6th November 2012

Confirmation of membership to the United Nations global compact

Distinguished Secretary General,

CSP confirms its decision to join the United Nations global compact and its support for the implementation and respect of the 10 principles of the social and ethics charter regarding the Human rights, labour rights, protection of the environment and fight against corruption.

With this letter, we confirm the integration of the 10 principles in the strategy of our company, our corporate culture, and in our processes and know-how.

We state our commitment to make them progress within our sphere of influence and to report our improvements by the appropriate ways –CSP web site, internal communication, communication with our clients and providers-.

Since we joined in 2011, we have put in place concrete projects and have worked to make them evolve in respect of Human rights, labour rights, protection of the environment and fight against corruption.

With our best regards,

Laure Baudry Brenas
Chairlady
