Corporate Social Responsibility

Global Compact - Communicating on Progress

A/S Uglands Rederi has traditionally had and has a strong focus on sustainable business practice. Safety has always been the number one priority, but other key elements such as environmental and social impact as a consequence of conducting our business have received increased focus. Knowing that company activities affect society in many ways, and that the company is affected by its surroundings, it is important for A/S Uglands Rederi to contribute to creating and maintaining a positive and sustainable shipping environment.

As a consequence of the above, A/S Uglands Rederi joined the UN Global Compact during 2012. The UN Global

Compact is a strategic policy initiative for businesses that are committed to aligning their operations and strategies with ten universally accepted principles in the areas of human rights, labour, the environment and anti-corruption. This has been integrated as part of the A/S Uglands Rederi company policy and the corporate culture.

As member of this initiative an annual "Communication on Progress" is required, and has been submitted, which is available on the Global Compact website. This is a public disclosure to stakeholders on progress made in implementing the ten principles.

THE UN GLOBAL COMPACT TEN PRINCIPLES

HUMAN RIGHTS

- | | |
|-------------|--|
| Principle 1 | Businesses should support and respect the protection of internationally proclaimed human rights; and |
| Principle 2 | Businesses should make sure that they are not complicit in human rights abuses. |

LABOUR STANDARDS

Implementation of the UN Global Compact ten principles 2012

The most important corporate social engagement is to provide a safe, sustainable and long term business and work environment for the employees, business partners and the local community. A/S Uglands Rederi (UR) supports several initiatives in various communities, believing that social engagement in communities where business is conducted, contributes to creating shared value for both the company and society as a whole. UR is engaged in different social activities both in Norway and in the Philippines, seeking to continually renew and improve its approach to the local community.

In 2013, in accordance with ISO standards, efforts to ensure continuous improvement in safety and environmental performance were made. As continued focus on reducing energy consumption and seeking environmentally friendly technologies are important, both for the company and its stakeholders, a newbuilding contract for an eco-design supramax bulk carrier was signed in 2013. In 2014, the new platform supply vessel

(PSV) Juania with the SALT 100 design will be delivered containing several new and progressive solutions, tailored to meet the oil companies' needs for a modern, fuel efficient and operationally flexible Platform Supply Vessel. Fleet renewal with eco-friendly design and technology is an ongoing process and will continue in the years to come. For more information click [here](#).

UR supports and respects the protection of internationally proclaimed human rights. In 2012, steps were taken to improve performance in this area by renewing and expanding the "supplier declaration" (a questionnaire to suppliers related to Quality, Environment, Social Responsibility, Transparency and Health & Safety). The supplier declaration provides guidance when choosing suppliers identifying those that support a precautionary approach to environmental and social challenges, undertake initiatives to promote greater environmental responsibility, and encourage the development and diffusion of environmentally friendly technologies.

UR through policy and procedures strives not to contribute to any kind of forced labour, child labour and discrimination in respect of employment, occupation, gender, age and culture. For more information click [here](#).

UR has had procedures and guidelines in place related to averting corruption through gifts and other more specific office related subjects. In 2012, anti-corruption efforts were intensified by formalizing an anti-corruption procedure more specifically focused for the fleet and crew onboard. The said procedure has been implemented, strengthening the existing routines, enabling an enhanced and systematic stance against corruption. Employees are trained in accordance with recommendations from UNODC, Global Compact and The Norwegian Shipowners' Association.

UR is still considering membership in organizations and networks where corruption can be combated together with other shipping companies and organizations at a higher level. For more information click [here](#).

Global Reporting Initiative

Global Reporting Initiative, as the most widely applied standard for reporting on the ten principles of Global Compact, has been chosen as the company's reporting framework. The objective of the Global Reporting Initiative is to create a platform where the reported information is transparent, reliable, comparable and precise.

The Global Reporting Initiative's (GRI) vision is that disclosure on economic, environmental, and social performance is as commonplace and comparable as financial reporting, and important to organizational success.

Sustainability reports based on the GRI framework can be used to benchmark organizational performance with respect to laws, norms, codes, performance

standards and voluntary initiatives; demonstrate organizational commitment to sustainable development; and compare organizational performance over time.

UR is through its improvement cycle continuously seeking best practice. In this respect, UR has performed a materiality analysis in order to identify aspects that have the most material value for the company. Improvement initiatives can therefore be focused on these aspects. A materiality analysis can be described as a CSR checklist. It enables the company to perform a self-evaluation as well as an evaluation by external stakeholders: owner, employees, clients/main suppliers, partners/financial and insurance institutions, local community(ies).

To facilitate the materiality analysis, stakeholders were identified. "Stakeholder" is a term for those parties that are affected by or affect the company. They may also have constructive feedback/criticism worthwhile for the company to listen to and take action

accordingly. For UR the following five stakeholders have been identified and indirectly engaged;

- Owner
- Employees
- Clients/Main Suppliers
- Partners/Financial Institutions
- Local Community(ies)

The above process was an agenda item and confirmed in the latest Management Review, a key stone part of the annual improvement cycle.

The company has engaged the five stakeholders as follows;

Owner: The Owner participated in the decision to become a UN Global Compact company and to report in line with GRI. The Owner is also part of the board of directors.

Employees: As a result of an external audit, an internal working environment questionnaire amongst the employees

was recommended and executed during May 2013. In addition, through Department Management review, Master review and Management review processes employees are able to voice their opinions and suggest improvements.

Clients/Main Suppliers: Clients are requested and encouraged to give customer satisfaction feedback in line with ISO 9001. In addition, offshore related tenders require the companies' CSR status to be given. The company's main suppliers have also been requested to read and return the supplier declaration signed and/or commented. 80% of said suppliers have responded.

Partners: Cooperating Partners such as financial institutions and partners in ownership are well informed of the company's CSR activities and have the opportunity to voice their opinions and thoughts in regular meetings and other formal and informal points of contact. In addition, they are receivers of the annual report and are through this informed of the company's CSR position and work.

Local Community: UR has a long reputation in supporting and working interactive with the local community. The term "JJ Umland Companies" has often been used as the sponsoring entity. General reference is made to the

JJUC.no home page. Through sponsor meetings and participation, opinions and viewpoints are exchanged. In addition, as a participant company in "Samfunnsansvar på Agder" the company has presented its CSR work and received constructive feedback both pro's and con's. Samfunnsansvar på Agder represents a number of local companies of varying sizes and products, ensuring a broad perspective.

The above brief description of how stakeholders have been engaged and afforded an opportunity to influence the company's ability to account for their views, is acknowledged as indirect. The process of engaging stakeholders will be more direct the next time around when the materiality analysis is renewed. This will be done in approximately 2-3 years' time, tentatively 2015 or latest 2016. The frequency and method of engagement are also subject to discussion during the annual Management Review Meeting.

The materiality analysis performed during the fall of 2013, both the internal company and stakeholder analysis, highlighted three aspects that warrant the company's focus as follows:

- **Environmental work**
- **Anti-Corruption work**
- **Supply chain with a special focus on labour conditions**

These three aspects will then be reported in the GRI 4 report as core aspects. The aspects are of material value both for the company and society at large and as such are viewed without boundaries'. As this will be the first annual report in line with GR 4 and it is the first materiality analysis, the results are considered too give valid guidance.

The AS Uglands Rederi Global Reporting Initiative report is structured as a matrix naming the GRI element/indicator and referencing the documents and page where relevant information is publicly noted. When not referenced, specific information may be noted. This is the company's second GRI report, however the first GRI4 version. For further information and details, please review the company's home page www.jjuc.no.

This report has not been subjected to verification by an external body nor submitted specifically to GRI for verification purposes. The report is made and published in an honest and open manner representing the status of CSR and the Global Compact – GRI status for 2013.
