

MeetGreen respectfully requests a deferral of our Communication on Progress to August 31, 2012 from October 21, 2011. This request will allow us time to achieve two important things:

- Adjust our data collection period to align with a calendar year and more logically with our event management project cycles.*
- Prepare to adopt integrated reporting that will weave together our COP with the updated GRI Event Sector Supplement Guidelines and ISO 20121 Reporting requirements. The latter of these two are not anticipated to be finalised until 2012.*

This adjustment will help to streamline and make our reporting more efficient and respond to emerging standards for event sustainability. Questions and concerns in the interim can be directed to Shawna McKinley (smckinley@meetgreen.com).
