn't caught on in Japan?

Yanagisawa: One possible reason, for products centered on the stock of Japanese firms, exists at a more basic level than SRI—the prolonged unpopularity of Japanese issues.

Kikuchi: Japanese stocks have been among the most sluggish in major global markets for the past five years. But a focus on SRI could trigger renewed interest. In Japan, the environmental and social components of ESG still tend to be viewed in terms of costs, but it is quite likely this is exactly where firms' unrecognized efforts lie. The SRI perspective could be the catalyst for an end to the despair enveloping Japanese companies. Suzuki: ESG factors certainly come into play in the low valuations of Japanese issues. In rankings based on quantified measures of governance, Japanese companies rank behind not only European and US companies, but also most emerging countries. I believe governance in Japan being seen as so poor internationally means improvement could attract new investment.

Recently announced requirements by the Tokyo Stock Exchange for reporting on governance and the possible reform in the presentation of financial statements means new information will be available for evaluating companies. This should provide more fertile ground for investment decisions incorporating ESG considerations.

Presentation of information, ambivalence of term "SRI"; further improvements necessary

Suzuki: There is probably some ambivalence about the term "SRI." I think it tends to lead to misconception that the products give more weight to social contributions and disregard investment returns, creating hesitation among investors seeking to maximize their investment gains.

Moderator: The word "SRI" gives the wrong impression, as many people have been saying. I think it gives the impression that you sacrifice your own returns to contribute to society.

Tanaka: None of the SRI funds I have designed have even slightly sacrificed returns. Unfortunately though, SRI funds as a whole have not performed well. Many funds concerned with global warming set up before the global financial crisis have declined steeply since the crisis. This is because they had a high proportion of small-cap venture stocks, which are more sensitive to market conditions. That is, their decline had nothing to do with their being SRI funds.

Moderator: How do individual investors react to the terms "SRI" and "social contribution?"

Yanagisawa: We have the responsibility to provide proper explanations to individual investors to help them understand financial products and make investment decisions. Yet the fact is that SRI is still not widely understood or even known.

Naoko Saito Senior Managing Director, Daiwa Securities Co. Ltd.

Hiroshi Suzuki Senior Researcher, Environment and CSR Research Section, Capital Market Research Department, Daiwa Institute of Research Ltd.

Kikuchi: I have recently become painfully aware of the need for a change in the way information is presented. For example, I feel investment sentiment has been frozen by overblown claims about the dire consequences for the earth of not reducing CO₂ emissions. I believe information should be presented in a way people can relate to—indicating how intertwined our daily lives and companies' activities are with global issues.

Consideration of non-financial gains to expand SRI

Moderator: Daiwa held a seminar for institutional investors and invited representatives from the Japanese Trade Union Confederation, which released the Guidelines on Responsible Investment of Workers' Capital. What are these guidelines, and how was the response from investors?

Yanagisawa: The guidelines relate to pension funds, which is, in a broad sense, workers' capital. Aimed at establishing workers' governance over the funds, they call for ESG considerations to be incorporated into decision making, and performance monitored and followed up. While most participants responded positively, some were negative. Naturally, some asset management companies insisted that performance is inevitably the focal point in managing assets. Institutional investors' main mission is to maximize performance. While it is ideal to take long-term growth into account when evaluating companies to make investment decisions, they actually need to deliver performance in a month or two.

Still, if fund managers at representative institutional investors such as GPIF¹ and influential pension funds refer to SRI factors when selecting stocks, I think it will have a domino effect and instantaneously change the environment.

Suzuki: I believe most investors' true opinion is that performance is everything in managing funds, but I think that investment gains are not limited to just performance, but also the positive feedback the investment creates. People that invest for such feedback are probably interested in generating positive returns for society rather than being purely money-orientated. I think SRI will spread when investors consider profits that cannot be measured numerically.

Saito: That said, it remains the case that investors exist because there are profits to be made. On the other hand, we have recently witnessed the social phenomenon of people spontaneously sending school backpacks to orphanages around Japan. I think this shows that people need to feel connected with others even in a so-called fragmented society. By explaining in simple words to individual investors that connecting with society is a social contribution and that participation in society can occur through investment, we can probably create a win-win relationship, which will probably help spread SRI.

Tanaka: Customers can directly relate to the microfinance funds I am currently selling. I think there is extremely strong potential demand for the funds among customers ranging from individuals with a strong interest in the market to business investors.

1 Government Pension Investment Fund: The world's largest institutional investor, said to be managing ¥88.5 trillion in Japanese bonds (end Dec. 2008).

Giving meaning to money; much expected of financial institutions

Moderator: The lack of financial education in Japan means many people believe making money is the antithesis of contributing to society. However, the two are compatible and using money meaningfully can build a sustainable society. I believe money flows will change if we educate people about this.

Kikuchi: I am currently participating in the Multi-stakeholder Forum on Social Responsibility for a Sustainable Future², which has brought together diverse stakeholders to resolve society's problems. The composition of stakeholders is unique in that the

financial sector is grouped separately from other companies. This stems from the idea that financial institutions, which are responsible for money flow, act as infrastructure.

To me, this shows that there are extremely high expectations of financial institutions to give meaning to money flow. I received the extremely strong impression that actors from non-financial sectors such as government, NPOs and NGOs, consumer groups, and labor organizations expect financial institutions to redirect money flows and gradually change the world through proactive initiatives and the creation of frameworks such as impact investing.

2 Multi-stakeholder Forum on Social Responsibility for a Sustainable Future: Please see page 22.

Examples of successful group coordination; the shortcut to spreading SRI

Moderator: What should the Daiwa Securities Group do to spread SRI?

Kikuchi: I think it is extremely important to broaden the range of products offered. This could be bonds or direct capital flows, but I think the important thing is to develop a wide range of products and devise an effective way of communicating information. Also, we should provide basic information such as an explanation of impact investing rather than just product information, using whatever means possible to coordinate information between group companies and steadily pump out information.

Tanaka: I want to continue steadily developing funds that benefit investors and play a useful role in business.

Shuichiro Tanaka Director, Investment Trust Division, Daiwa Securities Co. Ltd.

Shiko Yanagisawa Managing Director, Global Equity Sales, Daiwa Securities Capital Markets Co. Ltd.

However, I think we need to raise awareness even within the Daiwa Securities Group, as there are variations in the understanding of, and interest in, SRI even in our company.

Saito: I strongly feel that we need to make a coordinated effort to create examples of win-win investments generating profit for investors, employees, and the Daiwa Securities Group as a whole.

Suzuki: Changes in capital flows should also change the stance of companies. I think we should therefore also facilitate positive communication between investors and companies.

Yanagisawa: I think it is also important to offer investors information on companies that are at the leading edge of socially responsible activities, but whose initiatives are not widely known, and educate equity analysts who carry out corporate research. Suzuki: In my opinion, when we provide information to institutional investors, we need to indicate how changes in society affect individual companies' value. The most powerful way to appeal to investors would be to provide examples of successful investments in which positive social returns rebounded in investment gains. Still, because there are as many examples of failure as success, it would also be acceptable to urge customers to make such investments with an understanding of this overall picture.

Moderator: Thank you all for your highly constructive insights. We will take them into account in the Daiwa Securities Group's future activities.

Moderator: Mariko Kawaguchi Managing Director of CSR Promotion, Corporate Communication Department, Daiwa Securities Group Inc.

Our relationship with money

A key function of financial institutions is to generate money flows that lead to a sustainable society, but providing education about the impact of money on the economy and society is also important. We highlight the importance of the fact that the money we each hold has meaning.

Economic and financial educational activities

Learning about the economy when you are young enables you to better understand the relationship with others and society in general and how economic activities and finance can affect society.

The Daiwa Securities Group exploits its own specialist knowledge and knowhow and cooperates with educational institutions and NPOs to support practical economics education for elementary, junior high, and senior high school students and offer programs at educational institutions.

Results in Economic and Financial Education

Activity	Description	Started	Participants
Support for the Student Company Program (SCP)*	A program that gives high school students hands-on experiences with corporate management by simulating real-world business conditions	September 2003	174
Support for Finance Park*	Personal finance planning workshop teaching students about society and economics by managing household finances.	June 2005	23,936
Sponsorship of JA's mainstay Global Leadership Forum for elementary, middle, and high school teachers*	Case studies on recent developments in the global economy	July 2001	3,182
Support for operation of Japan Council for Economic Education (CEE-Japan)	Promoting use of <i>Life is a Series</i> of <i>Choices</i> hands-on economics textbook for economic education of teachers	January 2009	577

Programs of Junior Achievement, the world's largest non-profit organization promoting economic educational activities for youth

Describing how money relates to daily life, and the philosophy of finance

Finance is closely intertwined with our daily lives. We come into contact with it every day, for example, through banks, securities companies, insurance companies, and state pensions. Despite this, there are likely few people concerned about the ways money entrusted to financial institutions (deposits, insurance, shares, pension reserves) is used.

We undertake various educational activities to inform investors and depositors that money has meaning and the power to move society and companies to action. We use lectures at high schools and universities as well as various bodies' venues for communicating with the public to teach financial literacy and the philosophy of finance, broadening understanding of SRI.

We actively engaged in financial education in fiscal 2010, holding lectures for students and working adults (at community colleges and the Junior Chamber International Osaka) on a sustainable society and the significance of money.

Examples of Financial Education Activities in Fiscal 2010

Date held	Participants	Themes
May 14	Employment Study Group, Ministry of Health, Labour and Welfare	Realities of SRI
November 5	Junior Chamber International Osaka	Future of money
November 10	Hitotsubashi University	CSR and capital providers
November 12	Seminar for community college	Sustainable society and social responsibility for seniors
November 17	Sakai High School	Future of money

Talk on the future of money at Future Expo

The Daiwa Securities Group had a stand featuring impact investing at the Future Expo 2010 for the Blue Planet held November 4-6, 2010 by the Junior Chamber International at the Osaka International Convention Center. At a panel discussion on "SRI—Innovations Creating Sustainable Money Flows," Mariko Kawaguchi, Managing Director of CSR Promotion, Corporate Communication Department, Daiwa Securities Group, acted as moderator, and Satoru Yamamoto, Director, Product Planning Department, Daiwa Securities, participated as a panelist discussing the future of money. Participants' reactions such as, "It was the first time I heard that money can be used to change society," and "I would have thought of a more useful way to use my money if I had heard these things when I was a child," reiterated the importance of our educational activities.

Introducing impact investing at the Future Expo

Participation in Multi-stakeholder Forum on Social Responsibility as steering committee member

The Multi-stakeholder Forum on Social Responsibility for a Sustainable Future, in which many bodies participate as equals, was established in 2008 with the aim of building a coordinated response to problems in society that cannot be solved by government alone. Katsuya Kikuchi, Senior Fund Manager, Daiwa Asset Management, participates in the forum, which includes business and consumer associations, labor unions, NPOs and NGOs, and government, as a representative of the financial sector and steering

committee member (as of March 2011). In the forum's first two years, discussions centered on factors needed to create a safe and stable sustainable society. Hereon, the forum plans to devise a coordinated strategy to create a safe and sustainable future and work on concrete actions spanning four issues: developing social infrastructure to nurture humanity, creating a society in which everyone can live together, participating in the resolution of global-scale problems, and developing sustainable communities.

Holding "Social Business College" lectures

The idea of social businesses, which aim to resolve specific problems affecting society as well as to generate sustainable profits, has gained attention. However, social businesses themselves are not yet widely known. At the Daiwa Securities Group, we regard providing a forum for discussion of sustainable business models and financing as highly important. In October 2010 we began the "Social Business College" series of lectures for university students and adults.

We hold the lectures in cooperation with Music Securities, a next-generation financial business providing financing to social businesses via the Internet, and we publish the proceedings and case studies on our website.

http://www.daiwa-grp.jp/csr/citizen/support/college/backnumber.html

The second lecture, held on December 7, was conducted by Eriko Yamaguchi, CEO, Motherhouse. Ms. Yamaguchi spoke frankly about making bags—of a quality acceptable to customers in advanced nations—in the developing nation of Bangladesh (which was not being reached by international aid) and her efforts to establish the company's brand. The lecture was received enthusiastically, with the audience empathetic and asking real questions about Motherhouse's business model.

Future lectures will also highlight social businesses with a unique business model. We plan to hold over twelve lectures during the two years of the series, ending in September 2012.

1st: October 28, 2010

Lecturer: Natsuko Shiraki, President, HASUNA Co., Ltd.

2nd:December 7, 2010

Lecturer: Eriko Yamaguchi, CEO, Motherhouse Co., Ltd.

3rd: February 14, 2011

Lecturer: Yoshiteru Takemoto, CEO, tobimushi Inc.

First Social Business College lecture

Creating a Rewarding Workplace for Employees

Making Work as Fulfilling as Possible

At the Daiwa Securities Group, we believe maximizing each employee's motivation increases customer satisfaction and in turn raises shareholder value. We are making efforts to ensure that individual employees feel satisfied in their jobs and that they, together with their families and all others concerned, feel proud to be a member of the group.

Our efforts

Achieving a good work-life balance

We are working to ensure employees have a good work-life balance as part of our business strategy. As a group, we have made concerted efforts to introduce employees to new ways of thinking about work. We have put in place systems that deliver a variety of work practices, encouraged employees to leave work by 7:00 p.m. and to take their annual leave, and instituted workplace visits by employees' families.

Encouraging women to succeed

We are trying to appeal more to women's individual interests, by introducing thriving female employees as role models in internal publications and providing opportunities for cross-company communication, in order to increase the number of women in management positions. These efforts have resulted in five female directors joining the board and women heading up about 10% of branches since fiscal 2009. The number of women transferring to the career-track employee and regional career-track employee streams has also increased significantly.

Recruitment of previous years' graduates

In fiscal 2011, we began hiring university graduates who had graduated up to three years earlier. We hope to

secure diverse personnel by recruiting year-round so that such graduates can be employed soon after receiving tentative job offers, regardless of whether they have prior work experience. These recruits receive the same level of training as new graduates.

Recruitment of people with disabilities

The Daiwa Securities Group has around 200 employees with disabilities working in a wide range of roles at its headquarters, in sales branches, and in call centers.

The group started recruiting new graduates with disabilities as regular employees (general office staff) in fiscal 2008 and in fiscal 2011, broadened recruitment into the career-track employee, regional career track employee, and customer service employment streams. We actively increased recruitment opportunities, holding briefings about the company for new graduates, participating in career expos, and implementing job placement support programs for disabled university students.

Once people with disabilities are hired, we provide support for career advancement, for example creating opportunities for them to enter the career-track and regional career-track employment streams.

Efforts to ensure and improve employees' health

We consider our employees' health essential capital for our company and society. Our human resources department, General Health Development Centers, and health insurance association have worked together to more actively promote health.

Our efforts include thorough health education, a walking campaign, joining the Cancer Screening Corporate Action project, a program to help people quit smoking, breast and uterine cancer screening, cervical cancer vaccinations, and metabolic syndrome-specific health guidance.

Past Measures and Results

Measures		Progress			
		Indicator	Before	After (as of FY2010)	
February 2005	Establishment of Women's Support Action Team¹	Number of female managers ¹	75	162	
October 2005~	Expansion of childcare and nursing care programs	Number of employees taking childcare leave	115 people (no men)	383 people (incl. 25 men)	
April 2007∼	Job relocation system ²	Number of users (cumulative since FY2007)	-	69	
June 2007∼	Directive asking executives and employees to leave office before 7:00 p.m.	Overtime working hours (monthly avg.)	26.2 hours	24.0 hours	
June 2008∼	Policy to encourage executives and employees to take paid leave	Paid leave usage rate (per year)	37%	55%	
April 2008∼	Recruitment of people with disabilities as regular employees	Proportion of employees with disabilities (all employment streams)	1.87%	2.08%	
October 2009~	Expansion of program for changing career path	Number of employees transferring to career-track roles (total since FY2009)	October 2009~	682 people	

¹ Director or higher

Note: For scope of data, see: http://www.daiwa-grp.jp/english/csr/report/2011/

² Offers position in new location when an employee must relocate due to marriage or spouse's job transfer (eligible to employees who are not subject to transfers that require change of residence).

Daiwa Aid after the Great East Japan Earthquake

We extend our deepest condolences to the victims of the earthquake that took place on March 11, 2011.

The following is a report on our donations to help reconstruction and provide aid to affected areas and the direct support the Daiwa Securities Group is providing, as well as our future plans.

Donations

¥100 million (Daiwa Securities Group)

¥30 million each to Iwate, Miyagi, and Fukushima prefectures ¥10 million to Ibaraki Prefecture

■ Subsidies for volunteer activities

¥35 million (Daiwa Securities Foundation)

¥5 million (¥1 million each) to disaster volunteer centers in Iwate, Miyagi, Fukushima, and Ibaraki prefectures, and Sendai City

¥30 million in grants to disaster volunteer action groups (maximum ¥500,000 per grant)

Recipients are students and specialist groups engaging in activities needing specialized skills.

■ Subsidies for research into disaster medicine

¥10 million (Daiwa Securities Health Foundation)

¥10 million (maximum ¥1 million per grant) to universities, research centers, hospitals, and other individuals and groups engaged in research into disaster medicine or medical care in the disaster-stricken areas of the Tohoku region and Ibaraki, Miyagi, and Chiba prefectures.

■ Daiwa Foundation Tohoku Scholarships

£250,000 (Daiwa Anglo-Japanese Foundation)

The foundation has decided to establish a £250,000 scholarship fund for students from the Tohoku region whose educational or other circumstances were affected by the earthquake.

■ Daiwa Point Program Donations through point exchange (Daiwa Securities)

¥7.18 million raised by 7,005 participants (as of April 30, 2011)

Used to support reconstruction in affected areas through NPO Japan Platform.

■ Charity collection (Daiwa Securities Group)

¥40.57 million raised from executives and employees in Japan and abroad (as of April 27, 2011)

Used for reconstruction of affected areas and to support victims through Japan Platform and the Japanese Red Cross Society.

■ Policy Proposal (Daiwa Institute of Research)

The Daiwa Institute of Research announced a proposal for the establishment of a reconstruction fund and a reconstruction solidarity tax.

(Proposal for Establishment of Reconstruction Fund and Reconstruction Solidarity Tax to Finance Rehabilitation after Great Earthquake of Unprecedented Scale).

Please see the following website for more information (in Japanese).

http://www.daiwa-grp.jp/data/current/press-2955-attachment.pdf

■ Support through financial products

The Daiwa Securities Group is giving a portion of trust fees from the Daiwa Nippon Ouen Fund (Phoenix Japan)¹ to earthquake victim support groups.

The group is also supporting finance aspects of the massive reconstruction funds and developing impact investment financial products.

1 Daiwa Nippon Ouen Fund (Phoenix Japan): Japanese stock fund offered by Daiwa Asset Management. Invests only in Japanese stocks to support strong Japanese companies and invigorate the Japanese economy.

■ Future support

Interest in building a sustainable economy has grown since the earthquake and accident at the Fukushima Daiichi Nuclear Power Plant brought into focus sustainable energy and regional economies that take into consideration the surrounding environment and communities. We strive to offer companies and investors information spanning a wide range of perspectives such as the environment and CSR.

There are many additional ways, such as the Daiwa Institute of Research's policy proposal, for the Daiwa Securities Group to contribute through capital markets.

We plan to share our experiences in the reconstruction of Sumatra, using knowledge gained in our project supporting reconstruction after the 2004 tsunami².

We also plan to encourage employee's activities long-term by providing employee volunteer information through our intranet

2 Daiwa Securities Group Tsunami Reconstruction Fund

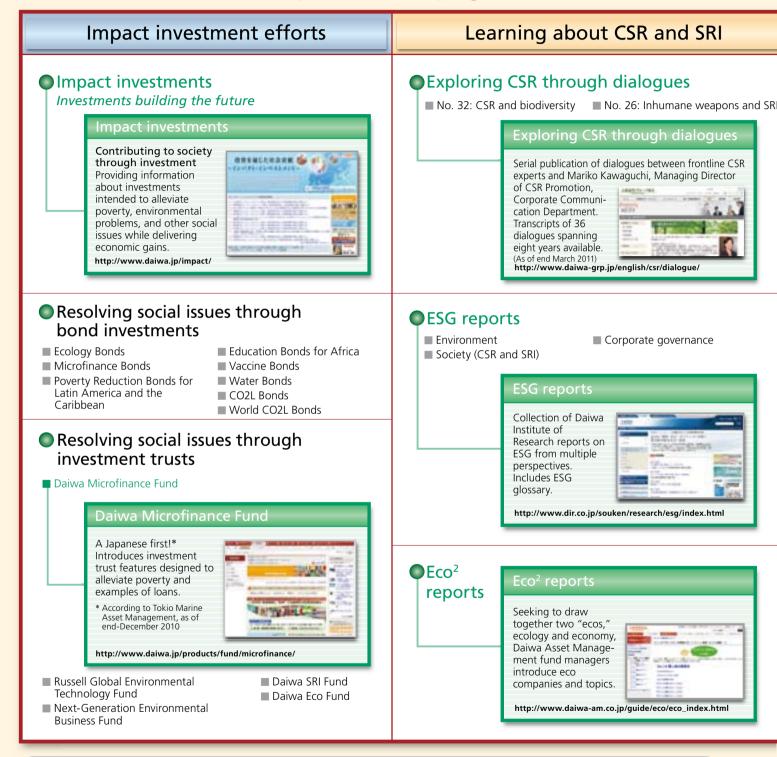

Please see the following websites for more information about the Daiwa Securities Group Tsunami Reconstruction Fund (in Japanese).

CSR Issues: Performance and Targets

This section reports the fiscal 2010 results and fiscal 2011 targets for the wide range of initiatives conducted to help build a more sustainable society.

		Targets for Fiscal 2010	
Key Issue 1 Leveraging Financial Capabilities to Contribute to a Sustainable Society		 Arrange and distribute at least ¥100 billion in impact investment bonds Consider other impact investment products such as investment trusts 	
Key Issue 2		 Strengthen ties with domestic and overseas universities and also monitor and further promote the performance of these relationships Provide employees with training in financial philosophy (ethics as financial supporter) Pursue wide distribution of the "Life is a Series of Choices" text to teachers Hold study sessions for students on the topic of social business 	
Developing Sound F for the Next Genera	inancial and Capital Markets tion	Communicate more information about environmental issues (continued)	
		Enhance information dissemination through Daiwa Securities Information TV and website	••••••
C		Establish a firmer global internal control scheme to further strengthen the trust of stakeholders and thus ensure sustained growth	
Corporate Governance		Establish groupwide BCP scheme	
CSR Management		Hold dialogues with experts at least once a month to improve executive and employee awareness, and promote internal and external communication through the dissemination of information

Daiwa Securities Group CSR

Approach and Basic Stance

The Daiwa Securities Group has the important mission of contributing to the development of society and the economy through daily operations that help build investors' wealth and support corporate activity.

We consider strong trusting relationships with customers, shareholders, employees and society—as expressed by our corporate principles—foundational to the ongoing fulfillment of this mission and continuous growth.

Role and Social Responsibilities of the Financial Industry

The Daiwa Securities Group is a leader in the financial industry, and plays a vital social role by building a bridge between, on the one side, the need of companies to raise capital or the need of governments to finance public works projects, and on the other side, the need of individual and institutional investors, pension funds, and others for efficient investment.

On the fund-raising side, the Group provides advice and assistance in implementation for companies raising money for capital expenditures and R&D, as well as for national governments, local governments, international institutions and public corporations seeking to raise funds for public works projects. It does so by issuing marketable securities such as stocks and bonds, and by creating other securitized products.

On the investment side, the Group provides appropriate investment information and advice tailored to each customer's situation and goals. It offers a comprehensive and diverse line-up of financial instruments and services to meet the various needs of individual and institutional investors as well as pension funds.

The Group links demand for funds to fund supplies through the financial and capital markets, primarily, and facilitates the smooth flow of money so that it can circulate as the lifeblood of the economy. This, in turn, helps to develop industries and resolve social issues.

External Initiatives Using Finance to Resolve Social Issues

The business sector plays an important role in enhancing the sustainability of society. Financial institutions have a social mission to make the most of their core capacities to contribute to sustainable social development. At the Daiwa Securities Group, we believe that our role is not only to maintain and develop an equitable and dynamic financial market, but also to reflect a socially conscious perspective in finance and facilitate the flow of money to build sustainable societies.

On the basis of this philosophy, the Daiwa Securities Group is a signatory to UNEP FI,¹ PRI² and the Carbon Disclosure Project (CDP),³ fulfilling this role as an upstanding member of the international community.

In January 2010, the Daiwa Securities Group became the first Japanese securities company to sign the United Nations Global Compact (GC),⁴ a platform to help companies that have committed to sustainable and responsible business practices shape their policies. The Group pursues business

CSR REPORT 2011 Web-only contents

activities consistent with the UN Global Compact. Further, in line with the United Nations Millennium Development Goals (MDGs),⁵ the Group is endeavoring to develop products and services that help resolve social issues.

1 United Nations Environment Programme Finance Initiative (UNEP FI)

UNEP FI is a partnership between the United Nations Environment Programme, which is a UN organization, and financial institutions around the world. Based on the recognition that the money handled by the financial industry has a major impact on the world, this initiative pursues better ways of doing business, taking into account the environment and sustainability, and seeks to spread and encourage this commitment.

2 Principles for Responsible Investment (PRI)

PRI is an investor initiative in partnership with UNEP Finance Initiative and the UN Global Compact. This initiative seeks to encourage and promote responsible lending and investing practices which take environmental and sustainability issues into account.

3 Carbon Disclosure Project

This project is an affiliation of institutional investors concerned about climate change who demand that companies disclose information about their stance on environmental problems and initiatives addressing such problems.

CARBON DISCLOSURE PROJECT

4 UN Global Compact

The UN Global Compact was established in 2000 under the UN Secretariat after an initiative launched in 1999 by then-Secretary General Kofi Annan. The membership consists of global corporate leaders who are expected to align their business practices with ten principles in the fields of human rights, labor, environment, and anti-corruption in their business activities, in partnership with UN agencies, labor, and civil society.

5 United Nations Millennium Development Goals (MDGs)

The MDGs consist of eight goals that 189 representatives from UN Member States, including 147 heads of state, participating in the UN Millennium Summit held in New York in September 2000, designated as 21st century goals for the international community, with a target date of 2015.

Management Report

CSR Management

Approach and Basic Stance

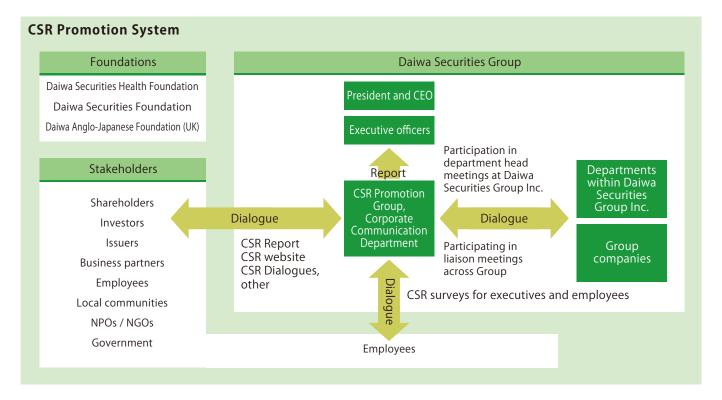

The Daiwa Securities Group has four corporate principles: building customer trust, valuing human resources, contributing to society and earning sound profits. To live up to these principles, the Group strives to encourage a rich awareness of CSR among executives and employees. This is the key to ensuring that everyone at Daiwa acts in line with the greater good in all of their daily work. The Group is proactive in holding dialogues with external stakeholders, and reflects their feedback in its activities.

CSR Promotion System

The CSR Group of the Corporate Communication Department at Daiwa Securities Group Inc. compiles information in external meetings and actively holds dialogues to ensure that feedback from a wide range of stakeholders is reflected in the Group's activities. The section then shares this information in department head meetings and departmental liaison meetings at Daiwa Securities Group Inc. and throughout the Group, and also treats CSR-related issues as business issues requiring solutions. The section also provides lectures on CSR during the Group's new hire training to increase awareness of CSR, and shares information on CSR activities with branches throughout Japan and major overseas sites. The section also organizes dialogues on various CSR issues with opinion leaders in the broader society, and posts them on the CSR website of Daiwa Securities Group Inc. as "CSR Dialogues" (only selected dialogues are available in English).

CSR Dialogues:

Abstract of the Daiwa Securities Group's Medium-Term Management Plan "Passion for the Best 2011"

Corporate Mission and Principles

The Daiwa Securities Group's mission is to contribute to the development of society and the economy through daily business operations, including wealth management and supporting corporate clients' activities.

The strong trust of stakeholders, including customers, shareholders, employees and the society, is essential to the accomplishment of our mission and sustainable growth.

Management Vision

Building a Robust Business Structure, and Taking the Path to Becoming Asia's Leading Financial Services Firm

Based on its established business foundation, the Daiwa Securities Group will materialize its vision and corporate principles in order to achieve higher goals.

The Daiwa Securities Group is working to achieve sustainable growth by building even stronger trust with stakeholders and contributing to the ongoing development of society. The Group aims to be an upstanding enterprise that executives and employees and their families can feel more and more proud to be part of, as it strives to "Build a Robust Business Structure, and Take the Path to Becoming Asia's Leading Financial Services Firm."

Management Report

Corporate Governance

Approach and Basic Stance

The Daiwa Securities Group is convinced that earning the trust of all stakeholders is the best way to ensure that corporate value continues to grow. The Group is developing an agile, efficient corporate governance system whose transparency meets global standards.

Corporate Governance System

With the aim of ensuring efficient management and thorough corporate governance, in 1999 the Daiwa Securities Group became the first publicly listed Japanese company to make the move to a holding company system. In addition, Daiwa Securities Group Inc. adopted a committee system to accelerate decision making. Under this system, directors entrust certain decision-making authority to executive officers; the supervising function of the Board of Directors has been reinforced through the establishment of the Nominating, Audit and Compensation committees; and management transparency has been enhanced.

The corporate governance system of the Daiwa Securities Group consists of:

- ·The Board of Directors, which serves a supervisory function, and the Nominating, Audit and Compensation committees; and
- ·The Executive Committee, which serves as the executive body; and the Group Risk Management Committee, the Disclosure Committee and the Group IT Strategy Committee, which are subcommittees of the Executive Committee; and
- ·The Group Internal Audit Committee, which serves as the internal audit body reporting directly to the CEO.

Although the chairman of the Board of Directors is also an executive officer, he does not have any specific duties as an executive officer.

Supervisory function

The Board of Directors consists of 12 directors, including five outside directors.* The Board of Directors determines key management policy and supervises executive duties. In order to perform this supervisory role from multiple viewpoints in accordance with the demands of society, the policy for selecting new board members states that candidates must have a strong sense of ethics and demonstrate initiative and leadership. Additionally, external directors are experts in such fields as executive management and accounting. In addition, the supervisory function of Daiwa Securities Group Inc. is reinforced by the Audit Committee and the Office of the Audit Committee. The Audit Committee, which consists of a majority of outside directors,* plays a pivotal role in the supervision of executive duties. The Audit Committee is assisted by the Office of the Audit Committee, which is an independent department.

* Outside directors as defined by Article 2-15 of Japan's Companies Act.

Executive body

The Executive Committee, consisting of 14 executive officers, is operated by Daiwa Securities Group Inc. The Executive Committee discusses and makes decisions regarding executive management, including the business strategy of the Group as a whole and Group-wide management issues. The Executive Committee has been entrusted with the greatest possible level of decision-making authority by the Board of Directors and holds monthly meetings, in principle.

Some of the executive officers of Daiwa Securities Group Inc. also serve as directors in major Group companies in order to secure efficient and effective department strategies based on the overall Group strategy and from the perspective of Group management.

Preventing conflicts of interest between group companies

Conflicts of interest between group companies can occur in situations such as intra-Group trading. The Daiwa Securities Group applies rules regarding conflicts of interest stipulated by Japan's Companies Act to Executive Committees. Conflicts of interest within the Group are prevented through a rule prohibiting an executive officer from voting when he or she is also the director of an interested group company.

Internal Control

With the implementation of the internal control and reporting system for financial reports, all Daiwa Securities Group companies have executed the documentation of standards in three areas: companywide control, business process control, and general IT control. Regulations for the internal control and reporting system and related regulations were amended accordingly.

Based on these regulations, Group companies' internal control divisions take the lead in evaluating the effectiveness of internal control, while the evaluation results are confirmed in councils at each Group company and reported to Daiwa Securities Group Inc. After these reports are received, the Group Internal Audit Committee discusses them and makes decisions and, based on these decisions, the Disclosure Committee determines the effectiveness and validity of the system. Taking the report on the results into account, the CEO and the CFO draw up an internal control report and only then declare to investors and other stakeholders that financial reporting is accurate. In fiscal 2010, the Committee revised the internal management system regulations related to risk so that they would be more closely aligned with global standards.

Risk Management

Appointment of CRO and Establishment of GRM Department

In April 2010, Daiwa Securities Group Inc. established the Group Risk Management Department to manage the Group's overall risk exposure more comprehensively and directly, and also created the position of Chief Risk Officer (CRO) to oversee the department.

Business Continuity Plan

In anticipation of possible damage to its sales branches or head office/head office functions and/ or data center due to social infrastructure shutdowns caused by earthquakes, fires, storm and flood damage, and abnormal weather, as well as serious outbreaks of infectious diseases, such as new strains of influenza, the Daiwa Securities Group drew up a business continuity plan (BCP) prioritizing important operations¹ to be restored or continued in the event of a natural disaster, in order to keep the financial market functioning and protect customers' economic activities.

In accordance with this plan, the Group will ensure the safety of customers and Group executives and employees and protect assets while continuing to pursue vital operations based on the public-interest aspect of its business as a financial services firm.

Specifically, the Group has promoted the digitization of data necessary for its business operations to establish a state-of-the-art business continuity system in the financial industry. Equipped with Japan's highest-level backup center, Daiwa Securities Group Inc. has already completed the installation of thin client technology.² This enables the Group to easily switch to an alternate system in case the headquarters cease to function and thereby continue vital operations through a substitute office location.

The Group immediately set up a crisis management headquarters after the Great East Japan Earthquake struck on March 11, 2011. The headquarters confirmed the safety of Group executives and employees and verified that all were unharmed, and also confirmed that there were no problems with setting up offices or system operations for the continuity of operations. By March 14, the following Monday, all branches were operating as usual, so that the Group was able to accommodate customers in afflicted areas who had lost their seals and Daiwa cards with services such as cash withdrawals.

The Group will continue to enhance coordination between Group companies' BCP systems to prepare for accidents.

1 Priority operations to be restored or continued:

- 1. Market settlement of securities transactions contracted but not yet delivered
- 2. Payment operations
- 3. New orders from customers to sell or to liquidate long positions on margin transactions for the products below

Domestic listed equities

MRF (money reserve funds), MMF (money market funds), medium-term government bond funds Japanese government bonds for individual investors

2 Thin client:

A technology for the storage and administration of the totality of data on a single server instead of

having individual employees control application software and files distributed among various terminals. This can streamline administration processes and costs while reducing operational risks.

Information Security Management

The Daiwa Securities Group has developed and maintains a sophisticated information security management system to protect its customers' personal information and other information assets from a wide range of security threats and handle this information appropriately. The Group has formulated a basic information security policy and a privacy policy to maintain its management system. In addition to technical information security measures, the Group implements security training for all executives and employees in accordance with the responsibilities of their posts.

For group-wide organizational information security management, individuals responsible for information security at each Group company meet to discuss Group information security measures and report information security risks to the Group Risk Management Committee. In addition, to raise the level of information security, the Group operates in conformity with the Information Security Management System (ISMS). A number of Group companies have already obtained ISMS and Privacy Mark certification in accordance with their respective evaluation and certification systems.

Management Report

Compliance

Approach and Basic Stance

Without stable, fair, and transparent financial and capital markets, economic prosperity and social progress are not possible. The Daiwa Securities Group takes its responsibility seriously to contribute to healthy markets which serve as vital social infrastructure. It works every day to accomplish this by fulfilling a market intermediary role. Most importantly, Daiwa recognizes that none of these vital functions are possible without a highly effective compliance framework and rigorous internal controls.

Compliance Framework

Daiwa Securities Group Inc. plays a central role in setting compliance policy for the entire Group. This is complemented by policies formulated by each Group company to comply with rules and regulations that apply to their specific line of business. For this reason, each Group company's compliance department plays a leading role in setting out detailed compliance regulations and measures.

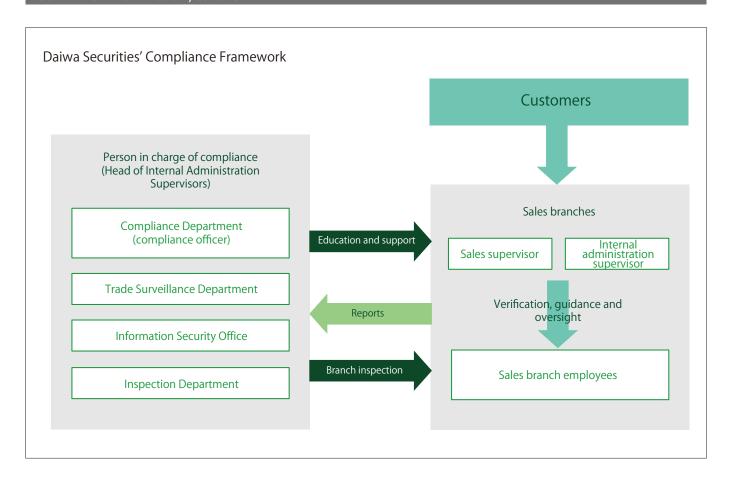

Daiwa Securities upgraded its internal administration supervisory system by ensuring that every single branch has a full-time position dedicated to this function. Moreover, to improve and enhance the quality of the company's sales operations to protect the interests of investors, the company took initiatives based on the PDCA cycle, augmented the manager confirmation system, and provided tools for sales employees. In addition, the company conducted a comprehensive inspection of internal rules and took steps to improve the effectiveness of sales branches while also alleviating their burdens.

In its role as a gatekeeper for the market, the company also reinforced its initiatives to ensure market fairness and transparency, such as eliminating unfair trading and criminal elements.

Daiwa Securities Capital Markets adjusted and reinforced its steps to accommodate the revisions made to Japan's Financial Instruments and Exchange Act. The company adapted to regulations on disclosure of the sale of securities by revising client forms, reinforcing the management system and system for managing solicitation, strengthening the system for reporting to the Japan Securities Dealers Association, and revising the foreign securities account agreement.

The company took steps to comply with the revisions to the procedure for changing the status of customers from "professional investor" to that of "general investor" by changing the application forms and authorization forms used when a professional investor returns to the status of a general investor, adjusted the deadline for the change, and devised new forms and revised forms to reflect the determination of the period to submit requests for a return to professional investor status. The company addressed regulations on alternative dispute resolution (ADR) by revising its regulations on dispute resolution and improving its system to address complaints, and also joined the Japan Securities Investment Advisers Association and concluded an agreement with the Japan Financial Services Association as part of its efforts to resolve complaints and other claims.

As always, those responsible for compliance in each of the Group companies exchanged information in the corporate ethics liaison committee, and the Group's overall compliance framework was continuously maintained and promoted.

Establishment of system to strengthen strategy for Asia

Daiwa Securities Capital Markets is establishing and enhancing its global compliance system, with a particular focus on establishing a compliance system based on strengthening its strategy for Asia. In fiscal 2010, the company adopted a system of regional heads (RHs) who have the authority and responsibility to set up compliance systems in business regions. The company set up a Hong Kong control room to facilitate the establishment of a compliance system in the Asia and Oceania region, where business has expanded particularly rapidly, under the RH in charge of this region. In addition, the RH and CR for Asia and Oceania were assigned the following responsibilities when the positions were first created, but these operations could expand as business grows going forward.

- 1) Management of conflicts of interest in region
- 2) Management of insider information in region
- 3) Monitoring of proprietary account trading and employee trading in region
- 4) Operations related to reports on large shareholdings of stocks and other instruments
- 5) Compliance in research
- 6) Issues related to compliance in derivatives operations in Asia

Systematic Measures to Avoid Involvement with Criminal Elements

The Daiwa Securities Group avoids any involvement whatsoever with organized criminal elements. This is a key part of its commitment to earning trust and ensuring sound financial markets. The Group is taking a range of measures to reinforce its systematic measures for preventing any engagement with parties associated with organized crime in or outside of Japan.

In 2008, the Group established a new basic policy governing its approach to avoiding involvement with organized criminal elements and began to execute it. The Group also follows the Guidelines for Corporations to Prevent Damage by Criminal Elements issued by the Japanese government in June 2007. In 2010, the Group established the Regulations Concerning Shut off of any Relationship with Criminal Elements, and ensures that these rules are scrupulously observed.

In addition, Daiwa Securities Group Inc. took a central role in compiling information from Group companies, reviewing cases where contact may have been received from criminal elements, and holding interviews to assess the response. It also endeavored to improve effectiveness by exchanging information with public institutions to ascertain conditions and building up and establishing a database.

With the JSDA's Regulations Concerning Shut off of any Relationship with Antisocial Forces, Daiwa Securities Capital Markets formulated new internal regulations and augmented and reinforced its system to ensure that its securities underwriting operations had no contact whatsoever from criminal elements. In addition, the company upgraded its system by setting up a database on criminal elements. Going forward, in addition to these measures to avoid involvement with criminal elements, the Group will strengthen its measures to avoid engagement with parties involved in unfair trading in the financial markets as well as those who may tolerate criminal elements.

Basic Policy on Avoiding Any Involvement with Criminal Elements

Basic Position

To ensure fairness and the sound development of the securities market and protect our customers and staff, the Daiwa Securities Group is creating a framework to eliminate the influence of organized crime groups, gang members, corporate extortionists and other criminal elements and taking systematic measures to avoid all ties with such elements.

- 1. The Daiwa Securities Group will not carry out any transactions whatsoever with criminal elements.
- 2. If it is determined that parties already having transactions with the Daiwa Securities Group are criminal elements, we will swiftly take appropriate measures to terminate dealings with them.
- 3. The Daiwa Securities Group will provide no funds to criminal elements.
- 4. The Daiwa Securities Group will accept no unfair demands from criminal elements. If it is determined that an unfair demand has been made by criminal elements, we will take legal action in the civil or criminal courts against the party making the demand.
- 5. The Daiwa Securities Group establishes close cooperative relationships with outside parties such as the police force, the National Center for the Elimination of Boryokudan (organized crime groups), legal experts and others.

Compliance Training

Daiwa Securities Group companies provide regular training and testing to improve compliance awareness and ensure that all employees embrace Daiwa's commitment to corporate ethics. These efforts are the foundation of employees' own efforts to ensure total compliance.

The Daiwa Securities Group holds numerous compliance training sessions, making full use of e-learning technologies. Daiwa Securities gives the All Branch Unified Compliance Assurance Test to all sales employees every six months. In addition, various training programs were given with an emphasis on "knowledge of insider trading regulations," "essential knowledge when working with customers deemed to be insiders," "knowledge on management of corporate information" and "knowledge on sharing information." Retired police officers from the Trading Investigation Division came to the company to give talks with the aim of ensuring people knew what to do if they received any contact from criminal elements.

In addition, new hires and newly appointed managers receive compliance education, training and group training, as well as a wide range of training emphasizing practical aspects.

In addition to the training based on annual plans, Daiwa Securities Capital Markets provided training to employees in charge of reviewing advertisements and other documents, as well as company-wide training on firewall regulations. In addition, all employees (about 2,000) were given compliance training, including a knowledge test, using e-learning.

Corporate Ethics Hotline

Since January 2003, Daiwa Securities Group Inc. has been operating a Corporate Ethics Hotline through which employees can report problems in the workplace directly to a corporate ethics officer or an outside lawyer. When the hotline is contacted, the Daiwa Securities Group Inc. corporate ethics officer, in cooperation with the internal control officers at each Group company, carries out a fact-finding investigation, while taking steps to protect the caller. The Corporate Ethics Hotline was contacted 18 times in fiscal 2010, three times fewer than in the previous fiscal year.

The Group is conducting training to ensure anyone can use the Corporate Ethics Hotline without hesitation and is making efforts to respond as quickly as possible when calls are received. This has led to a broadening of the potential user base, and the hotline is now very well known within the Group and is considered reliable owing to the success of these efforts.

Regardless of measures used to solve problems from here onward, the Group is taking steps to expand training about the hotline so that it can work more effectively than ever before as a deterrent to prevent problems before they occur.

Nature of complaint	Response
Power harassment, negative comments regarding character	Conduct fact-finding, then bring the misconduct to the attention of the senior manager, and implement training for the superior involved
Time management problems	Conduct fact-finding, then bring the misconduct to the attention of the senior manager, and implement training for the superior involved

Management Report

Information Disclosure

Approach and Basic Stance

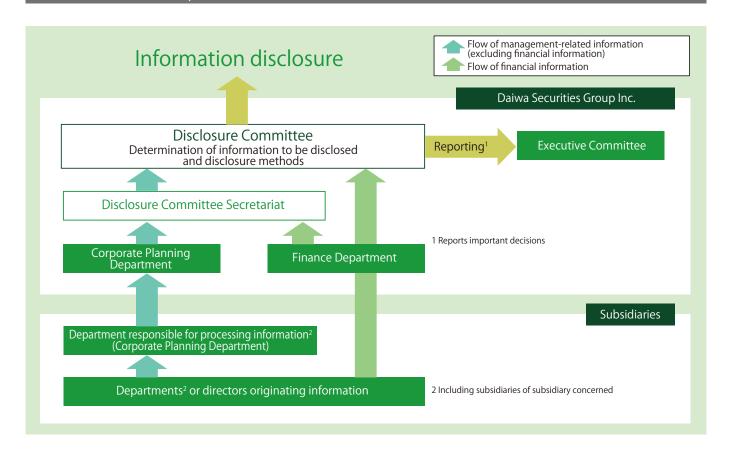

The Daiwa Securities Group has established a Disclosure Policy, and strives to disclose accurate information fairly, appropriately, and in a timely manner. As a member of the financial industry, the Group strives to attain a high level of information disclosure, to be a model for other publicly listed companies. Going beyond financial information, the Group is strengthening its disclosure of non-financial information related to social and environmental issues, progress on which is not necessarily represented by short-term financial indicators.

Disclosure Policy

- •We will observe the fair and timely disclosure of important financial, social and environmental information ("management-related information") regarding the Daiwa Securities Group so that our stakeholders (including shareholders, investors and the communities we operate in) may understand and maintain realistic expectations of the Daiwa Securities Group.
- •We will comply with the Financial Instruments and Exchange Law and other laws and ordinances related to securities transactions and the various rules of the stock exchanges on which our stock is listed.
- •We will endeavor to achieve fair disclosure both in terms of content and timing.
- •We will utilize various communication channels including presentations, telephone conferences, the Internet and printed materials in order to disclose information in a manner that is easy to comprehend for investors.
- •We will consciously act as a leader of the securities markets in terms of disclosure and set the standards for all other listed corporations.
- •We have established the Daiwa Securities Group Inc. Disclosure Regulations, which define guidelines such as the setting up of a disclosure committee and the methods of disclosing management-related information, in order to fulfill the spirit of this Policy.

Information Disclosure System

Daiwa Securities Group Inc. has created Disclosure Regulations in order to achieve its Disclosure Policy. Its Disclosure Committee, a subcommittee of the Executive Committee, is responsible for final decisions regarding disclosure in accordance with these regulations. Group companies also create rules for controlling the release of management-related information, following a uniform disclosure system created for the entire Group. Group companies collect and report information to Daiwa Securities Group Inc. without fail, including posting management-related information contact lists on the in-house network.

Providing IR Information

The Group endeavors to issue information that is clear and intelligible for all investors. The Group uses a wide range of IR tools so that its information disclosure is fair, appropriate, and succinct, thus ensuring that there are no disparities in the information available to institutional investors and individual investors.

Moreover, the Group regularly updates the content of its IR site and strives to make it as accessible as possible.

Disclosure of Non-Financial Information

The Group is committed to disclosing non-financial information to all stakeholders to promote understanding of the Daiwa Securities Group and ensure that the Group is accurately assessed.

In fiscal 2010, the Group took the initiative in explaining its efforts to strengthen its business in Asia, its most important strategy, together with its financial information. In addition, in publications such as annual reports and business reports and during company briefings, the Group proactively discloses information on initiatives that serve as models for Japan's leading companies, such as the social impact of impact investment products, work-life balance, the promotion of success for women, and social contributions.

In addition, the CSR report is distributed to everyone who attends the general shareholders' meeting to deepen understanding of the Group's social responsibilities.

Social Report

Relationship with Customers

Approach and Basic Stance

We understand that customer trust is the foundation of our business, and we always work to identify approaches that will truly satisfy our customers. At the Daiwa Securities Group, we have built the concept of hospitality into our understanding of service to give new life to customer relations. Our goal is nothing less than having the most satisfied customers in the financial services industry.

Building Even Deeper Trust in Relationships with Customers

Accountability to customers

We strive to understand the customer's needs quickly, propose the best solution for each customer, and provide more-than-satisfactory services. We also work to provide customers with complete, appropriate explanations.

Japan's Financial Instruments and Exchange Law, which went into effect in September 2007, prohibits "solicitation that is improper in light of the customers' knowledge, experience, financial situation and objective." This law forms the basis of Daiwa Securities' approach, but the company also provides explanations that go beyond the legal requirements to demonstrate true hospitality in its product descriptions.

When selling impact investment products that help resolve social issues, such as Vaccine Bonds and Water Bonds, Daiwa Securities explains how the customer will be contributing to society by buying the product, in order to deepen their understanding of social contributions.

Active post-sales follow up

A securities company's true relationship with the customer begins after a product has been sold. Follow-up is essential in maintaining and strengthening the trusting relationships formed with the customer. In particular, customers are dissatisfied and apprehensive when the value of a product that they have purchased goes down. Daiwa Securities constantly works to reinforce its relationship of trust with the customer by giving attentive explanations and relevant proposals that succeed in alleviating this dissatisfaction and concern.

Providing information in seminars and on the web

In addition to the investor seminars that Daiwa Securities holds once every month, usually attended by over 100 people, and the information on overseas and Japanese markets it provides on an ongoing basis, Daiwa Securities holds impromptu seminars on the foreign currency market when the market fluctuates sharply, as when the yen appreciated significantly.

In January 2011, Daiwa Securities held its New Spring Follow-up Seminar, with about 3,700 customers attending. The company also proactively disseminated information on its website by holding live

seminars on the Internet and issuing reports released by investment trust companies. These initiatives are part of Daiwa Securities' efforts to ensure that customers can easily access information.

The company will continue to actively hold seminars as part of its ongoing efforts to provide information, and will also provide timely content based on market conditions and trends.

Follow-up services for impact investment products

Daiwa Securities provides customers who buy Vaccine Bonds with the activity reports released by IFFIm, the issuer of these bonds. The company believes that it is also important to provide information on how the money invested in impact investment products, which enable customers to give back to society through their investments, is used to solve social problems.

Initiatives in fiscal 2010

Beginning in fiscal 2010, some employees responsible for customer interaction at retail sites were assigned to follow-up services for the customers handled by the sales staff. This system increases contact with customers. Daiwa Securities always works to develop the structures needed to provide customers with fine-tuned services.

Services accessible to diverse customers

When Daiwa Securities renovates sales branches nationwide or plans new branches, it takes steps to ensure that its branches can be used by a wide range of customers, such as eliminating steps up and down on the floor and installing wide counters.

In addition, the company explains services using written communication and introduces its Internet banking services to deaf customers.

Daiwa's Point Program

Daiwa's Point Program awards customers with points based on their transactions, which can be exchanged for products and cash vouchers or used to make donations to NPOs. Daiwa Securities launched a donation program for the Great East Japan Earthquake using points awarded through the Daiwa Point Program on March 18, 2011. Customers can donate as little as one point to the cause. Their donations were provided in full to victims of the earthquake through the NGO Japan Platform.

Improving customer service quality at sales branches

Many different types of customers visit Daiwa Securities' sales branches. This means that employees interacting with customers at its sales branches must have high-caliber service skills with an emphasis on attentiveness to the customer, in addition to specialized knowledge of the market and products.

Daiwa Securities provides hospitality training when employees first enter the company to help them learn about its hospitality standards, which go beyond simply providing service. In addition to basic

training, the company gives more practical training involving role plays of various situations. In addition to group training, the company gives regular verification tests on an ongoing basis using its e-learning system. Daiwa Securities' head office staff conduct on-site checks every six months and provide guidance to achieve even higher quality.

Initiatives Make Use of Customer Views

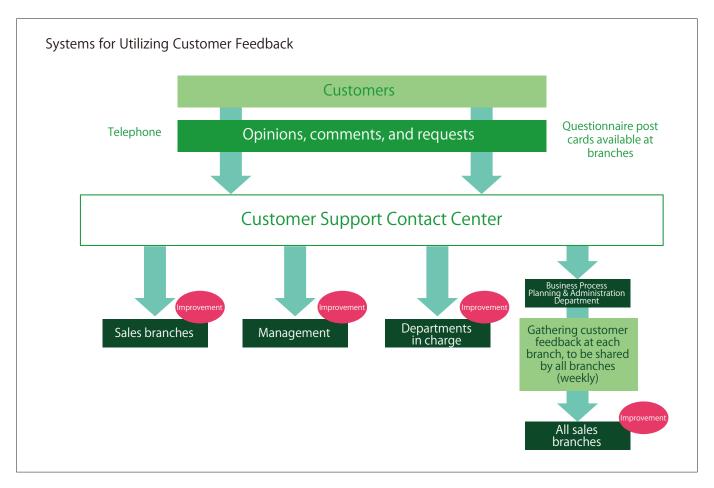

Call Center initiatives

Daiwa Securities' Call Center is staffed by 450 telephone service representatives (TSRs)* who take orders, describe products, and handle queries about clerical procedures or requests for sales literature. The Call Center is one of the main channels supporting the company's business model, which is driven mostly by the Daiwa Consulting and Daiwa Direct transaction channels.

At the Call Center, employees have direct contact with customers, and so the Center plays a critical role in areas such as transaction channels, customer support and marketing that can lead to improved operations through customer feedback. The company implements training and regular level checks for TSRs* in order to maintain and improve call center operations to meet the demand for high-quality service.

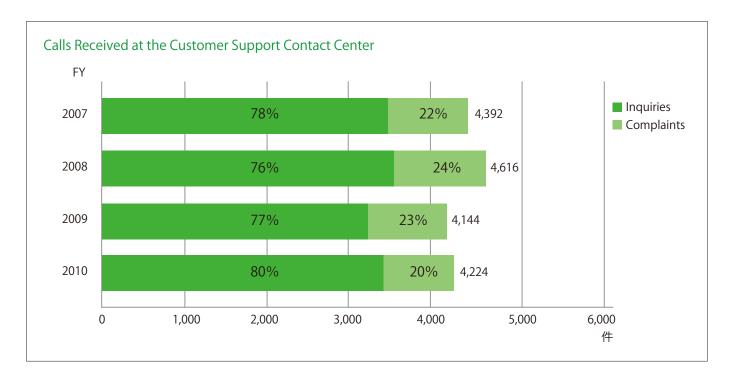

The Center uses the customer inquiries and opinions that it receives to analyze data and identify each cause when there are problems. By providing feedback and information to Daiwa Securities' head office and sales branches, the company seeks to improve services and customer interaction and raise customer satisfaction.

* TSR (Telephone Service Representative) is the name typically used in Europe and the US to refer to telephone operators with specialized knowledge.

Calls received at the Customer Support Contact Center

Daiwa Securities' Customer Support Contact Center also handles customer feedback. The Center shares the customer feedback it receives with Daiwa Securities' sales branches and head office and responds promptly and appropriately. The volume of calls and complaints received at the Center in fiscal 2008 increased compared to the previous fiscal year, which was primarily attributable to the deterioration of market conditions. However, in fiscal 2009 and 2010, the volume of calls and complaints has been declining. The Center takes customer feedback seriously, and the entire company works together to improve customer service.

Social Report

Relationship with Shareholders and Other Investors

Approach and Basic Stance

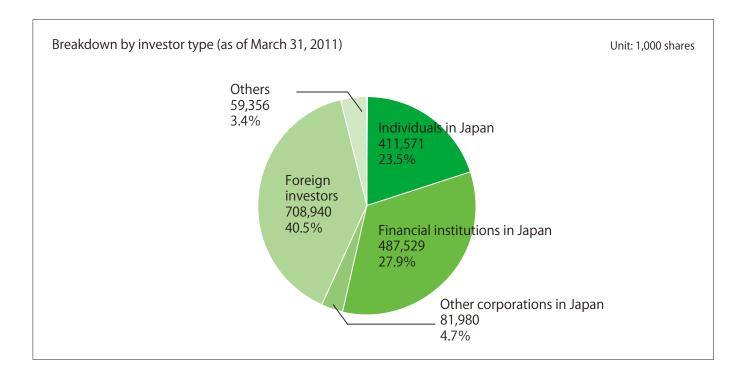

The Daiwa Securities Group works hard to stay in good communication with shareholders and other investors. As part of our "from saving to investment" policy in Japan, we believe that increasing the number of retail investors is part of the Daiwa Securities Group's social responsibility. Accordingly, we work to provide all investors with helpful information that is easy to understand.

Shareholder Composition

As of March 31, 2011, 40.52% of the shareholders of Daiwa Securities Group Inc. were foreign investors, up 2.30 points from the end of the previous fiscal year. In addition, the share of individual investors increased 1.47 points to 23.53%. These increases were likely due to the augmentation of the shareholder reward program carried out at the end of September 2010.

Stock information

http://www.daiwa-grp.jp/english/ir/shareholders/index.cfm

Dividend Policy

Daiwa Securities Group Inc. aims to continue improving value for shareholders, which includes distribution of profit. In principle, dividends are paid semiannually at a pay-out ratio of approximately 30% based on consolidated financial performance. Daiwa Securities Group Inc. also looks for ways to increase returns to its shareholders in various ways, including share buybacks when it has sufficient accumulated capital to pursue further growth.

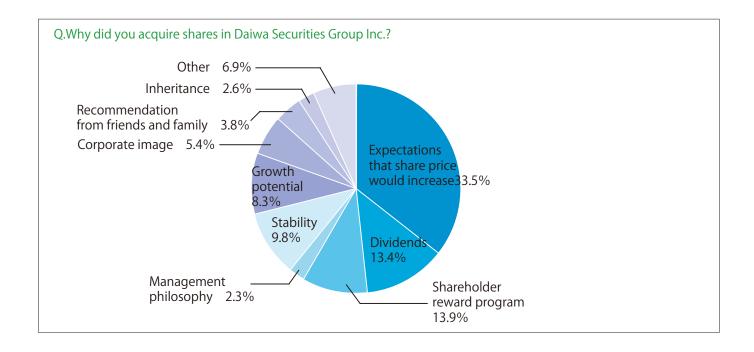

Communication with Shareholders

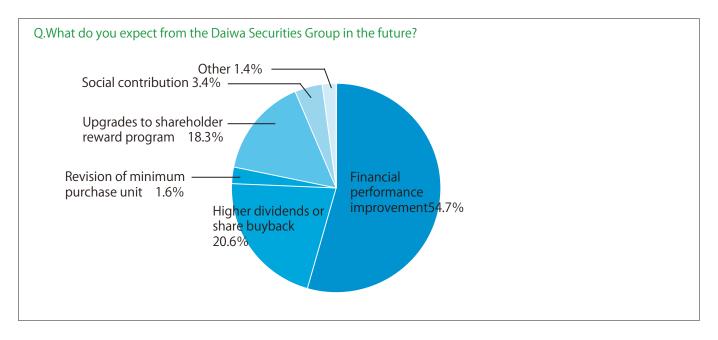

The general meeting of shareholders is an opportunity for direct communication with shareholders. To encourage higher attendance, since 2006 regular general meetings of shareholders have been held on Saturdays. A total of 2,075 shareholders attended the 74th regular general meeting of shareholders held on June 25, 2011 in Tokyo.

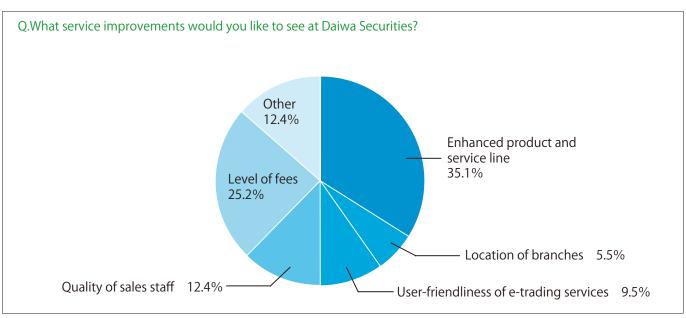

Daiwa Securities Group Inc. will strive to make its communications more accessible by, among other initiatives, renewing its website to facilitate ease of access for shareholders.

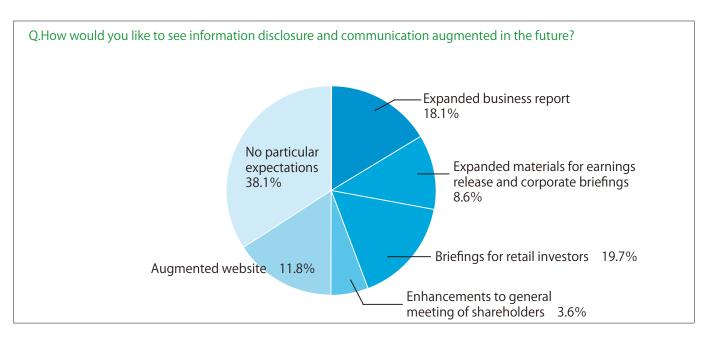

Questionnaire for Shareholders

The Daiwa Securities Group regularly gives a questionnaire to shareholders with a view to reflecting their opinions in management and IR activities. We utilize the results to good advantage in business activities, leading to improvements such as higher satisfaction with the shareholder reward program.

Investor Relations

IR briefings are held regularly for institutional investors and analysts, where top executives describe the business environment, earnings and future business strategies. In our overseas IR activities, we also endeavor to communicate directly by visiting overseas institutional investors, for example.

We also strive to enhance the accessibility and ease of understanding of the information and content on our IR website by compiling information pertinent to individual investors in particular and making it easy for readers to follow up on the information they are interested in. We are also using a wide range of methods to reinforce communication with a wide range of investors.

Investor Relations

http://www.daiwa-grp.jp/english/ir/index.cfm

Shareholder Reward Program

Beginning in September 2010, we enhanced our shareholder reward program while continuing our reward program catalogue. We added more shareholder reward categories and made it easier for shareholders to apply to the program.

Social Report

Relationship with Executives and Employees

Approach and Basic Stance

The Daiwa Securities Group believes that maximizing the motivation of every executive and employee will improve customer satisfaction and thus enhance shareholder value. We aspire to be a corporate group where executives and employees are highly motivated and their families and friends share in their pride to be part of the Group. We take a range of measures to achieve this goal.

With the aim of making our employees the most highly qualified in the industry, we offer training for all occupational abilities and stages, and we focus on certifications and improving English skills with a support system that encourages the ambitions of every employee.

In 2008, the Group issued "Daiwa Spirit," a booklet about what it means to be a Daiwa professional. This was developed based on the corporate principles and expresses the basic philosophy and mental attitudes valued by the corporate culture since the foundation of the Group. "Daiwa Spirit" is shared with all Group employees and is expected to enhance employees' sense of unity and togetherness, and thus the Group's cohesiveness.

Hiring Initiatives

Hiring approach and trends

The Daiwa Securities Group would like all of its employees to be highly motivated and to stay with the Group from hiring to retirement. All new college graduates hired by the Group, including persons with disabilities, are brought on as full, regular employees. This helps to encourage new hires to feel a sense of trust and pride in the company and a sense of solidarity with their colleagues. In April 2011, the Group hired 446 new employees.

Our approach to retaining talented people is simply to provide an environment in which diverse individuals can perform to their full potential. In line with the Group's strategy to strengthen our business in Asia, Daiwa Securities Capital Markets in particular is bolstering its workforce in Asia. Our hiring policy in Japan also takes in to account candidates' linguistic skills to secure personnel who will be able to perform on the global stage.

¹ Regional career-track employees: A class of career-track employees who stay in one region and are not subject to transfers that require a change of residence.

¹ Average annual salary includes bonuses and other remuneration.

Recruitment of previous years' graduates

In fiscal 2011, we began hiring university graduates who had graduated up to three years earlier. We hope to secure diverse personnel by recruiting year-round so that such graduates can be employed soon after receiving tentative job offers, regardless of whether they have prior work experience. These recruits receive the same level of training as new graduates.

Support for the success of veteran employees

The Daiwa Securities Group offers the Daiwa Master Program to actively support the success of highly motivated and skilled employees, regardless of their age. This system enables veteran employees nearing the mandatory retirement age of 60 who meet certain criteria to continue their employment until they are 65 years of age. We revised the system in 2009 to refine the criteria even further.

Re-employment under the Daiwa Master System

(persons)

	2007	2008	2009	2010
No. of employees hired under the Daiwa Master System	14	36	53	58

Note: This data pertains to three Group companies.

Recruitment of people with disabilities

The Daiwa Securities Group has around 200 employees with disabilities working in a wide range of roles at its headquarters, in sales branches, and in call centers.

The group started recruiting new graduates with disabilities as regular employees (general office staff) in fiscal 2008 and in fiscal 2011, broadened recruitment into the career-track employee, regional career track employee, and customer service employment streams. We actively increased recruitment opportunities, holding briefings about the company for new graduates, participating in career expos, and implementing job placement support programs for disabled university students.

Once people with disabilities are hired, we provide support for career advancement, for example creating opportunities for them to enter the career-track and regional career-track employment streams.

The Daiwa Securities Group began hiring new graduates with disabilities as regular employees beginning in fiscal 2008. We hired 7 new graduates with disabilities in April 2008, 15 in April 2009 and 5 in April 2010. We seek to hire talented people, regardless of whether they have disabilities or not. Beginning with our 2011 new hires, we will hire persons with disabilities for career-track positions, regional career-track positions and customer service positions. The goal is to hire high-caliber employees, not just to meet Japan's legally mandated employment rate for persons with disabilities, thus providing a bigger stage on which persons with disabilities can advance their careers, take advantage of opportunities and stay highly motivated to succeed.

Employment Rate for Persons with Disabilities (as of Each Fiscal Year-end)

^{*} This data pertains to 11 Group companies.

Human Resources Development and Skill Development

Employee training approach and trends

The Daiwa Securities Group focuses on human resource development with the aim of creating a professional cadre that can ensure the Group remains Japan's most impressive securities firm. In particular, we believe that the first two years after joining the Group—when new graduates are just getting their start as full members of society and Group employees—is a critical period for a solid basic education. We offer extensive training programs during this period. Our varied training options ensure not only that employees acquire the fundamental skills needed for their jobs, but also that they learn about the Group's corporate philosophy and commitment to CSR.

We continue to undertake initiatives to improve the English skills of employees. With globalization, the Group increasingly invests in overseas subsidiaries, and employees are more likely to be transferred within the Group. Thus, strengthening English skills is a crucial issue not only for Daiwa Securities Capital Markets employees, who often work in overseas-related operations, but also for Daiwa Securities employees focused on operations in Japan. We will continue to augment our efforts in this area in the future.

Of course, we also believe that our employees must have a firm understanding of corporate ethics and compliance in order to ensure the development of sound financial and capital markets—a key issue for the Daiwa Securities Group. Accordingly, we offer regular training on information management and compliance.

Education and training system

The Daiwa Securities Group educates employees by providing training tailored to each position, based on the Group's shared policies. Each company provides its own training in light of the different skills required depending on the company's focus. However, the Group also strives to foster crosscutting ties and a feeling of solidarity by increasing the number of joint training sessions for the Group and opportunities for employees from Group companies to gather together while also raising the effectiveness of the training.

For example, the Group offers selective management training for managers through programs such as the Daiwa Management Academy and Daiwa Leadership Program, and also provides joint training for mid-level employees to acquire business skills with programs designed to enhance their skills in the areas of presentation, coaching, negotiation, communication, logical thinking and facilitation.

Daiwa Securities launched the Daiwa Mentoring Program in July 2009, a two-year intensive basic educational program for new hires. The company has introduced a tutor system in which each new hire is assigned to another employee who will be in charge of their education for the first year of their employment. The new hires are given focused education and training so that they can become independent in their first two years.

Supporting employees trying to earn credentials

In light of globalization and corporate strategies emphasizing Asia, the Daiwa Securities Group strives to improve employees' English skills and helps employees raise their TOEIC scores. We offer a test support system, such as e-learning accessible to all employees. In addition, we offer more practical

e-learning opportunities and recommend English conversation and language schools to intermediate-level learners. The number of Group employees taking the TOEIC exam more than doubled in fiscal 2010 over the previous fiscal year.

In addition, Daiwa Securities aims to have all employees acquire Associated Financial Planner (AFP) certification and to have the highest number of employees in the industry with the Certified Financial Planner (CFP) certification, the level above AFP. In addition, the company provides generous support so that employees can enhance their specialized skills and become professionals by, for example, subsidizing certification costs.

Internal (intra-group) job postings and new career path examinations

The Daiwa Securities Group also has an internal recruiting system to open new career opportunities to skilled employees interested in self-development. In fiscal 2010, 8 out of 114 applications were successful. There have been a total of 904 applicants since 2000, and a total of 146 successful transfers. We also now offer career path examinations for those in non-career-track jobs who wish to move into career track or regional career-track jobs. Since fiscal 2009, 682 non-career-track employees have moved to career-track and regional career-track positions.

Evaluation system

At the Daiwa Securities Group, we believe that a fair and well-accepted evaluation system is crucial in keeping all employees highly motivated in their jobs. Accordingly, we implement a multifaceted evaluation system for managers in which subordinates and related departments assess job performance in the course of daily operations and gives feedback to the manager. This is intended to deepen self-awareness and mutual understanding and improve the Group's overall productivity. This system also takes compliance-related performance into account.

In fiscal 2009, we revised the Group's human resources system. Our aim is to provide a benefits program that motivates employees at all stages of their careers, from entry and mid-level to veteran employees, to reach the next stage and attain positions with greater responsibilities. We will continue working to ensure that our personnel evaluation system is equitable by clarifying the expected responsibilities for every position.

Creating a Workplace Supportive of Work-life Balance

Encouraging work-life balance

An advanced level of work-life balance is one of the human resource strategies advocated in the "Passion for the Best" 2011 medium-term management plan, and the Daiwa Securities Group promotes work-life balance as part of its general management strategy.

Individuals optimize their own sense of worth by devoting themselves wholeheartedly in both their lives and their work. This commitment enables each person to realize his or her potential, and also ensures values diversity in the workforce. This conviction drives the Group in its pursuit of working styles that enable work-life balance and its efforts to create an environment in which both men and women can work in a variety of ways.

Not only do we seek to establish a system that enables diverse work styles, but we also work to change employee awareness by encouraging employees to leave work before 7:00 pm and take all their paid holidays and by welcoming family visits to the workplace. We will continue promoting initiatives designed to attract the kind of high-caliber employees who build an enterprise that achieves great performance.

Encouraging women to succeed

We are trying to appeal more to women's individual interests, by introducing thriving female employees as role models in internal publications and providing opportunities for cross-company communication, in order to increase the number of women in management positions. These efforts have resulted in five female directors joining the board and women heading up about 10% of branches since fiscal 2009. The number of women transferring to the career-track employee and regional career-track employee streams has also increased significantly.

In recent years, there has been a sharp increase in female employees aspiring to advance their careers by switching to career-track and regional career-track positions. In fiscals 2009 and 2010, 682 female employees moved to career-track positions.

We will continue to expand the ranks of female managers, aiming to develop female leaders who will drive the future of Japan's financial industry.

Working Hours and Paid Vacation Usage Rate

Major New Programs and Revised Programs in Fiscal 2010

Program name	Program description
Shorter Workday Employment Program	This program allows employees to shorten their scheduled working hours to a minimum of six hours until their children complete third grade in elementary school.
Nursing Care Leave Program	Employees with families requiring nursing care may take short-term leaves of absence (paid).
Substitute Vacation Program	Employees working more than 60 hours a month in overtime and weekend work may take a vacation equivalent to the time exceeding 60 hours in place of part of their overtime pay.
Childcare Leave Program	This program allows employees to take childcare leave even if their spouse is a full-time homemaker and is able to care for their children; the terms for rehiring have also been relaxed.
Annual Paid Vacation Program	Employees may take their annual paid vacation in increments of one hour for a maximum of five days a year.

¹ Figures indicate employees at the three companies who are members of the Daiwa Securities Group Employees' Union.

² In addition to annual paid vacation, the Daiwa Securities Group offers three days of special summer vacation. These figures show the usage rate for annual paid vacation when special summer vacation is included.

¹ Employees eligible for childcare leave include non-regular employees (contract workers, part-timers, etc.).

Main Initiatives for Work-Life Balance and the Female Employee Support Plan

Program name	Program description		
Professional Return Plan (rehiring of sales staff)	Offers opportunities for re-employment to former full-time employees who left their jobs due to marriage or childbirth.		
Job Location Change System*	Offers a position in a new location when an employee must relocate due to marriage or spouse's job transfer.		
Childcare leave	Employees can take childcare leave until their child's 3rd birthday.		
Exemption from or restricted overtime work	Employees can apply for an exemption from overtime work until their child completes the 3rd grade of elementary school. Employees can also apply for restricted overtime work until their child completes elementary school.		
Day care subsidy	The company offers a subsidy for day care expenses until the employee's chi begins elementary school (age 6).		
Expanded leave system	The company encourages employees to take paid vacation and has introduct leave for marriage preparations or "family day" leave to give employees a chance spend time with their families.		
Follow-up on program use	The Personnel Department keeps track of individual employees' childcare-relate schedules and notifies them of programs available at the appropriate time.		
Support after returning to work	Daiwa WLB Station, a work-life balance promotion website that focuses on various support systems related to child-rearing and nursing care, provides information for employees on childcare leave and helps facilitate their smooth return to the workplace.		

^{*} Number of employees using the program at four Group companies (three Group companies and Daiwa Property): 69

Female Employees and Managers at the Daiwa Securities Group

Percent of managers who are female	3.1	3.4	3.9	4.1

^{*} This data pertains to all consolidated Group companies.

Initiatives to improve employee health

The Daiwa Securities Group believes that employee health is an indispensable asset for both the company and society. Accordingly, the Personnel Departments, General Health Development Centers and health insurance associations work closely together to improve employee health.

The Group has set up a system that enables employees to confirm the results and analysis of their regular health checkups and full medical checkups online. The Group also uses in-house magazines and the intranet to provide employees with health information. Moreover, it also offers a walking program, a program encouraging employees to undergo cancer exams, and a smoking cessation program, and encourages female employees to have breast cancer and uterine, ovarian, and cervical cancer exams, and to get the cervical cancer vaccination. Beginning in fiscal 2009, employees whose health checks found problems receive a follow-up confirmation form (known as a "yellow paper") enclosed with the results of the regular health checkup. Those employees are required to visit a medical facility within two weeks and submit this form to a General Health Development Center with the doctor's comments. As a result, the majority of such employees now visit medical facilities.

The Daiwa Securities Group has set up General Health Development Centers at the main Group offices. At the centers, in-house doctors provide medical services, while industrial physicians and health nurses provide consultations on general health. Psychiatrists and clinical psychotherapists offer consultations

on mental health issues.

As a result of these efforts, employees' health awareness is high, and 99% of employees receive regular health checkups. We gave presentations on these results at symposiums held by the Ministry of the Economy, Trade and Industry and the Tokyo Metropolitan Government. Other companies were interested in our approach.

Mental Health

In August 2006, Daiwa Securities Group Inc. established the Health Support Promotion Department to help employees maintain their mental and physical health. The Health Support Promotion Department is staffed with two certified clinical psychologists who are available to provide consultations to support Group executives and employees, and their families. Moreover, we maintain arrangements with outside specialists so that Group personnel and their families can receive prompt attention anywhere in Japan. We also support employees' mental health by arranging talks in all branches and departments to broaden awareness of mental health issues.

Human Rights Awareness

In light of our Corporate Principles and the United Nations Global Compact (which the Daiwa Securities Group joined in January 2010, a frontrunner in the industry), we aspire to further improve our corporate culture, which emphasizes respect for human rights in our basic principles, and are further reinforcing human rights awareness activities.

With the aim of ensuring accurate understanding of human rights issues and deepening awareness, Daiwa Securities Group Inc. established a Human Rights Awareness Promotion Committee in 1984. Organizations are set up underneath this committee, with all heads of Group departments and branches serving as leaders, to follow the committee's plans by conducting campaigns such as soliciting human rights slogans from all Group employees and their families, as well as incorporating information ensuring accurate understanding of human rights issues in new hire training and manager training. Once a year, all Group employees watch a video on human rights and then divide up into their divisions to discuss the issue from a variety of organizational perspectives.

We will continue to promote human rights awareness to ensure fair, discrimination-free hiring and help to build a gender-equal society.

Basic policy for initiatives addressing human rights and social integration issues

- (1) The Daiwa Securities Group supports and complies with the protection of human rights as advocated internationally and does not infringe on human rights within the limits of its influence.
- (2) The Daiwa Securities Group educates and instructs Group employees with accurate information on human rights and social integration issues.
- (3) At the same time, the Group views human rights and social integration issues as our own problem, not somebody else's problem, and fosters a sensitivity that enables empathy with the pain of others.
- (4) We provide an equitable working environment free of discrimination that values people.
- (5) Each employee is a member of society unburdened by prejudice.

Revised in May 2011

Communication

Communication with executives and employees

At the Daiwa Securities Group, we believe that communication with executives and employees is vital in maintaining a healthy workplace environment. Communication takes place through interviews with the Personnel Department and a semi-annual self-assessment questionnaire. In addition to the union member questionnaire given by the Employees' Union, in fiscal 2010 we conducted a questionnaire on work-life balance. We provide opportunities for employees to share their views, and then reflect these findings when reviewing the adequacy of current programs and revising programs in the future.

Number of Employees' Union Members (as of the End of Each Fiscal Year)

(persons)

Fiscal year	2006	2007	2008	2009	2010
Employees' union membership	6,078	6,969	7,666	7,915	7,590

^{*} Of the 9 Group companies (this does not include Daiwa Asset Management Co. Ltd., which has its own employees' union, and Daiwa Property Co. Ltd., which has no employee union).

Communication between employees

In October 2007, we introduced a "club activity support program." This program was intended to help employees enjoy their time off, deepen their friendships with colleagues and give them more opportunities to share a sense of solidarity, as well as to provide work-life balance support and facilitate a full social life for employees. In fiscal 2009, we augmented this program. Groups that meet certain conditions are recognized as Daiwa Clubs and Daiwa Circles and receive subsidies covering some of their activity costs. Currently, 14 clubs and 9 circles are active in the Group.

Initiatives for families

Families of recipients invited to President's Awards ceremonies

Flowers sent to all employee households at Christmas

"Family days off" holiday system created

Employees' families also eligible for mental health support

Two million yen benefit given at birth of the third or subsequent babies born to employees

Family visits to the workplace (started in 2008; 4,345 families participated in fiscal 2010)

Social Report

Relationship with Society

Approach and Basic Stance

At the Daiwa Securities Group, good corporate citizenship means working together with the local community and engaging in consistent collaboration with NPOs and NGOs to foster sustainable development. We carry out diverse corporate citizenship initiatives under the following four key categories.

- 1. Education and research activities in the fields of economics and finance
- 2. Encouraging Volunteerism among Executives and Employees
- 3. Support for culture and the arts
- 4. Assistance to communities on both the local and the international level through foundations and NPOs

- * Past data for Daiwa Securities Foundation has been revised.

1. Education and Research Activities in the Fields of Economics and Finance

The Daiwa Securities Group makes the most of the knowledge and expertise in economics and finance which it has accumulated in the course of its business. We are engaged in business-academia collaboration, and also support economic education programs in junior and senior high schools. Our vision is that economic and financial education would help young people gain the capacity to shape the future.

Primary joint programs with Junior Achievement Japan, an NPO that provides economic education for youth

(1) Finance Park (Experiential Life Planning Program)

Junior Achievement Japan was established in Shinagawa, Tokyo in June 2005 with the aim of helping junior and senior high school students develop life-planning skills. Daiwa provides funds to open facilities and set up simulated shops, and it also provides personnel. In January 2007, Junior Achievement Japan opened an office in Kyoto. As of March 31, 2010, a total of 23,936 students had taken part in action programs that teach students how to think for themselves and make solid decisions.

Finance Park

(2) Student Company Program (Experiential Company Management Program)

In this six-month hands-on corporate management program, high school students set up a "company" in their schools and operate it through all phases, from raising capital to recruiting personnel and handling the accounting, manufacturing and sales. The Daiwa Securities Group has been collaborating with the Student Company Program (SCP) at Ritsumeikan Senior High School since fiscal 2003. By fiscal 2010, Daiwa had dispatched 18 employees on over 83 occasions as outside directors to offer advice on the preparation of financial data and on company management. As of March 2011, 174 students

Student Company Program

have acquired the basic skills needed to earn a living by learning about corporate management, how the world works, the difficulties of decision making, the pressure of the bottom line, accountability and the importance of leadership and teamwork.

(3) Global Leadership Forum for Junior and Senior High School Teachers

This is a training program organized by Junior Achievement Japan for junior and senior high school teachers, which started in 2001. At this forum, teachers discuss the state of the global economy and brainstorm about how education should develop in the 21st century, stimulated by lectures given by guests from a wide range of perspectives, panel discussions, and case studies. The Daiwa Securities Group sponsored the forum from 2003 to 2007, and has cooperated continuously in related events. By fiscal 2010, a total of 3,182 teachers had participated in the forum.

(4) Council for Economic Education Japan (CEE-Japan)

CEE-Japan was established in January 2009 with the goal of providing economic education programs for school teachers. The Daiwa Securities Group is CEE-Japan's main sponsor, providing not only the inaugural funds but also ongoing support, together with seven other influential companies. Under a partnership between Junior Achievement Japan and the Council for Economic Education in the US, we seek to implement programs tailored for schools in Japan.

In June 2010, we completed the economy and finance text, *Life is a Series of Choices*. This text was developed so that teachers could instruct students in workshops on economic concepts in a way that would be easy for them to understand. In August, methods for using this text were introduced at the Global Leadership Forum for Teachers 2010, which drew about 450 participants. In January 2011, 22 teachers attended a two-day workshop in Shinagawa, and 30 teachers attended a two-night, three-day workshop held in February with guest lecturer Professor Tawni Ferrarini from Northern Michigan University. Boards of Education in other regions also held workshops, attracting 75 teachers. By the end of March 2011, a total of 577 teachers had participated in workshops and forums.

Results in Economic and Financial Education

Activity	Description	Started	Participants
Support for the Student Company Program (SCP)*	A program that gives high school students hands-on experiences with corporate management by simulating real-world business conditions	September 2003	174
Support for Finance Park*	Personal finance planning workshop teaching students about society and economics by managing household finances.	June 2005	23,936

	Promoting use of Life is a Series of Choices hands-on economics textbook for economic education of teachers	January 2009	577

^{*} Programs of Junior Achievement, the world's largest non-profit organization promoting economic educational activities for youth

Daiwa JFS Youth Sustainability College

The Daiwa Securities Group has held a series of endowed lectures for students in a partnership with NPO Japan For Sustainability (JFS) for four years, from October 2006 to September 2010. The lectures are funded by Daiwa Eco Fund Trust fees.

A subject is chosen as the theme for each year's lectures, with the four-year program giving the participant an overall picture of sustainability. In the monthly lectures, people active on the cutting edge of their field, including university professors, researchers, corporate managers, businesspeople, NPO/NGO leaders and government administrators, present the concepts and practice of sustainability to students in a succinct and clear manner. The lectures are translated into English and distributed to 191 countries and regions around the world through the JFS website.

After the lecture, participants enjoy an introduction to "sustainable mail order and online purchasing practices" with an opportunity to sample fair trade products and sweets made at social welfare facilities. The four-year program concluded in September 2010. Following up on this program, a new social business college was opened the following month.

Daiwa JFS Youth Sustainability College

Holding "Social Business College" lectures

The idea of social businesses, which aim to resolve specific problems affecting society as well as to generate sustainable profits, has gained attention. However, social businesses themselves are not yet widely known. At the Daiwa Securities Group, we regard providing a forum for discussion of sustainable business models and financing as highly important. In October 2010 we began the "Social Business College" series of lectures for university students and adults.

We hold the lectures in cooperation with Music Securities, a

First Social Business College lecture

next-generation financial business providing financing to social businesses via the Internet, and we publish the proceedings and case studies on our website.

http://www.daiwa-grp.jp/csr/citizen/support/college/backnumber.html (available only in japanese)

The second lecture, held on December 7, was conducted by Eriko Yamaguchi, CEO, Motherhouse. Ms. Yamaguchi spoke frankly about making bags—of a quality acceptable to customers in advanced nations—in the developing nation of Bangladesh (which was not being reached by international aid) and her efforts to establish the company's brand. The lecture was received enthusiastically, with the audience empathetic and asking real questions about Motherhouse's business model.

Future lectures will also highlight social businesses with a unique business model. We plan to hold over twelve lectures during the two years of the series, ending in September 2012.

1st: October 28, 2010

Lecturer: Natsuko Shiraki, President, HASUNA Co., Ltd.

2nd: December 7, 2010

Lecturer: Eriko Yamaguchi, CEO, Motherhouse Co., Ltd.

3rd: February 14, 2011

Lecturer: Yoshiteru Takemoto, CEO, tobimushi Inc.

Describing how money relates to daily life, and the philosophy of finance

Finance is closely intertwined with our daily lives. We come into contact with it every day, for example, through banks, securities companies, insurance companies, and state pensions. Despite this, there are likely few people concerned about the ways money entrusted to financial institutions (deposits, insurance, shares, pension reserves) is used.

We undertake various educational activities to inform investors and depositors that money has meaning and the power to move society and companies to action. We use lectures at high schools and universities as well as various bodies' venues for communicating with the public to teach financial literacy and the philosophy of finance, broadening understanding of SRI.

We actively engaged in financial education in fiscal 2010, holding lectures for students and working adults (at community colleges and the Junior Chamber International Osaka) on a sustainable society and the significance of money.

Examples of Financial Education Activities in Fiscal 2010

Date held	Participants	Themes
May 14	Employment Study Group, Ministry of Health, Labour and Welfare	Realities of SRI
November 5	Junior Chamber International Osaka	Future of money
November 10	Hitotsubashi University	CSR and capital providers
November 12	Seminar for community college	Sustainable society and social responsibility for seniors
November 17	Sakai High School	Future of money

Talk on the future of money at Future Expo

The Daiwa Securities Group had a stand featuring impact investing at the Future Expo 2010 for the Blue Planet held November 4-6, 2010 by the Junior Chamber International at the Osaka International Convention Center. At a panel discussion on "SRI—Innovations Creating Sustainable Money Flows," Mariko Kawaguchi, Managing Director of CSR Promotion, Corporate Communication Department, Daiwa Securities Group, acted as moderator, and Satoru Yamamoto, Director, Product Planning Department, Daiwa Securities, participated as a panelist discussing the future of money. Participants' reactions such

Introducing impact investing at the Future Expo

as, "It was the first time I heard that money can be used to change society," and "I would have thought of a more useful way to use my money if I had heard these things when I was a child," reiterated the importance of our educational activities.

2. Encouraging Volunteerism among Executives and Employees

At the Daiwa Securities Group, executives and employees participate in volunteer programs and other community action, and these experiences broaden their perspectives and values. This, in turn, has a good influence on both their work and their lives.

Volunteer activities include both activities that the Daiwa Securities Group plans and runs on its own initiative and joint activities undertaken in cooperation with the community and NPOs. We strive to create an environment that makes it easy for executives and employees to volunteer by setting up a recognition program for volunteers, among other incentives. Aiming to encourage as many Daiwa people as possible to participate in corporate citizenship initiatives, we will continue to collaborate with external NPOs, strengthen internal communications about volunteering, and create more opportunities for executives and employees to get involved.

Volunteer Awards

At Daiwa Securities, outstanding activities by executives and employees are recognized with the President's Award. The company also introduced the Volunteer Award in fiscal 2007, which is given twice a year to employees and groups involved in ongoing community volunteer activities. In the second half of fiscal 2009, Daiwa Securities Capital Markets included an award for social contribution activities in its Passion for the Best Awards. Unfortunately, there was no winner of this award in fiscal 2010.

Executives and employees involved in social contribution, donation and recycling initiatives

Group executives and employees organize sign language classes, help clean up after community events and participate in various campaigns for reusing and recycling valuable supplies. One such campaign involves collecting used and unused stamps, prepaid cards, partially used postcards and similar items to donate to NPOs. We will work even harder in the future to encourage executives and employees who are moving as a result of a job transfer to ensure their books and other items can be recycled.

Donations from executives and employees in fiscal 2010 totaled ¥440,094, 8% down from fiscal 2009. The number of people voluntarily taking part in sign language classes increased to 2,322 people in fiscal 2010, a 1.5 % year-on-year decrease, while the number participating in volunteer activities on weekends or after work increased 22% over the previous year to reach 384 people.

Main activities in fiscal 2010

Sign language classes

Since 2000, the Daiwa Securities Group has held sign language classes for beginners in the Tokyo, Osaka and Nagoya regions. These classes are intended to raise understanding of people with hearing impairments and popularize sign language, and are open to the general public as well as the Group's executives and employees. In fiscal 2010, 2,287 people participated nationwide. In the classes, participants who are aiming to reach a higher level are given information and referrals to sign language circles. The company also hopes that ongoing sign language studies will broaden its use.

"If the World Were a Village of 100 People" Workshop

The Daiwa Securities Group joined other companies in sponsoring a workshop entitled "If the World Was a Village of 100 People" at three venues (in Tokyo on September 21, 2010, in Nagoya on February 3, 2011, and in Osaka on February 4, 2011). Participants, including 49 people from the Group, were given a card showing the population breakdown by classification and linguistic roots, and food was distributed to highlight the gaps between rich and poor. This gave participants a personal experience of the world's disparities and diversity.

Neighborhood clean-up events by Daiwa Securities Business Center

Under its good corporate citizenship program, the Daiwa Securities Business Center has, since 2008, carried out clean-up activities covering the area from near the headquarters building to Toyocho Station on the third Friday of every month. Participants believe that keeping streets clean is a way of giving back to the community. This campaign is held from 8:00 am until 8:20 am before office hours start, and it has become a regular event.

Moreover, the company participated in the first community clean-up organized by the Koto Ward Town Hall. In April 2010, the president and many other executives and employees cleaned the streets from the town hall to the Toyocho Center Building.

The company will continue to participate as much as possible in community clean-up activities, and will work with the communities administering these programs to help keep the streets clean.

3. Support for Culture and the Arts

The Daiwa Securities Group provides ongoing support for a wide range of cultural and artistic activities. For instance, in 2010, we supported the Design to Change the World Exhibition (May-June), where product designs and projects that resolve the variety of issues confronting people living in developing countries were displayed, as well as the Global Festa Japan 2010 (October), an event introducing efforts to achieve the UN Millennium Development Goals (MDGs), one of which is to halve global poverty by 2015.

The Group was also the special sponsor of the Twenty-Second Central Contest for Book Review Painting for the seventeenth year, a tradition that began with the sixth contest. This contest for

elementary, junior and senior high school students awards prizes by age group to drawings that express their impressions of a book they have read. Exhibits of the winning drawings were held at 12 Daiwa Securities branches.

We also support traditional Japanese cultural forms such as shogi and go. In addition to sponsoring the top title matches in shogi and go, the Meijin Title Match (shogi) and the Honinbo Tournament (go), since 2005, the Group is also the special sponsor of the Daiwa Securities Cup shogi and go Internet tournament. In shogi, we support the Saikyo Tournament and the Women's Saikyo Tournament. In go, we support four tournaments: the Open, the Ladies and Grand Champion Internet Tournament, as well as the Amateur Championship. These matches take place on the Internet year-round, and viewers can also watch the matches in real time on the Internet. The matches, which begin at 8 p.m. on weekend evenings, attract a strong following among not only Japanese fans but also shogi and go enthusiasts in other countries.

New series of television commercials, "Playing for Change"

"Playing for Change" is a musical project that aims to create motivation, build connections and make peace in the world through music.

Mark Johnson, a producer and engineer working primarily on the West Coast of the United States, launched this project. The experience inspired him to bring musicians from around the world into this performance and connect the world through music.

Over 100 musicians from around the world who were virtually unknown at the time collaborated in this project. Well-known music appealing to all generations and the project's original music were arranged to be performed together by these global musicians, resulting in a project that has moved many people.

Part of the project's revenue goes to the NPO The Playing For Change Foundation (PFCF), which uses the money to provide necessities to refugees in India and Nepal and to establish music schools and art schools in South Africa, among other projects.

The Daiwa Securities Group, recognizing that the "building connections around the world" concept advocated by this project is consistent with its goal of providing financial services that link its customers to the world, is using footage from the project in its television commercials.

4. Financial Assistance to Communities on Both the Local and the International Level through Foundations and NPOs

Daiwa Securities Health Foundation

The Daiwa Securities Health Foundation was established in 1972, in commemoration of the Group's 30th anniversary, to support medical research. Since 1973, the Daiwa Securities Health Foundation has supported 30 outstanding research projects focusing on improving the health, medical care and welfare of middle-aged and older people. It has disbursed ¥30 million in grants of ¥1 million each year. Fiscal 2010 marked the 37th year of this program, with a cumulative total of 1,012 recipients receiving ¥977 million in total.

In addition, the Foundation decided to disburse ¥10 million in reconstruction assistance to support research by individuals and organizations such as universities, institutions and hospitals into topics

such as medical activities in disaster areas and disaster medical care.

Daiwa Securities Health Foundation (available only in Japanese):

http://www.daiwa-grp.jp/dsh/index.html

Daiwa Securities Foundation

The Daiwa Securities Foundation was established in 1994 in commemoration of the Group's 50th anniversary, with the mission of building a better world. The Foundation provides yearly grants for volunteer activities in the fields of welfare and medicine, and carries out educational activities to encourage volunteerism. These activities are intended to improve the public welfare by fostering an environment conducive to volunteer activities. By fiscal 2010, the Foundation had given a cumulative total of ¥557 million in Volunteer Activities Grants to 2,400 organizations.

In fiscal 2011, in particular, the Foundation provided ¥35 million in Disaster Volunteer Activities Grant to support organizations and groups involved in volunteer work responding to the Great East Japan Earthquake.

Daiwa Securities Foundation (available only in Japanese):

http://www.daiwa-grp.jp/dsf/index.html

The Daiwa Anglo-Japanese Foundation in the UK

The Daiwa Anglo-Japanese Foundation is a UK charity that was established in 1988 with a generous benefaction from Daiwa Securities for the purpose of supporting a closer relationship between Britain and Japan. Principle activities include the following:

- (1) Making grants available to individuals, institutions and organizations to promote ties between the UK and Japan in all fields of activity
- (2) Enabling British and Japanese students and academics to further their education by providing opportunities for joint research and supporting exchanges and other bilateral initiatives
- (3) Awarding of Daiwa Scholarships for British graduates to study and undertake work assignments in Japan
- (4) Organizing a year-round program of events to increase the understanding of Japan in the UK

Daiwa Foundation Japan House, the London-based headquarters, acts as a center for Anglo-Japanese relations in Britain by offering a wide range of seminars, exhibitions and book launches as well as meeting rooms for Japan-related activities and facilities for visiting academics. The Foundation is represented in Japan by its Tokyo Office, which provides local assistance to Daiwa Scholars (foreign students), administers grant applications from Japan and collaborates with other institutions that promote Anglo-Japanese relations. Since its inception, 135 students have been accepted from the United Kingdom. In addition, the Foundation has provided grants for a total of 2,517 projects, with grant-in-aid exceeding ¥2,075 million (as of March 2011).

The Foundation has also decided to establish a £250,000 scholarship fund for Japanese students whose schoolwork and lives were affected by the Great East Japan Earthquake and are seeking to study for a period at an educational institution in the UK.

Daiwa Securities Group Tsunami Reconstruction Fund

We established the Daiwa Securities Group Tsunami Reconstruction Fund on March 9, 2005 to provide recovery assistance to regions damaged in the Sumatra Earthquake and Indian Ocean Tsunami which occurred on December 26, 2004. Beginning in fiscal 2005, this fund provides long-term support for recovery over a ten-year period, disbursing ¥10 million annually for a total of ¥100 million. Established within the Asian Community Trust (ACT), the Daiwa Securities Group Tsunami Reconstruction Fund provides grants to local NGOs that offer assistance in the fields of mental health care for children, utilization of microfinance and provision of education opportunities for children in Indonesia, Sri Lanka and India, the three countries hardest hit by this disaster. Leveraging expertise in their respective areas, Asian Community Center 21 (ACC21), which functions as the executive office for ACT, undertakes program selection and activity monitoring, while the Sumitomo Trust & Banking Co., Ltd., acts as the custodian of this fund.

There are three key characteristics to this fund. First, it provides long-term recovery assistance measures rather than offering temporary donations. Second, it utilizes financial systems to provide assistance through charitable trusts, microfinance and other avenues. And finally, the monitoring done by ACC21 makes it possible to assess every detail of the activities being conducted.

The Asian Community Trust:

http://www.acc21.org/act/english/act-aen-index.html

Donations from SRI Fund's Trust Fees

Daiwa SRI Fund Financial Assistance Program

The Daiwa SRI Fund Financial Assistance Program gives grants to Japanese NPOs that provide support in fields involving human life (the human security field).

Rather than supporting general projects and events, the program supports the human resource development of the NPOs that administer such activities. Aiming to build the capacity of NPO staff to address daily human security issues, the program subsidizes personnel and education costs. It is operated in collaboration with the NPO Civil Society Initiative Fund with donations from the trust fees of the Daiwa SRI Fund.

Fiscal 2011 recipients of the Daiwa SRI Fund Financial Assistance Programs (available only in Japanese): http://www.civilfund.org/fund23.html

Support for Kopernik

Kopernik is a US-based NPO established in 2009 with the aim of improving quality of life and reducing poverty in developing countries; it went into full operation in Japan in 2010. Kopernik has developed a scheme that enables contributors in developed countries to select NPOs in a developing country and a product that they need (simple water purifiers, solar lamps, etc.) to donate. The status of the activities carried out by the NPOs receiving the donation is shown on the website, and the transparency of the donation's use is ensured.

Some of the donations made by the Daiwa Eco Fund are used to cover Kopernik's administrative costs. Daiwa Asset Management and Daiwa Securities select the products and the recipients to receive donations in light of their consistency with the principles of the Daiwa Eco Fund. The way the donation will be used is clear and NGOs active on the ground can be supported directly, which means that we can give back to the community efficiently and accurately.

Support for ISEP

The Institute for Sustainable Energy Policies is an independent non-profit research organization established in 2000 with the aim of realizing sustainable energy policy. The organization is carrying out natural energy projects funded by citizens, such as Japan's first locally-financed wind turbine, named Hamakaze-chan.

Donations from trust fees of the Daiwa Eco Fund were used to pay for the cost of preparing the Renewables Japan Status Report 2011, published by the organization in March 2011. This report earned high praise from related government agencies, researchers, universities and NPOs, and we are confident that supporting its ongoing publication is a very worthwhile endeavor.

Daiwa CI Biodiversity Conservation Fund (DCBCF)

The Daiwa CI Biodiversity Conservation Fund was established in November 2007 to work with the global environmental NGO Conservation International (CI) to carry out biodiversity conservation activities in the vicinity of World Natural Heritage sites in seven countries that have been selected from 34 areas called biodiversity hotspots.* The Daiwa CI Biodiversity Conservation Fund is operated with donations from the trust fees of the Daiwa Eco Fund.

* Hotspot: Places where biodiversity is rich but greatly threatened (34 places). This term was coined by British biologist Norman Myers in 1988 to designate areas that should be given priority in conservation and preservation efforts.

Daiwa-Russell-GEF Asia Project to Support the Transfer of Environmental Technology

The Daiwa-Russell-GEF Asia Project involves the compilation and distribution of handbooks containing basic technologies from among those environmental technologies possessed by Japan that can be fully developed and operated using the materials and human resources of developing countries. The project is operated in cooperation with the Global Environmental Forum, operates a project funded from the trust fees of the Russell Global Environmental Technology Fund. In September 2010, the project issued the Handbook on Sewage Treatment Technology for Developing Countries, using Thailand as a model.

Public Engagement

Participation in Multi-stakeholder Forum on Social Responsibility as steering committee member

The Multi-stakeholder Forum on Social Responsibility for a Sustainable Future, in which many bodies participate as equals, was established in 2008 with the aim of building a coordinated response to problems in society that cannot be solved by government alone. Katsuya Kikuchi, Senior Fund Manager, Daiwa Asset Management, participates in the forum, which includes business and consumer associations, labor unions, NPOs and NGOs, and government, as a representative of the financial sector and steering committee member (as of March 2011). In the forum's first two years, discussions centered on factors needed to create a safe and stable sustainable society. Hereon, the forum plans

to devise a coordinated strategy to create a safe and sustainable future and work on concrete actions spanning four issues: developing social infrastructure to nurture humanity, creating a society in which everyone can live together, participating in the resolution of global-scale problems, and developing sustainable communities.

Daiwa Aid after the Great East Japan Earthquake

We extend our deepest condolences to the victims of the earthquake that took place on March 11, 2011. The following is a report on our donations to help reconstruction and provide aid to affected areas and the direct support the Daiwa Securities Group is providing, as well as our future plans.

■Donations

¥100 million (Daiwa Securities Group)

¥30 million each to Iwate, Miyagi, and Fukushima prefectures

¥10 million to Ibaraki Prefecture

■Subsidies for volunteer activities

¥35 million (Daiwa Securities Foundation)

¥5 million (¥1 million each) to disaster volunteer centers in Iwate, Miyagi, Fukushima, and Ibaraki prefectures, and Sendai City

¥30 million in grants to disaster volunteer action groups (maximum ¥500,000 per grant)

Recipients are students and specialist groups engaging in activities needing specialized skills.

■Subsidies for research into disaster medicine

¥10 million (Daiwa Securities Health Foundation)

¥10 million (maximum ¥1 million per grant) to universities, research centers, hospitals, and other individuals and groups engaged in research into disaster medicine or medical care in the disaster-stricken areas of the Tohoku region and Ibaraki, Miyagi, and Chiba prefectures.

■ Daiwa Foundation Tohoku Scholarships

£250,000 (Daiwa Anglo-Japanese Foundation)

The foundation has decided to establish a £250,000 scholarship fund for students from the Tohoku region whose educational or other circumstances were affected by the earthquake.

■Daiwa Point Program

Donations through point exchange

(Daiwa Securities)

¥7.18 million raised by 7,005 participants

(as of April 30, 2011)

Used to support reconstruction in affected areas through NPO Japan Platform.

■Charity collection

(Daiwa Securities Group)

¥40.57 million raised from executives and employees in Japan and abroad (as of April 27, 2011)

Used for reconstruction of affected areas and to support victims through Japan Platform and the

Japanese Red Cross Society.

■Policy Proposal

(Daiwa Institute of Research)

The Daiwa Institute of Research announced a proposal for the establishment of a reconstruction fund and a reconstruction solidarity tax.

Proposal for Establishment of Reconstruction Fund and Reconstruction Solidarity Tax to Finance Rehabilitation after Great Earthquake of Unprecedented Scale (available only in Japanese) http://www.daiwa-grp.jp/data/current/press-2955-attachment.pdf

■Support through financial products

The Daiwa Securities Group is giving a portion of trust fees from the Daiwa Nippon Ouen Fund (Phoenix Japan)¹ to earthquake victim support groups.

The group is also supporting finance aspects of the massive reconstruction funds and developing impact investment financial products.

1 Daiwa Nippon Ouen Fund (Phoenix Japan): Japanese stock fund offered by Daiwa Asset Management. Invests only in Japanese stocks to support strong Japanese companies and invigorate the Japanese economy.

Future support

Interest in building a sustainable economy has grown since the earthquake and accident at the Fukushima Daiichi Nuclear Power Plant brought into focus sustainable energy and regional economies that take into consideration the surrounding environment and communities. We strive to offer companies and investors information spanning a wide range of perspectives such as the environment and CSR.

There are many additional ways, such as the Daiwa Institute of Research's policy proposal, for the Daiwa Securities Group to contribute through capital markets.

We plan to share our experiences in the reconstruction of Sumatra, using knowledge gained in our project supporting reconstruction after the 2004 tsunami².

We also plan to encourage employee's activities long-term by providing employee volunteer information through our intranet.

2 Daiwa Securities Group Tsunami Reconstruction Fund

Initiatives Outside Japan

Participation in Wall Street Run & Heart Walk 2010 in the US

The Wall Street Run & Heart Walk 2010 is a charity event held to support the American Heart Association, which is engaged in efforts to prevent and treat cardiovascular disease and stroke. Cardiovascular disease and stroke are the first and third most common causes of death, respectively, in the US, with almost 1 million deaths per year attributable to these causes.

On June 24, 2010, 15 employees of Daiwa Securities Group in

Participation in charity run

the US and their families joined several thousand staff from other financial institutions for this event. They entered the 5km run through Manhattan neighborhoods, and everyone completed the run.

New groups selected for support in fiscal 2010 in London

Daiwa Securities Capital Markets Europe's Charity Committee selected two organizations to support in fiscal 2010.

The first is Great Ormond Street Children's Hospital, which is famous world-wide for its pediatric medical care. The company will also support Little Havens, a hospice for children that offers respite care, eases symptoms, and provides end-of-life care to children not expected to reach adulthood due to life-threatening illness.

The Charity Committee sets up a system for funding, donations and staff enabling the company to accurately support needs. In fiscal 2010, events will be held throughout the year to support these two organizations.

Environmental Report

Environmental Initiatives

Approach and Basic Stance

The natural environment is the very foundation of human life, so protecting it is essential to sustainable societies. We strive to help resolve environmental issues through our business by investing in the development of products that can reduce society's environmental impact, and also by making investments that help to make environmental technologies and infrastructure more widely available. We are working to establish a system that efficiently collects data on Daiwa's environmental impact. We are also focused on raising employees' environmental awareness to empower them to reduce environmental impact in daily business operations.

Environmental Management

All Daiwa Securities Group companies carry out environmental management. In the monthly meetings of the Environmental Management Council, the managers from each company work together by compiling data and exchanging information.

The Daiwa Institute of Research Business Innovation has earned ISO14001 certification. Initially this certification was only for the telecom business, but the scope was expanded to cover the entire headquarters of the company beginning in April 2010. We use forums such as councils to consider ways in which we can continue to develop group-wide environmental management systems.

We will continue to reduce energy consumption and track data on CO₂ emissions, use of copy paper and paper for forms, the amount of waste generated, and recycling amounts, and continually work to reinforce our efforts.

CO₂ Emissions

Energy consumption at the Daiwa Securities Group's domestic offices (on a CO_2 emissions basis) rose 4.7% in fiscal 2010 compared with fiscal 2009. This was primarily due to Japan's revised Act on the Rational Use of Energy, which now requires that data include the electricity, gas and crude petroleum used in air conditioning by tenants in office buildings in Japan which are subject to the revised Act (Daiwa Securities Headquarters building, Eitai Daiya Building, and Osaka Mitsui Bussan Building, and Daiwa Securities branches). Calculated as before, electricity consumption would have decreased 1.6% from the previous year.

Electricity consumption at overseas offices increased due to the increase in the number of offices covered by changes in the report boundary, but electricity consumption per office decreased 9.7% from the previous fiscal year.

Energy Consumption

FY	2006	2007	2008	2009	2010
Domestic offices					
Electricity (1,000 kWh)	88,728	92,659	97,722	104,750	108,6281
Natural gas (1,000 m³)	691	644	517	423	6961
Gasoline (kiloliters)	1,046	1,032	1,029	1,062	1,137
Heavy oil (kiloliters)	34.1	23.7	4.3	1.4	8.61
Diesel fuel (kiloliters)	0.1	0	0.1	0	0.2
Overseas offices					
Electricity (1,000kWh)	-	7,718	11,640	11,130	13,137

¹ Energy consumption increased significantly due to Japan's revised Act on the Rational Use of Energy, which now requires that data include tenant energy consumption for air conditioning in the three office buildings and other facilities in Japan which are subject to the revised Act.

CO₂ Emissions from Energy Consumption

(Unit: 1,000 kg-CO₂)

FY	2006	2007	2008	2009	2010
Domestic offices					
Electricity	49,244	51,426	54,236	58,136	60,2891
Natural gas	1,438	1,339	1,075	880	1,4481
Gasoline	2,427	2,396	2,389	2,465	2,639
Heavy oil	101.6	70.6	12.8	4.1	25.71
Diesel fuel	0.2	0	0.3	0	0.6
Total for domestic offices	53,211	55,232	57,713	61,486	64,403
Overseas offices					
Electricity	-	4,283	6,460	6,177	7,291
Total for domestic and overseas offices	-	59,515	64,137	67,662	71,694

¹ Energy consumption increased significantly due to Japan's revised Act on the Rational Use of Energy, which now requires that data include tenant energy consumption for the air conditioning for the three office buildings and other facilities in Japan which are subject to the Act. CO₂ emissions in fiscal 2010 totaled 57,197 thousand kg-CO2 for electricity consumption for which the Group has full-year figures.

 CO_2 emissions per employee is calculated by dividing the Daiwa Securities Group's total emissions by the number of domestic employees, and increased 400kg year on year. This is because the revised Act on the Rational Use of Energy now requires the inclusion of data on electricity, gas and crude petroleum use by office building tenants.

^{*} This data pertains to consolidated Group companies.

^{*} At overseas offices, only electricity consumption was calculated.

^{*} Shows data for consumption of electricity, gas, gasoline, heavy oil and diesel fuel at domestic offices and electricity consumption at main overseas offices converted to CO2 emissions (1,000 kg).

^{*} For all years and regions, the emissions coefficient used for converting to CO2 emissions is based on the ministerial ordinance related to the calculation of greenhouse gas emissions arising from the business activities of specified emitters (Ministry of Economy, Trade and Industry and Ministry of the Environment, Ordinance No. 3, March 2006).

CO₂ Emissions per Employee (Domestic)

(Unit: 1,000 kg-CO₂)

FY	2006	2007	2008	2009	2010
Per employee	4.5	4.3	4.2	4.6	5.0
Number of domestic employees	11,924	12,943	13,652	13,477	12,868

^{*} This data pertains to consolidated Group companies.

Volume of copy paper / forms used

We facilitated the transition to a paperless office by appointing an employee to be in charge of the paperless transition at Daiwa Securities Group Inc. and holding paperless meetings in fiscal 2010. As a result of these endeavors, the volume of copy paper used fell about 23% form the previous fiscal year. Moreover, about 39% (based on monetary value) of the copy paper used consisted of Green Procurement Network (GPN) compatible products.

Volume of Copy Paper / Forms Used

(Unit: 1,000 kg)

			(

^{*} Calculated based on the Reuse Plan for Large-Scale Buildings Used for Business, as specified by each local government.

Initiatives to Reduce Environmental Impact

Upgrades to building equipment to conserve energy

When Daiwa Securities upgrades equipment such as air conditioners, power supply units, power conversion equipment, and water supply and drainage units in its branches, the company requires that products meeting the highest ("top runner") standards are adopted to ensure that equipment with low environmental impact is installed. "Top runner" standards were recommended in Japan's Act on the Rational Use of Energy, which requires that manufacturers clear benchmarks ensuring that energy-saving products are manufactured. The "top runner" concept calls for manufacturers to strive to improve their technologies and create products and equipment that surpass the energy efficiency of products and equipment currently on the market.

Eco activities expanded (Daiwa Securities Business Center)

The Daiwa Securities Business Center started the Eco Promotion Committee in 2008 and began to work on eco initiatives. Each year, the Business Center sets its own targets for reducing electricity use and paper use to raise awareness among individual employees and motivate them to create and implement

¹ The data for copy paper is calculated using data on the amounts purchased centrally for the Group companies by Daiwa Sanko. Paper purchased centrally accounts for about 90% overall.

² The data on paper for forms reflects only the forms generated by the Group data centers and does not include forms generated by outsourcing.

ingenious solutions. In fiscal 2010, the third year, the Daiwa Securities Business Center set a target of reducing paper use by 10% over the previous fiscal year and achieved a 9.1% reduction, but paper use has been cut by a cumulative 28% since this program started.

Information on the volume of paper ordered, electricity consumption and hours of electricity consumption, as well as status updates on internal initiatives, are listed monthly, quarterly, biannually and every fiscal year on the intranet as part of the company's efforts to raise awareness of employees.

Shortening work hours by encouraging executives and employees to leave before 7:00 p.m.

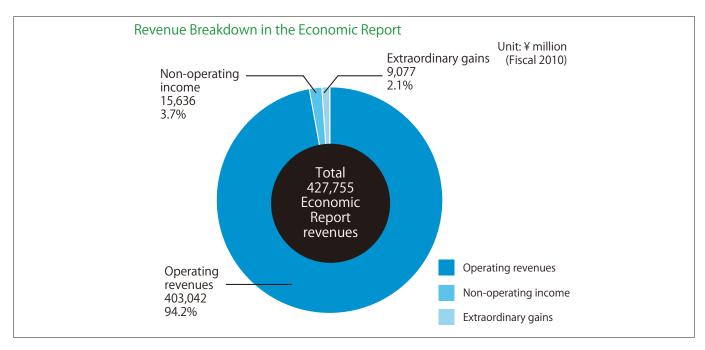

Encouraging executives and employees to leave the office before 7:00 p.m. in the interest of work-life balance means that lights and heating/cooling are needed for shorter periods. This, in turn, helps to reduce environmental impact.

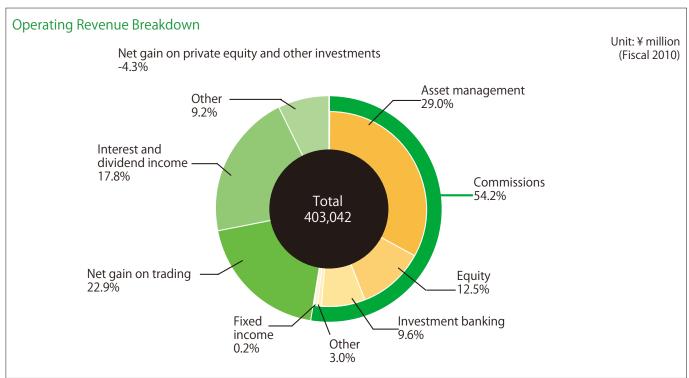

Economic Report

Delivering Economic Value to Stakeholders

Revenues in the Economic Report

For the purpose of this Economic Report, revenues represent the total of all revenues received by the Daiwa Securities Group (consolidated) in fiscal 2010—operating revenues, non-operating income and extraordinary gains. In fiscal 2010, operating revenues accounted for 94% of revenues.

Outline of Operating Revenues

Commissions

The three main categories of commissions, which account for 54.2% of revenues in the Economic Report, are described below.

1. Equity and fixed income commissions

Commissions earned on the purchase or sale of stocks, bonds and other securities by individual or institutional investors.

2. Asset management commissions

Commissions earned on sales of investment trusts and fees charged for placing and managing individual or corporate customers' assets held in trust.

3. Investment banking commissions

Underwriting commissions charged when corporate customers issue stocks or bonds to raise funds, and advisory fees for M&A, etc.

Net Gain on Trading

These are profits that arise from the sale of securities the Group has in its own account, or when the Group buys from or sells to its clients in the context of their business dealings.

Net Gain on Private Equity and Other Securities

Net gain on private equity and other securities describes gains resulting from the purchase or sale, or unrealized gains or losses, on securities acquired for investment, and from the sale of investment limited partnerships, etc.

Interest and Dividend Income

Interest and dividend income describes income earned from interest on securities held, dividends, and from transactions of lending or borrowing securities.

Distribution of Economic Value to Stakeholders

Economic value for the purpose of this Economic Report is calculated as revenues minus interest expenses (less interest paid), the cost of sales, selling, general and administrative expenses (less personnel costs, taxes, and expenditure for corporate citizenship activities), non-operating expenses (less interest paid), and extraordinary losses.

Executives and Employees

The distribution of economic value to executives and employees is the figure for personnel expenses (including reserves for salaries and bonuses, as well as welfare program costs and social insurance contributions). Daiwa has built a fair compensation system that is highly acceptable to all, in order to improve employee motivation and maximize the value provided to all stakeholders.

Society

Regardless of the ups and downs of the business cycle, we aim to provide stable funding for our corporate citizenship activities. See "Corporate Citizenship Initiatives and Expenditures" in the "Relationship with Society" section for a breakdown of these expenditures.

Shareholders

In fiscal 2010, the Group paid an interim dividend of ¥3 per share and a year-end dividend of ¥3 yen per share, for a total annual dividend of ¥6 yen per share.

Creditors

The Group pays interest to creditors.

Government

According to the Daiwa Securities Group's financial accounting, the tax amount paid is the sum of current income taxes, deferred income taxes, and other taxes and duties including consumption tax.

Minority Shareholders

This is the profit and loss returned to the minority shareholders of the Daiwa Securities Group companies.

Changes in Distribution of Economic Value to Stakeholders

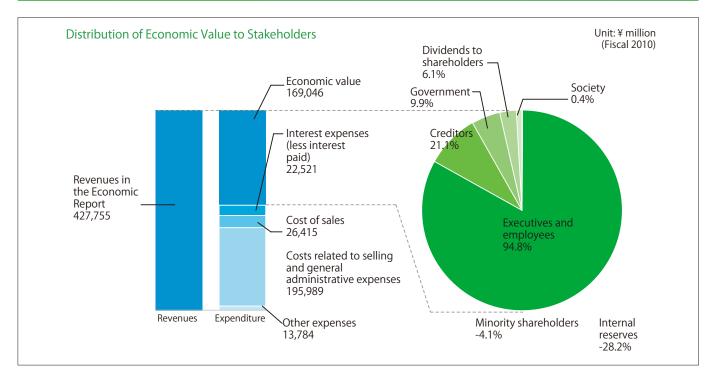

(Unit: ¥ million)

Stakeholders	2006	2007	2008	2009	2010	Tabulation method

Third-party Opinion

Approach and Policy on Third-party Opinion

At the Daiwa Securities Group, we believe that it is important to have external stakeholders evaluate our activities and provide advice so that we can continue to improve our CSR initiatives. For this reason, every year we ask for the opinion of a third party, an outside stakeholder, when we publish the CSR report.

Toshihiko Goto has shared his opinions of the 2011 report. Mr. Goto is Chief Executive of the NPO Sustainability Forum Japan.

We will study and share his opinions both internally and externally to improve our activities. This feedback will be reflected in our future initiatives and in the CSR reports for subsequent fiscal years.

Third-party Opinion

The Japanese people are thinking entirely differently about how best to approach national, economic and social issues since the Great East Japan Earthquake struck on March 11. We have indeed entered a period of paradigm shift. For the business world to adapt and be responsive to changes like these is the very definition of CSR, and the financial services industry is expected to be fully engaged and contribute to the protracted reconstruction ahead of us.

At the same time, the emerging markets and developing countries that will be important business targets going forward are entering a completely new stage in CSR. The launch of the ISO 26000 guidance standard on social responsibility in November 2010 was symbolic of this progress. It was developed with the participation of experts from 99 countries, mostly

Toshihiko Goto Chief Executive, NPO Sustainability Forum Japan.

emerging and developing nations, but I am afraid that Japanese companies are still moving too slowly on ISO26000.

The Daiwa Securities Group is endeavoring to take its employees' awareness to the next level with cutting-edge initiatives such as SRI funds and impact investment bonds. However, the social responsibilities (SR) in emerging economies and developing countries are extremely varied and wideranging. Staff, including at subsidiaries, outside of Japan must not only be aware of SR through products, but must also address SR issues independently in the area where they work. It is basically impossible for CSR staff at the head office to respond directly to every issue—rather, an adequate response requires a system that involves all employees. Ideally, every employee would take the initiative in addressing the seven core subjects of the ISO 26000 in their private lives as well as in their work. These seven core subjects are organizational governance, human rights, labor practices, the environment, fair operating practices, consumer issues, and community involvement and development. I believe that the functions of the head office's CSR division should be at the center of strategic management, and now is the time when the Daiwa Securities Group, and many other Japanese companies, must rethink their approach, reconsidering how they will build such functions and how they will improve CSR capacity on the frontlines. I also think that this can lead to business opportunities. The Group's current CSR initiative that encourages more employees to take up volunteer activities is a very effective way to enhance CSR capacity.

I think that, as a general statement of intent, the president's message takes the high road, but the key is the extent to which specific measures are established and implemented.

The editorial policy states that the report focuses on areas the Daiwa Securities Group particularly wishes to communicate in an easy-to-understand highlight edition. This is a completely different concept from typical reports, and certainly represents a noteworthy effort. In this report, the Group focuses on SRI, and I think this is appropriate since this is part of the Group's core business and its status as a leader in this field. However, as noted in the report, SRI accounts for a very small percentage of overall investing in Japan, with a three-digit difference compared to the US and Europe. I hope that the Daiwa Securities Group will develop an indicator for assessing the extent to which SRI concepts are being realized in its mainstream business overall.

The Daiwa Securities Group has decided to convey comprehensive information based on the GRI in its full edition. The issue of how the highlight edition and the full edition can be used together and how the synergies can be enhanced has yet to be clearly addressed.

While the report states that it aims to convey comprehensive information based on the GRI Guidelines, it highlights descriptions by stakeholder. These descriptions by stakeholder are typical of the Japanese format and are not used much internationally. However, a link to a comparison chart with the GRI Guidelines is provided to satisfy both the domestic and international audiences. I also appreciate that explanations of technical terms are provided even in sections only available in the full edition.

Of note, the Daiwa Securities Group has revised its basic policy on human rights. However, it seems to continue to focus on discrimination. The Ruggie Report has provided the direction and guidance for human rights in ISO 26000 and the new OECD Guidelines for Multinational Enterprises, revised in May 2011. In his role as the United Nations Special Representative of the Secretary General on human rights, Professor John Ruggie presented this report to the UN Human Rights Council. Human rights are defined very broadly in the UN's "protect, respect and remedy" framework, proposed in the Ruggie Report. Awareness of human rights that enables people to empathize with another person's pain is important as a personal quality, but the key issue is to be aware of the kinds of human rights problems happening around the world. I believe that the Group's basic policy will have to be revised again soon to reflect this.

In regard to environmental issues, building a sustainable society has been at the top of the agenda of every Japanese organization since the disasters of March 11. I have great hopes that the Daiwa Securities Group will establish its 2020 goals and 2050 vision.

As I wrote at the beginning, CSR is entering a new stage. The key terms are due diligence, stakeholder engagement, human rights and ethics, and the value chain, but I did not see these terms appearing often in this report. I believe that the Daiwa Securities Group should use this key language, particularly in times of such intense change.

Finally, the Daiwa Securities Group does not yet have a basic policy on the environment, a document which every global enterprise should have. I recommend that the Daiwa Securities Group promptly consider formulating its own.

Response to Third-party Opinion

We truly appreciate Mr. Goto's evaluation of our activities, which represent our strategy to expand in Asia, based on a global framework. By making impact investments one of our key business areas and involving many executives and employees in this area, we are striving to boost familiarity with CSR. We are proud that the Daiwa Securities Group is playing a pioneering role in Japan in this field. That said, we do recognize that we need to make further efforts to reach the level demanded in this global world, as outlined in the ISO26000 and the Ruggie Report. We released our human rights policy this year, and have taken the first step in addressing human rights issues other than discrimination.

Koichi Matsushita Executive Managing Director

In addition, we are considering adopting a new framework for environmental management. As part of our business expansion in Asia, we have also

started initiatives to raise employees' sensitivity by providing information on social problems in countries and communities, hoping that this would lead to business such as impact investment. These are all important CSR issues as well as fields in which our efforts have lagged, so we have decided to put more efforts in this area. We will continue to devote resources to impact investment, and are developing products to aid the recovery from the Great East Japan Earthquake. Still, as Mr. Goto pointed out, this still occupies a modest share of our overall earnings. We will strive to develop indicators and make products like these mainstays for the Group.

Third-party Evaluations

Dow Jones Sustainability World Indexes Member 2010/11

The Dow Jones Sustainability World Index (DJSI World) is a stock index of companies with sustainable practices selected by Dow Jones & Company, Inc. of the United States and Sustainable Asset Management (SAM) of Switzerland. Daiwa Securities Group Inc. has been included in DJSI World for 12 consecutive years.

FTSE4Good Index

FTSE is a subsidiary of the UK's Financial Times and the London Stock Exchange. It develops global indexes and provides data for investment. Daiwa Securities Group Inc. has been included in the FTSE4Good, an index of socially responsible companies compiled by FTSE, for six consecutive periods since September 2006.

Certified Family-friendly Employer

Shown at right is the certification symbol for family-friendly employers provided by Japan's Ministry of Health, Labour and Welfare's based on the Act on Advancement of Measures to Support Raising the Next Generation of Children. In addition to Daiwa Securities Group Inc. obtaining certification as a family-friendly employer on June 9, 2008. Daiwa Securities, Daiwa Securities Capital Markets, Daiwa Institute of Research Holdings, Daiwa Institute of Research, Daiwa Institute of Research Business Innovation and Daiwa Securities Business Center also received this certification.

Work-Life Balance

The Daiwa Securities Group has earned high praise from a range of external organizations for its initiatives to provide employees with a more supportive work environment that is conducive to work-life balance. In fiscal 2009, the Group won the Ministry of Health, Labor and Welfare Award in the category of corporate promotion of equality and work-life opportunity, as well as the excellence award in the organizational activity category for the Third Work-Life Balance Grand Award, the 2009 Nikkei Childcare Support Award, and the Third Diversity Management Prize in the WLB category. The Group jumped from 63rd place to 7th place in Nikkei Research's rankings of the best company to work for.

G3.1 GRI Content Index

GRI Application Leveis

In compiling the Daiwa Securities Group Sustainability Report 2011, reference was made to Global Reporting Initiative (GRI) Guidelines (3.1 Edition) and the Financial Services Sector Supplement (2008). The guidelines set out a series of standard levels (GRI application levels) based on regulations outlined therein that companies compiling reports may apply to ensure that their reports are compliant with GRI guidelines. We believe that the Daiwa Securities Group Sustainability Report 2011 meets the reporting standards for GRI Report Application Level B.

*Sector supplement in final version
