**UN Global Compact
Environment**

Principle 7:   Businesses should support a precautionary approach to environmental challenges

Principle 8: Undertake initiatives to promote greater environmental responsibility

Principle 9:   Encourage the development and diffusion of environmentally friendly technologies

In 2013, Agility DGS France implemented a **green program**. All offices were provided with collection bins, for plastic, paper and electronics that are collected for recycling on a weekly basis. These materials are collected on a weekly basis by a local recycling company.

Our monthly newsletter focuses on Health, Safety and Environmental topics. Environmental issues have covered Recycling, Reducing Paper Use and Safety during Sand Storms.

Our Life Support contracts involve both preventative actions and the incorporation of environmentally friendly / recycling initiatives. Examples include the safe processing of waste, fuel overspill basins, recycling of aluminum cans, metals and plastic water bottles, and the use of biodegradable catering materials. In many projects, a percentage of the proceeds of recycling initiatives are contributed to local educational initiatives. In 2013, over 61% of all waste generated was recycled.

Environmental spills or contamination have an immediate reporting requirement.

Agility DGS France has developed, in Mali, waste management charts that include specific handling for each type of domestic and industrial waste including: batteries, tires, concrete, light bulbs, plastic, aluminum, spent brass, iron and glass, oil soaked clothing and rags, paper, wood, kitchen waste, and chemicals. These charts are distributed to all of our work sites and to our clients.

Employees are furnished with appropriate Personal Protective Equipment such as overalls, gloves, eyeglasses, hearing protection, reflective vests and safety shoes to ensure that anyone coming into contact with Hazardous Materials (HAZMAT) is protected. Training is continuous for both recognizing and responding to environmental incidents.
