Statement of Commitment to the Principles of the United Nations Global Compact

At Fenergo Limited., we proudly affirm our steadfast commitment to the Principles of the United Nations Global Compact.

As a leading SaaS company, our company mission is to provide software solutions that enable financial institutions and corporate firms to fight financial crimes to make the world a safer place. We recognise the critical importance of leading by example and upholding human rights, labour standards, environmental sustainability, information security, data protection, anti-money laundering and anti-corruption practices.

Our mission goes beyond providing innovative software solutions; it extends to promoting transparency, integrity and accountability throughout the financial industry, creating a positive impact on society as a whole.

Since our founding in 2009, Fenergo has been dedicated to integrating these principles into our products, operations, and partnerships, driving positive change within the company, investors, clients, suppliers and the broader global community.

It is precisely because of these core beliefs that we are honoured to join the United Nations Global Compact alongside other sustainability-focused and forward-thinking organisations, striving to drive positive change on a global scale.

By aligning with the United Nations Global Compact and committing to provide a Communication of Progress (COP) on a yearly basis, Fenergo wants to demonstrate our dedication to transparency, responsible corporate citizenship and our commitment to building a more sustainable and equitable future for all.

Your sincerely,

Niall Twomey, Co-Founder, CTO and ESG Sponsor
