

PacificHydro

5 September 2014

To the UN Global Compact office and the stakeholders of Pacific Hydro:

Grace Letter

Pacific Hydro recognises that a key requirement for participation in the UN Global Compact is the annual preparation and posting of a Communication on Progress (COP). This allows us to communicate to our stakeholders and the broader business community our continued support for the UN Global Compact.

Due to the close alignment of the UN Global Compact with the Global Reporting Initiative (GRI), we integrate our COP into our Annual Review and Sustainability Report. Our reporting cycle follows a standardised process for completion, culminating in the release of the report. This release date can vary from October to December year to year. Once our report is released, we make a copy available on the UN Global Compact website to fulfil our COP requirements.

For this reason, we request that the date of submission for our COP be changed to 31 December each year.

Kind regards

Jessica Storer
Group Communications and Sustainability Manager
Pacific Hydro
