

António Guterres

Secretary-General United Nations

New York, NY 10017 USA

Dear Mr. Secretary-General, I am pleased to confirm that Randers Arkitekten ApS supports the ten principles of the Global Compact on human rights, labour, environment and anti-corruption. With this communication, we express our intent to implement those principles. We are committed to making the Global Compact and its principles part of the strategy, culture and day-to-day operations of our company, and to engaging in collaborative projects, which advance the broader development goals of the United Nations, particularly the Sustainable Development Goals. Randers Arkitekten will make a clear statement of this commitment to our stakeholders and the general public.

We recognize that a key requirement for participation in the Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's efforts to implement the ten principles and support any specialized UN Global Compact issue platform that our company may join at a later date. We support public accountability and transparency, and therefore commit to report on progress within one year of joining the Global Compact, and annually thereafter according to the Global Compact COP policy. This includes:

- A statement signed by the chief executive expressing continued support for the Global Compact and renewing our ongoing commitment to the initiative and its principles. This is separate from our initial letter of commitment to join the Global Compact.
- A description of practical actions (i.e., disclosure of any relevant policies, procedures, activities) that the company has taken (or plans to undertake) to implement the Global Compact principles in each of the four issue areas (human rights, labour, environment, anti-corruption).
- A measurement of outcomes (i.e., the degree to which targets/performance indicators were met, or other qualitative or quantitative measurements of results).

Purpose of the Randers Architect is:

- To design buildings that are future-proof with a focus on sustainability, which promotes circular economy and carries out the 17 sustainable development goals of the UN.
- To contribute to a more sustainable community by building healthier homes and open spaces.
- To make sure that our buildings have a low energy-use with a good inside-climate of daylight, ventilation, and selection of materials.
- To minimize the CO2 use of buildings.
- To advise, host lectures, and knowledge sharing of our expert knowledge of the trade and affect a sustainable accession.
- To strengthen the capabilities of our employees with the knowledge, tools, network, courses, or supplementary training to heighten their professional standards, creativity, and knowledge about the challenges of the business.

Sincerely yours,

Mr. Brian Andersen  
CEO/Managing Director  
Randers Arkitekten Aps
