**RE: UN Global Compact**

Dear Secretary-General,

I am pleased to confirm that The Lane Construction Corporation (Lane), a subsidiary of Webuild S.p.A. (Webuild) supports the Ten Principles of the United Nations Global Compact on human rights, labor, environment, and anti-corruption. With this communication, we reinforce our commitment, as a subsidiary of the signatory company Webuild, to making the UN Global Compact and its principles part of the strategy, culture, and day-to-day operations of our company. We also commit to engaging in collaborative projects which advance the broader development goals of the United Nations, particularly the Sustainable Development Goals. Lane will make a clear statement of this commitment to our stakeholders and the general public.

We recognize that a key requirement for participation in the UN Global Compact is the annual submission of a Communication on Progress (CoP) that describes our company's efforts to implement the Ten Principles. In support of public accountability and transparency, our progress is and will continue to be aggregated and reported annually according to the UN Global Compact CoP by parent company, Webuild. This report will include:

- A statement signed by the Lane chief executive expressing continued support for the UN Global Compact and renewing our ongoing commitment to the initiative and its principles. This is separate from our initial letter of commitment to join the UN Global Compact.
- The completion of the online questionnaire of the Communications on Progress, by parent company Webuild, through which it discloses the Group's continued efforts (including Lane) to integrate the Ten Principles into our business strategy, culture, and daily operations, and contribute to United Nations goals, particularly the Sustainable Development Goals.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ignacio Botella", with a long, sweeping horizontal line extending to the right.

Ignacio Botella  
President and CEO, The Lane Construction Corporation
