Dear readers,

Corporate responsibility is an integral part of the corporate culture and business activities of Bertelsmann AG. What distinguishes Bertelsmann from many other companies, however, is its decentralized organizational structure.

Bertelsmann is a global enterprise that employs some 100,000 people in over 50 countries. The principle of decentralization is an intrinsic component of our corporate philosophy, which has developed and proved its worth over a period of decades.

We at Bertelsmann are firmly convinced that the executives on the ground in each country and market are in the best position to know what is good for their business and their employees – but also what is good for the society in which they build and operate that business.

One thing is clear: a company's decentralized structure can only function properly on a foundation of common values. The Bertelsmann Code of Conduct, which was introduced at the end of 2008, provides

binding guidelines for legally appropriate and ethically responsible behavior within our company. It is the first code of conduct to apply to every one of our employees throughout the world, and it is based on the goals and fundamental values of the Bertelsmann Essentials that guide our actions.

The principles of the United Nations Global Compact promote socially and ecologically sound economic behavior in a globalized world. Therefore, it goes without saying that we recognize and support these

principles. In this first progress report, we outline the areas in which we promote the ten Global Compact principles. I hope you will enjoy reading this report.

Yours,

Hartmut Ostrowski
Chairman and CEO, Bertelsmann AG

Human Rights

..... **The media are both a business and a cultural asset.** // Whenever we create, bundle or disseminate media content and products, we fulfill important functions in society: to inform, entertain and educate. This is associated with a special degree of responsibility.

COMMITMENT TO HUMAN RIGHTS MEANS ACTIVELY SUPPORTING FREEDOM OF THE PRESS AND GIVING A VOICE TO THE WEAK

Media – more than a mere commodity

As a media company, we bear special responsibility. The content we create and disseminate on a daily basis is of great importance for understanding and assessing political and societal issues. Our viewers, readers and users trust us to present important events in an understandable way, to expose injustices and to call attention to wrongful conduct.

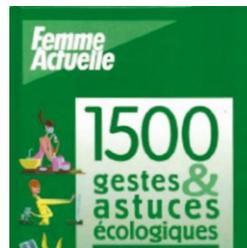

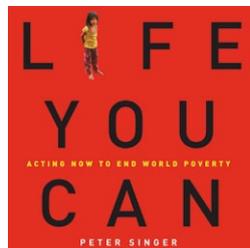

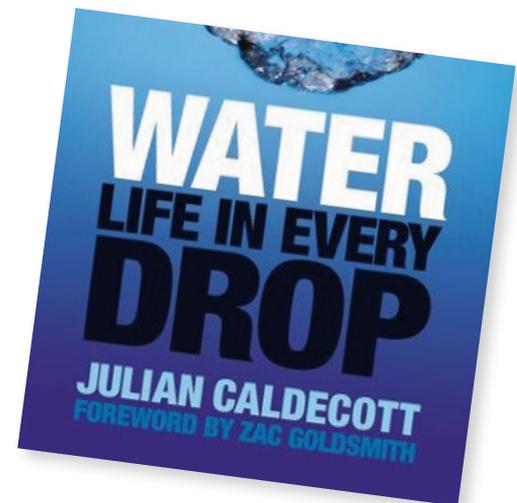

We are committed to the principle of writing, broadcasting, printing and circulating information that is relevant and of interest to people. And we do so in a discerning, factual and unbiased way – for quality cannot be achieved without professionalism and high standards.

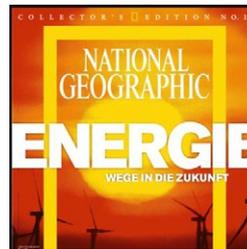

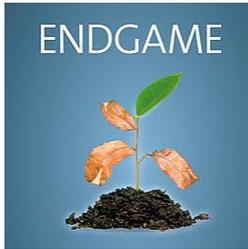

Ultimately, professionalism is part of the special responsibility we bear. But taking responsibility can also mean setting boundaries; not everything that is possible can be justified. This is true with respect to both information and entertainment.

We are conscious of the fact that the content we create and disseminate reaches millions of people worldwide every day.

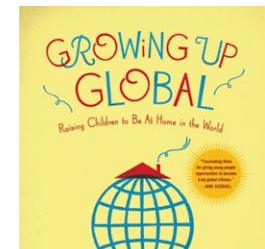

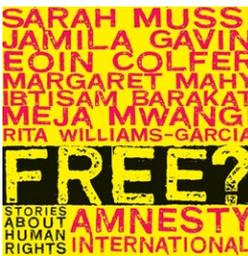

We consider it our obligation to use this influence to make a difference: to help people, to draw attention to pressing problems in our society and to expose wrongdoing and injustice.

However, responsibility for the media is not limited to media producers. The buzzword “media literacy” hints at the responsibility of each citizen. And because media skills need to be learned, Bertelsmann companies have many individual projects in place around the world to help parents, teens and children deal responsibly with the great opportunities of media diversity.

Many of our products reflect sustainability-related issues.

Bertelsmann establishes an International Academy of Journalism

In September 2010, Bertelsmann founded an Academy of Journalism that will advocate the spread of the ideals of press freedom and promote expertise and networking among journalistic talent worldwide. The “International Academy of Journalism” reconfirms and underscores the company’s commitment to press freedom, quality journalism and corporate responsibility on the occasion of its 175th anniversary. José Manuel Barroso, President of the European Commission, acted as the patron of the founding act, which took place in Berlin at

a ceremony to mark Bertelsmann’s 175th year. Each year, the Academy will convey the tools of the trade for the digital future of journalism to a selected group of journalists worldwide by means of on-site workshops and e-learning modules. Its primary target group is aspiring journalistic talents, mainly from countries where press freedom is non-existent or at risk. Candidates should have a track record of advocating press freedom in their previous work, make imaginative use of the opportunities of the new media and be talented, courageous writers.

The “International Academy of Journalism” will be built up in the months ahead and officially take up its teaching activity at the end of 2011. It will be established in close cooperation between Bertelsmann and the Group’s two acclaimed schools of journalism: the Henri-Nannen-School in Hamburg and the RTL School of Journalism in Cologne. The Academy will also pursue partnerships with organizations and institutions that advocate freedom of the press and of opinion.

Andreas Wolfers, director of the Henri-Nannen-School of Journalism in Hamburg (left), joins “Stern” reporter Katja Gloger and Peter Kloeppel, RTL Television editor-in-chief and director of the RTL School of Journalism, in announcing the establishment of the International Academy of Journalism.

José Manuel Barroso, president of the European Commission, pointed out the Academy’s important mission of strengthening democracy.

European Charter on Freedom of the Press

On May 25, 2009, the first European Charter on Freedom of the Press was signed at Gruner + Jahr headquarters by 48 editors-in-chief and leading journalists from 19 countries. In 10 articles, the document formulates principles for the freedom of the media from censorship and government interference of any kind. So far some 500 print, radio and television journalists from 34 countries have affirmed the charter by signing it online. The goal is to create a European media region with uniform, liberal standards and to enable journalists to invoke this document when freedom of the press is violated.

More information about the European Charter on Freedom of the Press can be found at: www.pressfreedom.eu

Protecting young people on the Internet

Wer-kennt-wen.de has joined with other major German network operators under the Freiwillige Selbstkontrolle Multimedia-Diensteanbieter (Voluntary Self-Monitoring of Multimedia Service Providers) umbrella to develop extensive and consistent industry standards for the protection of minors and of personal information in social networks. Among other things, the volun-

tary declaration includes a commitment to comprehensive privacy setting options for users, a way to submit complaints about violations against the rules of the community directly, the option of “ignoring” other users, and building users’ awareness of these options through clear advisories within the platform. Further information is available from www.fsm.de

The “Lesespaß” (Joy of Reading) initiative in Gütersloh

In September 2010, to commemorate its 175th anniversary, Bertelsmann and its partners – the Stiftung Lesen (Reading Foundation) and the Goethe-Institut e.V. – launched the “Lesespaß” (Joy of Reading) initiative in the company’s hometown of Gütersloh. The aim of the two-year program is to promote reading among children from families in which reading is not a priority.

“Reading is a prerequisite for education and vocational training”

According to “Reading in Germany 2008,” a study commissioned by the Federal Ministry of Education and Research, reading habits are on a decline across the country. The younger generation tends to read very selectively, mostly skimming content. The Federal Literacy Association and Stiftung Lesen estimate that there are between three and four million functional illiterates in Germany. The “Lesespaß” initiative has the aim of slowing and ideally reversing this trend locally. “Reading is the foundation for active participation in society, reading is a prerequisite for education and vocational training, reading is a fundamental cultural technique. ‘Lesespaß’ is our gift to the city of Gütersloh,” declared Bertelsmann Chairman and CEO Hartmut Ostrowski.

Big launch party for children, with RTL presenter Nina Moghaddam

The launch of “Lesespaß” was celebrated on September 1, 2010 with a large party at the Gütersloh city library, attended by lots of children, parents, preschool and elementary school teachers, local literacy advo-

cates and the interested public. Guests were treated to an open-air stage program emceed by RTL presenter Nina Moghaddam: from music and clowns to magicians and break-dancers – all the stage acts and promotions were related to the day’s big topic of reading.

“Lesespaß” – a special approach

What sets “Lesespaß” apart is its comprehensive approach and the fact that many complementary measures to promote reading are concentrated in a specific time and place. A combination of tried-and-tested techniques and innovative activities to promote reading will hopefully result in a long-term improvement in the reading skills of children and teens. This has for some time been regarded as a promising approach in the theory of literacy promotion but has rarely been put into action to date, so the bundling of measures in this project can effectively be described as unique. Bertelsmann and its partners Stiftung Lesen and Goethe-Institut intend to make all project concepts and the logo available for use. The initiative can then serve as a template for integrated projects to promote reading skills in other town and cities.

From left to right: Goldmann author Hatice Akyün, Prof. Dr. Klaus-Dieter Lehmann of the Goethe-Institut, Gütersloh Mayor Maria Unger, Bertelsmann Chairman and CEO Hartmut Ostrowski, RTL moderator Nina Moghaddam and Sabine Uehlein of the foundation Stiftung Lesen.

Nina Moghaddam and Ingo Bingo were at the Gütersloh city library for the kickoff.

Long-term assistance in disaster areas

Natural disasters quickly disappear from the headlines, but the people affected have to live with the consequences every day, and long-term aid is needed.

Assistance in rebuilding SOS Children's Villages in the aftermath of the tsunami

Thanks to the generosity of Bertelsmann's companies and employees, at least 250 tsunami orphans were taken care of: a total of €1.4 million has been donated to fund six SOS Children's Villages in Indonesia, India and Thailand. Children in these villages will be provided with food, housing, clothing, medical care and education for a minimum of ten years. Like Medan, Banda Aceh and Meulaboh in Indonesia and Phuket in Thai-

land, Pondicherry is one of the SOS Children's Villages founded immediately after the tsunami to give new homes to children who were bereaved by the disaster or whose parents are no longer able to care for them over the long-term.

As the oldest of the "Tsunami Children's Villages," Pondicherry has now established itself as a fully-fledged children's village with a kindergarten, outpatient de-

partment and learning center and many attractive services for the surrounding area. The children also have the opportunity to work on their education and hobbies at the Children's Village own learning center. Its library now has a good 2,000 books, and in the computer room, they learn how to use PCs, software and the Internet.

“Bertelsmann Hope School” opens in China

The “Bertelsmann Da Long Hua Hope School” was officially christened at the end of April during a ceremony in the school’s sports grounds. Since September 2009, classes have been taught at the primary school in expanded and renovated classrooms, and Bertelsmann made it all possible: several of the Group’s companies in China, among them Arvato, G+J, Fremantle Media, the local Corporate Center as well as the Bertelsmann Asia Investments supported the “Hope School” project of the Beijing Youth Development children’s relief organization in cooperation with the municipal government.

Earthquake relief in China: construction of Guangping Middle School completed

It’s been more than two years since a major earthquake struck the Chinese province of Sichuan, killing 70,000 people and destroying an estimated five million buildings. At Guangping Middle School in Han Zhong, there is no trace of this destruction to be seen today. The rapid reconstruction of the badly damaged school building was made possible by money from the relief fund Bertelsmann set up immediately after

the disaster. A total of €610,000 was collected in the Bertelsmann employees’ fund drive in May 2008. Bertelsmann had set up a €500,000 relief fund for the victims of the earthquake immediately after the disaster. At the same time, all employees of the media company were called upon to increase this fund with their own donations. Bertelsmann then matched these donations to double the sum. Bertelsmann chose the

children’s relief organization Plan International as its partner in the relief operation in order to help the most vulnerable victims in the disaster area: the children.

Pulling together to help Haiti after the Earthquake in January 2010

€100,000 was the sum provided by Bertelsmann as emergency relief to the victims within days of the catastrophic earthquake in Haiti. The aid has since been coordinated by Plan International, a children's relief agency that Bertelsmann has worked with since the aftermath of 2008's severe earthquake in southern China.

Shortly after the earthquake hit Haiti on January 12, 2010, RTL Group began calling on its viewers and listeners to donate funds. In less than two weeks, RTL Group companies helped to raise over €45 million for emergency and long-term relief. In the Netherlands, RTL's flagship channel RTL 4 teamed up with public broadcaster Nederland 1 and commercial channel SBS 6 to simultaneously broadcast the charity programme Nederland Helpt Haiti. This raised €41.7 million in donations, which was matched by the Dutch government. Most commercial radio stations, including RTL Nederland's Radio 538, also supported this joint initiative.

Grupo Antena 3 in Spain launched the Ayuda a Haití campaign to raise funds via text messages. Within 48 hours, the campaign had generated €1.3 million in donations, which went directly to the Red Cross. In Germany, Mediengruppe RTL Deutschland launched a trailer campaign on RTL Television, Vox, N-TV and Super RTL. So far, viewers have donated more than €3.1 million. In addition, the company's charity

foundation had given €100,000 from its own emergency relief fund. Among other things, this money will be used to rebuild the orphanage in Trichet, which was sponsored by an RTL Spendenmarathon, but completely destroyed in the earthquake. In France, Groupe M6 and RTL Radio teamed

up with the newspaper Le Figaro for the campaign Sauvons les enfants d'Haïti, raising money for the rebuilding and running of orphanages, kindergartens, schools and clinics. M6 also ran a trailer campaign in which its news anchors called on viewers to support Unicef's relief efforts.

“Stiftung Stern” foundation – help for people in need

The foundation “Stiftung Stern – Hilfe für Menschen e.V.” is a nonprofit association. Since the 1970s, the magazine “Stern” has been involved with a variety of relief actions aimed at assisting people in need. It initially focused on collecting direct donations for various aid organizations. In December of 2003, the association “Stiftung Stern” – Hilfe für Menschen e.V.” was established as an independent foundation. It collects dona-

tions for concrete aid efforts, which allows it to quickly provide practical help to people in need. It is also continuing its partnerships with a variety of aid organizations. However, the foundation retains control over the use of the resources it provides.

Current human-rights projects include initiatives related to bride kidnapping in Kyrgyzstan, families in need, drought in Kenya and child poverty in Germany.

“Let’s work so that inmates leaving prison never have to return”

Several humanitarian organizations, as well as doctors and personnel working on site have pointed the finger at disastrous and indignant life conditions of inmates in French prisons. The European Court of Hu-

man Rights has condemned the country for “inhuman and degrading treatments” happening in French prisons. In this context, Groupe M6 created the Fondation M6 with the aim to support audiovisual projects pro-

posed to inmates and to help with the dynamics of rehabilitation by providing training in the audiovisual trades, among many other initiatives. To that end, a budget of € 2.5 million has been set for the next five years.

Community Technology Center in Gurgaon, India

In 2008, Arvato Services founded a Community Technology Center in India together with Microsoft. The objective is to offer underprivileged members of society access to electronic media. Arvato Services is providing facilities and trainers. The program will offer young people from poor backgrounds instruction and continuing training via Microsoft training programs.

The Principles of the UN Global Compact

1 Businesses should support and respect the protection of internationally proclaimed human rights.

2 Businesses should make sure they are not complicit in human rights abuses.

Developments

(October 2008 to present)

- In 2008, Bertelsmann implemented a Global Code of Conduct that underscores its commitment to human rights. The Code was distributed to all employees worldwide and is also often used in dealings with business partners.
- Bertelsmann reiterated its long-standing commitment to human rights as part of Code of Conduct training for all employees, which launched in 2009.
- As part of the Code and training initiative, employees are instructed about the comprehensive means that the company puts at their disposal to safely report any human rights violations. The company makes various channels available for reporting violations: ombudspersons, Internet-based whistleblowing system and the Bertelsmann Ethics & Compliance Department.
- The E&C Department assures that reports are promptly reviewed and investigated by the appropriate functional Department. In 2008, a Corporate Compliance Committee was formed and meets regularly to monitor whether all reports have received adequate and timely scrutiny.
- In September 2010, Bertelsmann founded an Academy of Journalism that promote ideals of press freedom and expertise and networking among journalistic talent worldwide. The "International Academy of Journalism" reconfirms and underscores the company's commitment to press freedom, quality journalism and corporate responsibility on the occasion of its 175th anniversary.
- In September 2010, Bertelsmann started the two-year literacy initiative "Lesespaß" (= Joy of Reading) in its founder's town Gütersloh to promote children's reading skills.

Goals

(present to October 2011)

- The Code of Conduct will be reviewed in the context of a periodic programmatic evaluation.
- Training for newly hired employees is administered on an ongoing basis. Refresher training for all employees is anticipated for 2012.
- Ongoing monitoring of compliance with human rights violations occurs based on a review of reports received through the comprehensive whistleblowing channels.
- Compliance risk assessment, including a review of the risk of human rights violations, occurs on an annual basis.
- Annual workshops and regular exchanges with more than 100 Ethics & Compliance Representatives from subsidiaries will continue to occur.
- The “International Academy of Journalism” will be built up in the months ahead and officially take up its teaching activity at the end of 2011. It will be established in close cooperation between Bertelsmann and the Group’s two acclaimed schools of journalism: the Henri-Nannen-School in Hamburg and the RTL School of Journalism in Cologne. Headquartered in Hamburg, the Academy will also pursue partnerships with organizations and institutions that advocate freedom of the press and opinion.
- Several literacy programs will be started within the “Lesespaß” Initiative, the literacy project of Bertelsmann in Gütersloh, Germany.

Human Rights

Labour

..... Every day, more than 100,000 employees in over 50 countries are engaged in ensuring the success and ongoing development of our company. We attach especially high priority to our responsibility to our employees.
.....

COMMITMENT TO LABOUR PRINCIPLES MEANS GIVING EMPLOYEES A VOICE AND ENSURING A HEALTHY WORK-LIFE BALANCE

Helping shape tomorrow's company

Why are healthy and motivated employees so important for us? They are the driving force behind the innovative powers of the company. Our task is to fully develop this potential and to create an equitable and motivating work environment for every member of our workforce.

BeFit – Bertelsmann AG's in-company health management system

More exercise, healthier foods and comprehensive preventive healthcare: getting into shape and remaining fit are enormously important for everyone.

Motivating Bertelsmann's employees at every site to play an active role in ensuring their own health, getting into shape and remaining fit – this is the goal of our in-company health initiative BeFit. Bertelsmann creates optimal conditions for employees to achieve their own individual health goals. BeFit helps them move toward an all-round healthier life with respect to exercise and nutrition, medication and prevention, work-life balance and lifelong learning.

Bertelsmann's corporate culture, based on the principle of partnership, underlies the company's commitment to health-related issues. There is evidence that employees are healthier when they have a certain degree of freedom, identify with the company and enjoy partnership-based leadership.

With this in mind, in 2008 Bertelsmann AG introduced the BeFit program to bring together various aspects of in-company health management; its components have steadily expanded ever since. Along with activities and information on exercise, medication, prevention and protection for non-smokers, there are such initiatives as health weeks, action days and exercise programs during lunch breaks, as well as cooperative arrangements with nearby fitness centers. Bertelsmann's company sports program is a very popular way of offering employees opportunities for physical activity and included more than 490 events in 2009.

Over the past two years, nearly 100 health action days were held in cooperation with local partners. In Erfurt, Baden-Baden, Munich, Wuppertal and Stralsund, for example, over 2,500 employees took advantage of the opportunity for health checkups developed specifically for these events, including a back-health checkup

Many G+J employees came to celebrate the opening of the new in-house health club.

using the MediMouse, a stress test and a checkup using an InBody body composition analyzer.

The publishing company Gruner + Jahr in Hamburg also attaches great importance to employee health. The company's sports association Sportgemeinschaft G+J offers a variety of activities, and an in-house

health club was opened at Gruner + Jahr's Am Baumwall headquarters in early 2009. The facility was designed in cooperation with partner DanTrim and reflects employee requests and input. A team of qualified trainers creates individualized training plans and monitors employees' progress. Gruner + Jahr has already received awards for its achievements in this area.

Running to stay healthy

Exercise keeps us fit and is always a good way to offset the demands of everyday life, which is why many Bertelsmann employees like to run. As part of the “Gütersloh läuft” (Gütersloh runs) event, nearly 300 employees went out on the 4.6-kilometer running track during each of the past two years. The runners were assisted by the BeFit team, which provided the necessary running gear as well as refreshments at the finish line.

In the spring of 2010, 128 employees from Random House in New York ran 1,000 meters farther as part of the 34th JPMorgan Chase Corporate Challenge in Central Park. The runners were supported by colleagues from the Human Resources department and the Random House running group. As with other events of this kind, the emphasis was on being active together rather than setting new records.

Random House employees just before the JPMorgan Chase Corporate Challenge in Central Park.

Bertelsmann wins second health award

In 2008, for the second time in a row, Bertelsmann AG received the Deutscher Unternehmenspreis Gesundheit (German Company Prize for Health) from the Federal Association of Company Health Insurance Funds in recognition of its BeFit health promotion activities. It also received an award from the European Union under the “Move Europe” campaign. In 2009, the BeFit program won a “Move - Europe-Partner Excellence” certificate.

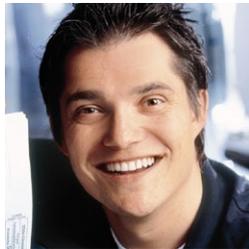

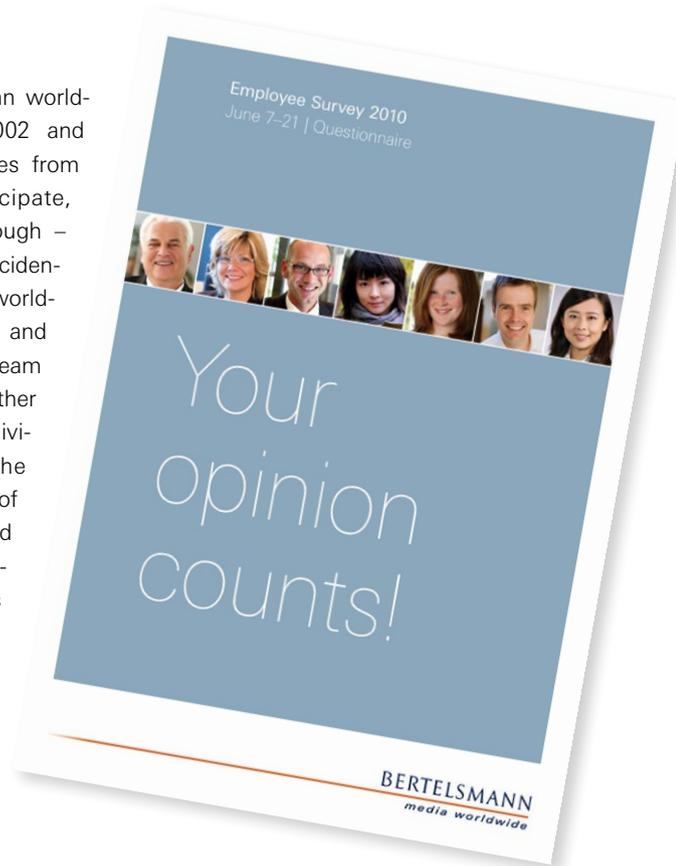

Beate Dembowski and Gero Hesse took the award for the BeFit Team.

Participants set off on „Gütersloh läuft“.

The 2010 Bertelsmann Employee Survey

This year marked the third Bertelsmann world-wide employee survey after the 2002 and 2006 editions. In all, 81,612 employees from 47 countries were invited to participate, with 69,454 colleagues following through – a participation rate of 85.1 percent. Incidentally, performing the employee survey world-wide was an enormous organizational and logistical challenge. A Corporate HR team spent months preparing the survey together with nearly 300 colleagues from the divisions. In all, 81 different versions of the questionnaire were created in a total of 15 languages. More than 80,000 printed questionnaires, 82,000 information flyers, 4,800 posters and 7,685 stickers were shipped to around 400 destinations all over the world. In addition, nearly 9,000 results reports were distributed in early September.

The Principles of the UN Global Compact

3 Ensuring freedom of association and effective recognition of the right to collective bargaining

4 Elimination of any kind of forced Labour.

5 Abolition of child Labour.

6 Elimination of discrimination in respect of employment and occupation.

Developments

(October 2008 to present)

- The company's third international employee survey was conducted in June 2010 to gather employees' opinions regarding a number of topics. Once again, a record was set with a participation rate of 85.1 percent. The responses of nearly 70,000 employees from 47 countries were compiled into over 9,000 reports. They are now being used as a basis for in-depth discussion of the results within teams and individual companies.
- Bertelsmann worked closely together with elected employee representatives. At all levels, there have been in-depth exchanges of views and trust-based cooperation between representatives of employees and the employer side. For example, the Corporate Center has provided support for the establishment and efforts of several employee representative committees and made sure that contact persons are available to assist them in their ongoing work.
- Over 100 continuing education events for employee representatives (2008–2010).
- In the area of human resources as well, a great deal of effort was made to inform and train employees, in the interest of maintaining a consistently high standard. HR coordinating committees are in place in all of the countries and regions in which Bertelsmann does business, and they

meet at least once a year. A total of 81 meetings were held in 2009. In addition, an HR summit was organized in early 2009, the first international conference for the company's HR directors.

- A zero-tolerance policy with respect to any kind of discrimination: clear procedures and sanctions, including dismissal, were defined. Representatives of severely disabled employees enjoy the active support of Bertelsmann AG. They monitor adherence to the rights of disabled employees and work hard to promote integration.

Percentage of severely disabled employees and other individuals with that status in Germany: 2008: 3.7% | 2009: 3.9%

- All employees of Bertelsmann AG, including Group companies and affiliated companies, have employment contracts that are based on voluntary employment and include provisions for termination. Moreover, Bertelsmann supports employee compensation in line with market conditions and adheres to existing collective bargaining agreements as far as possible.
- Providing training for young people is a corporate responsibility that Bertelsmann embraces. In the German Group companies, a total of 1,359 individuals

were employed as trainees or interns or attended a school of journalism at the end of 2009. All 226 individuals completing their training were guaranteed a job in the summer of 2009 despite the effects of the economic crisis.

- Number of trainees in Germany
2008: 1,412 | 2009: 1,359
- Involvement by Bertelsmann companies in training future employees outside of Germany as well, depending on local circumstances.
- For the second time in a row, in-company health management activities under the heading of "BeFit" were awarded the Unternehmenspreis Gesundheit (German Company Prize for Health) in 2008.
- More than 90 health action days were held in 2008 and 2009, and activities were expanded at the local sites.
- Participation in the sports program in Germany
2008: 7,900 | 2009: 8,500
- Participants in health action days
2008: 680 | 2009: 1,343

Goals

(present to October 2011)

- Continued active support for the efforts of employee representatives.
- Based on the results of the employee survey, an analysis will be conducted and follow-up measures will be determined and implemented within the individual companies and divisions.
- HR coordinating committees will continue to be actively involved in developing HR-relevant projects and processes, taking advantage of the specialized knowledge that exists in the various regions. Another HR summit will be held in the spring of 2011.
- Further expansion of in-company health management activities in Germany, as well as support for foreign sites in adopting successful initiatives.

Environment

..... **Conscientious use of natural resources** // Any company that prints and publishes books and magazines, ships CDs and DVDs or offers a wide range of different services inevitably enters into a complex interrelationship with the environment. Though the media sector has less impact on the environment than other branches of industry, we at Bertelsmann take this responsibility very seriously. Treating natural resources responsibly at every stage of our supply chain is an elementary part of our idea of corporate responsibility.

ENVIRONMENTAL PROTECTION MEANS HANDLING RESOURCES RESPONSIBLY AND ENCOURAGING ONE'S EMPLOYEES TO ACT ACCORDINGLY

Bertelsmann's Carbon Footprint

“Climate change is real, and it is one of the foremost challenges of the 21st century. Sustained growth is only possible if we, the private sector, also act sustainably and reduce our emissions. That is one of the reasons why we at Bertelsmann are taking action,” said Bertelsmann CEO Hartmut Ostrowski, explaining the Executive Board's 2008 decision to calculate the company's carbon footprint. This international balance of greenhouse gas emissions measures the Bertelsmann Group's impact on the Earth's atmosphere for the first time. It also forms the basis for a coordinated improvement in the company's energy efficiency. Because at the company and divisional level the environment and climate change have already been an issue for years.

be green.

The environmental initiative of Bertelsmann AG

Corporate responsibility is firmly anchored in Bertelsmann's company principles. The Bertelsmann Essentials obligate Bertelsmann's employees and companies to “act responsibly toward [...] the environment.” Based upon this, Bertelsmann's Executive Board launched a climate protection strategy in August 2008. As the first pillar in this strategy, a Group-wide, international inventory of greenhouse gas emissions (the “carbon footprint”) was drawn up in 2009. The IFEU Institute for Energy and Environmental Research in Heidelberg has calculated Bertelsmann's carbon footprint, which describes how much greenhouse gas (GHG) a business is responsible for emitting in a given period. Besides car-

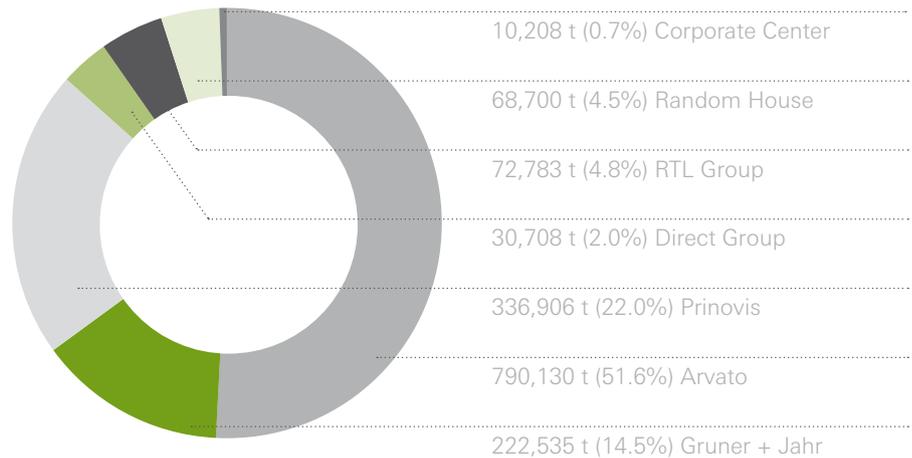

bon dioxide (CO₂), GHGs include other gases like methane and nitrous oxide. These gases are “converted” into carbon dioxide and shown as CO₂ equivalents (CO₂ eq), giving a standard measurement by which the impact on climate change can be expressed.

To calculate our carbon footprint, the Group's consumption of electricity and fossil fuels (especially gas, heating oil, gasoline and diesel) as well the amount of business travel (flights, train trips, etc.) was determined. The resulting greenhouse gas emissions are derived using conversion factors. We commissioned the auditing firm PricewaterhouseCoopers (PwC) to certify the quality of our carbon footprint

calculation. PwC assessed the data collection procedure at the Group level and the methodology used to calculate the carbon footprint for accuracy, reliability and pertinence. Through PwC, we have been able to verify that our approach conforms to current common, relevant standards and practices. At the same time, we also received recommendations for compiling future carbon footprints.

Our carbon footprint // Bertelsmann's 2008 carbon footprint amounted to more than 1.5 million tons of CO₂ equivalents. Most of our GHG emissions are caused by the printing plants in the Arvato and

Gruner + Jahr divisions as well as Prinovis. Like many industrial plants, the printing machines need large amounts of electricity, natural gas and heat. This is reflected accordingly in the carbon footprint.

Carbon Footprint of
Bertelsmann AG in 2008:
1,531,969 t CO₂ eq

The “be green” experts

The “be green” team is an international workgroup comprising environmental experts at Bertelsmann AG and all of its corporate divisions. The task force shares ideas and experiences on environmental topics and develops Bertelsmann’s environmental and climate protection

strategy. Since May 2003, environmental experts from Bertelsmann AG and all Bertelsmann company departments – environmental officers, production heads and chief paper buyers – have met regularly in this interdivisional, international task group to discuss issues related to

our ecological efforts. Best practices from the divisions and companies are presented, new developments at the international, European and German level are discussed, and strategies for more climate protection throughout the Group are jointly developed.

How emissions are caused at Bertelsmann

(in tons of CO₂)

By far the largest proportion of GHG emissions is caused by the provision of energy in the form of electricity and heat. Bertelsmann's direct emissions result from the use of fuels such as gas and heating oil in our heating systems and at our production facilities. In the case of electricity, our proportionate share of CO₂ emissions at the

power stations of our electricity suppliers and in the provision of fuels is taken into account. At the printing plants, electricity consumption is a key factor in the carbon footprint because, all over the world, much of the electricity is generated by burning coal, oil or gas in power stations.

In offices the ratio is somewhat reversed, with heating generally having the biggest impact on climate. Business travel includes the GHG emissions caused by air and rail travel and the use of rental cars. The transport segment represents the emissions from our various company-owned fleets of vehicles.

The be green Days 2010 at Bertelsmann around the world

Leave your car at home and bike to work, avoid printing out documents whenever possible, and turn on the light only when it's really needed: There are many ways to protect the environment in a business setting. To mark World Environment Day, established by the United Nations, Bertelsmann companies organized action days known as "be green Days" at more than 35 different sites in ten countries.

These events took place on and around June 1 and encouraged employees to think about and get involved in environmental issues. Environmental officers in the divisions put together action-packed programs and got many of their sites excited about participating in "be green Day" with ideas of their own. The action days received extensive coverage on Bertelsmann's intranet.

be green.

The environmental initiative of Bertelsmann AG

Bertelsmann AG regards climate change and environmental protection as central issues in our business and in society today.

Therefore, in partnership with employees and stakeholders, we strive to reduce our direct and indirect greenhouse gas emissions as part of our overall drive to limit our environmental impact.

Our strategy will be subject to constant improvement.

Pursuant with our decentralized corporate philosophy, we expect our divisions to take responsibility for sustainable management contributing to climate and environmental protection.

The Bertelsmann be green mission statement.

RTL Radio France, Paris

European Bertelsmann sites which participated in the be green Day 2010

RTL Group – the environment is part of the program

Since spring 2008, the “environMIND-team” has been supporting environmentally friendly actions and behavior at RTL Group. “Numerous green initiatives have been launched to keep the staff informed and promote or encourage their environmental conduct,” says Oliver Herrgesell, Environmental Chief Officer at RTL Group. “These include an interactive website with practical eco tips, our ‘environMINDday,’ the company mission statement, an environmental brochure and initiatives for organic menus at the canteen in Luxembourg.” At the second “environMINDday” on December 1, 2009, RTL Group presented its first CO₂ balance sheet. A few weeks

later, the environmental officers from each company agreed on targets to reduce greenhouse gas emissions by 20 percent and a timetable for achieving them by 2020. Many RTL Group channels are also increasingly covering environmental issues in their programs. “For example, RTL Radio in France has had a monthly theme day - ‘L’Expédition RTL’ - since October 2008, which presents various regions of the world where the consequences of climate change are severely felt,” continues Herrgesell. And when the

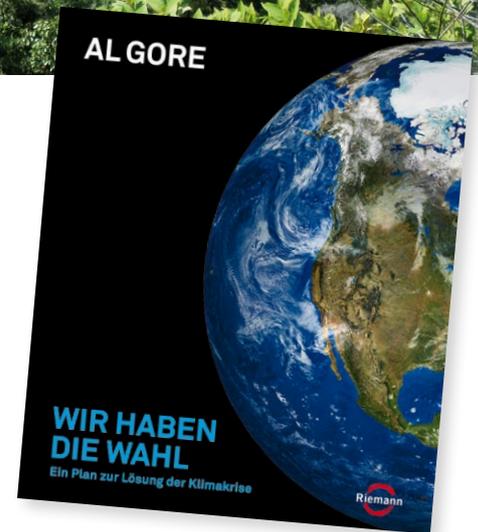

WWF (World Wildlife Fund) proclaimed March 28, 2009 “Earth Day” and called on all people around the world to turn off lights for one hour, several RTL Group channels supported this symbolic action. At the same time Michael De Maegd, a news presenter for the Belgian TV channel RTL-TVI, took off from Sydney in an ultra-light aircraft for the “WWF Earth Challenge.” The documentary expedition carried out jointly with WWF gave the RTL-TVI team some impressive pictures of regions threatened by climate change. “It was an extraordinary, ecological adventure,” said Oliver Herrgesell.

RTL-TVI moderator Michael De Maegd boarded an ultra-light plane from Sydney to Brussels for the “Earth Challenge WWF”.

Random House – paper from sustainable forests

All around the world Random House strives to produce its books in the most eco-friendly way possible. In Germany, for example, the local publishing group gets its paper from suppliers who can prove they use resources from water cycle-oriented, sustainable forestry. “For almost all of our book production, i.e., for all paperbacks and hardcovers, we only use paper varieties that are certified by the FSC,” said Wolfgang Michael Hanke in Munich, joint head of production responsible for the issue. And now the producers of illustration-printing paper have followed suit, so that Verlagsgruppe Random House’s entire color range can now be printed almost exclusively on FSC-certified paper as well. Random House Deutschland won the FSC Global Partner Award in September 2010 for outstanding services rendered to the FSC. Great importance was also attached to the certification of all printers. “At the Arvato subsidiaries Mohn Media and GGP Media, we’re in extremely good hands in this respect,” said Hanke. In 2007, Verlagsgruppe became the first publishing group in Germany to have its carbon footprint calculated by Climate-Partner. Random House is active in environmental protection outside Germany as well. In the U.S. the proportion of recycled paper in book production will be increased to 20 percent and targets for reducing greenhouse gas emissions will be introduced. And in Britain, an action plan will save 250 tons of carbon dioxide each year.

The Riemann imprint is all about environmental protection: its production processes are as eco-friendly as the content of its publications.

Gruner + Jahr – offsetting research travel

At a publishing company like Gruner + Jahr in Hamburg or the division's other sites, there are many ways to save energy or natural resources for the benefit of the environment. For example, G+J magazines are printed on 98.5 percent environmentally certified paper. "But if journalists, say from 'Geo' magazine, want to report from various regions of the world – even on environmental topics – then they have to travel, and usually by plane," says Thilo von Trott, who is responsible for environmental affairs at Gruner + Jahr. "Gruner + Jahr will offset

the resulting greenhouse gases in cooperation with 'Geo Saves the Rainforest' through a sustainable environmental project in Nepal," says von Trott. Reforestation, efficient cooking stoves and biogas plants are the most important elements for offsetting carbon emissions generated by unavoidable research trips by G+J editorial staff. "This project is based on the calculation of the total amount of carbon dioxide that Gruner + Jahr releases into the environment at all its locations - its carbon footprint," says von Trott. "The analysis

allowed us to more precisely break down how much of the footprint is attributable to such travel." New "Geo" subscribers also have the option to waive their promotional gift and donate a tree to a reforestation project in Ecuador. More than 20,000 new trees have already been planted as a result.

Arvato – in league to protect the forests

If a print product carries the seal of the internationally recognized Forest Stewardship Council (FSC), then this means that any wood used in its production comes from sustainable forestry. The same is true for the printing company itself: its FSC certificate proves that they are part of an entire production chain (chain of custody) from forest to finished product. If this chain is without gaps, a product is given the FSC label. Eleven Arvato companies in Germany, Italy, Spain, Portugal and the U.S. are now certified according to the stringent criteria of the FSC. "This shows that we are seri-

ous about our efforts to combine economic success with environmentally friendly action," said Andreas Henrichs, Arvato environmental affairs coordinator. "This fact is

further underscored by our membership in the WWF Wood Group," a voluntary initiative of companies who each sign individual agreements with the WWF.

In much of their business, Arvato companies use paper from FSC-certified forestry

The packaging of the topgreen line consists entirely of recycled or recyclable material, is produced in an environmentally friendly manner, and is printed with inks and lacquers that are free of petroleum and solvents.

Direct Group – 400,000 trees for climate protection

Green

DIRECTGROUP
BERTELSMANN

Books play a major role at Direct Group. This makes it all the more important that the division strive to make its paper procurement and printing processes as eco-friendly as possible. “Under no circumstances do our companies use paper from forests under protection or from non-sustainable forestry,” explains Oliver Lanka, Vice President Purchasing at Direct Group. “We only use suppliers who provide seam-

less traceability of the composition and origin of their raw materials.” Direct Group also places special emphasis on ensuring that the producers of paper used in its books are certified to credible environmental standards. In so doing, it seeks to support concepts central to sustainable forest management – i.e., reforestation, careful use of water and energy, and the prevention of illegal logging. In Germany,

for example, 100 percent FSC-certified paper is used. Following Der Club Bertelsmann and Círculo de Lectores, all subsidiaries are now gradually gaining FSC certification.

Since 2007, Direct Group has also been proving its environmental commitment in a very different business. For every customer who books a tour of Turkey with the Turkish partner Deha Tur via a Direct Group company, a tree is planted in the area around the provincial capital of Denizli - thereby replenishing the declining tree population in the region. This helps Direct Group to offset the impact of pollution caused by the travel. By the end of this year the 400,000th tree will have been planted.

Prinovis – environmentally friendly combined heat and power plant

Late in the summer of 2009, the gravure printing group Prinovis joined the Klimaschutz- und Effizienzgruppe der deutschen Wirtschaft (Climate Protection and Efficiency Group of German Industry.) The members of the initiative regard climate change and energy efficiency as opportunities for a successful economic future. They therefore wish to mobilize the motivation and willingness of companies to protect the climate more and substantially increase energy efficiency - and act as role models in the process. "In doing this we are going beyond what is required by law in many cases," says Christine Uhde-Leischner, whose tasks at Prinovis include coordinating environmental protection. "For example, we have introduced an energy management system at our sites to centrally record energy consumption, compare it with the values of other locations, and develop suggestions for how to save energy," she adds.

Alongside an integrated quality and environmental management program that has been running for years at Itzehoe and Dresden, Prinovis uses an environmentally friendly combined heat and power (CHP) plant to generate electricity and heat onsite at the company's Itzehoe, Nuremberg and Liverpool sites. "By operating at over 90 percent efficiency we can save a lot of fuel and avoid greenhouse gas emissions," explains Uhde-Leischner.

Prinovis's eco-friendly power plant in Liverpool

The Principles of the UN Global Compact

7 Businesses should support a precautionary approach to environmental challenges.

Developments (October 2008 to present)

- Bundled all climate protection measures in the “be green” team, an international work group comprised of environmental managers/officers from the corporate divisions
- Developed Group-wide climate protection strategy called “be green” and launched it throughout the Group, achieved first milestones (see below)

8 Businesses should undertake initiatives to promote greater environmental responsibility.

- Positioning of the issue on top level by the Chairman & CEO (statements/ interview)
- Bertelsmann has measured and published its first worldwide carbon footprint (for 2008: 1.532 million tonnes CO₂ eq.), calculated by an outside environmental institute (IFEU).
- Carried out international “be green” days in the lead-up to the UN’s World Environment Day on June 4, 2010, with comprehensive environmental and climate protection activities for employees at over 35 sites in 10 countries and for employees worldwide in intranet
- Produced and published a “be green” motivation film for employees (German/English) with the aim of making climate protection more tangible and encouraging employee involvement
- Set up an ongoing “be green” section on the Bertelsmann intranet dedicated to the topic of environmental protection (approx. 30 news articles and dossiers on climate protection)
- Integrated a question about environmental protection in the worldwide employee survey

9 Businesses should encourage the development and diffusion of environmentally friendly technologies.

- Carried out a benchmark study on environmental protection in nine media companies and published it in-house
- Carried out “Green Innovations in Practice” study about green business models and published it in-house
- Held a workshop on energy efficiency and Green IT for the environmental managers/officers

Goals

(present to October 2011)

- Achieve further milestones and continue to develop the Group-wide “be green” climate protection strategy
- Continue developing Bertelsmann’s Environment Policy
- Continue developing the Bertelsmann Paper Policy
- Draw up and publish the worldwide carbon footprint 2010 (calculated every two years)
- Expand “be green” communications to the in- and outside, including ongoing publication of “green news” on the Bertelsmann intranet and Bertelsmann’s Corporate Responsibility Portal
- Carry out another international “be green” Day
- Intensify and formalize stakeholder dialog on environmental and climate protection
- Train & coach Bertelsmann apprentices to be “climate ambassadors” and act as multipliers for climate protection during their training segments
- Update and expand the benchmark study on environmental protection at media companies
- Carry out further workshops on topics including energy efficiency

Environment

A scene from the employee training materials for the Code of Conduct

Anti-Corruption

... **Global Code of Conduct** // Bertelsmann published the Bertelsmann Code of Conduct in 2008 as a binding guideline for law-abiding and responsible conduct within the company.

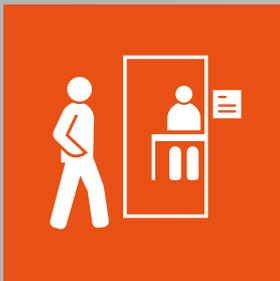

COMMITMENT TO FIGHTING CORRUPTION MEANS ABOVE ALL ELSE INFORMING AND EDUCATING ONE'S OWN EMPLOYEES

The Global Code of Conduct

What do important concepts such as fairness, honesty, integrity, respect and responsible corporate management and control mean in the context of everyday business? This question is crucial when it comes to taking specific action - because economic success and good corporate citizenship are two inseparable objectives for our company. Corporate responsibility and ethical behavior toward employees, customers, business partners and government agencies play an integral part in our value system at Bertelsmann.

Ethics & Compliance

The Bertelsmann Ethics & Compliance program assists the company and its subsidiaries in maintaining compliance with laws, regulations and company policies and in promoting an ethical culture consistent with the values and principles stated in the Bertelsmann Essentials and the Bertelsmann Code of Conduct.

The channels of the Bertelsmann Whistleblowing System.

Our Code Of Conduct

The Bertelsmann Code of Conduct follows international standards. It is based on ethical principles, legal requirements and Bertelsmann's own in-house rules and regulations. At the same time, the Code of Conduct is grounded in the Bertelsmann Essentials, which convey our goals and basic values. The Bertelsmann Code of Conduct consists of 20 principles that govern corporate responsibility, workplace conduct, business and financial transactions, and media and technology. The 20 principles address specific topics such as data protection, anti-corruption and independent and responsible reporting in Bertelsmann's published media.

For more information about the Code of Conduct and the whistleblower system please refer to www.ethics.bertelsmann.com

Training and whistleblowing scheme for employees

To familiarize our employees worldwide with the Code of Conduct, the Ethics & Compliance Department has developed an interactive training program in twelve languages, which is available in both Web-based and traditional formats and was implemented in June 2009.

The Bertelsmann Code of Conduct launched in 2008

Corporate Responsibility

Compliance with the law

We comply with all applicable local, national and international laws and regulations wherever we do business.

Human rights

The respect for and protection of human rights is part of our corporate culture.

Environment, health & safety

Environmental protection, health and safety are integral parts of our corporate responsibility.

Product safety

We create and develop safe products and services for our customers.

Governmental & regulatory relations

We conduct proper and legally impeccable relations with all government regulators and agencies.

Interpersonal Conduct in the Workplace

Mutual trust & respect

We treat each other in a mutually respectful and trusting manner at work and seek to create a workplace environment that does not allow for discrimination, harassment, bullying or intimidation.

Freedom to speak without fear of retaliation

We encourage our employees to speak up freely and without fear of retaliation. We do not retaliate against employees who raise good-faith workplace concerns.

Data privacy & protection

We collect, retain, use and transmit personal data and information in compliance with applicable law and policy.

Responsible use of assets

We deal with company property, products and resources responsibly and appropriately and use them only for their intended business purposes.

Conflicts of interest

We disclose potential or actual conflicts of interest in the workplace in a timely manner for proper review and resolution.

Business & Finance

Financial integrity & antifraud

We conduct our business and manage recordkeeping and reporting with integrity and transparency.

Anti-corruption & anti-bribery

We do not engage in corruption, bribery, kickbacks or other illegal transactions with private, commercial or governmental parties.

Gifts & entertainment

When giving or receiving business gifts or entertainment, we do so in a transparent manner that complies with company policy, industry standards and applicable law.

Antitrust compliance

We comply with applicable antitrust and competition laws and consult expert company counsel on antitrust and competition issues.

Insider trading

We comply with applicable insider trading laws and company policy regarding material nonpublic information that we learn about our own or other businesses.

Media & Technology

Intellectual property protection

We respect and protect all forms of intellectual property and protected content regardless of whether they are created by our companies or by third parties.

Information technology use & security

We make proper business use of workplace information technology and help to protect systems and equipment against internal and external threats.

Confidentiality & public relations

We protect company, product, service and other confidential business information from unauthorized disclosure and use.

Honest statements regarding products & services

We do not knowingly engage in or promote misrepresentation or fraud in the marketing or advertising of our products and services.

Media independence & responsibilities

We observe editorial and journalistic independence in news gathering and distribution.

The Principles of the UN Global Compact

10 Businesses should work against corruption in all its forms, including extortion and bribery.

Developments

(October 2008 to present)

- In 2008, Bertelsmann implemented a Global Code of Conduct that incorporates clear guidance on topics such as financial integrity, antifraud, anti-corruption, anti-bribery and conflicts of interest. The Code was distributed to all employees worldwide and is also often used in dealings with business partners.
- As part of the Code and training initiative, employees are instructed about the comprehensive means that the company puts at their disposal to safely report concerns about corruption or similar violations of company policy. The company makes various channels available for reporting violations: ombudspersons, an Internet-based whistleblowing system and the Bertelsmann Ethics & Compliance Department.
- The E&C Department assures that reports are promptly reviewed and investigated by the appropriate department. In 2008, a Corporate Compliance Committee was formed and meets regularly to monitor whether all reports have received adequate and timely scrutiny.
- The Ethics & Compliance Department has also conducted workshops and webinars with more than 100 Ethics & Compliance Representatives from subsidiaries around the world, to promote the integration of compliance into business processes, including compliance with anti-corruption requirements.
- The Corporate Audit department has undergone training in specific techniques for investigating fraudulent behavior.
- With the help of mass data analyses and red flag tests, preventive (rather than case-specific) procedures have been implemented to identify corruption in sales.

Goals

(present to October 2011)

- A review of the Code of Conduct is planned for 2011 in the context of a larger programmatic review.
- Training for newly hired employees is administered on an ongoing basis. Refresher training for all employees is anticipated for 2012.
- Ongoing monitoring of compliance with anti-corruption requirements occurs based on a review of reports received through the comprehensive whistleblowing system.
- The annual compliance risk assessment includes a review of corruption risks.
- Annual workshops and regular exchanges with more than 100 Ethics & Compliance Representatives from subsidiaries will continue to occur.
- Preventive procedures will be further developed, including spot checks to identify corruption in sales, in accordance with guidelines formulated for that purpose.
