

Communication on progress (COP) for Scania CV AB

From the core values to global management systems and the way Scania conducts its business, Scania is committed to upholding the ten principles of the United Nations (UN) Global Compact relating to human rights, labour, the environment and anti-corruption.

This Communication on Progress (COP) is Scania's annual disclosure to stakeholders about the company's efforts to implement the principles of the UN Global Compact. Scania joined the UNGC in 2012.

Scania has two channels to report sustainability information. To highlight how central sustainability is becoming to the business, in 2013 Scania produced its first Integrated Annual Report.

More detailed information is provided in Scania's on-line Sustainability Report available at www.scania.com/sustainability, which applies the Global Reporting Initiative (GRI) reporting framework 3.1. The report is written in accordance with Application Level C, and is self-declared.

Where applicable, the table on the following pages indicates where to find information about how Scania works with the respective principles of the UN Global Compact and also includes a link to a statement by Mr. Martin Lundstedt, Scania's President and CEO expressing continued support for the Global Compact.
