25<sup>th</sup> of April 2022

Your Honourable Excellency Mr. António Guterres,

With the greatest pleasure, we inform you that The Green Bridge Ingenieurgesellschaft mbH, seated in Geretsried, Bavaria, Germany, supports the Ten Principles of the United Nations Global Compact on human rights, labour, environment and anti-corruption.

As experts for urban conversions and material cycles, it is our declared goal and express wish to not only advocate these goals, but also to implement these principle to the best of our abilities.

We envisage a more just world, not primarily based on material equality as there are bound to be and will forever be disparities, but on the principle of equity, by making life more affordable.

By employing our high-tech we succeed in increasing the degree of preserving natural resources as much as in decreasing the waste of land or the exploitation of resources, and hence actively contribute to making the world a better place. The positive increase thereof shows in the rise of the quality of ground water and soil, the active climate protection through drastic CO2 reduction by the means of optimised logistics, as well as a tremendous reduction of costly mass movement. Fewer transports, and especially fewer long routes have the greatest potential to save on cost, energy, dirt and noise.

Thus, we not only put a halt to increasing prices of standard materials, but also give poorer people a genuine chance to obtain their own roof over their head as housing becomes more affordable with our methods. Moreover, RC materials make high quality building processes both, effective and efficient which is of particular use to those regions afflicted most by natural disasters and war.

We are committed to making the United Nations Global Impact and its underlying principles part of the strategy and corporate culture, as well as our daily affairs, be they internal amongst the members of our staff or external with our stakeholders, business partners and clients. Likewise, we pledge ourselves to engaging in collaborative projects which advance the broader development of goals of the United Nations, particularly the Sustainable Development Goals. The Green Bridge will make a clear statement of this commitment to our stakeholders and the general public.

We recognise that a key requirement for participation in the UN Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's efforts to implement the Ten Principles. We advocate public accountability and transparency and therefore commit to report on progress within one year of joining the UN Global Compact, and annually thereafter according to the UN Global Compact COP policy.

This includes:

- A statement signed by the CEO expressing continuing support for the UN Global Compact and renewing our ongoing commitment to the initiative and its principles. This is separate from our initial letter of commitment to join the UN Global Compact.
- A description of practical actions (i.e. disclosure of any relevant policies, procedures and activities) that the company has taken (or plans to undertake) to implement the UN Global Compact principles in each of the four issue areas (human rights, labour, environment anti-corruption).
- A measurement of outcomes (i.e. to what degree the target / performance indicators were met or other qualitative or quantitative measurements of results).

We are intent to become a valuable part of the United Nations community and to form strong, durable partnerships to achieve the SDGs. For all these good reasons we wish to join the United Nations Global Compact Network.

Please give our application your kind consideration.

Yours most faithfully,

Prof. Dr. Roman Brylka  
CEO and Partner
