	Outcomes

PRINCIPLE 7		BUSINESS SHOULD SUPPORT A PRECAUTIONARY APPROACH TO ENVIRONMENTAL CHALLENGES	
Actions	Actions taken		
	<p>Commitment: We strongly believe that it is our responsibility to become a carbon neutral company.</p> <p>System: We follow the GHG protocol corporate standard laid down by the Carbon Trust in UK to monitor and reduce our Carbon Footprint. We have invested in a community reforestation project near the Kaneliya forest reserve.</p> <p>Activities: We follow the protocol guide lines to monitor and reduce our Carbon Footprint. We have invested and developed Carbon Dioxide sequestration through community reforestation and protection of biodiversity. We have developed a Carbon neutral tea product to ensure our commitment towards the protection of environment.</p>		
Outcomes	Measurement of (expected) outcomes and value added for our company		
	<p>Become a leader in green production methods in the tea industry and thereby increase recognition and through that sales.</p>		

PRINCIPLE 8**BUSINESS SHOULD UNDERTAKE INITIATIVES TO PROMOTE GREATER ENVIRONMENTAL RESPONSIBILITY****Actions taken**

Commitment: Our company is committed to foster and promote a clean environment and to implement appropriate measure within production and use environmental indicators of the GRI to report.

System: We use ISO 14001 and have installed a system to monitor general environmental performance data for waste, emission, energy and water use. We have worked actively to reduce power consumption & water wastage in our facilities. We are trying to reduce the amount of waste paper generated while recycling the present generated waste paper.

Activities: Being a tea exporting company our damage to the environment is much lesser but we have analyzed the impact caused to the environment through our activities. All significant aspects of the damage to the environment have been identified and an annual objectives and targets have been set aside. An Environment Management Programme was also prepared by stating the procedure of achieving the set objectives. Following are the aspects considered in our environmental programme.

01. Electricity

As for electricity, we have identified and reduced the number of bulbs used in the tea blending area and the stores by switching on to daylight using fibre glass sheets. Fluorescence tube lights were replaced with energy saving bulbs outside and inside the factory. On the recommendation of the outside Energy Audit team we conducted a load profile study and upgraded the existing automatic capacitor bank to reduce electricity cost in the factory.

EN.3 Direct Energy Consumption by Primary Energy Source

Type of Energy Sources used	2010	2011
Electricity	482,856 kWh	516,772 kWh
Diesel (For Generator use)	1,000 Litres annually	

02. Water supplied by the Government

Due to difficulty in identifying water leakages and for easy maintenance, we replaced the underground Government supplied water distributing lines to various sections within the premises with the Surface distributing system and have saved a significant amount of water. Screw type taps are also replaced with Push type for reducing water wastage.

Actions

03. Well Water

For ease of identifying water leakages and easy maintenance, we replaced the underground well water pipe line system with surface system. A water meter was fixed to monitor the consumption & thereby identifying the leakages through much higher constant readings especially in holidays. Water saving taps was introduced by replacing the screw type to push type. We have installed rain water collecting tanks in areas where this also could be utilized for gardening and vehicle washing instead of using well water.

		2010	2011
EN 8	Total water withdrawal by source 1.) Govt. supplied water 2.) Well water	8.32 M ³ / Day 16.05 M ³ / Day	7.77 M ³ / Day 13.38 M ³ / Day
EN 9	Water sources significantly affected by withdrawal of water	Ground water bodies	

We have calculated our organizational and product water footprint, in order to take account of the company's impact on precious water resource and to mitigate any negative impacts.

04. Solid Waste

All waste papers generated are segregated and sent to the in-house yard for baling and exported for recycling. Some of the items such as paper cores are sent to the supplier for reuse in tag and envelope winding. BOPP ploythene is also sent to a collector registered in Central Environmental Authority for the recycling purpose.

We conduct monthly internal training programmes for all existing and new factory employees on quality control, waste segregation, machinery maintenance and proper material handling & transportation. We prepare compost using dried leaves, used tea leaves etc and Compost bins are placed in areas where it is easy access to use for the flower pots, garden and tea field.

Measurement of (expected) outcomes and value added for our company

We were able to reduce electricity and water consumption than our expected limit. We hold Environment Management System steering committee meetings monthly. All completed and ongoing activities related to environment are reviewed and follow up activities are planned. Annual audits are conducted by an outside audit firm in addition to internal audits carried out by company audit team.

Outcomes

Description	Planned cut-down qty/units	Actual cut-down qty/units	Cut down rate (%)
Govt. supplied water (Units per month for all employees)	5	14.5	290
Electricity (kWh per 1,000 kgs of made tea)	7	1.31	18.71
Well water (1000 Ltrs per day)	19	2.66	14

PRINCIPLE 9		BUSINESS SHOULD ENCOURAGE THE DEVELOPMENT AND DIFFUSION OF ENVIRONMENTALLY FRIENDLY TECHNOLOGIES	
Actions	Actions taken		
	<p>Commitment: We are committed to conduct researches and develop cleaner production methods in the tea industry.</p> <p>System: In following our commitment to become a Carbon neutral company, we regularly work with clean technology inventors to develop new cleaner technologies. These are measured through our ISO 14001 system.</p> <p>Activities: Patenting and development of the following:</p> <ul style="list-style-type: none"> 01. A more efficient wind mill 02. An unit to reduce the disbursement of black carbon and heavier pollutants from combustion engines 		
Outcomes	Measurement of (expected) outcomes and value added for our company		
	Cost savings by implementing cleaner technology		

PRINCIPLE 10	BUSINESS SHOULD WORK AGAINST CORRUPTION IN ALL ITS FORMS, INCLUDING EXTORTION AND BRIBERY
---------------------	--

Actions	Actions taken
	<p>Commitment: We are committed towards working against corruption in all forms.</p> <p>System: We follow the company values and national laws & regulations which are incorporated in our policies.</p> <p>Activities:</p> <ol style="list-style-type: none"> 01. Deliver the company expectation of ‘integrity” to all new employees through induction sessions 02. Strict adherence to company finance and other policies. 03. Frequent communication of company values to our customers and suppliers. 04. Ensure the correct implementation of our policies and procedures by frequent 3rd party audits 05. Ensure further enhancement of transparency of transactions by Strict follow up of audit recommendations 06. Sponsorship of events including National Anti-Corruption Day organized by the UN
Outcomes	Measurement of (expected) outcomes and value added for our company
