To our stakeholders,

ACEFAT, AIE recognize that a key requirement for participation in the UN Global Compact is the annual preparation and posting of a Communication on Progress (COP) that comprises of a statement of continued support for the UN Global Compact, a description of practical actions regarding to the principles of the UN Global Compact.

Our COP report will be our sustainability report of the period 2009-2010, Global Reporting Initiative framework. We have talked with the Global Compact organization in Madrid and we have introduced the adequate changes like the compromise of going on with the compromise with the Global Compact organization for another year.

ACEFAT, AIE is a SME with a little resources, and the end of the year has been complicated, that's the reason for the delay in our communication. However, the sustainability report is in the last step, is in the final review process and it's not possible to me to post to the UNGC COP site as a finished document at this time.

Therefore, I respectfully request an extension so that I may provide you with the most complete document for this reporting period.

Sincerely,

**Susana Pascual García**
