

UN Global Compact Communication on Progress - Dulas

Date 22nd July 2014

Statement

To our stakeholders

I am delighted to confirm that Dulas continues to support the ten principles of the Global Compact with respect to human rights, labour, environment and anti-corruption.

Our core business is the delivery of renewable energy solutions to help people not hurt them, this means our values and activities embrace the three environmental principles. We are continually encouraging the diffusion of renewable energy technologies in areas of the world with poor power supplies particularly for the use of primary healthcare.

Human rights have also always been at the heart of our business and our founding principles exclude manufacturing arms or arms related products. We have also recently added new policies within our Business Vision documentation and Employee Handbook.

Labour rights and responsible management are vital to our operations and values. We are employee owned with no external shareholdings.

We are anti-corruption and our activities are undertaken through transparent bidding processes.

In this annual Communication on Progress, we describe our actions to continually improve the integration of the Global Compact and its principles into our business strategy, culture and daily operations. We also commit to share this information with our stakeholders using our primary channels of communication.

Sincerely yours,

Phil Horton

Director, Dulas
