UNGC – COP-report

After review of obtained documents and after telephone calls in this case, we see ourselves hereby forced to apply for exit regarding Global Compact.

We are a small company and haven't the resources or the time to dedicate for the purpose on a meaningful manner.

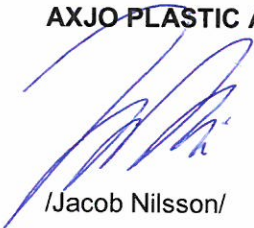

Henceforth, we will still follow the guidelines as provided, and this applies to our company in Sweden as well as in United States and China.

We will continue to follow up results, goals and improvements processes by our internal improvements program in the Board, Management group and in all our other Departments. But as we mentioned above, we don't have enough resources to further report externally.

We are hoping for understanding and we wish continued success for Global Compact.

Best Regards

AXJO PLASTIC AB
