

Dear Secretary-General,

I am writing to reaffirm North Plastik's steadfast support for the Ten Principles of the United Nations Global Compact concerning human rights, labour, the environment, and anti-corruption. Through this message, we wish to articulate our pledge to incorporate the UN Global Compact's principles into our company's strategy, culture, and everyday activities. We are also eager to participate in cooperative projects that further the United Nations' wider development objectives, especially the Sustainable Development Goals.

We are committed to clearly communicating this pledge to both our stakeholders and the public at large. We understand that an essential aspect of our involvement in the UN Global Compact is the yearly submission of a Communication on Progress (CoP), which outlines our efforts to actualize the Ten Principles. We endorse the ideals of public accountability and transparency, and as such, we vow to commence reporting on our progress from the calendar year following our accession to the UN Global Compact, and to continue doing so annually in accordance with the UN Global Compact CoP policy.

Our annual CoP will include:

- A declaration signed by our Administrator that reiterates support for the UN Global Compact and renews our enduring commitment to its principles, distinct from our initial commitment letter.
- The fulfillment of the online CoP questionnaire, through which we will reveal our company's ongoing endeavors to embed the Ten Principles into our business strategy, culture, and daily operations, thereby aiding the United Nations' goals, particularly those pertaining to the Sustainable Development Goals.

Yours sincerely,

Favazza Maurizio
Administrator
