

JM/2009/104
June 20, 2009

Mr. H.E. Ban Ki-moon
Secretary-General
United Nations
New York, NY 10017
USA

Dear Mr. Secretary-General,

Multi Commodity Exchange of India Limited (MCX) became signatory to the Global Compact in the year 2007. Two years on we reaffirm our commitment to support the ten principles of the Global Compact. MCX believes the voluntary adoption and advancement of the 10 Principles of the UN Global Compact is vital to promoting understanding and action to ensure human rights are protected, to support international labour standards, protect the environment and to prevent corruption.

MCX will make a clear statement of this commitment to its stakeholders and the general public. MCX will also work towards infusing the 10 principles of the Global Compact as part of its culture, day-to-day operations and will engage in collaborative projects which advance the broader development goals of the United Nations, particularly the Millennium Development Goals, thereby leading to India's development and prosperity.

MCX recognizes that a key requirement for participation in the Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's efforts to implement the ten principles. We support public accountability and transparency, and therefore commit to report on progress within two years of joining the Global Compact, and every year thereafter according to the Global Compact COP policy.

Please find attached some general information regarding our company as well as the contact person responsible for contacts with the office of the Global Compact.

Sincerely yours,

Joseph Massey
Managing Director & CEO

PROFILE

Multi Commodity Exchange of India Ltd. (MCX), India's No 1 commodity exchange, is a de-mutualized, state of the art electronic commodity derivatives exchange that enjoys permanent recognition from the Government of India and operates within the regulatory framework of the Forward Contracts (Regulation) Act, 1952 (FCRA, 1952) and regulations there under.

Having started operations in November 2003, today MCX has more than 2000 registered members operating through over 65,000 trading terminals spread across India. MCX is a classic case of Public Private Partnership. Promoted by Financial Technologies (India) Ltd., stake holders of MCX include top Institutional Investors and exchanges from across the globe as well as leading Financial Institutions, Public and Private Banks of India. The shareholders list consists of reputed names such as: NYSE Euronext, Citigroup, Merrill Lynch, Fidelity, State Bank of India, ICICI Group, NABARD etc.

MCX is the world's first multi-commodity exchange to have achieved dual ISO certification (ISO 9001:2000 for quality management and ISO 27001:2005 - for information security management systems). MCX has established India's first composite commodity futures price index –MCX COMDEX -- a benchmark of activity in the commodity futures market in the country symbolizing MCX's research capabilities. MCX has also pioneered several initiatives in the Indian Commodity Futures markets such as providing price updates on cell phones, introducing futures trading in commodities such as electricity, heating oil, steel, potato, mentha oil, natural gas and crude oil.

MCX has emerged as a leading metal and mercantile exchange within 7 years of operations. MCX's strategy since it went live was to focus on trading in globally-benchmarked commodity contracts such as bullion (gold & silver), base metals such as copper, nickel, zinc, lead, aluminium and tin and energy products such as crude oil, heating oil, CER, natural gas and others, tailor made to suit the Indian market conditions. MCX has successfully launched mini version of bullion and metal contracts which are reference with the international contracts.

In 2009, MCX ranked as the world's sixth largest commodity exchange in terms of number of contracts traded annually. Its strategic alliances, cutting-edge technology, and focused approach to business have propelled MCX to become the largest commodity exchange in India with a market share of 82% as on 31 March, 2010.

MCX offers futures trading in more than 40 commodities across various segments such as bullion, energy, ferrous and non-ferrous metals, oils and oil seeds, cereals, pulses, plantations, spices, plastics and fibres.

MCX has strategic alliances with several domestic trade associations to ensure that large liquidity pools partner and trade on its nationwide electronic trading platform. At a global level, it has signed various strategic alliances with leading international exchanges like Tokyo Commodity Exchange (TOCOM); The Baltic Exchange, London; Chicago

Climate Exchange (CCX); New York Mercantile Exchange (NYMEX), London Metal Exchange (LME); Dubai Multi Commodities Centre (DMCC), Bursa Malaysia Derivatives, Berhad (BMD), Euronext.liffe, Zhengzhou Commodity Exchange, Agricultural Futures Exchange of Thailand (AFET), Shanghai Futures Exchange (SHFE) and others.

MCX recognizes its Corporate Social Responsibility (CSR) commitments in its various roles, and reaches out to cover both - its employees and the stakeholders. In line with best international practice, MCX aims through its CSR programs to respond to public expectations on how a well-managed company should interact with its environment. MCX has been recognized as “India’s First Green Exchange” for its various environment-friendly initiatives. It has also won “Golden Peacock Award”, “NASSCOM 'Social Innovation Honours”, “Businessworld FICCI SEDF CSR Award” for its CSR initiatives. MCX is also part of the UN Global Compact movement that supports universal environmental and social principles.

MCX has brought about a paradigm shift in the Indian commodities market during the seven years of its operations through innovative technology, path-breaking ideas and novel products as well as by forging national and international strategic alliances. As recognition of its success, it has been invited to partner with Government and Regulators of various emerging economies to set up electronic trading platforms in those countries.

MCX is helping develop a nationwide manpower pool for the commodity ecosystem through training courses for rewarding careers in commodities. Most of the training events organized by us are conducted by our associate company – FT Knowledge Management Company Ltd (FTKMC). Such events are conducted in both rural and urban areas, in association with leading institutions such as:

- ☐ IIT Madras and its Rural Technology Business Incubator (RTBI) wing
- ☐ Indian Society of Agribusiness Professionals
- ☐ G.B. Pant University of Agriculture and Technology
- ☐ Indian Institute of Management, Lucknow
- ☐ The Institute of Financial Markets (IFM), Washington, DC
- ☐ University of Petroleum & Energy Studies (UPES), New Delhi
- ☐ Indian Institute of Finance (IIF), New Delhi
- ☐ International College of Financial Planning (IFCP), New Delhi
- ☐ National Centre for Cooperative Training (NCCT), New Delhi
- ☐ Symbiosis Centre for International Business, Pune
- ☐ Welingkar Institute of Management Development and Research, Mumbai

MCX is also the first exchange in India to receive the ISO 14001:2004 certification for Environment Management Systems. The ISO 14001:2004 is an internationally accepted Environment Management Standard, and re-affirms MCX’s commitment towards being an Environment conscious organization. “The ISO 14001:2004 standard addresses “Environmental management “. It defines steps taken by the organization to minimize harmful effects on the environment, caused by its activities, and to achieve continual improvement of its environmental performance.”

MCX is the first commodity exchange in India to achieve this landmark.

This certification also provides assurance on environmental issues to external stakeholders – such as customers, the community and regulatory agencies.

HUMAN RIGHTS

Principle 1: Businesses should support and respect the protection of internationally proclaimed human rights

Pragati – partnership with Rotary International

At MCX, we envisage creating empowerment through knowledge dissemination. Our involvement in sharing this wider responsibility is in pursuance of our philosophy, "to give back to the society/community our best". We aim to help people enrich their lives whether they are in the commodity ecosystem or society at large."

Rotary International and MCX launched 'Pragati' - a joint CSR project on January 13, 2007. 'Pragati' was envisioned for creating empowerment through education and awareness, thereby achieving economic growth in the rural strata. Rotarians have been exposed to commodity markets through various workshops. This initiative drove awareness on opportunities in the agri-segment, economic significance of futures trading, dissemination of futures prices, scientific warehousing, warehouse receipts, warehouse receipt financing, grading, good agricultural practices and quality standards.

"Rotary International Corporate Social Responsibility Award" was presented to MCX for integrating Rural India with Global Markets. The award was presented by Hon'ble Civil Aviation Minister Mr. Praful Patel on 13th Jan 2007 at Hotel Leela, Mumbai.

Mr Lamon Rutten, Joint MD, MCX, receiving the Rotary International CSR Award

Pragati Session with Rotary

Future plan: partnering with Rotary DISHA – a vocational training program for rural youths wherein MCX will impart training on financial and commodity markets. Through this initiative MCX aim to further the development rights of underprivileged sections of our wider stakeholder group.

‘Sahyog’ - Partnership with Tata Power

As part of its strategy to take the benefits of futures trading to farmers’ doorstep and reach out to every corner of India, Multi Commodity Exchange (MCX), India’s leading commodity exchange has signed a Memorandum of Understanding (MoU) with Tata Power Company Limited (TPCL), India’s largest integrated private power company. Through this alliance, the benefit of futures price information spread to 25 villages of Maharashtra having more than 125 registered members. The joint CSR initiative is named as ‘Sahyog’ (Partnership). As on 15th June 2010, the project has completed 12 farmers training and awareness programs have been conducted with more than 300 farmers trained.

Dr Hapase advising farmers during field visit

MCX-Coordinator briefing the farmer

The key objective of this alliance is to develop alternate process for farmers to access market information and advisory services along with dissemination of spot and futures prices of agricultural commodities, availing of which they could get the best price for their produce. MCX also conducts capacity and awareness building programs for farmers, provide all the study material and support for price information dissemination & other related activities.

Education and Adult Literacy Programs

In association with Pratham Books, Gramin Suvidha Kendra (GSK) creates awareness on education by availing various books and products, along with services for educational books among rural community children.

GSK has tied up with Tata Consultancy Services Limited (TCS) for the purpose of "Creating education and adult literacy" on the GSK platform. The first Adult Literacy Programme (Proudh Shiksha Abhiyan in Marathi) was initiated on 30th April 2010 at Fukhnagari village under the Jalgaon GSK center in Maharashtra. Currently total 40 women have enrolled for the course. Duration of the course is four months. The Computer Based Functional Literacy (CBFL) program (CBFL Program/Program) run across at its GSK centres through its existing GSK coordinators.

Villagers during the inauguration of Adult Literacy program at Fukhnagari

M S Swaminathan Research Foundation (MSSRF)

MCX recognizes that one of the best ways to reach out to farmers across the vast geographies of the nation is to partner with existing models and extend its expertise on price information and technology. MCX has joined hands with MSSRF, a not for profit trust based at Chennai. Combining science with technology, the MCX - MSSRF partnership reaches out to farmers across the Southern region of India through the MSSRF network of 38 Village Resource Centres (VRC)/ Village Knowledge Centres (VKC). The premise of the VRC is to harness local knowledge in an interactive media and reach out to farmers. MCX has committed to providing these centres with future and spot price information.

MCX has partnered with MSSRF in farmer training programs to help farmers understand how futures markets can benefit them. MCX has also partnered with MSSRF in its Mission 2007 program that aims to make every village a knowledge centre. Rechristened as the Grameen Gyaan Abhiyan, a national movement for knowledge empowerment of rural families, it is hoped that by 2010, the Grameen Gyaan Abhiyan will cover every village and home or hut in the country. The last mile and last person connectivity in this mission will be achieved through an integrated internet-community radio or internet-cell phone synergy.

The Energy Resources Institute (TERI)

In 2007, MCX has partnered with TERI with the objective of drawing on the expertise of TERI and being a partner in their experimental initiatives. TERI is experimenting on ICT inclusion of remote areas. To achieve this, it came up with the concept of village level kiosks, aimed at facilitating services that are very local in nature. In this unique partnership, MCX has partnered with TERI to set up the kiosks at Supi (Mukteshwar) and Sahiya (Dehradun). Both the places are hilly, remote areas with not even landline phone connections. The idea behind these kiosks is to equip a person with all the ICT equipments and to help him to run this center in a self sustainable manner. Along with this

other objectives are to give computer education to the local people and children, and give framers suggestions regarding their queries related to crops. MCX has contributed with financial and commodity domain knowledge and TERI has arranged for the infrastructure, systems and processes for using them. In addition, MCX has also financed the development of a web-portal www.k4rd.org, which acts as the single window for the vast range of services to be offered through these kiosks. These kiosks help the rural population living in remote areas to know the latest developments, along with future price information so that they can use it to their benefit.

MCX – TERI Kiosk at Supi

Farmer Aggregation Model

MCX has partnered with Cardinal Edge (CE), a Management Consulting Organization to explore ways to establish linkages and demonstrate ways in which farmers can participate on the futures exchange.

A pilot project on farmer aggregation was carried out with Aga Khan Rural Support Program India (AKRSP- I) with CE acting as the consultancy firm. Other than doing research and anglicizing existing contracts and identifying relevant changes based on field inputs, CE also interfaced between farmers and NGOs AKSRP - I to facilitate linkages between aggregator, farmers and exchange.

The partnership with CE helped facilitate convergence among farmers and the exchange resulting in a win-win situation because of price risk management through commodity derivatives trading.

Farmers gathering to understand aggregation

Toll free IVR number

Mobile is all set to define the business in future for India. Rural India is the seat for Indian agriculture, as such, farmers reaching out with mobiles, will be soon able to reach out to the world. The mobile phone will fill the gap that exists in areas of health and education and agriculture. The key to socio-economic development in these areas is thus going to be a leap in telecommunications.

TTSL and MCX have joined hands together with intention of developing a special relationship to enable both these organizations disseminate spot and future prices of commodities through the mobile network. By making innovative usage of voice and data connectivity for agriculture and allied rural sectors, with technical know how and network provided by TTSL, MCX disseminates spot and future prices of commodities. This strategic alliance for joint initiatives in information and communication technology (ICT) based extension services, benefits the farmers and other participants in the rural ecosystem. The toll free number 126565 can be accessed from any Tata Indicom number. MCX has received more than 1000 hits since the launch of this service. The future plan includes expanding the number of commodities price information available on the IVR and spreading the reach of the service across the country.

Price Dissemination through mobile van

In 2007, MCX partnered with Speck Systems under the CII – Dungarpur project to disseminate futures price information to farmers in Dungarpur, one of the 50 backward regions as notified by the Government of India. The price information has been integrated via web based URL of Speck Systems, which operates the mobile van, named 'Grameen Vikas Rath'. Other than price information, the van also promotes integrated pest management practices and educates farmers about efficient irrigation through training in use and maintenance of pipe and sprinklers. Around 350 farmers bargained with local trader over commodity pricing after visiting GVR and gaining knowledge of market price of MCX.

'Grameen Vikas Rath'

Disseminating price information via rural petrol pumps

In this endeavour MCX seeks to improve awareness of futures trading, price risk management and facilitate better access to markets for the farming community through partnerships with IOC.

Kisan Seva Kendra (KSKs) run by IOC carry on research, develop, pilot and run sustainable business models by using ICT (Information and Communication Technology). IOC has agreed to place boards that contain price and other information about commodities traded on MCX at its petrol pumps to benefit farmers. Black boards have been put up at 3 rural petrol pumps around Jalgaon region.

According to Mr. Kumar, GM, IOC, "As part of our group strategy to enable farmers to take informed decisions, we have decided to alliance with MCX's GSK to beef up information base to benefit farmers through IOC's petrol pumps in these rural areas. Most of the pumps are also geographically close to GSK locations so that these Kendra coordinators can send in the price information by post."

For MCX it is another way of ensuring that it reaches out to as many farmers as possible. While price information spread is one part of the strategy of MCX; to strengthen awareness about various aspects of agricultural economy is another. The most critical consideration is to follow it up with farmer awareness camps, to be organized by the KSKs operators of IOC. Needless to add such follow-up will add value by way of updating of information including price information through GSK.

In keeping up with its objective to strengthen its corporate social responsibility (CSR) activities, Multi Commodity Exchange (MCX) and Indian Oil Corporation (IOC) on 27th of March 2008 entered into an agreement to disseminate price information about commodities among farmers. The MoU was signed by Mr. Lamon Rutten, JMD, MCX and Mr. K. R. Suresh Kumar, GM – Retail, IOC.

MOU signed between IOC & MCX: In the picture (l to R: Mr Suresh Kumar, GM (Retail) IOC, Mr Lamon Rutten, Joint MD, MCX, Mr Jignesh Shah, Vice Chairman, MCX

Future plan: To expand the reach of price information via rural petrol pumps in different states and areas.

Farmer Awareness Programs

Creating awareness on commodity markets and making farmers awareness of price signals and its benefits is an important activity at MCX and the GSK platform is utilized for the same. Each GSK centre has a series of programs conducted year round that not only focuses on prices and GSK offerings, but also gives information of best sowing practices, use of pesticides and fertilizers, government schemes on agriculture, NABARD scheme, etc. GSK partners participate in the programs along with officials from NABARD, KVK and India Post officials. Till now 385 programs conducted, of which 266 conducted in 2009-10.

Future plan: More than 400 programs to be conducted in 2010-11 at the 23 GSK centers across the country.

GSK Coordinator briefing farmers on futures market

Farmer Awareness program at Jalgaon

Principle 2: Businesses should make sure that they are not complicit in human rights abuses

Equal rights for the disabled:

As part of its CSO activities, MCX under the aegis of its Center of Academia in association with NASSCOM Foundation organized a 3 day MCX Certified Commodity Professional (MCCP) class room training course for the specially challenged candidates. The MCCP is a certification exam conducted by Training department of MCX that helps to develop Commodity Professionals.

The MCCP program was conducted gratis on three consecutive Saturdays and held at the NASSCOM office at Andheri.

The first of its kind, this program was aimed at making the specially challenged gain skills in the area of commodity trading. The batch had 12 candidates having different levels of disability ranging from Muscle Dystrophy, Polio, Neurological Disability, or Cerebral palsy. Candidates came from MBA foundation and the Spastic Society, both of which are NGOs working for the disabled.

The MCCP course was followed by an online examination that was conducted after the completion of the course. It is aspired that through this course, the specially challenged acquired skills that enhanced their employment status.

Specially challenged students undergoing MCCP training

LABOUR

Principle 3: Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining

Using its domain strengths to make India's process of economic growth more inclusive, in particular, by providing farmers with a level playing field and new opportunities in the domain of agricultural marketing, risk management and finance, MCX has initiated a unique Public Private Partnership (PPP) project with India Post to demonstrate sustainable business models that focus on the "middle-to-bottom of the socio-economic pyramid". This project is named 'Gramin Suvidha Kendra' (GSK). By providing farmers future price signals, MCX is spearheading a 'silent revolution' wherein farmers become better informed and are able to make sound business decisions. This model works on the principle and belief of shifting farmers from being mere 'producers' to now becoming 'marketers.'

To ensure commodity exchanges benefits reach the recesses of rural India, GSK has been designed as a single-window service for all pre-harvest and post-harvest requirements of farmers. Thanks to India Post's ubiquitous network of over 155,000 post offices across the country, MCX's potential to reach out to farmers through GSK has grown exponentially, enabling it to cater to the marketing, warehousing and advisory needs of farmers across India.

Conceptualised in June 2006, the model was first launched at Jalgaon (Maharashtra) and later replicated in other states. GSK currently operates across 5 states and 22 locations, reaching out to more than 8,000+ registered farmers and touching lives across 2200+ villages, through 358 branch post offices.

GSK provides farmers with facilities such as:

- MCX spot and futures prices for their produce
- Quality agri inputs
- Expert advice on farming problems
- Better warehousing, quality testing
- Finance against warehouse receipts
- Weather insurance
- Intensive awareness on price trends and futures market
- Non agri products
- Education
- Adult Literacy

To facilitate the GSK initiative, MCX supplies ICT infrastructure at the sub post office level of each centre. The village/branch post master is an important link in this model who helps reach out to farmers with price information and other advisory services. The project also acts as a source of livelihood for rural youths who act as Coordinators.

While the unique partnership with India Post takes care of the scalability and replicability aspects, sale of agri inputs like seeds, pesticides and fertilizers on the platform helps generate revenues. The

build up of revenues at each and every step ensures that the model is a win-win with each stakeholder. GSK partnership with different sectors like Government, NGOs, Banks and Corporate Houses has enabled to provide broad range of services to the farmers. NABARD and Forward Market Commission (FMC) join hands to ensure that numerous farmer training awareness programs are conducted across all GSK locations. GSK also provides non-agri products like rural water purifiers, education and adult literacy through its partners..

GSK Centre at Salon Sub Post Office, UP

Farmers' Testimonials

Farmer: Ms. Shridevi Mishra

Village/ SO/ District-: Salon/ Salon/ Rae Bareilly

GSK services utilized: Purchased 3 packets of Mahyco and 3 packets of Pioneer Paddy seed. The initial results are very good and expect a more output this time.

Quote: 'As seeds were provide at our doorsteps, an average Rs 30 was saved per packet for Mahyco and Rs 20 for Pioneer. More services should be added for farmers.'

Farmer: Sangambassapa Shankarappa Ronad

Village/GSK/District: Savadi/RON/Gadag

GSK services utilized: Future price information

Quote: "I am getting price information on a daily basis at my village via GSK. Taking leads from black board price information, I sold groundnut at Gadag. It was a good deal. GSK price information helps all our village farmers with future price information for Bengal gram, maize and Wheat. I wish Sunflower future rates should also be given at GSK in coming days."

Principle 4: Businesses should uphold the elimination of all forms of forced and compulsory labour

Employee Volunteerism Policy

The MCX employee volunteerism policy gives opportunity to its employees to get directly involved with the society through various activities/donations. This involvement also gives employees a sense of pride for the company they work with. Employees are encouraged to volunteer in terms of time, money, energy, skill and leadership. MCX as a company is supportive of its employees' involvement and has put in place a company recognition system for employees who do their bit for the society.

"Khushi Ki Kiran"

'Khushi Ki Kiran' is the outcome of the Group's concern and philosophy of contributing towards society with skills and time. The in-house CSO Committee members coined the term 'Khushi Ki Kiran', which means spreading a ray of sunshine in the lives of people. This truly exemplifies the spirit with which the employees work towards giving back to society.

Group CSO has identified suitable NGOs located close to the office. The idea is to make the drive successful and that can be achieved only if we zero on to the right NGO located close by so that employees need not commute for long.

Due diligence is done of NGOs to ensure that they were authentic, genuine and have the required infrastructure and the need for such a movement. It is vital that we build in a comfort level with both – the NGOs and the employees. Hence the type of work done and the infrastructure facilities available with the NGOs is a key criterion for moving ahead in the selection process.

Employee volunteerism movement is associated with the following NGOs.

Ashadeep – working with slum children of single domestic/maidservant mothers. The children attend school and later stay at this home till their mothers come back to take them home. Ashadeep provides free school uniforms and meals for these children.

Snehasadan – residential home for street children. Children are sent to nearby municipal schools and all their needs are taken care of. Mumbai Police sends in children they pick from the streets and brings them to Snehasadan

Home for the Aged – a residential facility for senior citizens above the age group of 65 years.

More than 100 employees have signed up for Khushi ki Kiran.

Employee Speak:

"Such initiative by CSO would bring a desirable completeness to the personality of our employees which would be in the interest of the employees, the organization and the society.' **Parag Jain, Chief, Membership and Compliance, MCX.**

'My main motivation was an urge and eagerness to participate in an initiative that can make a change (even if it is a slight one) in people's lives, contribute a bit to the society (people around us) in my own small yet selfless way. I hadn't participated in any such activity in a long time (basically ever since I passed out of college), so was all the more enthusiastic about it and did not want to miss

this opportunity. It doesn't ask for much of an effort and yet can make a huge difference through cumulative effort. Thanks and regards.' **Prachi Garg, Manager – Group HR**

'I liked the idea because we do not get the time to go out on our own and if company is organizing and taking care, why should we not participate? It is after all a noble idea.' **Daxa Jani, Executive, Economic Analysis and Publication, MCX.**

'I was always looking forward to this sort of activity. I myself have gone thru lot of hardships since I lost my father when I was in 10th standard. Since then I have been working and have completed my studies. There are so many children who do not have enough opportunities to educate themselves because of various issues. If I can change the life of at least 1 child it will give me great amount of satisfaction. It's the time that I need to give it back to the society who has given me so much. I was an active member of Rotract International and have participated in various awareness programs at District level. Of late I am not able to devote my time to the social causes because of various reasons. I feel "Khushi ki Kiran" can in turn give me a satisfaction and belongingness to the society which I belong to.' **Pravin Sawant, AVP. Group HR.**

'Reach Out' - the pay roll deduction scheme

'Reach Out' – the Pay Roll Giving or 'Give As You Earn' scheme was launched in the month of May 2009. This initiative lets an employee donate a sum of money from his/her monthly salary to the charity of his/her choice. Employees can also track how your money has been utilized - that too from their desk.

'Reach Out' gives employees the choice of contributing to five NGOs, whose activities benefit children, women, visually impaired and the terminally ill. Based on their decision, every month, a specified sum is deducted from employee salary and handed over to the organization for disbursement to the designated charity. All donations are completely voluntary and employees have full control over the amount they wish to donate. As on 15th June 2010, more than 80 employees of Financial Technologies Group companies are part of this programme contributing more than Rs. 40,000/- per month.

Employees are provided with regular updates on how their money has been spent and the impact that their contribution has made. For instance, if an employee sponsors a child's education, Group CSO will inform of his or her school progress. Besides the feedback, the accountability and transparency (not to mention the tax benefits depending on the NGO chosen) makes the whole process actually so simple and attractive!!

Employee quotes:

"I think it's a brilliant initiative. It feels good that I am able to do this bit from my side to put a smile on someone's face. Like you always said it's a opportunity to give back to society. I have always wanted to do something like this but never got a chance to do it. So thank you and your team for providing me with this opportunity". **Litty Mathew, Group HR.**

“It is a great opportunity for us to help Cancer Patients. It's my great pleasure If I can contribute to save their Lives.” **Manish K Jain from Baran**

“I have been provided with an opportunity to spend a little amount for a noble cause.”
Kinkar Gupta Bakshi from Burdwan

“I am honoured to work in an organization which takes various steps towards helping various NGOs through various new steps,” **Bhavesh Morjaria, from Mumbai.**

Quotes from NGO Beneficiaries:

“Thanks for adding Akshayapatra foundation as one of the beneficiaries on PRG Front. It will not only inculcate the habits to contribute but help the disadvantage at large. A Big thank you to all of your team members for making this happen.”

Pawan Singh Raghuvanshi, DGM & Programme Head, Akshaya Patra Foundation

“Thank you very much for all the support and co - operation at your end to make this partnership materialize. FT Group employees believe in paying their dues to society. We at NAB thank all of them for their kind gesture. We would be looking forward to having all your employees at our unit for a better understanding and insight into the world of the visually impaired. This is only the beginning of a long journey ahead.”

Yashoda Karigar, National Association for the Blind

“A Big Thank You to you for being so wonderful and for all your effort in making this happen. It feels great to receive the first cheque for the Payroll Giving Program.”

Natasha Sehgal, Resource Mobilization Officer, Save The Children India

“We are thankful to all the Employees and the CSO dept for their kind contribution and sincere efforts for the children of Ashadeep. We assure you that the contribution will be used in the best interest of the children.” **Santosh Panigrahi, Ashadeep Association.**

Vocation Training Being Given to Women at Save The Children India NGO

Principle 6: Businesses should uphold the elimination of discrimination in respect of employment and occupation

MCX has well defined code of conduct and ethics that ensures there is no discrimination in respect of employment and occupation. The 'Affirmative Action' Policy clearly states that the company shall not support conscious discrimination in any form. The policy also reaffirms that equal opportunity in employment for all sections of society is a component of its growth and competitiveness. It further believes that inclusive growth is a component of growth and development of the country. MCX has also put in place the following:

Provide equal opportunities to all employees and aspirants for employment in the Company irrespective of gender, caste, religion, race or colour, merit being the sole differentiating factor.

Encourage employees to acquire skills, knowledge and training to expand / enhance their professional and specialized knowledge. This is done through AIMS (Acquire, Improve & Maximise - Skills) which is in-house learning and development initiative at MCX which makes every effort to enrich the company's human resource with knowledge and skills. The objective of AIMS is to motivate and provide resources to MCX employees to keep them abreast of emerging industry and technology trends. Our Training Programs are categorised as:

- * Induction programmes
- * Functional trainings– role and responsibility based
- * Technical trainings
- * Non Technical trainings
- * Product trainings
- * Enrichment Programmes (these are the soft skills development

programmes which value-add a person and make him/her more effective. It comprises training in communication skills, presentation skills, leadership skills, time management, team management, etc.

Saving Campaign

MCX in association with Department of Post, Maharashtra, launched Saving Week (08-12 March 2010) for employees and their families. The association gives a unique opportunity to save money through salary without having to visit the post office. As on 15th June 2010 more than 60 Postal Recurring Deposit (RD) accounts are opened.

Jagrut HIV/AIDS Awareness Initiatives

Training is provided in issues concerning national interest like HIV/AIDS. As a conscientious Corporate, Financial Technologies Group of which MCX is a part, has put in place a comprehensive HIV/AIDS policy, which is displayed outside the office. We have also launched the in house peer educator program on HIV/AIDS called '*Jagrut*'. The aim of the program is to spread awareness and dispel myths and misconceptions associated with HIV/AIDS.

So far, more than 20 programs have already been held and more than 300 employees have been trained on HIV/AIDS. This is continuous programme and all employees of MCX are to be covered.

Jagrut Poster

The CSO training policy is based on the scenario wherein there is a huge market demand for trained professionals in the field of commodity markets and wherein MCX is determined to provide equal opportunities to the economically disadvantaged/weaker sections with the belief and understanding of inclusive and healthy growth in the society. This policy is applicable to all the economically disadvantaged/weaker sections of society who would otherwise fulfil all the other criteria for admission to various domestic training courses run by its training division: Financial Technologies Knowledge Management Company (FTKMC). The company will allocate two seats in each of its domestic training programs for the economically disadvantaged/weaker section of society. Candidates eligible for these two seats will be offered the respective course free of cost.

ENVIRONMENT

Principle 7: Businesses should support a precautionary approach to environmental challenges

World Environment Day is celebrated within the organization to create a pool of aware and sensitive employees with the overall objective of propagating a greener environment. MCX has a well defined **Environment Policy** and **E waste policy** wherein it has tied up with two certified E waste recycler plants for disposal of its office E waste in a safe and environment friendly manner.

On the occasion of World Environment Day 2010, MCX reinforced the concept of REUSE and launched Stationery and Books drive on 4th June. Employee participated in the drive to safeguard scarce resources by donating existing reusable materials. Old text books and note books were donated to 'Akanksha' NGO. And stationery items were donated to 'Support' NGO. Slogan writing contest on environmental conservation was also announced. The best and creative slogans were uploaded on the Green Exchange (<http://ftgroup/mcxgreen/index.html>) micro-site.

An employee driven E waste drive was conducted on the occasion of World Environment Day 2009 to create a sensitization and awareness on the important issue of E waste.

E-Waste Drive At MCX

Date: 30/06/2009

To,
Ms. Sarita Bhal,
Multi Commodity Exchange of India Ltd.
Andheri (East), Mumbai

Subject: Confirmation letter for E-waste picked up on June 1st week

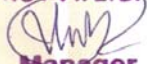

Dear Madam,

This is pertaining to the E-waste drive held in MCX/FT offices on June 5th 2009 on World Environment Day. Please find below materials details collected from all your branches.

- 1) Nariman Point -1 box
- 2) Andheri-1 box
- 3) Chennai - 1 box
- 4) Hyderabad -1 Box
- 5) Kolkata - 1 Box

Thanking you and assuring you our best service all the time.

For **ATTERO RECYCLING PVT. LTD.**

Manager

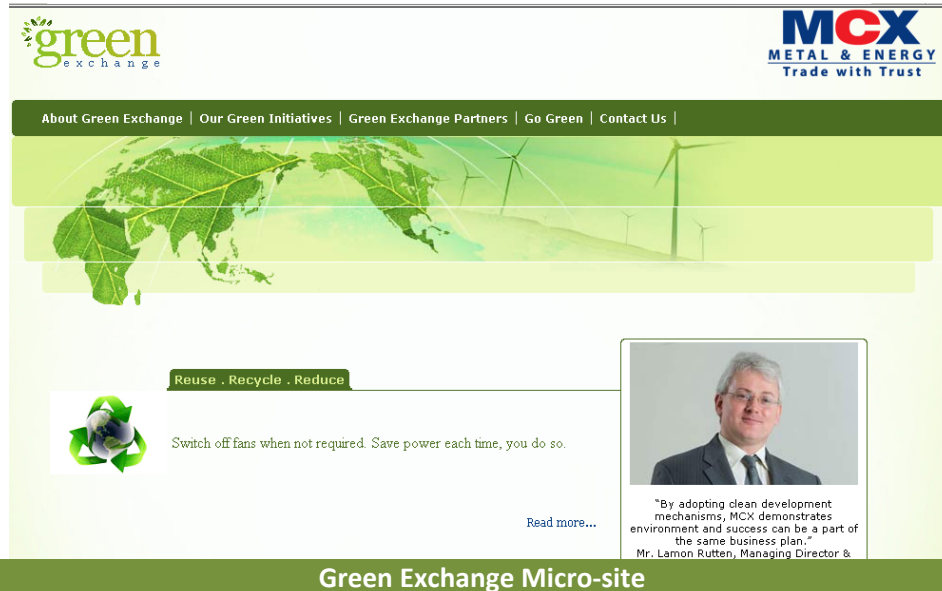

Thanks & Warm Regards,

Green Exchange Micro-site

MCX has also developed Green Exchange website to help users by providing sustainable living ideas, tips, messages, glossary, articles etc. Idea is to sensitize people on different ways to be environment friendly.

Visit To E-waste Plant

Environment and issues on global warming are a cause of concern for all including children. At MCX we firmly believe children are the future and we need to involve them in doing our bit for a clean environment. In this endeavour, on 20th Feb 2010, we have organized a special education drive for the children of our employees who will be sensitized on the issue of safe electronic

Visit to ECORECO Plant at Vasai

waste (E waste) disposal. The visit is in collaboration with ECORECO, our partner for safe disposal of electronic waste. Objective was to help children to understand the process of disposing and recycling electronic items in an environmentally safe manner.

Principle 8: Businesses should undertake initiatives to promote greater environmental responsibility

MCX recognizes that business activities have direct and indirect impacts on the societies in which they operate. At MCX a conscious effort is undertaken to minimize the negative effects of its footprint on the environment in which it operates. In the environmental domain, the organization strives to reduce energy usage and wastage and have adopted safe recycling mechanisms. The new MCX building is equipped with the best global practices for conserving energy. Glass windows that are double vacuumed are put in place so that they conserve energy. There is a complete glass facade that allows more of natural light to flow in. Water conservation systems through efficient plumbing means and rainwater harvesting are part of the architecture. Special washroom facilities for the disabled along with a ramp at the entrance reflect the values of MCX that strive to embrace all strata of society.

Green messages have been displayed at strategic locations at Exchange Square, the head quarters of MCX at Mumbai. These messages also extol employees to join the organization in ensuring a cleaner and greener future. Messages are displayed in the lifts, meeting rooms, next to printers, the cafeteria and car parking lot.

Increasing Awareness Among Employee

Owing to MCX’s emphasis on reducing its environmental footprint, management systems for maintaining information pertaining to MCX’s environmental performance were reviewed and enhanced as part of the ISO 14001 exercise. ISO 14001 trainings are held for all employees to accrue maximum benefits in our operations from implementation of this initiative. The rigorous training program focuses on the benefits of certification, aspects of environmental performance and the roles and potential contribution of employees in making it a success.

Principle 9: Businesses should encourage the development and diffusion of environmentally friendly technologies

In an effort to play a pioneering role in emissions markets, MCX had extended its transparent platform to emissions contracts with underlying carbon credits to its existing basket of commodities with regard to futures trading.

To ensure the same, MCX entered into a strategic alliance with Chicago Climate Exchange in September 2005 to help the Indian producers of carbon credits with benchmark prices as it prevails in the buyer's markets. With India supposed to be one of the major suppliers of carbon credits, the tie-up between the two exchanges is expected to ensure the sellers with better price discovery of carbon credits besides helping them cover risks associated with buying and selling. Hence by enabling a transparent platform for carbon credit futures trading, MCX has opened up immense scope and opportunity for domestic producers of carbon credits to realise fair prices for their carbon credits with no counterparty party credit risk besides national capacity building by slowly percolating the awareness. Availability of future price signals also enables clean technology development and transfer besides helping the policy makers to better develop the markets to address the issue of climate change.

Thus, emission futures at MCX acts as a catalyst in generating more and more carbon credits by the stakeholders in India and thereby helping the noble cause of addressing the global issue of climate change.

MCX's servers, data centres and other IT infrastructure are significant consumers of energy. Over the years, IT equipments have undergone major upgrades, resulting in reduced space, decreased energy consumption, and more efficient systems. Some of the major steps taken in this regard are:

- Replacement of conventional rack servers by new blade servers
- Virtualization of 80 servers on 2 physical servers using the VMWARE software.
- Installation of APC air conditioning mechanism, which closely couples the air conditioner with heat source to produce a more efficient direct return air path to the system
- A 'paper-less' operation – Travel4U (for online travel requisitions), online procurement database, OGC (for online setting of KRAs), online performance management systems, System vendor billing (through SAP), teleconferencing, help desks, ROTS (for online employee reimbursements) etc.

Significant reduce power consumption and space occupation have achieved through above initiatives. However, currently monitor the amount of energy saved through this initiative is not calculated. This exercise will be taken up in future to quantify the benefits accrued.

In recognition of the environment-friendliness of its operations and the launch of carbon credit futures, MCX has been honoured with the title of **India's First Green Exchange**. The honour was conferred on MCX by Dr. Michael Nobel, executive chairman, Nobel Charitable Trust, on behalf of the well-known NGO, Priyadarshini Academy.

ANTI-CORRUPTION

Principle 10: Businesses should work against all forms of corruption, including extortion and bribery.

MCX mission statement says the following, " We will continue to enforce a zero-tolerance policy toward unethical trade practices, attempted or real, by any participant/s".

MCX has in place a code of ethics that is applicable to all employees.

This Code of Ethics ("Code") for the Executives of MCX seeks to establish a minimum level of Business/professional ethics to be followed by the Executives, towards establishing a fair and transparent market place. The code of ethics is based on the following fundamental principles:

- Fairness and transparency in dealing with matters relating to the Exchange and the investors.
- Compliance with all Laws/Rules/Regulations laid down by Regulatory Agencies/Exchange.
- Exercising due diligence in the in the performance of duties.
- Avoidance of conflict of interest between self-interest of the Executives and interests of Exchange and investors.

MCX has Vigilance Committee whose responsibility is to set out the procedure relating to checks, inspections, enquiries and to monitor / prevent / thwart any attempt by participants to manipulate / distort prices and/or to indulge in trading malpractices. The Committee also performs such duties and responsibilities as may be assigned to it by the Board from time to time in connection with ensuring that the MCX trading platform is not misused by anybody to indulge in unfair or unethical market practices. The Committee is comprised of four members including the managing director. Members are also familiarised with various compliance parameters, and provided with a list of "Do's and Don't's", which are also available on our website.

MCX operates under the regulatory authority of the Forward Markets Commission (FMC), Union Ministry of Consumer Affairs, Food and Public Distribution, which sets up legal parameters within which MCX operates.
