

Annual Corporate Social Responsibility Report 2012

Corporate Social Responsibility

Global Compact - Communicating on Progress

HIIMAN RIGHTS

A/S Uglands Rederi has traditionally had a strong focus on sustainable business practice. Safety has always been the number one priority, but other key elements such as environmental and social impact as a consequence of conducting our business have received increased focus. Knowing that company activities affect society in many ways, and that the company is affected by its surroundings, it is important for A/S Uglands Rederi to contribute to creating and maintaining a positive and sustainable shipping environment.

As a result of this focus, A/S Uglands Rederi joined the United Nations (UN) Global Compact during 2012. The UN Global Compact is a strategic policy initiative for businesses that are committed to aligning their operations and strategies with ten universally accepted principles in the areas of human rights, labour, the environment and anti-corruption. A/S Uglands Rederi has embarked on making this a part of the company policy, operations and strategy, and an integral part of the corporate culture.

As member of this initiative an annual "Communication on Progress" is required, which shall be available on the Global Compact website. This is a public disclosure to stakeholders on progress made in implementing the ten principles.

(CDI Doforonco)

THE UN GLOBAL COMPACT TEN PRINCIPLES

| HUMAN RIGHTS | | (GRI Reference) |
|------------------|--|---|
| Principle 1 | Businesses should support and respect the protection of inter- nationally proclaimed human rights; and | HR 1-7 |
| Principle 2 | Businesses should make sure that they are not complicit in human rights abuses. | HR 1,2 |
| LABOUR STANDARDS | | |
| Principle 3 | Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining; | HR 5 LA 4-5 |
| Principle 4 | Businesses should uphold the elimination of all forms of forced and compulsory labour; | HR7 |
| Principle 5 | Businesses should uphold the effective abolition of child labour: | HR 6 |
| Principle 6 | Businesses should uphold the elimination of discrimination in respect of employment and occupation. | HR 4 LA 2, 13, 14 |
| ENVIRONMENT | | |
| Principle 7 | Businesses should support a precautionary approach to environmental challenges; | Profile disclosure 4, 11 |
| Principle 8 | Businesses should undertake initiatives to promote greater environmental responsibility; and | EN 2, 5-7, 10, 13, 14, 18, 21, 22, 26, 27 |
| Principle 9 | Businesses should encourage the development and diffusion of environmentally friendly technologies. | EN 2, 5, 6, 7, 10, 18, 26, 27 |
| ANTI-CORRUPTION | | |
| Principle 10 | Businesses should work against corruption in all its forms, including extortion and bribery. | SO 2, SO 3, SO 4 |

Implementation of the UN Global Compact ten principles 2012

The most important corporate social engagement is to provide a safe, sustainable and long-term business and work environment for the employees, business partners and the local community. JJUC supports several initiatives in various communities, believing that social engagement in communities where we do business contributes to creating shared value for both the company and society as a whole. JJUC is engaged in various social activities both in Norway and in the Philippines seeking to continually renew and improve its approach to the local community.

In 2012, in accordance with ISO standards, efforts to ensure continuous improvement in safety and environmental performance were made. One example related to seeking environmentally friendly technologies, was the signing in 2012 of a building contract for a new platform service vessel (PSV) with the SALT 100 design. SALT 100 contains several new and progressive solutions,

tailored to meet the oil companies' needs for a modern platform service vessel. SALT 100 combines innovations in design and technology to achieve better fuel efficiency, and reduce emissions.

JJUC supports and respect the protection of internationally proclaimed human rights. In 2012, steps were taken to improve performance in this area, by renewing and expanding the "supplier declaration" (a questionnaire to suppliers related to Quality, Environment, Social Responsibility, Transparency and Health & Safety). The supplier declaration provides guidance when choosing suppliers, identifying those that support a precautionary approach to environmental and social challenges, undertake initiatives to promote greater environmental responsibility, and encourage the development and diffusion of environmentally friendly technologies. JJUC through policy and procedures strives not to contribute to any forms of forced labour, child labour and

discrimination in respect of employment, occupation, gender, age and culture.

JJUC has had procedures and guidelines in place related to averting corruption through gifts and other more specific office related subjects. In 2012, anticorruption efforts were intensified by formalizing an anti-corruption procedure specifically for the fleet and crew onboard. The said procedure is an attempt to formalize the existing routine enabling an enhanced and systematical stance against corruption. Employees are trained in accordance with recommendations from The United Nations Office on Drugs and Crime (UNODC), Global Compact and The Norwegian Shipowners' Association. JJUC is considering membership in organizations and networks where corruption can be combatted together with other shipping companies and organizations at a higher level.

Global Reporting Initiative

Global Reporting Initiative, as the most widely applied standard for reporting on the ten principles of Global Compact, has been chosen as the company's reporting framework. The objective of the Global Reporting Initiative is to create a platform where the reported information is transparent, reliable, comparable and precise.

The Global Reporting Initiative's (GRI) vision is that disclosure on economic, environmental, and social performance is as commonplace and comparable as financial reporting, and important to organizational success.

Sustainability reports based on the GRI framework can be used to benchmark organizational performance with respect to laws, norms, codes, performance standards and voluntary initiatives;

demonstrate organizational commitment to sustainable development; and compare organizational performance over time.

The A/S Uglands Rederi Global Reporting Initiative report is structured as a matrix naming the GRI element/ indicator and referencing the documents and page where relevant information is publicly noted. When not referenced, specific information may be noted. As this is the company's first report, not all GRI elements/indicators are reported on, either they are not applicable or the requested information is not readily available. It is the company's intention to continiously improve and expand its GRI reporting.

| | GRI Element / Indicator | Page/Reference (Annual report/other) |
|-----------|--|---|
| | | |
| Indicator | PROFILE | |
| | Strategy and Analysis | |
