UN GLOBAL COMPACT COMMUNICATION ON PROGRESS

30th April 2009

1. Statement of Continued Support & Commitments

BUTEK perceive environmental and social challenges as opportunities increasing sustainability. We adhere to national and international standards to advance responsibility in environmental matters.

We hereby declare that BUTEK continues to embrace the United Nations Global Compact and its ten principles, as well as to integrate the principles into our business activities. BUTEK has participated in the initiative since 2006. We strongly believe in the value of this global network and its emphasis on the enlightened self-interest of all relevant social factors, including companies.

Our customers' satisfaction is our top priority. In addition, as an active member of society, we feel an obligation toward many other stakeholders as well. Through our active commitment to society, we want to help and support people.

Namik Kemal MEMIS

CEO

2. Further actions

We have taken further actions and initiatives, apart from our focus on principles, to support principles of the Global Compact initiative and to work towards sustainability goals:

2.1 Business & Employees

Solidarity which employees feel with the company is reflected in their willingness to work. Work satisfaction of all employees is for the company's success. Together with this sense it's important, both for the company and its employees, that we take our responsibility toward society seriously.

2.2 Business & Family

Since our foundation BUTEK has been working for coordination "Business and Family". The project is helping parents align the demands of work and private life, including children, family and care responsibilities.

BUTEK provides internal resources to educate employees and their children on direct actions as well as on long-term goals.

2.3 Business & Business

BUTEK is committed to high standards of legality and business ethics. This includes dealings with suppliers, dealers and all customers. Observing our suppliers' high levels of legality and business ethics and desist from making or accepting any bribe or gratification.

Besides we support suppliers and partners with defined guidelines on sourcing and delivery.

2.3 Environment

- 2.3.1 With carbon dioxide being the primary cause of human-induced global warming, one area in which we seek to manage our impact is in our need for transport. Our employees are required to use the most environment-friendly means of transportation whenever possible primary public transport or our own collective transportation possibility. All company cars are pooled and available on a per needs basis.
- 2.3.2 For helping reduce energy consumption the office heating system is centrally steered and adapts, together with the lighting to the outside conditions.
- 2.3.3 Double-sided printing is made possible. Office materials are chosen according to environmentally friendly.
- 2.3.4 Via our intranet we are able to facilitate an exchange between employees amongst each other on suggestions and best-practices within the office surroundings.
- 2.3.5 BUTEK lays great importance of the use regional food products in our plant. We believe in merit of unprocessed and local foods, especially within the crop of villages near to our region. We offer these to our employees and customers, free of charge.
- 2.3.6 We take responsibility for the environment and society. Our dealings with employees, business partners and shareholders are guided by honesty and integrity.
