

## Best practices – Communication on Progress of Dexia 2010

### **Declaration of Pierre Mariani, CEO Dexia**

#### Our commitment to UN Global Compact

Dexia has been committed to the United Nations Global Compact for eight years. That commitment is a founding element of our sustainable development approach, consistent with our wish to concentrate our action on the essence of our business and the sustainable needs of our clients.

An in-depth transformation of our company has been taking place since 2009, following the crisis which swept the financial markets, and against that background it has been our desire to pursue our commitment to sustainable development.

We now wish to develop our approach to be consistent with the refocusing of our activities and historical franchises and to concentrate on the essence: integrating sustainable development in our banking business. To that end, the theme of energy efficiency in buildings will be at the heart of our sales actions over the period 2011-2012.

With these initiatives, Dexia wishes to respond sustainably to the expectations of its clients in environmental matters.

Pierre Mariani

Chief Executive Officer, Dexia

### **Our actions**
