4.8		Statements of mission or values, codes of conduct and principles relevant to economic, environmental, and social performance	<p>Company Code and Whistleblower Policy KPN's company code is designed to ensure that KPN acts in an ethically responsible fashion and according to law. The code is based on our core values: personal, trustworthy and simple. These core values form the basis of our day-to-day operations and apply to all our business processes and external contacts.</p> <p>In order to facilitate application of the company code in our employees' day-to-day operations we have formulated supporting codes covering four clusters which provide concrete rules of conduct for specific areas:</p> <ol style="list-style-type: none"> 1) integrity 2) competition 3) insider trading 4) safety and information security. <p>Supplementing the codes of conduct KPN has a whistleblower procedure, an integrity review protocol and a policy on fraud. The whistleblower procedure permits employees to report cases of fraud, suspicion of fraud, non-compliance with the rules or lapses in ethical conduct. These reports may be made anonymously and may be made in writing (by letter or on the internet) or via the Integrity Line, from inside or outside the Netherlands and in various languages.</p> <p>The company code and whistleblower policy can be found at http://www.kpn.com/corporate/aboutkpn/investor-relations/corporate-governance/Company-Code.htm.</p> <p>Supplier Company Code KPN attempts to promote sustainability down the supply chain by purchasing from suppliers that comply with our labor and environmental criteria. Our Supplier Company Code (SCC; available on http://www.kpn.com/corporate/aboutkpn/Company-profile/Procurement.htm) sets down our social and environmental requirements. This code is based on the values set out in the United Nations Charter and on the core conventions of the International Labor Organization (ILO). We expect our suppliers in turn to request their own suppliers to comply with the code. This is set down in the code and its objective is to push further down the supply chain.</p> <p>Who we are and what we do, pp. 6–9 Paragraph 1.1 Our vision: ICT is vital to a thriving, sustainable society, p.19 Paragraph 1.2 Embedding corporate social policy within the organization, p. 21 Paragraph 1.6 Security and privacy, pp. 26–28 Paragraph 1.7 Compliance and integrity, pp. 28–29</p>
4.9		Procedures of the highest governance body for overseeing the organization's identification and management of economic, environmental, and social performance	<p>Annual Report, Risk Management, pp. 44–49</p> <p>Who we are and what we do, pp. 6–9 Paragraph 1.2 Embedding corporate social policy within the organization, p. 21</p>

Commitments to external initiatives			
4.11		Application of the precautionary principle	Annual Report, Risk Management, pp. 44–49
4.12		Externally developed economic, environmental and social charters, principles or other initiatives to which the organization subscribes or endorses	<p>Every man, woman and child, wherever they are in the world, has fundamental human rights. KPN respects and subscribes to the fundamental human rights laid down in international agreements such as the UN Declaration of Human Rights.</p> <p>KPN has signed the United Nations Global Compact. We thereby endorse the ten principles of this initiative and we have undertaken to respect human rights, to offer good labor conditions and to make an active contribution to environmental protection and anti-corruption. Every year, KPN will issue a progress report in relations to the Global Compact as part of the Sustainability Report. Details will be given in that report of the measures that have been taken to implement the ten principles.</p> <p>KPN applies the internationally recognized minimum social standards according to the International Labor Organization (ILO) and the OECD in her relations with suppliers, business partners and third parties.</p>
4.13		Memberships in associations and/or national/international advocacy organizations	<p>As part of the policy on sustainability, KPN actively participates in national and international networks. It helps to be able to compare our social performance with that of other companies and to strengthen it by interchanging experiences and ideas.</p> <p>KPN is a member of many networks, including:</p> <ul style="list-style-type: none"> • GeSi • ETNO • Green Grid • Teleworking Forum • Global Compact • Mobility Management Task Force • Mijn Kind Online is Founding Partner of Digivaardig & Digibewust. <p>We also aim to cooperate in social projects in markets in which we are active. For example, the subsidiary KPN Group Belgium is a partner of UNIZO (Unie van Zelfstandige Ondernemingen). KPN's German subsidiary E-Plus is associated with:</p> <ul style="list-style-type: none"> • Verband der Anbieter von Telekommunikations- und Mehrwertdiensten • M2M Alliance • Next Generation Mobile Network Allianz • Digitale Stadt Düsseldorf • Freiwillige Selbstkontrolle Multimedia-Diensteanbieter • Informationszentrum Mobilfunk • Stiftung Digitale Chancen. <p>http://www.kpn.com/corporate/aboutkpn/Company-profile/company-profile/the-company/Memberships.htm</p>

Stakeholder engagement			
4.14		List of stakeholder groups engaged by the organization.	Paragraph 1.3 In discussion with our stakeholders, pp. 22–24 Chapter 7 Scope, p. 66
4.15		Identification and selection of stakeholders	<p>KPN selects stakeholders based on their relevance to the IT industry and to KPN’s CSR themes. They are also organizations or persons (or their representatives) with whom we have a formalized contractual or business relationship, such as customers, investors, employees and suppliers. A major additional criterion is whether they had previously indicated their desire to be involved in KPN’s CSR policy.</p> <p>The other category of stakeholders concerns social organizations with which we do not have a business relationship, but whose views we value because KPN’s activities impact on the interests they represent. We very much wish to engage in dialog with authoritative, influential organizations, such as the World Wildlife Fund or the Nationaal Ouderenfonds, an organization representing senior citizens in the Netherlands. It exceeds our capacity to open up the dialog to every social organization that works on a particular subject.</p> <p>Paragraph 1.3 In discussion with our stakeholders, pp. 22–24 Chapter 7 Scope, p. 66</p>
4.16		Approaches to stakeholder engagement.	Paragraph 1.3 In discussion with our stakeholders, pp. 22–24
4.17		Key topics and concerns that have been raised through stakeholder engagement, and how the organization has responded	Paragraph 1.3 In discussion with our stakeholders, pp. 22–24

Environmental Performance Indicators			
		Management approach	<p>Care for the environment is an integral part of KPN's business operations. Our environmental policy focuses on making our products and services sustainable (in line with the people-planet-profit principle). The environmental policy is set out in our environmental statement. KPN aspires to limit the environmental impact of its products and services, from the production phase to the waste phase. The responsible use of energy is at the forefront of this.</p> <p>The ICT industry is one of the world's major energy consumers. Our sector is directly responsible for two per cent of global CO₂ emissions. The ICT industry sells millions of mobile phones and IT equipment that put a burden on scarce natural resources. We also know that the use of ICT resources is more likely to expand than decline in the future. KPN sees it as its responsibility as market leader to promote energy savings and innovation in the chain. We are convinced that the ICT industry can use less energy. But the greatest contribution ICT is making to an energy-efficient world comes from the IT solutions in other sectors. KPN believes in green ICT and makes sure it happens by maximizing energy efficiency while reducing its CO₂ emissions. On the other hand we can enable others to use energy more efficiently and cut down on their emissions by offering them our products and services. This is the case, for example, when implementing software that improves logistic processes and for our products and services that cut down on car mileage in the area of the New Way of Working.</p> <p>KPN aims to be climate neutral by 2020. This means that on balance we will cease to emit any CO₂. We wish to achieve this through a number of steps, such as saving on energy, increasing the energy efficiency of our network and data centers and using green energy. CO₂ compensation is the last step.</p> <p>Chapter 4 Energy-efficient, pp. 44–49</p> <p>This management approach supports Principles 7, 8 and 9 of the UN Global Compact.</p>
Materials			
EN1	Core	Total amount of materials used by weight and volume	Appendix 2 Core environmental data, Appendices, p. 9 This indicator supports Principle 8 of the UN Global Compact.

Labor Practices and Decent Work			
		Management approach	<p>We want our employees to take pride in KPN and feel involved in the company. We want the best and brightest to choose KPN because KPN offers them the best chances of development. KPN believes that we can reinforce this pride and involvement through corporate social responsibility. A key building block supporting our policy of motivating and keeping our people involved in KPN consists of giving them the space to work as a volunteer on the social projects run by the KPN Mooiste Contact Fonds. We make efforts to multiply our employees' range of abilities, for example by training. We promote diversity in our workforce.</p> <p>Diversity KPN wants its workforce to be a reflection of society. We also want more groups in society to perceive us as an attractive employer. This will widen our ability to recruit the cream of talent. The trend towards an aging population emphasizes the importance of the company being able to attract the widest range of people. Greater diversity means attracting – and retaining – more women, more people from a variety of cultural backgrounds, people with a physical impairment and older people.</p> <p>Deployability Its purpose is to ensure our employees' skills remain up to standard and to improve them, thus enhancing their deployability, whether or not within KPN Nederland. This fits in with our belief that the contributions made by our employees come from their skills. Nowadays there is less value to having a fixed job lasting the one's entire working life. Attention has shifted to the skills and deployability of employees as affording them maximum security in terms of ensuring their position on the labor market, both now and in the future.</p> <p>Occupational Health and Safety KPN cares passionately about guaranteeing safe working conditions. The KPN Security department makes and carries out the policy for this. The HR department coordinates and facilitates the health and vitality policy.</p>

GRI code	Core or Additional indicator	Indicator	Details/reference
			<p>The divisional Human Resources (HR) departments run these arrangements and programs. All major operations have their own HR department which advises line management and corporate departments on HR issues. Line management bears operational responsibility for ensuring that we really are a good employer. At KPN group level Corporate HR is responsible for initiating projects and new policy initiatives relevant to our segments. Regular joint discussions are held with HR staff members to review policy development in order to foster consistency in HR policy at KPN.</p> <p>Paragraph 6.1 Our people, pp. 61–64</p> <p>This management approach supports Principles 1, 3 and 6 of the UN Global Compact.</p>

Human Rights			
		Management approach	<p>KPN respects and subscribes to the fundamental human rights laid down in international agreements such as the UN Declaration of Human Rights. KPN undertakes to honor the human rights of its employees and customers. Some of the business we conduct, as is the case with Getronics International, is performed in countries where guarantees of compliance with human rights requirements are less watertight than is the case for our home markets in Europe. It is specifically the case that KPN's corporate code applies to these operations. They are obliged to adhere to the law and the ethical values concerning the approach to be taken to employees and staff.</p> <p>KPN employees can put any queries they may have about the content and observance of the company code to the Security & Integrity Helpdesk. The helpdesk is open 24 hours a day, 7 days a week. A Compliance Officer who can help employees with questions has been appointed for every supporting code. Employees can report cases of undesirable conduct to the help desk. The category includes sexual harassment and intimidation, aggressive behavior, discrimination and bullying. Reports may be made anonymously if desired. Employees may also report cases of working relationships that have gone badly wrong. If needed and desired, they are referred to a confidential adviser. The type of measure is determined on a case by case basis. The company code and the supporting codes lay down possible measures that may consist of a warning, a reprimand, suspension, removal from function or dismissal. In principle, cases of fraud, theft and serious or repeated violation of the rules will result in dismissal.</p> <p>We expect our suppliers also to respect human rights. Our Suppliers Company Code sets down our social and environmental requirements. Human rights are of course part of the social rights on which we assess suppliers.</p> <p>Paragraph 1.7 Compliance and integrity, pp. 28–29 Chapter 6 Our people and suppliers, Objectives and results, p. 60 Paragraph 6.2 Our suppliers, pp. 64–65 http://www.kpn.com/corporate/aboutkpn/Company-profile/Procurement.htm</p> <p>This management approach supports Principles 1 and 2 of the UN Global Compact.</p>
Investment and procurement practices			
HR1	Core	Percentage and total number of significant investment agreements and contracts that include human rights clauses or that have undergone human rights screening	<p>Chapter 6 Our people and suppliers, Objectives and results, p. 60 Paragraph 6.2 Our suppliers, pp. 64–65 http://www.kpn.com/corporate/aboutkpn/Company-profile/Procurement.htm</p> <p>This indicator supports Principles 1, 2, 3, 4, 5 and 6 of the UN Global Compact.</p>
HR2	Core	Percentage of significant suppliers, contractors and other business partners that have undergone screening on human rights and actions taken	<p>Chapter 6 Our people and suppliers, Objectives and results, p. 60 Paragraph 6.2 Our suppliers, pp. 64–65 http://www.kpn.com/corporate/aboutkpn/Company-profile/Procurement.htm</p> <p>This indicator supports Principles 1, 2, 3, 4, 5 and 6 of the UN Global Compact.</p>
HR3	Core	Total number of hours of training for employees regarding, and percentage of employees trained in, policy relating to aspects of human rights that are relevant to the company's activities.	<p>KPN respects and subscribes to the fundamental human rights laid down in international agreements such as the UN Declaration of Human Rights. KPN undertakes to honor the human rights of its employees and customers. Some of the business we conduct, as is the case with Getronics International, is performed in countries where guarantees of compliance with human rights requirements are less watertight than is the case for our home markets in Europe. Non-discrimination			
HR4	Core	Total number of incidents of discrimination and corrective actions taken	<p>KPN employees can put any queries they may have about the content and observance of the company code to the Security & Integrity Helpdesk. Employees can report cases of undesirable conduct to the help desk. The category includes sexual harassment and intimidation, aggressive behavior, discrimination and bullying. Reports may be made anonymously if desired. Employees may also report cases of working relationships that have gone badly wrong. If needed and desired, they are referred to a confidential adviser.</p> <p>In 2011, three cases of discrimination were reported to KPN. Disciplinary measures are taken against employees who do not comply with the company codes and sub codes. The type of measure is determined on a case by case basis. Community Performance Indicators			
		Management approach	<p>Company Code and Whistleblower Policy</p> <p>KPN's company code is designed to ensure that KPN acts in an ethically responsible fashion and according to law. The code is based on our core values: personal, trustworthy and simple. These core values form the basis of our day-to-day operations and apply to all our business processes and external contacts. The Supplier Company Code translates our CSR policy down the supply chain.</p> <p>In order to facilitate application of the company code in our employees' day-to-day operations we have formulated supporting codes covering four clusters which provide concrete rules of conduct for specific areas:</p> <ol style="list-style-type: none"> 1) integrity 2) competition 3) insider trading 4) safety and information security. <p>KPN employees can put any queries they may have about the content and observance of the company code to the Security & Integrity Helpdesk. The helpdesk is open 24 hours a day, 7 days a week. A Compliance Officer who can help employees with questions has been appointed for every supporting code. Employees can report cases of undesirable conduct to the help desk. The category includes sexual harassment and intimidation, aggressive behavior, discrimination and bullying. Reports may be made anonymously if desired. Employees may also report cases of working relationships that have gone badly wrong. If needed and desired, they are referred to a confidential adviser. The type of measure is determined on a case by case basis. The company code and the supporting codes lay down possible measures that may consist of a warning, a reprimand, suspension, removal from function or dismissal. In principle, cases of fraud, theft and serious or repeated violation of the rules will result in dismissal.</p> <p>The Security & Integrity Helpdesk collects and records reports and data in the area of security, safety (including industrial accidents) and integrity. It is important for KPN that this information is channeled to a central point. Analyses are made of the reports that have been recorded and these are used to take measures to limit harm and prevent recurrence.</p> <p>Supplementing the codes of conduct KPN has a whistleblower procedure, an integrity review protocol and a policy on fraud. The whistleblower procedure permits employees to report cases of fraud, suspicion of fraud, non-compliance with the rules or lapses in ethical conduct. These reports may be made anonymously and may be made in writing (by letter or by or on the internet) or via the Integrity Line, from inside or outside the Netherlands and in various languages.</p> <p>Supplier Company Code</p> <p>KPN attempts to promote sustainability down the supply chain by purchasing from suppliers that comply with our labor and environmental criteria. Our Supplier Company Code (SCC; available on http://www.kpn.com/corporate/aboutkpn/Company-profile/Procurement.htm) sets down our social and environmental requirements. This code is based on the values set out in the United Nations Charter and on the core conventions of the International Labor Organization (ILO). We expect our suppliers in turn to request their own suppliers to comply with the code. This is set down in the code and its objective is to push further down the supply chain.</p> <p>For more information about suppliers and CRS please visit http://www.kpn.com/corporate/aboutkpn/Company-profile/Procurement.htm</p>

Community Performance Indicators			
			<p>Compliance with the Telecommunications Act</p> <p>The Telecommunications Act and the relevant secondary legislation incorporate rules that apply to KPN. KPN attaches great importance to proper compliance with this legal and regulatory framework. A key element within our compliance activities is the Compliance Risk Assessment (CRA), a method for defining and managing the risks of a breach of the Telecommunications Act. This audit structure uses the same method that we use for our financial audit. KPN's Group Compliance Officer is responsible for supervising the CRA, for promoting and measuring compliance awareness and for taking any measures designed to ensure compliance with the Telecommunications Act.</p> <p>The Dutch Independent Post and Telecommunications Authority, OPTA, supervises compliance with the Telecommunications Act. OPTA may decide to impose fines or other penalties where it has observed a violation, but the legality of decisions taken by OPTA is always subject to judicial review.</p> <p>The Compliance Charter that we drew up in 2008 together with OPTA forms the guideline for the way in which we promote awareness of this Act within the company. KPN reports regularly to OPTA about the operation of its compliance program on the basis of clearly measurable performance indicators. In addition, agreements have been reached with OPTA about the manner in which KPN is to report any violations of the Act that KPN itself has observed and about the approach to be taken in case of any difference of interpretation.</p> <p>Public policy</p> <p>Two KPN departments, the Public Affairs and the Regulatory & European Affairs Departments, are responsible for formulating positions on public issues and for coordinating KPN's lobbying. These departments are part of the Corporate Legal & Regulatory Department that itself is part of the Corporate Center and reports to the Board of Management. Product responsibility			
		Management approach	<p>Telephones, transmission masts and health</p> <p>KPN is a service provider. The products linked to our services do not pose any significant health or safety risks and comply with all safety rules set by law. KPN is aware that issues exist with regard to mobile telecommunication masts and health risks. KPN wants mobile communication to be useful and enjoyable as well as safe and reliable. Consequently, KPN complies strictly with all the national and international regulations, as laid down in the Dutch Telecommunications Act (2003). KPN observes a wider safety margin than required by law. Exposure to radio waves emitted by our base stations is 200 times lower than the national and international thresholds. A survey carried out by the Dutch Radio Communications Agency shows that all the field strengths measured in the vicinity of GSM and UMTS transmission masts are well below the prevailing limits. It is possible for people to live their whole life close to base stations without any problem. More information on this topic and the survey can be found on the KPN web site (http://www.kpn.com/corporate/aboutkpn/corporate-responsibility/CSR-at-KPN/social-themes/telephones-masts-health.htm)</p> <p>Products, environment and safety</p> <p>KPN ensures that all products it puts on the market comply with the legal and regulatory framework applicable to the area of the environment and safety. Two EU Directives covering recycling and dangerous substances (“WEEE” and “RoHS”) are of especial significance in this respect. As a member of the Stichting ICT-Milieu we ensure that our customers can hand in their discarded products at municipal collection points for processing and recycling. Stichting ICT-Milieu runs the IT collection system that was set up after the manufacturers themselves took on responsibility for collecting and processing discarded electrical and electronic equipment. The RoHS Directive lists the components that may be used in electrical and electronic equipment. KPN has incorporated these requirements in its contracts with the suppliers of the products we sell under our own brand. The product manuals and symbols featured on the consumer packaging advise consumers how these products can be used safely and in an environmentally friendly way. Getronics itself collects used IT equipment. A decision is made at the collection center as to which equipment is fit for reuse and which equipment can be dismantled with a view to further processing. Many of the materials and components can be reused.</p>

			<p>Privacy</p> <p>The nature of our service means that KPN Nederland has access to customers' personal data and information about voice and data traffic. KPN adheres to the applicable legislation and regulations when processing this customer data. Legal obligations also apply to our employee data. KPN has provided the Dutch Data Protection Authority with precise details of the kind of customer data that is used, to what end, and to which persons or bodies this information is provided. As well as the Personal Data Protection Act KPN Nederland, as a telecommunications service provider, complies with the privacy provisions of the Telecommunications Act. This mainly concerns the processing of personal data, traffic data and complementary security requirements but also its approach to services such as caller ID. KPN Nederland also has its own rules alongside and sometimes in addition to the statutory rules. Customers can, for example, choose to have an unlisted number: both ex-directory and not disclosed by the 0900/8008 directory inquiries service (also termed a confidential number). They can also prevent use of their personal details for direct marketing, telemarketing or from being passed on to third parties. Customers with privacy questions can call KPN's customer service department. KPN's Privacy Statement, available in Dutch on KPN's web site (http://www.kpn.com/privacy.htm), provides details of KPN's approach to working with customer data in the Netherlands. The privacy statement applies to all customers who purchase telephony, Internet or TV services from KPN or from one of its subsidiaries in the Netherlands and for all users of KPN web sites.</p> <p>Paragraph 1.6 Security and privacy, pp. 26–28 Paragraph 1.7 Compliance and integrity, pp. 28–29 Paragraph 4.5 Challenges and dilemmas, p. 49</p> <p>This management approach supports Principle 8 of the UN Global Compact.</p>

Customer privacy			
PR8	Additional	Total number of substantiated grievances regarding breaches of customer privacy and losses of customer data	In 2011, 425 reports of privacy-related issues were received. KPN Nederland received 75 complaints about privacy. KPN's integrity experts review incident reports prompted by grievances, with the legal and regulatory framework being the first check made. The next step checks for violations of the KPN Company Code and of the relevant Supporting Codes. E-Plus Gruppe received 346 complaints about privacy. This rather high number is due to the sensitivity of privacy issues in Germany since Deutsche Telekom was in the news in 2009 regarding a privacy issue. Customers of E-Plus Gruppe can report grievances to a 'Customer Care Hotline'. The grievances are passed on to the company executive responsible for data protection. Four reports were received by KPN Group Belgium. Paragraph 1.6 Security and privacy, pp. 26–28 This indicator supports Principle 1 of the UN Global Compact.
