

AENER ENERGÍA PRESENTS ITS NEW CORPORATE IDENTITY / APRIL 2011

Aener Energía, one of the first European companies in the market of power factor correction, UPS's and voltage stabilizers, has presented its new corporate identity that reflects the spirit of a young, dynamic, strong and constant evolution company.

Since Aener Energía was created in 1994, the company has become a clear leader in the field of energy saving. Its firm commitment of internationalization has lead the company to have presence in over 25 countries in four continents.

This new identity intends to reflect the innovation and steady growth as well as its adaptation to all countries where operates.

Aener Energía has also presented its new office, adapted for this new image and as a result of the company growth and desire to provide the best customer service.

The new offices are located in Calle del Viento, 5 (Madrid, Spain).

AENER IN THE INTERNATIONAL EXHIBITION "HANNOVER MESSE 2011" / APRIL 2011

Aener Energía has been present again and for tenth year in the industrial exhibition "Hannover Messe".

In this edition Aener Energía has presented its new global corporate image and, as a novelty, has launched the new automatic capacitor for low power for small facilities (shops, restaurants, etc.) that stands out for its attractive design, very easy assembly and low cost. Another of the great innovations that Aener Energía has presented at the exhibition is the model FT55, perfect module, yet simple, for the construction of automatic capacitor banks.

Aener Energía is one of the few European companies in the sector of power factor correction, uninterruptible power supplies and voltage stabilizers that have an integrated product management and service with a production volume of more than 2.300 equipments per year. Aener Energía is one of the leading European manufactures in control and energy saving.

"PROJECT ABREGA": A NEW CHALLENGE FOR AENER ENERGÍA / JUNE 2011

In its program of corporate social responsibility Aener Energía has made a financial contribution to the "Project Abrega" of the Barabara association.

The aim of this project is to develop activities for children of socio-educational, performing arts, sports, environment as well as to improve facilities and maintenance in a school in Benin, in the gulf of Guinea situated in West Africa.

The funds and materials provided by Aener Energía will help to organize a solidarity camp in the Educational Center "Pierre Yerima" located in Kandi, a town in Northern Benin.

The ultimate goal of "Project Abrega" is to triple the number of students in school, up to 70 children in the course. Only 9,8 % of the young ones has a complete secondary education. The 46% of the children between 5 and 14 years work and they don't have an opportunity to go to school.
