PRINCIPLE 9 BUSINESS SHOULD ENCOURAGE THE DEVELOPMENT AND DIFFUSION OF ENVIRONMENTALLY FRIENDLY TECHNOLOGIES

Our Commitment or Policy

When appropriate and through our normal business practices, we encourage the development and diffusion of environmentally friendly technologies.

For a case study please see: <http://www.computing.co.uk/computing/analysis/2207256/case-study-baillie-gifford-3737463>

A brief description of our Processes or Systems

We continually monitor the power consumption within our main Datacentre sites. Where possible we reduce the power footprint by employing energy efficient hardware as well as utilising server virtualisation technologies. Server Virtualisation enables us to run multiple servers within a single hardware device, almost a third of our server inventory now uses this form factor.

Where possible we reutilise our IT hardware by cascading equipment to lower process intensive operations. Once this lifecycle has completed we dispose of all of our IT equipment via WEEE compliant vendors.

We are in the process of upgrading our desktop computer inventory to Microsoft Vista, on completion of this project we aim to adopt stringent policies for controlled shutdown and power management of these devices.

Actions implemented in the last year / planned for next year

We use efficient computing technology, encourage the use of email and the extranet rather than paper, have video conference facilities which can reduce travel by enabling business and client meetings without travel.

Measurable Results or Outcomes

This is difficult to quantify but we have reduced our power consumption over the last 12 months and are continuing to look for ways of reducing our environmental footprint via environmentally friendly technologies where they make financial and commercial sense.

PRINCIPLE 10 BUSINESS SHOULD WORK AGAINST CORRUPTION IN ALL ITS FORMS, INCLUDING EXTORTION AND BRIBERY

Our Commitment or Policy

Baillie Gifford is committed to the implementation of measures designed to prevent the possibility or occurrence of corruption in all of its forms. The firm conducts regular training on relevant fraud related matters and operates policies and procedures which are communicated to all staff as part of their induction programme and which are accessible to all on-line. Staff are expected to adhere to ethics policies which cover standards of behaviour in their conduct with other members of staff and with

clients and suppliers. In addition personal account dealing rules apply to all staff dealing. These rules require pre-clearance of personal trades and impose conditions on dealing designed to ensure that the interests of our clients are not compromised in any way."
