

Dear Mr. Johner,

As Global Compact member we are contacting you to inquire about the possibility for delaying our company's Communication on Progress due to issues relating to publishing date of our regular report, which also includes information needed for preparing Communication on Progress.

Vipnet is part of mobilkom austria group, owned by Telekom Austria, whose shares are listed on Vienna Stock Exchange.

As a listed company Telekom Austria is obligated to issue regular reports, including its Sustainability report, which is to be published by September.

Due to this fact Telekom Austria Group has a strict policy for communicating company-relevant information which could influence the price of shares. As Telekom Austria's Sustainability report will be published on September 2009, Vipnet is not at liberty to, prior to this date, communicate information which is an integral part of Global Compact Communication on Progress.

Therefore we kindly ask for a grace period of 180 days, which would enable us to comply by Telekom Austria Group regulations and Global Compact requirements.

We hope you would take into consideration our argument for delaying the deadline for our Communication on Progress. If you should have any further questions and/or need to discuss this issue further, we stand at your disposal.

Best regards,

Hrvoje Zemljic
