H.E. Antonio Guterres
Secretary-General
United Nations
New York, NY 10017
USA

Dear Mr. Secretary-General,

I am pleased to confirm that Rockwell Automation supports the Ten Principles of the United Nations Global Compact on human rights, labor, environment, and anti-corruption. With this communication, we express our intent to engage with our supply chain, customers, and stakeholders to advance the broader Sustainable Development Goals.

We recognize that a key requirement for participation in the UN Global Compact is the annual submission of a Communication on Progress that describes our company's efforts to live by the Ten Principles. Rockwell Automation supports accountability and transparency with environment, social and governance (ESG) topics and has published a Corporate Responsibility Report (now titled Sustainability Report) for over 15 years.

We commit to continuing to report on our progress according to the UN Global Compact requirements. This will include:

- Letter confirming our continued support for the UN Global Compact and renewing our commitment to the principles and initiatives.
- Description of how we live our ESG values and actions the company has or will take to support the Ten Principles.
- Our annual Sustainability Report will continue to include messaging on our progress in support of our ESG goals and measurement of outcomes.

For Rockwell Automation, sustainability is central to our mission of making the world more productive and more sustainable, and to our promise of Expanding Human Possibility. We will continue to adapt our sustainability approach to meet new challenges and make a meaningful, lasting difference in the world.

Sincerely,

A handwritten signature in black ink, appearing to read 'Blake D. Moret', written in a cursive style.
