Dear Sir / Madam,

I am pleased to confirm that Emirates Integrated Telecommunications Company “du” supports the ten principles of the Global Compact in respect to human rights, labour rights, the protection of the environment and anti-corruption. Following our recent topping of S&P/Hawkamah environment, Social & Corporate Governance (ESG) Index 2011 MENA, we are aspiring to take our disclosure and reporting methodology to the next level by engaging with our stakeholders, reporting according to the GRI standards and obtaining an external assurance. This comes as a continuation to the company’s sustained efforts to enhancing corporate governance standards within the company and community.

With that said, and although we are doing our best to work according to a timed project plan, we’ve reached a conclusion that we will required an additional extension till April 30<sup>th</sup>, 2013 considering the design, production, GRI assessment and Third Party Assurance. With this extension, we will also be able to include data pertaining to the entire fiscal year. This means that we would like to keep the publish date as end of April on annual basis so we can release a full year results.

We seek your support and understanding.

Sincerely yours,

Luma Jasim Bourisly  
Vice President, Corporate Communications
