Letter of Re-Commitment

At Computacenter we're committed to carrying out business responsibly. As part of this, since 2007, we have based our approach to corporate social responsibility (CSR) on the 10 core principles of the United Nations Global Compact (UNGC) and published our first Communication on Progress was published in 2009.

It is regret that with the change of process from yourselves we had not identified the need to confirm to you the engagement tier that we wished to follow and therefore did not meet the requirements to continue as a listed member by April 2019 wish has resulted in us being de-listed.

We remain a committed member of the compact and strive to incorporate the UNGC and its principles into our strategy, culture and day-to-day operations, through the development, communication and implementation of relevant policies throughout the organisation and will continue to do so on an ongoing basis as we believe that the UNGC provides our business with the appropriate framework through which to measure its development and progress for CSR.

Yours faithfully

Mike Norris
Chief Executive Officer
Computacenter plc
