

H.E. António Guterres Secretary-General, United Nations
New York, NY 10017 USA

Dear Mr. Secretary-General,

As we stand on the precipice of a new era in technology, **Firmus Technologies** is thrilled to affirm its unwavering commitment to the Ten Principles of the United Nations Global Compact concerning human rights, labour, the environment, and anti-corruption. We express our intent not only to integrate these principles into the core of our operations but to advance the broader objectives of the United Nations, particularly the Sustainable Development Goals.

Our dedication transcends mere words; it's about embedding the Global Compact's principles into the fabric of our culture and daily activities. **Firmus Technologies** is not just a company; we are a network of partners, committed to leading by example, leveraging the transformative power of artificial intelligence (AI) and sustainable technology to forge a better future.

Recognising the crucial role of transparent and continuous communication, we are committed to annually sharing our progress in implementing the Global Compact's principles through the Communication on Progress (COP). Our report will include:

- A reaffirmation of our commitment to the Global Compact, articulated through a statement from our Co-CEO, underscoring our dedication to these guiding principles.
- An outline of practical actions taken or planned, reflecting our commitment across the four issue areas of human rights, labour, environment, and anti-corruption. This includes enhancing energy efficiency in AI, thereby contributing significantly to environmental sustainability efforts. Our advancements in sustainable technology, such as our proprietary HyperCube technology, have and will enable us to significantly cut CO2 emissions and energy consumption, setting new benchmarks in the industry.
- Metrics and outcomes demonstrating the effectiveness and impact of our initiatives, such as the adoption of novel AI infrastructure solutions to drive operational efficiencies, reduce carbon footprint, and support clean energy technologies across various sectors.

As Co-CEO of **Firmus Technologies**, I assure you of our continued, enthusiastic participation in this important initiative. Together, with the guidance of the United Nations Global Compact, we are poised to make a significant, positive impact on our world.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Rosenfield", written in a cursive style.

Tim Rosenfield
Co-CEO, Firmus Technologies
