

Eastern Produce Kenya Limited

Communication on Progress - 2008

The approach to risk management is incorporated in our corporate governance framework. This framework requires management teams in each business territory to review and regularly report on the risks they face and the controls in place to manage them. Policies and procedures (financial, social and environmental) support and continuously improve the management systems in place as well as ensuring minimum if not beyond compliance. As one of the pioneer Kenyan signatory's to the Global Compact, Eastern Produce Kenya Limited is committed to the challenge of ensuring commitment and demonstrating progress.

Eastern Produce Kenya Limited being a quality tea producer strives to continuously exhibit leadership in a number of areas because we have to meet our own expectations and those of our stakeholders. We have been doing these bearing in mind that even as we produce an export product, we are very much a company that is in touch with ourselves, the environment as well as the local surrounding communities.

Prior to joining the Global Compact, we had a lot to be proud of. In the area of protecting and sustaining the environment, we have led by example. The company has worked hard to incorporate awareness of environment and ecological issues into the day to day management of its operations by providing managers with training, encouraging individuals within the company to be aware of managing water resources, teaching issues relating to prevention of soil erosion, re-afforestation initiatives, weeding, kitchen gardens and many other practices.

We have even gone one step further with the construction of wetland sites by way of dealing with wastewater from the tea factories. This has effectively reduced water wastage and effluent. The core objective is to create heightened awareness and to encourage responsibility among all individuals in the company. The success of these initiatives is demonstrated by employees beginning to implement ideas and teaching in their homes. The setting up of workers village environmental committees (VECs) has helped to create more awareness for the need for a clean and protected environment.

Our employment practices are very much applauded by our employees and the respective labour bodies as well as business partners who regularly conduct social audits on us. Proudly, we can say that there is no discrimination on gender, health, religion, ethnic or any other grounds. The enjoyment of the right of freedom of association and the attendant benefits of collective bargaining in an environment of inclusiveness and respect for the value that individuals bring to our business are some of the pluses for us.

In the business world, we have committed ourselves to operating above board. Fair business practices and a strong anti-corruption or anti-fraud platform do not encourage corruption in any form whatsoever. This is the way we conduct our affairs and we are guided by our company code of ethics.

Eastern Produce Kenya Limited has the character to back its commitments in all the areas of endeavour that we are committed to. These being the markets, environment, workplace and within our local communities. We have through this displayed our commitment to the principles of the Global Compact. As a company we believe that our stakeholders support our

commitment to the Global Compact principles and by association they also abide by the same. By simply doing the right thing we are simply part of the ‘global’ effort in contributing positively albeit in a small manner to the Global Compact initiative.
