董事长致辞 | Chairman's Statement

People's livelihood is an eternal concern, and so is our social responsibility. 2011, the year which has just passed, marked a successful launch of the national 12th Five-year Plan and witnessed the most demanding tests for the global financial industry. In the face of these challenges, we have ensured the successful fulfillment of the Bank's three-year plan with down-to-earth efforts, kicked off our strategic transformation in spite of the hard times, nourished a ground which will courageously shoulder its responsibility, and displayed a service-oriented social image by translating our gratitude into benefit to society.

In 2011, facing a complicated economic situation, we shouldered the historical responsibility of serving the real economy and creating outstanding value. In keeping with the State's policy direction, we improved corporate governance and promoted operational transformation, taking new strides in our pursuit of a sustainable development marked by a balance between business development and capital restraint as well as between risks and returns. We gave priority to supporting key national projects being newly or continuing to be implemented, steadily increased our aid to enterprises of all sizes, and actively promoted the development of a new socialist countryside and regional economy, thus playing our due role as a major bank in supporting the sound development of the real economy. Furthermore, we took flexible and pragmatic steps to deal with complicated changes in the business environment. With a view to improving our financial service and creating value for our customers, we made steady progress in financial innovation and continued to maintain our position as a listed bank ranking first in the world in profit, market capitalization, customer deposits, and brand value.

In 2011, during our battle against climate change, we devised an approach to development which supports green economy and advocates low-carbon finance. We guided the optimized allocation of credit resources by means of scientific management, imposed a strict control on the access to credit for

industries with "high energy consumption, high pollution and overcapacity", and assisted in the green and low-carbon upgrading of the industrial structure by the use of credit as a lever, which gave vigorous support to the change of China's mode of economic development. Stepping up our efforts to extend and expand the green service channels, we achieved a favorable combination of the physical and the electronic channels, with the proportion of E-banking representing over 70% of all our business. Apart from offering our customers an experience of efficient service, this has effectively forestalled financial risks. Actively responding to the State's call for energy conservation and emission reduction, we sought to enhance environmental awareness among our employees and strengthened the routine management designed to save energy and reduce consumption, in order to create an environment-friendly corporate atmosphere of a "green bank".

In 2011, in pursuit of fulfilling our corporate citizen responsibility, we carried on the corporate culture of caring for the national economy and people's livelihood and giving back to society. Focusing on "public welfare" and "universal livelihood", we devoted ourselves to the development of social welfare undertakings in the areas of disaster and poverty relief, culture and education, community healthcare, environmental protection and academic research. We initiated an innovative approach to poverty relief synchronized with social progress for the improvement of economically backward regions with the power of philanthropy. We took an active part in the earthquake disaster relief, offering love and care to the people in need. We inspired children who had dropped out of school because of poverty to pursue a better life through learning, upgrading educational support to life guidance. We increased our investment in communities and deepened our pursuit of excellence in serving the people, and thereby enrich our customer experience through re-engineering our service process and reshaping our service delivery. Seeing employees as the source of motivation for the Bank's sustainable development,

we tried to create a harmonious and dynamic environment for personnel training in order to give our employees a platform for a full display of their talent and enhance their value along with that of the Bank.

In 2011, in our endeavor to build a global financial brand, we focused on a service mode that satisfied the needs of customers by tracking their development. Following the process of China's economic globalization, we encouraged quality enterprises to join global competition, steadily broadened the range of our overseas offices, and actively promoted RMB cross-border trade in order to improve our global service. We have expanded our overseas business network to 33 countries and regions and increased the number of our overseas offices to 239. As a result, an integrated global service network covering Asia, Africa, Europe, America and Australia has taken shape. While effectively expanding the service channels for Sino-foreign trade, we respected and understood the different cultures of the host countries and successfully built the image of a responsible large bank rooted in the local area, caring for people's livelihood and repaying the community.

Sustainable development should be based on a sense of responsibility, and enduring success should be founded on caring for people's livelihood. To actively fulfill our social responsibility and maximize our economic, environmental and social value have been mutually consistent with ICBC's corporate culture, mutually dependent on our transformation, closely following our reform and innovation, and closely accompany our emphasis on the principle of repaying society. Having braved the global financial crisis, we are even more convinced that the sense of responsibility has the power to change the world and usher in a bright future.

Time and tide invite us to set sail and cleave the waves, and the long and arduous journey that lies ahead requires us to advance at a higher speed. In 2012, ICBC will initiate the new task of building

itself into one of the world's most profitable, most outstanding and most respected first-rate financial enterprise. The financial market is complicated and unpredictable and our transformation will by no means be easy and smooth. Nevertheless, the public's support and the unity of our staff have always encouraged us to forge ahead in a grateful frame of mind, marching forward in a win-win manner. A new starting point generates new hope, and a new journey carries new dreams. Opportunities will be accompanied by challenges, and glory will coexist with pains. Now that the sail has been hoisted, let us join hands with people from all walks of life to make a greater contribution to the sustainable development of society, economy and environment with a broader horizon, increasing confidence, greater enthusiasm, and steadier steps.

行长致辞 | President's Statement

In 2011, the world economy was made fragile by repeated heavy blows, the global market was disrupted by the European debt crisis, and countries in West Asia and North Africa suffered continual unrest. Faced with the most complicated external environment since the beginning of the new century, ICBC has conscientiously complied with the CPC Central Committee's and the State Council's policies and financial regulatory requirements. We have proactively forestalled and mitigated risks, deepened our sense of responsibility, accelerated reform and innovation and furthered operational transformation. Seizing opportunities amid the crisis, we have maintained a sound and steady development and taken new steps in our pursuit of sustainable development.

Creating value as an outstanding company and rewarding our shareholders with a steady growth

We have always deemed it a primary way of fulfilling our social responsibility to create value and reward our shareholders. In 2011, the value of the Bank's assets reached RMB15,476.9 billion, marking an increase of 15.0% over the previous year; the Bank made an after-tax profit of RMB208.4 billion, up 25.6%; the average return on assets and weighted return on equity reached 1.44% and 23.44% respectively, up 0.12 percentage points and 0.65 percentage points from the previous year; the Bank paid the State RMB91.954 billion in taxes, up 30.1%; our social contribution was RMB1.76 per share, up RMB0.42 year on year. Having passed through the crucible of the global financial crisis, we now rank top in the world in terms of profit, market capitalization, deposits and brand value. We have become one of the world's leading banks, with a steady growth in return to our investors.

Actively adjusting the credit structure and giving full support to the real economy

In compliance with the State's macroeconomic policy, we have persisted in unifying the business

principles of a commercial bank whilst supporting the development of the real economy. The Bank has maintained a reasonable control over credit extension and a balanced growth in the total loan amount. In 2011, RMB new loans granted by our domestic branches totaled RMB811.7 billion, up 13.1% over last year. Meanwhile, we focused on adjusting the credit structure. By improving our service, we contributed to the change in the development mode for the real economy and the adjustment of the economic structure. We stepped up our credit support for small and micro enterprises. The balance of loans to such enterprises during the year was RMB959.3 billion, up 46.1% from the previous year. To promote the coordinated development of the regional economy, we increased loans to the central region, the western region and the northeastern region by 13.94%, 14.81% and 13.29% respectively to fully exert comprehensive advantage of the Bank's financial services to the largest extent. To support the construction of government-subsidized housing, we increased the loans for such housing by 67.44%, despite the decline in our total real estate loans. We gave a stronger financial support to agriculture, rural areas and farmers, deepened the reform of the Bank's county sub-branches, and increased our credit support for the production, processing and circulation of farm produces. The Bank will vigorously promote the sound development of the real economy and bring about a sound cycle for the development of both the real economy and the monetary economy.

Developing our public welfare undertakings and keeping our promise about service quality

Keeping in mind the Bank's mission of "serving customers and contributing to society", we have taken an active part in public welfare undertakings and enhanced our awareness of service innovation. The Bank has increased its public welfare investment and introduced new forms of campaigns in terms of

disaster and poverty relief, culture and education, community service, environmental protection, and academic research. In 2011, the Group invested a total of RMB39.2 million in public welfare undertakings. It launched ICBC's "Safety of Mothers and Babies 120" campaign, built bridges over streams in the Qinshan and Bashan mountainous areas, staged a Bank Museum exhibition of refined works and held a competition for innovative designs of campus products. These concrete actions have helped the company to establish a favorable corporate citizen image. With a view to offering the best service among all Chinese banks, we have held a succession of service-enhancing activities and tested our capability by offering financial services to the International Horticultural Exposition, the Universiade, the Shanghai Art Fair and the 9th National Traditional Games of Ethnic Minorities. Thus we have effectively enhanced our service capacity and raised the standard of service through systematic improvements in terms of channels, processes, division of business, service management and brand development. Seventeen outlets of the Bank were listed among the "100 Model Entities with Civilized and Normative Service in 2011" by the China Banking Association, ranking top among its peers.

Caring for the healthy development of employees and seeking harmony between company and employees

We have adhered to the value concept of "people Oriented" and actively promoted the harmonious development of both the company and its employees. In 2011, focusing on enhancing its business management and international competitiveness, the Bank devoted itself to the integration of employees from different regions and of different ethnic groups. In its domestic branches, female staff represented 48.3% of all the employees and members of ethnic groups represented 5.2%; in its overseas branches, local people accounted for more than 90% of the

total. To promote personnel training and resource development across the Bank, we launched a project for training international talent, enhanced the quality of employees, and broadened the courses of career development; we offered 38,000 training courses to 2.23 million person-times. We made active efforts to protect the legal rights and interests of all categories of employees, strengthened a democratic system and cared for the employees' physical and mental health, in order to make talent development an important component and pillar of the Bank's core competitiveness.

In 2012, faced with a complicated and challenging economic situation at home and abroad, we will continue to accelerate the Bank's strategic transformation and business innovation under the guidance of a scientific outlook on development. We will incorporate the fulfillment of our social responsibility into business development in order to give a good start to the implementation of a new three-year development plan, to provide better financial services for the sound development of the real economy and to create more value for stakeholders.

- Vetoed proposal to provide loans to an excess capacity project

A chemical fertilizer factory based in Shandong Province uses methanol as the major raw material to produce polyformaldehyde, it has an annual production of 40,000 tons and a fixed asset investment of RMB770 million. After the examination, the Bank is of the view that the methanol capacity in the domestic market is seriously excessive, which has forced methanol producers to extend their business to polyformaldehyde and other downstream businesses; besides, the growth rate of the planned polyformaldehyde capacity in China is growing faster than the growth rate of the market demand; and as the planned projects successively come into production, the polyformaldehyde market will suffer from an excess capacity. Hence, the Bank has vetoed the loan application for such project.

- Vetoed proposal to provide loans to a high pollution project

A petrochemical company based in Hainan Province sought a loan from the Bank to fund its pure terephthalic acid (PTA) project with an annual production of 2.10 million tons. 新年伊始，受北方冷空气扩散南下影响，湖南、贵州、江西出现大范围冰冻、雨雪天气。本行迅速行动，采取多项措施为当地抗凝冻灾害提供金融服务保障，得到了广大客户和社会公众的认可与好评。

及时应对，保障运营

本行及时制定了凝冻期间业务运营保障服务应急预案，对人员安排、资金调度、票据交换、应急保障等各项工作进行周密安排，确保了正常的办公和营业秩序，做到网点“保开门、保营业、保安全”。例如湖南怀化当地高速公路因冰冻实行交通管制，本行及时安排绕行线路，保证了距县城 80 多公里的辰州矿业支行开门营业。

特事特办，快速审批

在受灾严重的贵州省，连续的雨雪凝冻天气使全省电网 118 条线路遭受到不同程度的破坏，低温天气也造成电网用电负荷急剧攀升。为确保贵州生产生活用电和“西电东送”正常状态，当地电网公司启动了固定融冰装置和移动式直流融冰装置等多种方式进行融冰及线路抢修，急需抗灾资金。得知这一情况后，本行立即启动贷款绿色通道，在接到贷款申请当天即完成了贷款审批及发放全部流程，在第一时间向客户发放了贷款，为当地正常的生产生活秩序提供了保障。

温馨服务，温暖客户

本行贵州分行网点附近路面及人行道因强凝冻造成结冰，当地员工及时主动的进行扫雪除冰，并在网点张贴了温馨提示，台阶上铺设了防滑垫，确保客户来银行办理业务安全。为了减少客户来网点办理业务的时间，该分行根据业务忙闲情况合理安排营业窗口，抽调二线人员充实到一线网点担当大堂经理，协助网点做好对客户的接待疏导和宣传解释工作，避免客户等待时间过长；同时，还通过向客户发短信、张贴提示等渠道，建议客户使用网上银行、电话银行、手机银行等办理银行业务，缴纳电话、手机、水、电、煤气、数字电视等各类日常生活费用，减少出行。

在江西鹰潭，部分商户因为恶劣天气出行不便，本行想客户之所想，组织专家团队为客户设计抗严寒金融服务方案，主动上门提供零辅币兑换、安装网上银行、送达账户对账单等金融服务。针对车站交通滞留人员较多的情况，本行主动加强车站周边网点及自助银行 ATM 机的应急保障，提高加钞频率，确保了旅客的取现需求。

• Case :

In early 2011, when cold air in the North spread to the South, Hunan, Guizhou and Jiangxi suffered from freezing, rain and snow. The Bank took many actions immediately to provide financial service guaranty for local anti-freezing disaster projects, which was widely recognized and praised by customers and the public.

Timely responding to guarantee operation

The Bank prepared the emergency plan on services guaranteeing operation during the anti-freezing period, making thorough arrangement for staffing, fund transfer, bill exchange and emergency guaranty, which secured normal office and operation order and guaranteed that outlets "opened for business on a safe basis". For example, an alternative road was arranged when the expressway was subject to traffic control due to freezing in Hunan Huaihua county, guaranteeing Chenzhou Kuangye Sub-branch, more than 80 kilometers away from the county, was in operation.

Handling special matters differently for rapid approval

In severely hit Guizhou Province, continuous rain, snow and freezing weather damaged 118 province-wide electrical power lines to different degrees, and the low temperature also sharply increased electrical loads of the grid. To ensure power utilization for productive and living purposes in the province and normal "West-East Electricity Transmission", local grid company resorted to many methods including fixed thawing device and mobile direct current thawing device for deicing and emergency repairing of electrical power lines, which urgently needed anti-disaster funds. The Bank immediately opened the green loan channel, completed the entire loan approval and extension process on the day when it received the loan application and lent to the customer without delay, which guaranteed local normal production and living order.

Providing warm services to customers

The road and sidewalk close to the outlet of Guizhou Branch were frozen. The staff took initiatives to clean snow and ice on a timely basis, put up warm reminders in the outlet and laid anti-slipping mats on the steps, guaranteeing that customers were safe and sound. To shorten business handling time of customers, the Branch flexibly arranged windows according to business situation, and transferred second-line staff to be lobby managers in front-line outlets, assisting in receiving and distributing customers and giving them explanations and thus avoiding them waiting too long. Meanwhile, the Bank recommended customers use internet banking, telephone banking and mobile banking to transact businesses and pay daily living expenses for telephone, mobile phone, water, electricity, gas and digital television via such channels as sending short messages to customers and pasting notices.

In Yingtan of Jiangxi, it was inconvenient for some merchants to go out due to the bad weather. The Bank was so considerate that it organized expert teams to design anti-severe cold financial service schemes and provided onsite financial services like change of small notes, installment of internet banking and serving of account statements. In response to a big number of stranded persons at stations, the Bank actively strengthened emergency guaranty of outlets and ATMs close to stations and increased banknote filling frequency to serve customers' cash withdrawal needs.

Independent Limited Assurance Statement on Corporate Social Responsibility

To the Board of Directors of Industrial and Commercial Bank of China Limited

Scope of Our Engagement

The 2011 Corporate Social Responsibility Report (the "Report") of Industrial and Commercial Bank of China Limited (the "Bank") has been prepared by management of the Bank (the "Management"). The Management is responsible for the collection and presentation of information within the Report and for maintaining adequate records and internal controls that are designed to support the corporate social responsibility reporting process.

Our responsibility was to carry out limited assurance procedures in relation to key sustainability indicators included in the Report for the year ended 31 December 2011 in accordance with the Management's instructions. We also evaluated the Report in terms of the principles of materiality and inclusivity set out in Global Reporting Initiative G3 Sustainability Reporting Guidelines.

Our work was limited to these stated above and our report is made solely to you, as a body, and for no other purpose. We do not therefore accept or assume any responsibility for any other purpose or to any other person or organization. Any reliance any such third party may place on the Report is entirely at its own risk.

Our review has been planned and performed in accordance with International Standard on Assurance Engagements ("ISAE") 3000: Assurance Engagements Other Than Audits or Reviews of Historical Financial Information issued by the International Federation of Accountants.

We have designed our procedures for us to evaluate the Report in terms of the principles of materiality and inclusivity set out in Global Reporting Initiative G3 Sustainability Reporting Guidelines.

Materiality

- Has the Bank provided a balanced representation of material issues concerning its sustainability performance?

Inclusivity

- Has the Bank identified stakeholders?
- Has the Bank managed its stakeholder participation process?
- Has the Bank responded to stakeholder concerns?

Work Performed

In order to form our conclusions, we carried out the following procedures.

In accordance with the Management's instructions, we selected Head Office, four branches and two subsidiaries to perform limited assurance procedures over key sustainability indicators in the Report for the year ended 31 December 2011. The sites selected included:

- Head Office
- Shanghai branch
- Shenzhen branch
- Shanxi branch
- Ningxia branch
- ICBC (Asia)
- ICBC (Macau)

We did not perform limited assurance procedures on other sites.

The limited assurance procedures we carried out were limited to:

- Interviewing a selection of the Bank's management responsible for sustainable development issues to understand the current status of sustainable development activities and the progress made during the reporting period.
- Sample testing key sustainability indicators in the sites selected.
- Cross checking key sustainability indicators to the annual financial report of the Bank, where applicable.
- Conducting a high-level review of the Report to ensure all material sustainability issues have been covered in the Report.
- Reviewing selected documents relating to the material sustainability issues.

Limitations of Our Review Scope

Our scope of work did not include:

- Assessing the accuracy or fairness of information relating to areas other than the key sustainability indicators of the sites selected.
- Reviewing the forward-looking statements made by the Management.
- Reviewing and consequently providing assurance on historical data.

Level of Assurance

Our evidence gathering procedures have been designed to obtain a limited level of assurance (as set out in ISAE 3000) on which to base our conclusions. The procedures conducted do not provide all the evidence that would be required in a reasonable assurance engagement and, accordingly, we do not express a reasonable assurance opinion or an audit opinion. While we considered the effectiveness of the Management's internal controls when determining the nature and extent of our procedures, our review was not designed to provide assurance on internal controls.

Our Conclusions

Subject to our limitations of scope noted above and on the basis of our procedures for this limited assurance engagement, we provided the following conclusion:

- Nothing has come to our attention that causes us to believe that there are any errors that would materially affect the key sustainability indicators reported by the Management.
- Based on our work performed, nothing has come to our attention that causes us to believe that any material sustainability issues were not aligned with the materiality and inclusivity set out in Global Reporting Initiative G3 Sustainability Reporting Guidelines.
