H.E. António Guterres
Secretary-General
United Nations
New York, NY 10017
USA

Dear Mr. Secretary-General,

I am pleased to reconfirm that AMEX supports the Ten Principles of the United Nations Global Compact on human rights, labour, environment and anti-corruption. With this communication, we express our intent to continue implementing those principles. We are committed to making the UN Global Compact and its principles part of the strategy, culture and day-to-day operations of our company, and to engaging in collaborative projects which advance the broader development goals of the United Nations, particularly the Sustainable Development Goals. AMEX will make a clear statement of this commitment to our stakeholders and the general public.

We recognize that a key requirement for participation in the UN Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's efforts to implement the Ten Principles. We support public accountability and transparency, and therefore commit to report on progress within one year of joining the UN Global Compact, and annually thereafter according to the UN Global Compact COP policy. This includes:

- This statement signed by our chief executive expressing continued support for the UN Global Compact and renewing our ongoing commitment to the initiative and its principles.
- A description of practical actions that the company has taken (or plans to undertake) to implement the UN Global Compact principles in each of the four issue areas.
- A measurement of outcomes.

AMEX was previously a member of the global compact due to a failure to report our progress. We were a smaller enterprise in the past, and we lost track of the reporting requirements. We have grown considerably since then and have developed an internal quality assurance department. We are now able to dedicate more people and time to keeping track of reporting requirements and submitting COPs. Additionally, since we were delisted the COP for SMEs has been introduced which is much more in alignment with our size and how we do business, which makes reporting much easier. As we have grown, we have also developed company culture that is in line with the ten principles of the Global Compact. We wish to recommit ourselves to the compact and incorporate the reporting procedures into our quality assurance measures.

Sincerely yours,

AMEX
