H.E. Antonio Guterres  
Secretary-General  
United Nations  
New York, NY 10017  
USA

Dear Secretary-General,

I am very pleased to announce that our company Assan Alüminyum supports the Ten Principles of the UN Global Compact on human rights, labour standards, environment and anti-corruption. We hereby express our intention to develop these principles in our own sphere of influence. We are committed to making the UN Global Compact and its principles a part of our company's strategies, culture and daily activities and to take part in cooperation projects that support the development of other comprehensive development goals of the United Nations, especially the Sustainable Development Goals. Assan Alüminyum will clearly declare this commitment to its stakeholders and the public.

We recognise that the most important requirement of being a UN Global Compact signatory is the publication of an annual Progress Report explaining how our company has implemented the Ten Principles. We support the principles of accountability and transparency, and therefore, in accordance with the UN Global Compact Progress Report Policy, we commit to submit Progress Reports within one year of our date of admission to the UN Global Compact and annually thereafter.

The report will include the following items:

- A letter signed by the general manager expressing the organisation's statement of ongoing support for the UN Global Compact and its ongoing commitment to the Global Compact principles. This letter will be different from the first letter of commitment we submitted to the UN Global Compact.
- An online Communication on Progress Report (COP) questionnaire in which we will explain our integration of the Ten Principles into our business strategy, culture and daily operations, and our efforts to contribute to the United Nations goals, in particular the Sustainable Development Goals.

Sincerely yours,

Göksal Güngör  
General Manager
