SECRETARY-GENERAL

COP
Communication On Progress

Dear Mr. Secretary-General

We hereby confirm that we want to continue our membership of the Global Compact.

RH ARKITEKTER AS hereby forward our efforts to implement the ten principles in 2012 and our goals for 2013.

General Actions:

- **Business in Denmark:**
- In Denmark we consider human rights, employee rights and anti-corruption incorporated into our business and in society in general. We have not found any cases that conflicts with the ten principles in 2012.
- All employees have been informed on the ten principles in a presentation at our monthly information meeting with all employees.
- We have on our homepage (WWW.RH-ARK.DK) presented our commitment to the Global compact and the ten principles.
- In general we refer to our membership of the Global Compact when signing contracts with other international companies, typically for building projects for the pharmaceutical and biotechnological industries.
- In 2013 we will continue to inform our employees and collaborators on the Global Compact and the ten principles.
- In 2013 we will continue to support having employees from different regions of the world, as we experience this as the best way to gain understanding, insight and respect between different cultures. Currently we have employees from China, New Zealand and The Baltic region.

Business International:

- All employees working internationally for RH ARKITEKTER have been informed on the ten principles in 2012.
- Internationally we primarily work in China. For 2013 we will introduce the ten principles for our business partners in China.

Med venlig hilsen / kind regards

Arne Hansen / Chief Executive Officer (CEO) / Partner / Danske ARK
