

In 2014 we will be focusing on:

- Reducing our CO2 emissions by 14% compared with 2013. We will Implement an enhanced energy monitoring system to help identify further energy optimization areas
- Implementing energy-saving production processes
- Reduction of water consumption by recycling water used for processing.
- Ensuring that our Danish management handbook becomes global by being implemented at our production facilities in China.
- Expanding our DAFA Supplier Code of Conduct in China in the selection of new suppliers.

We constantly aim for continuous improvements in the whole organization and we believe that how we handle the impacts from our improvements is our responsibility. We are very aware of our limited size seen from a global perspective but we know we make a difference in our local business area.

By using UN Global Compact as our overall guideline we will extend our sustainable business ethics while striving for our vision of becoming a more global company. We look forward in the years to come to communicate our progress.

Best regards,

Jacob Norby

Managing Director, DAFA A/S
