Preface

The global world's order expects from the business to make a profit and increase its competitiveness, while promoting sustainable economic, environmental and social development.

"Grindeks" is a socially responsible company, which already in 2002, in response to UN Secretary General Kofi Annan's invitation as one of the first Latvian companies joined the "UN Global Compact", which brings together socially responsible companies from around the world. This year "Grindeks" submits in its sixth report to the UN on the context of the Global Compact.

Being a responsible company that operates transparently, starting from 2007 "Grindeks" publishes a Corporate Governance Report, and for the first time this year has created this Corporate Social Responsibility Report for 2009 (hereinafter - the Report). This will help the different stakeholders of the company to learn more about "Grindeks" activity, creating lasting solutions to public health. This Report describes the corporate social responsibility issues that are essential to the company and to the pharmaceutical industry as a whole. Preparing the Report, internationally recognized guidelines were used.

So far, the company reported on the socially responsible business and sustainable development to its stakeholders in annual reports, but this year and beyond – by this Report, and permanently - by using a section "Corporate Social Responsibility" on the company's web site www.grindeks.lv, where this Report will be also published.

The Report is submitted to the Stock Exchange "NASDAQ OMX Riga" simultaneously with the Annual Report of "Grindeks" 2009 and is published on the website www.nasdaqomxbaltic.com.

Kirovs Lipmans
Chairman of the Council

Jānis Romanovskis
Chairman of the Board

Profile and Strategy

"Grindeks" was founded in 1946. The company continues to develop and to take a leading position of the pharmaceutical companies in the Baltic states. The main fields of action of "Grindeks" are: research, development, manufacturing and sales. "Grindeks" specializes in the heart and cardiovascular, CNS and anti-cancer medication therapeutic groups.

The Group of "Grindeks" consists of JSC "Grindeks" and its four subsidiaries: JSC "Tallinn Pharmaceutical Plant" in Estonia, JSC "Kalceks", "Namu Apsaimniekošanas projekti" Ltd. in Latvia and "Grindeks RUS" Ltd. in Russia. The representatives and representative offices of "Grindeks" are working in fourteen countries. Branches and representative offices are in Lithuania, Estonia, Russia, Kazakhstan, Ukraine, Belarus, Moldova, Georgia, Azerbaijan and Uzbekistan, while the representative offices are in Poland, the Czech Republic, Hungary and Armenia. In 2009 the total number of employees in the company, together with the representative offices and the subsidiaries was 895.

In Latvia "Grindeks" has always been a driving force in its sector – with a highly skilled workforce, a strong link with science, high standards of quality and responsible attitude towards environment and society as a whole.

The operating strategy of "Grindeks" is firmly based on its mission to care for human health, employees' interests and shareholders' wealth, as well as to rely on innovation and to be environmentally friendly company. The business philosophy of "Grindeks" is closely connected with the company's four key values – quality, stability, innovation, and employees. It stimulates the business growth, promotes competitiveness and develops the company's internal culture.

Strategic priorities for action

Manufacturing is one of the company's strategic priorities for action, so as to ensure high production efficiency, "Grindeks" continuously develops its production infrastructure and introduces new technologies. "Grindeks" cares so that, increasing the production capacity, it not only ensures the company's growth of the turnover, but also effectively cares for the environment.

One of "Grindeks" strategic priorities for action is a permanent improvement of the product portfolio. "Grindeks" follows the trends of the pharmaceutical market, and actively responds to the consumer needs, offering the necessary medicines.

To increase "Grindeks" sales of medications, the company has developed a targeted marketing agency network and focuses its activities both in existing markets and new perspective markets. "Grindeks" purposefully works on the pharmaceutical Group's expansion and on the development of its operations.

Company's sustainable development

Dialogue with stakeholders is important for "Grindeks". This helps to understand the different expectations of the audiences, opportunities to cooperate with them and to integrate in the company's strategy the knowledge acquired. "Grindeks" regularly evaluates and analyzes the stakeholders and their relationship with the company's business objectives and strategies in order to address issues that may have a significant impact on the company's performance.

Contribution to sustainability of society

The annual audited financial statements of "Grindeks" for the year 2009 – the Group's turnover was 53.6 million lats, and the net profit was 3.6 million lats. Production and sales, provides that "Grindeks" takes a stable, high position among the companies with the largest exporting potential in Latvia. "Grindeks" not only cares about the good business performance, but like other socially responsible companies in the world, in addition to its business development gives funds to the sustainability of the society. "Grindeks" annually supports health promotion activities, education, informs students about the importance of the science and encourages the scientific research. In dialogue with the public, at the same time the company increases its own quality and environmental protection standards. "Grindeks" business development goes hand in hand with corporate social responsibility. "Grindeks" sponsorship and support is focused on activities that promote educated, healthy and cultural society.

Corporate social responsibility

The implemented corporate social responsibility of "Grindeks" activities are focused primarily on:

- local society;
- environment;
- employees;
- the company's sustainable development.

Every year "Grindeks" supports health promotion activities, stimulates the growth of education, introduces pupils to the importance of natural science and contributes to the scientific innovation, at the same time increases the company's quality and environmental protection standards, promoting two-way dialogue with the society.

Each year the company carries out major investments in the development of manufacturing technologies and infrastructure, in the high quality of medications and substances, as well as in the environmental protection, public health and safety at work. It demonstrates the confidence of "Grindeks" in the chemical industry's global voluntary initiative "Responsible Care", and the UN "Global Compact" objectives. "Grindeks", taking strategic decisions, evaluates their potential impact on the environment.

At "Grindeks" the sustainable development and corporate social responsibility are included in the job responsibilities of the Heads of the Communications Department, the Personnel Department and the Quality Management System, as well as the Quality Director. Adopting important decisions, the company's impact on the public, employees, suppliers, subcontractors, customers, consumers, environment and economy is taken into account.

The company constantly publishes a section "Corporate Social Responsibility" on the company's web site www.grindeks.lv.

Collaboration and Partnership

Company listed on Stock Exchange

Since 2 January of 2006 "Grindeks" shares are listed on the Official List of "NASDAQ OMX Riga" (hereinafter – the Stock Exchange). From 1 June 1998 to 1 January 2006 the company was in the Second List. In 2008 and 2009 "Grindeks" received the "Baltic Corporate Excellence Award" as the best Latvian company listed in the Baltics. In 2008 and 2009 "Grindeks" received an award for the best investor relations online in the Baltic states within the project *The Baltic Market Awards*, organized by the Stock Exchange. The information, published on the Stock Exchange, can be found also on the website of "Grindeks" www.grindeks.lv under a section "For investors".

One of the most important operational factors of "Grindeks" are the clearly set management principles that help to achieve short and long term goals. "Grindeks" is one of the best examples of corporate governance and good practice in Latvia. "Grindeks" is conducted by the General Meeting of Shareholders, the Supervisory Council and the Management Board. Constructive cooperation between the shareholders and company management enables the efficient management of multidimensional pharmaceutical company business and mitigate potential risks. In order to stimulate product sales and reduce the company's operating risks, the company continually works to strengthen existing and develop new markets, and purposefully diversified.

Integrated Management System

The company and partners are interdependent and mutually advantageous relations raise the additional added value. An integrated management system gives an opportunity to fundamentally link good management practice to good practice in any major field of the company. An integrated, systematic approach organizes and facilitates all of the company's business processes and makes them more effective. This, in turn, enhances collaboration with suppliers, promote reliability. Regular business self-assessment stimulates consistency of the internal functioning, reduces errors, thereby optimizing costs, and improves business competitiveness and profitability. The Integrated Management System is a way, how "Grindeks" works and manages its business. It is a tool, how to integrate and implement effective and efficient process and action management. Continuous improvement of activities has become a drive of the development of "Grindeks" and long-term goal.

International cooperation

"Grindeks" develops its international activities in the both fields: manufacturing and trade. "Grindeks" is a highly export-oriented pharmaceutical company. Total exports account for 96%. "Grindeks" exports its products to over 40 countries. The main markets of the ready-made medications of "Grindeks" are CIS countries, including Russia. In its turn, the main active pharmaceutical ingredient export markets of "Grindeks" are Europe, Japan, Canada, the USA, Russia and Pakistan.

In 2009 number of suppliers of "Grindeks" was more than 380 (organizations of raw materials, spare parts, packaging, and service). In its turn, client range of active pharmaceutical ingredients and the final dosage forms is more than 180 clients a year.

To assess and to improve its operations, "Grindeks" annually carries out customer satisfaction survey in key business areas of activity – in the business of final dosage forms and active pharmaceutical ingredients.

"Grindeks" is a flexible company that is adapting to changing market conditions, choosing to work with reliable business partners in each market. To achieve successful financial management objectives, the company carries out production and resource optimization, reduces costs and concentrates production capacity, as well as purposefully improves range of products. Each year "Grindeks" introduces at least four new products. To effectively charge the available production capacity, "Grindeks" also offers production services to other companies.

"Grindeks" focuses to its key business areas, therefore the company uses outsourcing services for the various functions. Evaluating the business processes, "Grindeks" transfers its functions, which require large investments or specific knowledge, to the outsourcing provider. Thus the company focuses the financial and human resources to the development and competitiveness in strategically important areas of the long-term. "Grindeks" successfully cooperates with the Latvian scientists and research institutes and foreign pharmaceutical companies in the implementation of various research projects that promote research and development of new substances.

Membership in organizations

In 2009 "Grindeks" continued active participation in several associations and non-governmental organizations and contributed to the dialogue between state institutions and enterprises, and participated in the trilateral talks between the government, employers and employees.

"Grindeks" is an active member and supporter of numerous organizations - Pharmacists Society of Latvia, Association of the Latvian Chemical and Pharmaceutical Industry, Latvian Chamber of Commerce and Industry, Latvian Quality Association. On the international level, "Grindeks" is the member and supporter of Latvian Chamber of Commerce in Lithuania, as well as the member of "UN Global Compact" and partner of the Global Chemical Industry Program "Responsible Care". In 2009, "Grindeks" continued the membership at Latvian Biotechnology Association. Membership at the Association gives the opportunity to our company to follow all the current events of the field, take part in promotion and development of the industry as well as find ideas for perspective projects in biotechnologies.

Safety, Quality and Environment

"Grindeks" follows the "UN Global Compact" principle – companies must undertake initiatives to promote greater environmental responsibility and environmentally friendly technologies.

There is a permanent environmental issues section on the web site of "Grindeks" www.grindeks.lv called "Environment. Quality. Safety." Similarly, the publicly available information related to the protection of the environment, the company includes in the Annual Reports.

Quality and Safety

The pharmaceutical production is one of the most responsible manufacturing sectors, as it relates to human life and health, therefore the pharmaceutical industry is faced with particularly high quality requirements. "Grindeks" operation is certified under the "Good Manufacturing Practice" (GMP) standards. The introduced "Good Manufacturing Practice" is a guarantee that "Grindeks" works in accordance with the European Union's and the world's requirements, producing high quality, safe and effective medications.

In 2007 an Active pharmaceutical ingredients scale-up laboratory was opened, which is the first laboratory in the Baltics, which received the international Good Laboratory Practice certificate. This proves that the organization of work in the laboratory meets the highest standards of laboratories worldwide. The active pharmaceutical ingredient research takes place under the requirements of Current Good Manufacturing Practice and specific customer requirements.

The production plants of "Grindeks" have been audited by both, the partners and the pharmaceutical inspections of the entire world recognizing the compliance with international quality standards. In 2009 "Grindeks" successfully passed 23 significant inspections and audits by Latvian and foreign state agencies of medicine and supervisory bodies of food supplement manufacturers, clients and institutions of environmental protection.

Pharmacovigilance

With its responsibility towards its products and the health of the consumers, JSC "Grindeks" continues to develop its Pharmacovigilance system in all sales markets. For the purpose of elimination of potential risks and health hazards, data on the effects of the medicinal products are being summarised, investigated and evaluated and the information about side-effects and interactions with other medications is being gathered.

To ensure the control of safe use of medications, there is a Pharmacovigilance Group at the company, which key task is to state and timely eliminate adverse/side effects from the use of medications and to report to the competent authorities.

The analysis of the reports and their further submission to the competent authorities are carried out in accordance with the relevant guidelines and pharmaceutical companies' practices. "Grindeks" is involved in the electronic reporting system EudraVigilance which is also the main European Risk Management Strategy support between the EMEA (European Medicines Agency) and the competent national authorities.

On the "Grindeks" web site www.grindeks.lv there is a permanent section "Monitoring of Side Effects." The company also has set up a section "Health School" on the website, in which the company offers information on various health topics, diagnosis and the symptoms, possible solutions for health strengthening and recovery, as well as useful tips.

Quality and Environmental Management

According to the international and Latvian standards LVS EN ISO 9001:2008 and LVS EN ISO 14001:2004, "Grindeks" has introduced Integrated Quality and Environmental Management System that covers all the operational areas of "Grindeks". This allows continuous improvement of business processes, providing our customers and consumers with high-quality and safe products, and regularly update and improve the product portfolio. This Management gives the systematic research of new products and markets and development of medicines; in its turn, the research of customer satisfaction and the services are essential for the increase of sales volume and as the means of obtaining feedback from the customers.

At "Grindeks" the Quality Director is responsible for the implementation and maintenance of the Latvian and international LVS EN ISO 14001:2004. In its turn, the Head of the Quality Management System Division is responsible for the implementation and maintenance the Latvian and international standard LVS EN ISO 9001:2008 implementation and maintenance. They are obliged to:

- provide development, implementation and maintenance of the Integrated Quality and Environmental Management System;
- Provide regular reports on the execution and performance improvement needs for the Quality and Environmental Management System.

The Quality, Safety and Environmental Policy of "Grindeks" proves the safety and quality of its products produced, as well as the quality of services provided. Research, development, manufacture and sales of active pharmaceutical ingredients and final dosage forms of "Grindeks" are organized so as to ensure quality and safety of products, as well as sparing effect on the environment.

The ground rules of the Quality, Safety and Environmental Policy of "Grindeks":

- Concerted actions by:
 - expectations of shareholders and employees;
 - expectations and satisfaction of customers;
 - laws and regulations and other requirements.
- Good practice principles and continuous monitoring of their execution.
- Ongoing operational improvements in:
 - Labour protection System;
 - Quality Management System according to LVS EN ISO 9001:2008 standard;
 - Environmental Management System in accordance with LVS EN ISO 14001:2004 standard.
- Continuous environmental impact reduction of production, products and services.

Quality, safety and environmental issues are regularly reviewed during the company's Board and Management meetings with the purpose to develop them, taking into account to market changes and customer expectations. The Quality, Safety and Environmental Policy is explained to all employees of the company. The company holds regular staff training, building a high level of environmental awareness.

"Grindeks" systematically carries out an environmental impact assessment, and the Division of Quality analyses monitoring indicators on a regular basis.

Environmental Management System

"Grindeks" monitors the impact on environment in the entire life cycle of its products – in research, development, production and sales, and invests more and more finances in the development and improvement of the production infrastructure. Development projects are designed to maximize environmental conservation and pollution prevention.

"Grindeks" is the "green thinking" company that in the created Environmental Protection System continuously seeks solutions for saving environmental resources. The company carries out regular environmental protection measures on the bases of assessment and the monitoring results of environmental impact.

Company's environmental protection policy or the component of operational framework is taking the following actions:

- environmentally friendly product or the "green" purchase;
- reduction of energy consumption;
- waste reduction;
- reduction of water consumption;
- reduction of emissions to air and atmosphere;
- reduction of raw material consumption per unit of production;
- reduction of the product impact on the environment, improving the product, its production and the innovation process.

"Grindeks" as the chemical manufacturer implements a responsible environmental policy for the long-term and systematic work on environmental protection.

According to the Cabinet of Ministers of the Republic of Latvia regulations No.294 of 9 July 2002 "On the declaration of A, B and C categories` polluting activities and on the procedure of giving authorizations of A and B category" (with amendments), the State Environmental Service`s Regional Environmental Authority of LielRīga issued "Grindeks" a class A license to the existing polluting activities on 1 November 2007.

Environmentally friendly product or the "green" purchase

Effective therapeutic agents and medications usually cannot be made from environmentally friendly products, and complex chemical products can be obtained only from other simpler chemical products. The company tests and evaluates the most environmentally friendly technologies and raw materials, and, if it is possible to get good quality medications using them, then environmentally friendly products are purchased, such as environmentally friendly solvents (water, alcohol, etc.), water-soluble and natural vegetable dyes, etc.

Reduction of energy consumption

"Grindeks" is proud for its achievements in reducing energy consumption. The following actions have been taken: the regulation of heat supply; the replacement of the old steam boiler and of ventilation equipment to more modern equipment; heat and thermal insulation of buildings and equipment; different organizational arrangements that allow to operate equipment more efficiently, etc. "Grindeks", improving existing and constructing new production sites, before starting a design and construction, especially evaluates and chooses the most optimal option of the planned heating, hot water and steam systems. All of the ventilation equipment of the company is gradually replaced to less energy-intensive systems.

Waste reduction

Waste reduction measures in "Grindeks" are taken by using the EU recommended best available techniques, the most significant of which is an increase in the reaction outcome of processes, thereby reducing waste. One such technique is the recovery of the used solvents and the valid component extraction from the liquid waste. Through small steps in the production of each product, significant results are achieved.

Waste, created in the production processes, is collected in groups. Hazardous waste is transferred to licensed disposal organizations, less hazardous – biologically cleaned in the wastewater treatment plant or recycled wherever possible. "Grindeks" is the partner of the Green Dot of Latvia, JSC "BAO" and other waste management organizations.

Reduction of water consumption

At "Grindeks" water consumption reduction has achieved significant results. According to the company's environmental plan, in 2009 a modern biological sewage purification plant was put into operation, in which in the environmentally friendly manner wastewater of the company's plants are purified, thereby "Grindeks" no longer uses chemical and energy-intensive treatment types – wastewater dilution with water, to reduce concentration of chemical substances to the standards set by law.

The concept of the industrial sewage purification plant is currently one of the most modern concepts confirming that pharmaceutical industry and development of the company is consistent with careful attitude to nature. The technologically modern purification plant is a purposefully planned investment project, so that upon increasing production capacities we could not only ensure the growth of the turnover of "Grindeks", but also efficiently take care of the environmental protection. Construction of the "Grindeks" industrial sewage purification plant was implemented within two years. New, closed-type purification systems not only ensure the removal of pollution from wastewater, but also help to eliminate the spreading of the smells characteristic to such systems. A laboratory is also established in the purification plant where the wastewater analyses and the result monitoring are made.

"Thinking Green" and environmental initiatives provide business opportunities – in the future, "Grindeks" plans to develop and expand sewage investigation in the laboratory of purification plant, as well as provide sewage purification modelling services to other industrial companies.

In 2010 "Grindeks" installed collection and treatment facilities of artesian water, and with that the drinking water is no longer used for the technical needs, used to use mainly in the chemical plant for cooling the equipment. In this system the water is returned to the pool, chilled and re-used.

Reduction of emissions to air and atmosphere

"Grindeks" takes measures to reduce emissions into the air and atmosphere. The company carries out the replacement of ozone depleting refrigerating agents in the refrigeration equipment - production technologies are being redesigned, without using ozone-depleting solvents (carbon tetrachloride, chloroform) in the manufacture and to make a significant reduction of other environmentally unfavourable solvents. Closed equipment prevents the release of dust into the atmosphere, to the equipment and dust filters, the receivers of acid gases and solvent vapour are installed to the possible emission sources. These receivers also prevent odours from spreading. Even the wastewater treatment takes place in closed containers and all the emissions from the treatment plant are absorbed, so it does not feel the open-treatment plant characteristic odour.

Reduction of raw material consumption per unit of production

To minimize the production process of raw material consumption per unit of production, "Grindeks" makes substantial waste reduction measures. Particularly effective is the recurrent use of the recovery of solvents - which have the greatest impact on the environment. There are production sites, where the fresh and the recovered solvent ratio, used in the process is from 1:5 to 1:20.

"Grindeks" and Society

Like other socially responsible companies throughout the world, "Grindeks" has voluntarily undertaken to help improve the social and environmental problems of the society. In addition to developing its business, "Grindeks" also allocates funds for the sustainability of society.

"Grindeks" is a reliable social partner, supporting the development of educated, healthy and cultural society. The management of the company believes that the society is entitled to expect support from the successful, financially stable and positively oriented companies, and this position is one of the basic concepts of the development of "Grindeks".

Sponsorship and Society Support Policy

The company has developed the Sponsorship and Society Support Policy that determines evaluation criteria and procedures of sponsorship and support by the company. The aim of the Sponsorship and Society Support Policy is to promote the formation of educated, healthy and cultural society.

"Grindeks" supports projects that target particular groups of the society, thus, emphasizing the strengthening of relationship and loyalty with these groups. The main target audiences are:

- doctors;
- pharmacists;
- public opinion makers.

"Grindeks" major sponsorship and support areas are:

- promotion of medicine and health;
- education and science;
- culture;
- charity.

"Grindeks" can also support the sponsorship of projects that are socially active, environmentally friendly and could draw wide public attention.

"Grindeks" sponsorship policy does not support:

- individuals, families or individuals in the fields of sport and culture;
- religious and political activities or organizations;
- tourist trips.

"Grindeks" sponsorship and support activities are carried out strictly observing the Law on Promotion of Medicines as well as the Code of Ethics.

In 2009 "Grindeks" continued implementation of various social activities and support projects under its Sponsorship and Society Support Policy, which priority is the projects in pharmacy and other projects related to this area. The employees of the company are regularly invited to participate in the society support programs of donation/charity, not related to the professional scope of activities.

Support of Science and Education

"Grindeks" is one of the few Latvian enterprises, providing practical support to the development of science and education in Latvia. The company's dialogue with the society accomplishes by investing in the activities of "Grindeks" Foundation "For the Support of Science and Education", supporting organization of conferences and publishing of literature of the pharmaceutical sector, explaining the educational and career opportunities in science, organizing excursions and sponsoring projects in sports and charity.

In 2009 a number of important steps are made to support and promote education in engineering and natural sciences and pharmacy, as well as to dignify the Latvian and foreign scientists and teachers for the achievements and contributions in the manufacture of new pharmaceutical products and for the research of the Latvian history of pharmacy, and for the merits in the development of the Latvian pharmacy and "Grindeks". Over the years, "Grindeks" has established close cooperation with the Latvian educational institutions – thus during 2009 the company was attended by 996 students on excursions, while 100 students went on praxis.

Communication

"Grindeks" appreciates the principle of openness and transparency, therefore, develops extensive internal and external communication activities. For communication with audiences, the company uses integrated methods of communication, including advertising, public relations, event marketing, interactive communications, etc. At the same time, the company complies with the restrictions, which prohibit the advertising of prescription medicines to the broad audience.

"Grindeks" regularly participates in the social events and actively informs the public on the business news - medications, achievements, performance results, etc. This helps not only to increase the total turnover, but also to strengthen "Grindeks" brand and to promote public awareness of health issues. Product promotion activities in the market are complemented by informative and educational articles in specialized publications. Seminars are held for physicians and pharmacists, in which, clients of "Grindeks" can find product news, can obtain fresh information on the health sector in general and exchange views. Cooperation partners regularly receive the company's newspapers in the electronic and paper format. To improve the company's operations, "Grindeks" encourages and receives feedback from stakeholders, including physicians, end users, etc. "Grindeks" as a socially active company actively speaks at conferences, and regularly receives visitors from foreign embassies, the existing and potential partners, as well as organizes excursions around the company to pupils and students of the field, pharmacists and others interested.

Latest information on the company is regularly inserted on the web site of "Grindeks" www.grindeks.lv, in which the information is posted in Latvian, Russian, English and Spanish.

"Grindeks" regularly carries out sociological studies to determine the society's attitude towards the company. Similarly, the company always responds to the public on the issues at stake - by phone or writing letters of response. Various questions about the medications, shares etc. are often asked through the company's web site.

The company has introduced a computerized document management system that ensures compliance with legislation, the lifecycle of electronic documents and signatures, the traceability of operation to a particular employee, the necessary validation process and to determine each employee's role and responsibilities. The company has created an internal communications portal – Intranet.

Working Environment

Professional employees, who use their knowledge and skills to achieve the set goals, are the main value and the factor of success of the company. "Grindeks" is aware that skills of the employees, their creativity, ability to create ideas and new products are the key factors to develop the business. Therefore "Grindeks" pays much attention to the work environment.

In its daily work, "Grindeks" undoubtedly observes internationally recognised human rights, respects the principle of equality of genders, religions, cultures, races and ethnical groups, freedom of speech, association and assembly.

Occupational Safety and Health System

The issues of the working environment and safety "Grindeks" solves methodically, and they are integrated into the work process. The company has established successful cooperation with several educational institutions, setting up training programs for youth that provides practical skills and prepare for many professional and skilled workers.

Labour safety issues in the JSC "Grindeks" are solved methodically and integrated in the work process. We have established successful cooperation with several education establishments, by creating training programmes for the youth that secure acquirement of the practical skills and prepare more professional and skilled young employees.

The company has a comprehensive working environment risk reduction system, involving the management and covering nearly all processes. Each employee of "Grindeks" is involved in the system of labour safety and can report for improvements on the working environment and conditions. The company organizes the Healthy Working Environment Day, in which the company's board members, directors, department managers meet with their department staff to discuss working conditions, working environment risk reduction plans and priorities for work to be done.

In order to avoid exposure of dangerous chemicals to workers, the documentary procedure of working environment risk evaluation is developed, which includes all of the results of the risk tracking and recording, as well as labour safety and health activities planning and impact monitoring.

At the end of 2008 at "Grindeks" Business Continuity Management Process was developed, which aim is to ensure safe and flexible business environment that is able to promptly and effectively respond in a case of a major incident. It promotes rapid restoration process of operation and helps to protect assets and company reputation. The process includes a rapid response plan, a crisis management and communication plan and recovery strategies. To ensure continuity of business operations, in 2009 the company introduced the Crisis Management and Communication Plan. Its purpose is to ensure that crisis management is structured and transparent. The plan defines the problem areas, issues which may be confronted with a high probability.

Understanding attitude and support of "Grindeks" management together with the involvement of each employee is a warrant of occupational safety and health (OSH) system success leading to continuous improvements to promote safe and health- friendly workplace.

It is not only the objective of OSH Development Programme 2007-2010 of Latvia but is one of the main conditions for sustainable development of "Grindeks", too.

On the company's website www.grindeks.lv, the detailed material on Occupational Safety and Health System at "Grindeks" is possible to access in the section "Environment. Quality. Safety."

"Grindeks" has received a Note of Acknowledgement for permanent and effective participation in the Latvian State Labour Inspectorate competitions, and has been nominated for participation in competition of the European level on the work environment risk evaluation and reduction. In 2007 "Grindeks" received the European Good Practice Award on the subject of occupational safety.

Quality and environmental protection

Future expectations

Management Report

In 2009 the Group of "Grindeks" consisted of JSC "Grindeks" and its four subsidiaries: JSC "Tallinn Pharmaceutical Plant" in Estonia, JSC "Kalceks", "Namu Apsaimniekošanas projekti" Ltd. in Latvia and "Grindeks RUS" Ltd. in Russia (altogether hereinafter referred to as "the Group"). The main activity of the Group is research, development, manufacturing and sales of original products, generics and active pharmaceutical ingredients.

Kirovs Lipmans
Chairman of the Council

Jānis Romanovskis
Chairman of the Board

Group's activity during 2009

The Group's turnover amounted to 53.6 million lats in 2009, which is by 8.5 million lats or 13.7% less than in 2008. In its turn, the net profit related to the shareholders of the holding company, amounted to 3.6 million lats in the accounting period, which is by 60% less in comparison with 2008.

In 2009, the gross profit margin of the Group was 49.8%, whereas, net profit margin comprised 6.7%. Products of the Group, manufactured during the accounting period, were exported to 44 states worldwide for the total amount of 50.8 million lats, which is by 8.5 million lats or 14.3% less than in 2008.

In 2009 ROE was 7.2%; ROA was 6.5%; liquidity was 2.25.

The main factor, which essentially influenced the turnover of the Group and the decrease of the profit, comparing to 2008, was the global economic recession, which stimulated overall decrease of consumer purchasing power and thereby also the decline in demand for both: "Grindeks" final dosage forms and active pharmaceutical ingredients in the veterinary product market. Also the results of the Group were influenced by devaluation of the national currency in Russia and several other CIS countries. Additional load was caused by changing the rules of the pharmaceutical market last year – the tendency of distributors to decrease the medical supplies in storehouses and to postpone the previously agreed purchasing terms.

Summer months of 2009 were the least profitable, however since the fourth quarter of 2009 and in the beginning of 2010 there is a positive increase in demand of "Grindeks" goods.

Sales of final dosage forms

The Group's sales volume of the final dosage forms was 48.2 million lats in 2009, which is by 8.7 million lats or 15.2 % less compared with 2008. In 2009 the sales volume of final dosage forms to the CIS countries, including Russia, which are the main markets of the final dosage forms, comprised 41.9 million lats.

In 2009 the biggest decrease of the sales of final dosage forms was observed in Belarus, Kazakhstan and Russia. Purposefully strengthening the marketing and sales activities, there have been positive changes in Russia and Kazakhstan starting from last October. In its turn, in Belarus, where the foreign currency reserves have decreased significantly and the import of medications is limited essentially, the situation has not changed yet.

In the environment of the tense economic situation the turnover in the Baltic States and in other European countries was 6.3 million lats in 2009, which is by 2.2% more than in 2008.

Sales of active pharmaceutical ingredients

The main export markets for active pharmaceutical ingredients (hereinafter referred to as "APIs") produced by the Group are Europe, Japan, the USA, Australia, Pakistan and India. Overall APIs export amounted to 5.3 million lats in 2009, which is by 3.9% more than in 2008.

"Grindeks" concluded a multi-degree and long-term cooperation agreement with the German pharmaceutical company "Marenis Pharma" and introduced in production a new API – ursodeoxycholic acid (UDCA), which is used for manufacturing of final dosage forms in the treatment of hepatic and gallstone diseases.

Investment program

In January of 2009 "Grindeks" opened a new final dosage forms' plant, which is the most considerable investment project in the history of the company. Expansion and modernization of the final dosage forms plant was performed within 2 years and 9.1 million lats were invested in total.

In June of 2009, taking care of the protection of environment, "Grindeks" opened a new industrial sewage purification plant, where the principle of biological purification is implemented and the most modern technologies installed. Principle of biological purification is the most modern and environmentally friendly way of sewage purification in the chemical industry. In total, 2.5 million lats were invested in the project.

In order to ensure regular development and manufacturing of the UDCA API, "Grindeks" has started construction of a new manufacturing unit. The construction will be completed in 1.5–2 years and it is planned to invest almost 6 million lats in it.

In 2009 "Grindeks" continued and in 2010 successfully finished an international clinical trial on the influence of the brand product Mildronate® on the treatment of angina. Results of the just-finished multinational clinical trial once more approve effectiveness and the high safety of Mildronate® in the treatment of angina in combination with the standard therapy. Results obtained will promote sales and registration of Mildronate® in new markets. "Grindeks" altogether invested 1.6 million lats in this research.

Quality and environmental protection

In 2009 "Grindeks" successfully passed 23 significant inspections and audits by Latvian and foreign state agencies of medicine and supervisory bodies of food supplement manufacturers, clients and institutions of environmental protection. Audits of ISO9001 and ISO14001 recertification were performed successfully, as well as the Shared Third Party Audit by Certified Auditors of Active Pharmaceutical Ingredient Committee (APIC) on the request of "Grindeks" APIs' customers. "Grindeks" is accepted as a supplier for 3 APIs – Droperidol, Oxytocin and Xylazine. In 2009 "Grindeks" implemented the newest requirements of the European Union legislation in the field of pharmaceutical manufacturing – yearly product quality reports are issued, several quality agreements with contract manufacturers are concluded, as well as analysis of the medication quality are performed by the most modern methods that are 2–4 times more effective than previously.

Future expectations

Overcoming the global economic recession of 2009, in 2010 "Grindeks" plans to regain the increment rate of the previous years. Therefore, to organize effectively the diverse pharmaceutical business and to achieve the business goals, "Grindeks" tactics will be:

- flexible approach in the changing market situation;
- cooperation with the secure business partners in every separate market;
- strict control of expenses, as well as optimization of manufacturing and resources;
- determined diversification of business actions:
 - introduction of new products;
 - entrance into new markets;
 - increase of production capacity, offering manufacturing services to other companies;
- investments for future – new business projects, research, development of medications.

"Grindeks" is aware that the saving of resources and cost reduction will be a high priority in the coming years. But it must not affect the company's development! Skilfully balancing the business needs, opportunities and challenges, the business objectives will be achieved!

"Grindeks" employees and the business partners – thank you for the investment in the company's growth and development!

About Company

"Grindeks" is the leading pharmaceutical company in the Baltic States with long extensive experience in the research, development, manufacture and sale of both original and generic medications as well as active pharmaceutical ingredients in more than 40 countries worldwide. Its operation is vertically integrated and the company has all the necessary resources to perform the complete product development cycle using its own resources, from research and development of medications to registration and sales of the ready-made product.

The geographical location of "Grindeks" in Latvia is a great advantage. We are a bridge between Europe and the East, which allows us to save on logistics costs by delivering products in both directions.

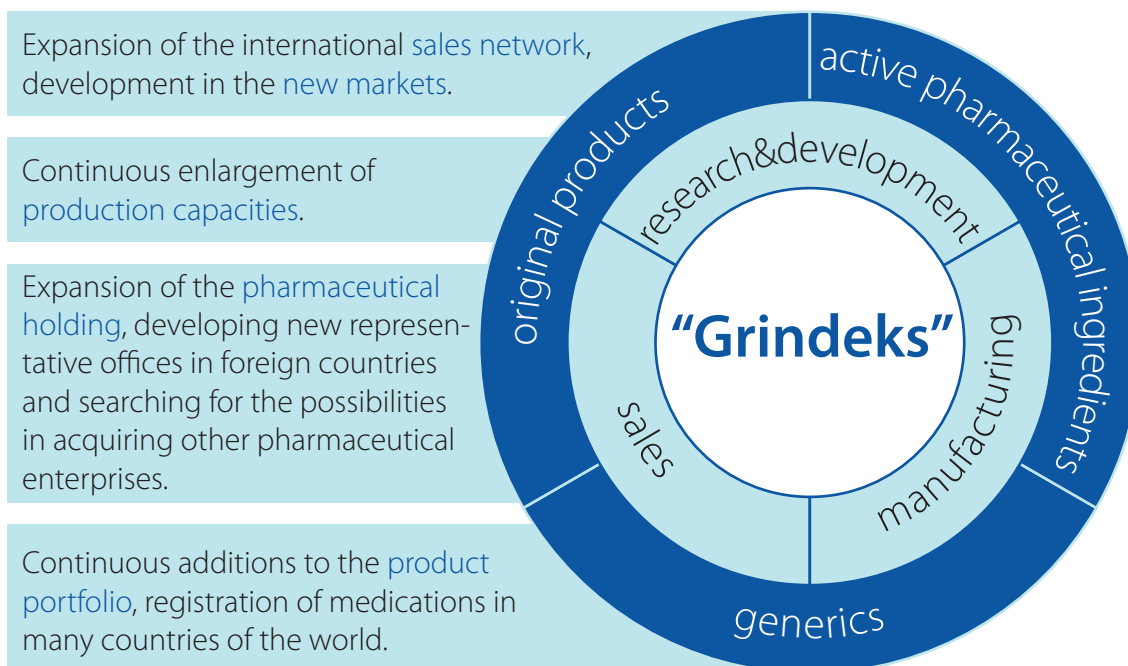

The business philosophy of the company is closely related to the values facilitating the development of "Grindeks", promoting competitiveness and establishing the internal culture of the company.

Performance characteristics of "Grindeks":

- **Vertical integration of operational processes** to ensure complete development of the product by its own resources;
- **Technological supply** – with regard to technologically advanced equipment, "Grindeks" is among the leading world companies;
- **Brand products** – "Grindeks" manufactures qualitative brand products by using intermediately priced services and intermediately priced raw materials;
- **Relations with science** – close cooperation with the Latvian scientists, as well as traditional ties with the Russian scientists and scientists in other CIS countries whose high level of knowledge is beyond question;
- **Broad specialization, knowledge, practical experience and flexibility.**

Factors facilitating development of "Grindeks":

- Meeting high international standards;
- Broad knowledge and experience throughout the product life cycle;
- Highly qualified personnel;
- New and modern technologies;
- Quality assurance according to international requirements (GMP, GLP, FDA, TGI, APIC etc.);
- Traditions of close cooperation with scientists and manufacturers in Latvia, Russia and other CIS countries;
- A network of representative offices in the Baltic states and CIS countries, and cooperation partners in Europe and elsewhere in the world.

Mission

We are concerned about public health, employee motivation and welfare of our shareholders.
We are innovation based and environmentally friendly company.

Vision

We aim to become a significant European company.

Values

- **Employees** – we are professionals using our knowledge and skills to achieve the determined goals.
- **Quality** – we are responsible for the production of safe and effective medicine, ecologically clean environment and work place safety.
- **Innovations** – we are steering development of science and research, as well as implementing latest technologies.
- **Stability** – we are reliable partners, socially responsible and honouring traditions.

INDEPENDENT AUDITOR'S REPORT

To shareholder of JSC "Grindeks"

Report on the financial statement

We have performed the audit of JSC "Grindeks" (hereinafter - Company) financial statements for the year 2009 and the consolidated financial statement of JSC "Grindeks" and its subsidiaries (hereinafter - Group) for the year 2009 incorporated in the consolidated annual report of Company for the year 2009, which is presented on pages from 9 to 37. The audited financial statements comprise the balance sheet as of 31 December 2009, the profit or loss account for the year 2009, the report on the changes in equity and the cash flow statement for the year ended December 31, 2009, as well as a summary on the relevant accounting principles, as well as other explanatory information presented in the Appendix.

Management responsibility on the presentation of the financial statement

The management of JSC "Grindeks" is responsible for drawing up of the financial statements and accuracy of the information contained in the said report presented pursuant to the International Financial Reporting Standards as adopted by the European Union. This responsibility implies establishment, implementation and maintenance of such internal control that is to ensure the drawing up and true and fair presentation of the financial report that is free from material misstatement resulting from fraudulent activity or errors, selection and use of an appropriate accounting policy, as well as preparation of accounting estimates suitable in the particular conditions.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We performed the audit in accordance with the International Standards on Audit recognized in Latvia. These standards stipulate ethical norms to be observed by the auditor and require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free from material misstatement.

The audit includes procedures undertaken to obtain audit evidence on the amounts presented in the financial statements and the information disclosed. The procedures are selected based on the auditor's professional judgement, including assessment of risk of fraudulent misrepresentation or material discrepancies in the financial statement. When performing risk assessment, the auditor takes into account internal control established to ensure the drawing up of the financial statements and accurate presentation of information in the reports aimed at determining the most appropriate procedures in the particular situation, rather than expressing an opinion on the efficiency of control. The audit also includes general evaluation of whether the applied accounting principles and relevant management assumptions, as well as the information presented in the financial statements are reasonably justified.

We believe that the disclosures made in the course of our audit are sufficient and adequate to express our auditor's opinion.

Opinion

In our opinion, the financial statements referred to above in all material aspects present a true and fair view of the financial position of the Company and the Group as of December 31, 2009, and of the results of its financial performance and cash flows for the year 2009 in accordance with the International Financial Reporting Standards as adopted by the European Union.

Report on the conformity of the management report

We have familiarised ourselves with the management report for the year 2009, which is presented on pages from 5 to 7, and have not disclosed any material discrepancies between the financial information presented in the management report and the financial statements for the year 2009.

Products

Brand products

Generic medications

Active Pharmaceutical Ingredients

Products

"Grindeks" specializes in the heart and cardiovascular, CNS and anti-cancer medication therapeutic groups. There are more than 100 ready-made medications in the company's product range – two brand products Mildronate® and Ftorafur® and generic medications. Important place in the company's product range is also for its active pharmaceutical ingredients.

Brand products

Mildronate®

The brand product Mildronate® is the most popular medication of "Grindeks" of the cardiovascular group of agents. Its unique property means this medication can be used for the treatment of different cardiovascular diseases such as heart failure, infarction, stenocardia and thrombocytopenia, as well as for prophylactic purposes in cases of physical and mental strain and during rehabilitation periods. The medication is available in capsules and injections.

The highest demand for Mildronate® is in Russia and other CIS countries, while in Latvia it has been acknowledged as the most exportable product in the non-food product group for several years.

In the beginning of 2010 "Grindeks" successfully finished a clinical trial on the influence of the brand product Mildronate® on the treatment of angina. The clinical trial was carried out in the cooperation with the experienced clinicians, scientific experts and international contract research organisations corresponding with the ICH/ GCP (Good clinical practice) and the EU legislation for the clinical trials of I – IV phases. A randomized, multinational, multicenter, double blind, placebo-controlled clinical trial with Mildronate® was performed in 37 research centres in Latvia, Lithuania, Russia and Ukraine. Results of the just-finished multinational clinical trial once more approve effectiveness and the high safety of Mildronate® in the treatment of angina in combination with the standard therapy.

Ftorafur®

The second most popular "Grindeks" brand product Ftorafur® is an oncological medication used for the treatment of gastric and colorectal diseases. Ftorafur® plays an important role in the total sales volume of products of "Grindeks" as one of the most important export medication. For over 30 years, Ftorafur (Tegafur) has been successfully exported to Japan, and promotional activities are being developed in the European markets, Russia and other CIS countries.

The research and development activities of "Grindeks" have also been aimed at the improvement of this product by developing possible combinations with other medications.

Generic medications

In addition to Mildronate®, "Grindeks" also offers medications needed by patients and physicians such as Karvidil®, Simvalimit®, Lizinopryl and Warfarin for treatment of cardiovascular diseases and others.

In 2009, several registration processes of medications were continued in order to expand the supply of oncological group products of "Grindeks". In 2009 a new generation medication for the treatment of progressive breast cancer in post-menopausal women Axastrol® was successfully promoted.

Among the most important medications is the sleep medication Somnol® and other effective psychotropic group agents – Alprozolam, Betamaks® and Venlaxor. One of the most successful medications in this therapeutic group is Rispaxol® – a qualitative new generation product for the treatment of schizophrenia.

The group of over-the-counter products is focused on the development of ointments and analgesic/anti-inflammatory agents. Highly popular products are the ointments Capsicam® and Viprosal B®, as well as the natural health tonic Apilak is popular among the buyers. In the second half of 2009 “Grindeks” began to offer an effective adsorbent “Sorbex” – which is an effective means for absorption and removal of toxic compounds from the human body. At the end of 2009 the company launched the medication Rimantadine-Grindeks, which is a powerful and recognized antiviral product for the treatment of seasonal influenza.

Active Pharmaceutical Ingredients

Active Pharmaceutical Ingredients (APIs) are an integral element of “Grindeks” products. They are manufactured for both further manufacturing of final dosage forms within the company, and for sale to other pharmaceutical companies around the world, mainly in Western countries.

The company offers intricate products created as a result of multi-stage synthesis, diversifying and making the portfolio of APIs products more attractive year by year. At present, “Grindeks” manufactures 16 types of active substances. The most popular products are Ftorafur (Tegafur), Zopiclone, Oxytocin, Rilmenidine and the new veterinary products Detomidine, Medetomidine and Atipamezole.

Registration of Zopiclone and Oxytocin APIs in accordance with the requirements of European Pharmacopoeia provides export opportunities to the European Union (EU) member states. Both of these substances manufactured by “Grindeks” have been registered in the European Directorate for the Quality of Medicines (EDQM).

Since the beginning of 2009 “Grindeks” has taken part in a joint international project “Oxytocin in Uniject™” conducted by the international non-profit organization PATH and the Argentine pharmaceutical company “Instituto Biológico Argentino S.A.I.C.” Within the scope of the project “Grindeks” is chosen to be a collaboration partner, who produces and supplies Oxytocin API. “Oxytocin in Uniject™” is an innovative non-reusable injection device prefilled with a single dose of Oxytocin.

In the second half of 2009 “Grindeks” introduced a new active pharmaceutical ingredient – ursodeoxycholic acid (UDCA), which is used for production of final dosage forms in the treatment of hepatic and gallstone diseases. Introduction of the UDCA product will diversify business activity of “Grindeks”, extend the product portfolio, as well as the development opportunities within a completely new medical therapeutic group for the company – gastroenterological diseases. In accordance with the concluded agreement, 30t of UDCA substance will be delivered by “Grindeks” in 2011. In general, it will considerably extend and even double the APIs business of “Grindeks”.

The high quality of “Grindeks” APIs is confirmed by the Good Manufacturing Practice (GMP) certificate issued by the State Agency of Medicines of Latvia and the opinion of the U.S. Food and Drug Administration on conformity of the standard for the entire API's production unit, as well as the opinion of the API's Committee of the European Federation for Medicinal Chemistry (APIC) on conformity of production unit of “Grindeks” with the EU guidelines (ICH Q7A). The opinion of the Therapeutic Goods Administration (TGA) is of great importance for the opportunity to export Zopiclone API to Australia.

Production

Final Dosage Forms

Active Pharmaceutical Ingredients

Production

The great experience of "Grindeks" in a full cycle of pharmaceutical manufacturing, starting from substances up to final dosage forms, demonstrates the company's ability to organize the multidimensional pharmaceutical business diversely.

Final Dosage Forms

Production of "Grindeks" final dosage forms – tablets, capsules, injections, ointments and syrups – takes place both in Latvia and abroad. Tablets, capsules and syrups are produced by "Grindeks" in Latvia, while "Grindeks" subsidiary company in Estonia, the "Tallinn Pharmaceutical Plant", has specialized in ointments.

In January 2009, "Grindeks" opened a new final dosage forms plant. It was built next to the previous plant and completely integrated with the existing plant. Enlargement and modernization of the plant was carried out over two years, with 9.1 million lats invested in total. Thanks to this ambitious project, productivity and production capacity will be substantially increased. It will be possible to produce 1.5 billion tablets and 500 million capsules in the new plant. The total area of the new final dosage forms' plant of "Grindeks" is 5,500 m². The production processes meet Good Manufacturing Practice and ISO quality standards, which guarantee the overall safety and quality of the produced medications. A modern automatic monitoring system has been mounted in the new plant to check the microclimate in the premises, operation of the engineering systems, and for monitoring other production processes. It also provides significant savings on utilities, while the modern and high-powered technological equipment ensures convenient, safe, efficient and environmentally friendly production.

Production of injections, in accordance with agreements concluded, is organized in the pharmaceutical companies of "Sanitas" in Lithuania, "Jelfa SA" in Poland and "HBM Pharma" in Slovakia.

Active Pharmaceutical Ingredients (APIs)

The APIs' plant of "Grindeks" covers an area of approximately 10 000 m². High-quality APIs are produced in reactors of various volumes (from 100 to 4,000 litres) for both the final dosage forms' plant of "Grindeks" and for export to clients abroad.

Due to the targeted investments, the volume of production has doubled over the last five years. The current maximum capacity of the production of APIs is 150 tons a year. In 2009, supplies to the final dosage forms' plant of "Grindeks" exceeded 67 tons of APIs, while seven tons of substances were manufactured for export.

"Grindeks" has all the necessary resources to provide contract research and contract production services for APIs.

New Export Markets

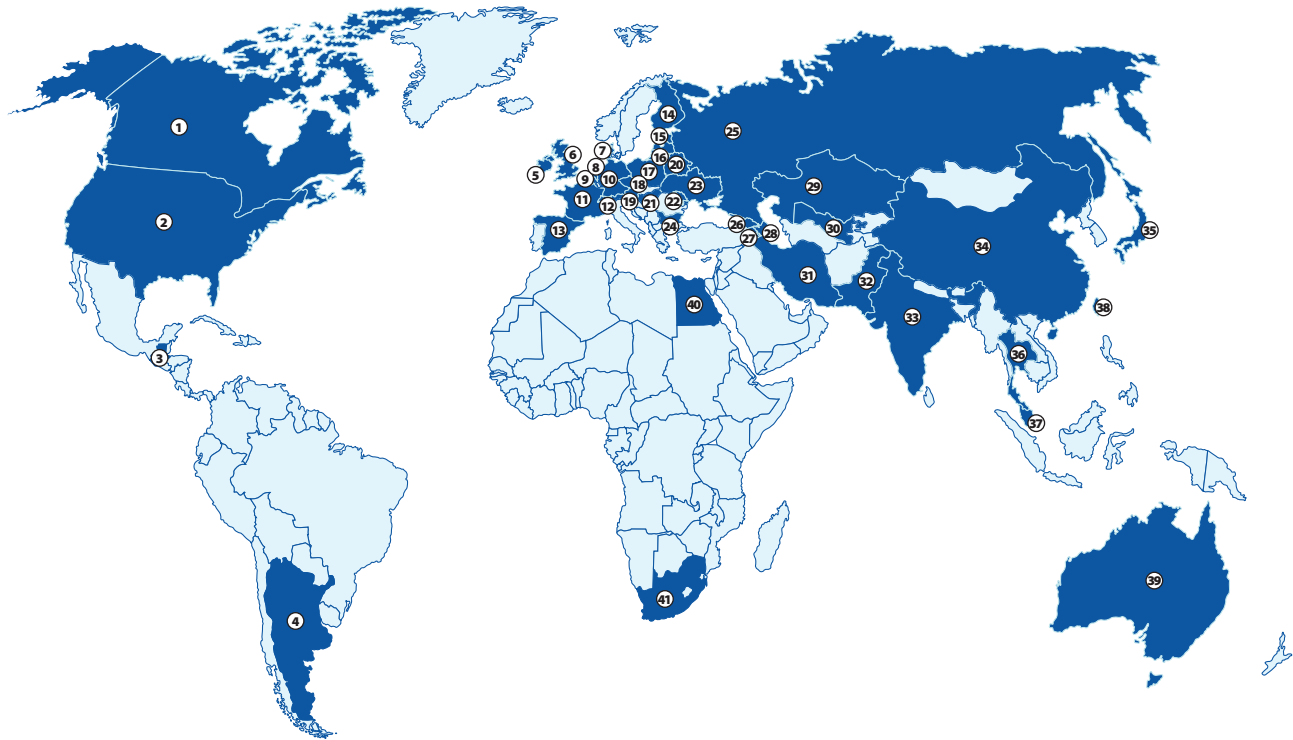

Markets

The international operations of "Grindeks" are developing in both manufacturing, and trade, and currently 96% of the total turnover is exported. "Grindeks" products are exported to more than 40 countries.

The representatives and representative offices of "Grindeks" operate in 14 countries. The subsidiaries and representative offices are located in Lithuania, Estonia, Russia, Kazakhstan, Ukraine, Belarus, Moldova, Georgia, Azerbaijan, Uzbekistan, Poland, the Czech Republic, Hungary and Armenia.

Main export markets of "Grindeks"

- | | | | | |
|--------------------|-----------------|------------------------|----------------|------------------|
| 1. Canada | 9. Belgium | 17. Poland | 25. Russia | 33. India |
| 2. The USA | 10. Germany | 18. The Czech Republic | 26. Georgia | 34. China |
| 3. Guatemala | 11. France | 19. Austria | 27. Armenia | 35. Japan |
| 4. Argentina | 12. Switzerland | 20. Belarus | 28. Azerbaijan | 36. Thailand |

| 8. The Netherlands | 16. Lithuania | 24. Bulgaria | 32. Pakistan | 40. Egypt |
| | | | | 41. South Africa |

Markets for Final Dosage Forms

The sales volume of "Grindeks" ready made medications amounted to 48.2 million lats in 2009, which is by 8.7 million lats or 15.2% less, comparing to 2008. In 2009 the export volume of the ready-made medications to the CIS countries, including Russia, which are the main markets of the ready made medications, was 41.9 million lats.

In 2009 the biggest sales decrease of ready made medications was in Belarus, Kazakhstan and Russia. Purposefully strengthening marketing and sales activities, starting from October 2009, the results show positive changes in Russia and Kazakhstan. By contrast, in Belarus, which substantially reduced the national international monetary reserves and increased imports of medications is limited, the situation has not changed.

In 2009, in the strained economic circumstances, the turnover in the Baltic states and other European countries was 6.3 million. lats, which is an increase of 2.2% over the previous year.

Markets for Active Pharmaceutical Ingredients (APIs)

The main export markets of "Grindeks" APIs are Europe, Japan, Canada, the USA, Russia and Pakistan. In 2009, exports of APIs stood at 5.3 million lats, which is by 3.89% more than in 2008.

"Grindeks" maintains a position with 31% of the world markets for exports of Zopiclone and Oxytocin, while exports of the new veterinary substances to the EU member states comprise 28% of the total EU market. In its turn, thanks to the long-term cooperation agreement on UDHS production and delivery, as of 2014 "Grindeks" plans to capture about 15% of the global market.

The main cooperation partners are "Taiho Pharmaceutical" (Japan), "GDL International" (the USA), "Bimeda" (Canada) "Mylan" (France, Ireland), "Eurovet Animal Health" (the Netherlands), "Marenis Pharma" (Germany).

New Export Markets

The marketing strategy of "Grindeks" has hit its mark, and the company will concentrate on both retaining existing markets, and entering promising new markets such as China and Turkey and smaller Southeast Asian markets like Vietnam. In 2009, registration of medications was continued in China and registration of the brandname Mildronate® was started in Vietnam.

Currently, the company purposefully expands its activities in the regions of Eastern Europe, the Balkans, and the Scandinavia. We have started to export final dosage forms to Romania, Slovakia, Albania, Kosovo, Sweden and Finland.

Investment Program

Investment Program

Final dosage forms' plant

In January of 2009 "Grindeks" opened a new final dosage forms' plant, which is the most considerable investment project in the history of the company. Expansion and modernization of the final dosage forms' plant was performed within 2 years and 9.1 million lats were invested in total.

Industrial sewage purification plant

In June of 2009, taking care of the protection of environment, "Grindeks" opened a new industrial sewage purification plant, where the principle of biological purification is implemented and the most modern technologies installed. Principle of biological purification is the most modern and environmentally friendly way of sewage purification in the chemical industry. In total, 2.5 million lats were invested in the project.

Construction of UDCA manufacturing unit

In order to ensure regular development and manufacturing of UDCA API, "Grindeks" has started construction of a new manufacturing unit. The construction will be completed in 1.5–2 years and it is planned to invest almost 6 million lats.

International clinical trial on the influence of the brand product Mildronate® on the treatment of angina

In 2009 "Grindeks" continued and in 2010 successfully finished an international clinical trial on the influence of the brand product Mildronate® on the treatment of angina. Results of the just-finished multinational clinical trial once more approve effectiveness and the high safety of Mildronate® in the treatment of angina in combination with the standard therapy. Results obtained will promote sales and registration of Mildronate® in new markets. "Grindeks" altogether invested 1.6 million lats in this research.

Quality

Quality Management System

Technological supply

Inspections, audits and quality certificates

Quality

Quality requirements in the field of pharmacy and Good Manufacturing Practice (hereinafter – GMP) increase every year, therefore “Grindeks” continued to improve its operations in this sphere during 2009.

Quality Management System

The integrated Quality Management System of “Grindeks” covers all stages of the product life cycle: research, development, production, quality control, sales, as well as labour and environmental monitoring.

The Quality Management System has been certified since 2006, while in the spring of 2009 the Quality Management System was recertified in accordance with the new version of LVS EN ISO 9001:2008 and a new certificate received.

In the enterprise special attention is paid to the Business Risk Management, which aims to provide a structured and planned business risk management process and to eliminate the possibility that certain events, action or inaction adversely affects the company's goals and strategy.

The company has introduced the Business Continuity Management Process, which is aimed at ensuring a safe and flexible business environment, capable of immediate and effective response in case of a major incident, facilitating fast business renewal process and protecting the resources and reputation of the company. The process includes a quick response plan, crisis management and communication plan and recovery strategies.

Thanks to the computerized Document Management System, which is implemented in the company's most strategically important fields, the circulation of documents has become more effective and more operative, because now the record and traceability of documents is better. The computerized Document Management System ensures document compliance with the law, electronic life-cycle of documents and signatures and the operation traceability up to the concrete employee, the necessary validation process and the determination of each employee's role and responsibilities.

Technological supply

For the quality control the obsolete devices of “Grindeks” are constantly replaced by new, more modern and more powerful equipment. Similarly, funds are invested in new equipment, measurement tools and methods. Equipment such as quadrupole mass spectrometric, light scattering and refractometric detectors or capillary electrophoresis and ultra-performance liquid chromatography are rare in many countries. However, this equipment is used by “Grindeks” not only for trials but also for routine monitoring of Mildronate®, Ursodeoxycholic Acid, Oxytocin and other products.

Inspections, audits and quality certificates

For the company the year 2009 was marked by more audits and inspections than in other years. Altogether “Grindeks” successfully passed 23 significant inspections and audits by the Latvian and foreign state agencies of medicine and supervisory bodies of food supplement manufacturers and audits by clients about compliance to the GMP of the entire company and of the manufacturing units. Especially significant were audits by the Latvian and the Belarusian pharmaceutical, food and veterinary inspection services and the European Union Shared Third Party GMP Audit by Certified Auditors of Active Pharmaceutical Ingredient Committee (APIC). “Grindeks” is accepted as a supplier for 3 active pharmaceutical ingredients – Droperidol, Oxytocin and Xylazine.

The Good Manufacturing Practice system in its initial implementation phase – in the 90-ies of the last century – mostly covered the ready-made medication production and control. But in 2009 its requirements and rules regulate not only almost all of the company's actions, but also give the company responsibility for the quality in the contract-organizations. In response to that pharmaceutical legislation's requirement “Grindeks” experts conducted more than 30 audits in the companies of cooperation partners and raw material producers, testing laboratories and printing-works, not only in Europe but also in China, India, Turkey and other countries.

Personnel Policy

Number of employees – 895
Employees with the university education – 60%
Average age – 43 years
Average service at the company – 9.6 years

The decreasing staff turnover, the increasing proportion of young, qualified employees, as well as high demand for internships at the company is the proof of the successfully realized Personnel Policy of “Grindeks” and good reputation as an employer.

The company has successfully introduced a Staff Management System, including a Staff Welfare Plan, Education, Structure and Absence modules, notifications by e-mail of the hiring or dismissal of an employee, structural changes, changes of position, employees’ birthdays etc., a Competence Administration and Development module etc.

The Personnel Policy of the company is implemented both in Latvia, and in the representative offices by applying modern IT solutions.

Personnel Policy

The main principles of the Personnel Policy are as follows:

- Working conditions in line with health and safety regulations and requirements of Good Manufacturing Practice;
- A well-organized work environment, technical supply required for the work (technologies, computer equipment, service cars, communications, etc.);
- Open information concerning development perspectives of the company, career and personal growth opportunities.

Production Relations' Policy

The Production Relations Policy also plays a major role in the company, including development of unified procedures and regular updates, optimisation of the work process and work assessment.

“Grindeks” provides a clean working environment meeting all health and safety and modern technical requirements, as well as enhancing career and personal growth opportunities for its employees in line with the development prospects of the company.

Performance of Work and Development Planning

The company performs professional assessment of employees on an annual basis, through assessing work competence in the preceding year and gathering information related to the needs of the employee training.

In 2009 a new competence models were developed for all 230 positions in the company. In 2009, employees will be assessed according to the new competence model. It includes a performance analysis, development planning and the particular job required competencies assessment.

The competence model is applied to:

- Selection of staff;
- Work performance management;
- Career planning;
- Determination of training needs and management of employee development;
- The wage system.

Raising Qualifications and Training Policy

Raising the professionalism of employees improves the competitiveness of the company. Close attention is paid to training and improvement of competence and qualifications. The further training and qualification of the workforce is planned in accordance with the strategic goals of the company by summarizing the training needs determined in the process of annual professional evaluation.

In 2009 the number of training classes per employee stands at 132.5 classes. Particular attention is paid to mastering new technologies, Good Manufacturing Practice issues, comprehensive quality leadership, as well as the principles of environmental protection. In addition to the resources of the company, in 2009 "Grindeks" winning in the competition of projects attracted the EU Structural Funds for the workforce training and raising of professional skills.

Salary Policy

"Grindeks" offers salaries and a competitive bonus system as well as project bonuses, meeting the requirements of the labour market and corresponding to the assessment of each employee.

Social Policy

The Social Policy for staff is of great importance for "Grindeks". It envisages social guarantees, benefits, employees' health and accident insurance, as well as extras like subsidised meals and lunches in the company's canteen, transportation and compensation for travel expenses.

The company also has a sport complex where employees can play basketball, volleyball, attend aerobics classes, use fitness equipment as well as relax in a sauna.

Relaxation from work can also be enjoyed at various events organised by "Grindeks". Singing Ligo songs on the eve of the summer solstice organized by "Grindeks" has become a tradition, while in winter it is possible to strengthen team spirit in the bowling tournament and other events.

Every year "Grindeks" nominates and congratulates the best employees. In its turn, the employees, who have worked in the company for many years, "Grindeks" awards with the silver badges – for 15 years of work at the company; and gold badges – for 25 years of work at the company.

Various thorny issues in the company are solved through a social dialogue, and the management of "Grindeks" is always open for negotiations with the employees' trade union, which has existed since the company was established. The conclusion of the collective agreement with employees before Christmas has become a tradition, providing staff with social guarantees exceeding those prescribed by the Labour Law, for example:

- leave considered as time at work for studies and examinations for employees of the company who successfully acquire higher education qualifications in specialities necessary for the company;
- three days paid leave (for marriage and for fathers in the event of childbirth);
- a special holiday for each employee.

New Employees

By organising the New Employee Days, "Grindeks" makes it easier for new employees to start work in the company. During the information day the employees are briefed on the operation of the company, the work of structural units, environmental, quality, health and safety and fire safety issues, and are also invited to go on a tour of the company's site and get acquainted with one another.

Qualifications Centre of Chemical, Pharmaceutical, Environmental industries and Biotechnology

Concerned about the potential employees and the skills of the existing employees "Grindeks", together with other Latvian chemical and pharmaceutical companies, is actively engaged in the project of the creation of the Qualifications Centre of Chemical, Pharmaceutical, Environmental industries and Biotechnology. This project aims at preparing qualified professionals. It is planned that this qualifications and examination centre will provide with education, and retraining of the professionals and educators, and its functions will include both the methodological work, and examination.

Communication Policy

Communication Policy

To facilitate the goals of "Grindeks", the company strategically and operationally implements internal and external communications. "Grindeks" communication strategy is characterized by: a unified communications platform in all countries; result-oriented communication activities; defined criteria for evaluation of communication activities.

In the company's external communication, a special role is given to the communication and the feedback of the company's important audiences – the pharmaceutical industry specialists, business partners, investors and the public in general. The company regularly provides information on current events to the stock exchange and the media. Comprehensive and up to date information about the company is always found in the company's website www.grindeks.lv, while the Russian speaking doctors and specialists can find the information about the company's Mildronate® in the specially created website www.mildronat.ru. The company regularly issues a newspaper "Grindeks для здоровья" (*Grindeks for Health*) and since April 2009 on a quarterly bases – "Grindeks Update" – an electronic issue in English.

To maintain close liaison with doctors, specialists and business partners, "Grindeks" participates in various conferences, seminars and exhibitions of the industry. For several consecutive years "Grindeks" participates with its stand in the main event of the industry – the international exhibition "CPhI".

Particularly important is communication with the employees of "Grindeks". To improve information flow, at the beginning of 2010 the company introduced intranet – the portal for "Grindeks" employees. However, an integral form of the communication of the company is also quarterly meetings, annual regional meeting of representatives and videoconferences.

To assess the effectiveness of communication with audiences, "Grindeks" carries out monitoring of publicity, sociological researches, analyzes the web site traffic, and evaluates the benefits and returns at the end of the communication projects.

Kaleidoscope 2009

Kaleidoscope 2009

January

- The President of the Republic of Latvia V.Zatlers and the Chairman of the Board of "Grindeks" K.Lipmans opens the new final dosage forms plant. 9.1 million lats were invested in the project in total.

February

- "Grindeks" participates in the Open Door Week, during which 180 pupils from different schools of Latvia attended the company.
- "Grindeks" participates in the project "Oxytocin in Uniject™", organised by the international organisation PATH and the pharmaceutical company from Argentina "Instituto Biológico Argentino S.A.I.C." "Grindeks" is chosen as a producer and supplier of an active pharmaceutical ingredient Oxytocin.

March

- Obtaining the European Union's Structural Fund co-financing "Grindeks" organises training and qualification rising projects for the staff.

April

- In Moscow a press conference takes place on the achievements of the use of Mildronate in the medical practice.
- For the Russian speaking doctors and specialists the special website on the brand product Mildronate® is created – www.mildronat.ru.
- In the beginning of April the first issue of "Grindeks Update" is sent out that is devoted to the English speaking collaboration partners and clients of "Grindeks".

May

- "Grindeks" participates in the 6th Baltic Congress of Neurology in Lithuania.
- "Grindeks" team wins the 2nd honorable place in a basketball tournament organized by the Pharmacists' Society of Latvia .

June

- The new industrial wastewater treatment plant, which is the most modern in the Baltics, was opened. In total, 2.5 million lats were invested in the project.
- "Grindeks" supports the sixth Medical Congress of Latvia, which brings together more than 2500 doctors from Latvia and other countries.

July

- For the second year in a row “Grindeks” was recognised as the best Latvian company listed in the Baltics and received “Baltic Corporate Excellence Award 2009”.

August

- “Grindeks” is visited by the Japanese delegation and the Ambassador of Japan in Latvia Takashi Osana.
- The 2nd international conference “Ftorafur® – in modern chemotherapy” takes place in Jūrmala.
- “Grindeks” in cooperation with the Ministry of Education and Science of Latvia and Mechanics and Technology College of Olaine develops new training programs.
- “Grindeks” successfully passes the regular GMP inspection by the State Agency of Medicines of Latvia.

September

- The Vice Premier of China in Latvia Hui Liangyu meets the Chairman of the Council of “Grindeks” Kirovs Lipmans and discusses the possibilities to quicken registration of Mildronate® in China.
- “Grindeks” starts the construction of the new Ursodeoxycholic Acid manufacturing unit. Almost 6 million lats will be invested in the project.
- “Grindeks” successfully passes the recertification audits of Quality Management (ISO 9001) and Environmental Management (ISO 14001) Systems.

October

- “Grindeks” participates in the largest pharmaceutical event exhibition „CPhI Worldwide 2009” in Madrid, Spain.
- For the first time “Grindeks” participates in the conference of the Russian Psychiatrists and Narcologists and organises the satellite symposium on the subjects of depression and sleep disorders.
- In the forum “Efficient Management and Partnership” “Grindeks” receives a Note of Acknowledgement for the implementation of the Principles of Corporate Governance in the company and for the effective Change and Financial Management.

December

- “Grindeks” receives an award for the best investor relations online in the Baltic states in 2009 at the ceremony of *The Baltic Market Awards*, organized by the Stock Exchange.

- “Grindeks” Foundation “For the Support of Science and Education” continued supporting and motivating students, teachers, scientists, and educational institutions in engineering, natural sciences and pharmacy.
