

## United Nations Global Compact – Communication on Progress (COP)

### Statement of continuing support by the CEO

In November 2011 NUNNER Logistics have committed themselves to support the ten principles of the UN Global Compact, and have submitted their Communication on Progress (COP) since then each year in November.

I am pleased to confirm that NUNNER Logistics reaffirms its support of the Ten Principles of the United Nations Global Compact in the areas of human rights, labour, environment and anti-corruption. In this Communication on Progress we describe our actions to continually improve the integration of the Global Compact and its principles into our company strategy, culture and daily operations. We also commit to share this information with our stakeholders using our primary channels of communication.

Sincerely yours,

---

Erwin Cootjans  
CEO

### Description of practical actions

#### 1 Human rights

##### 1.1 Assessment, Policy & Goals

NUNNER Logistics respects and actively supports the Universal Declaration of Human Rights. The respect for human rights is integrated in both internal and external operations. On 2014 May 26<sup>th</sup> Nunner has published the new company's Code of Conduct that is applicable to all employees of the NUNNER group and must be complied with. This Code of Conduct is also published on the companies website and can be found here :

<http://www.nunner-logistics.com/wp-content/uploads/2014/05/Nunner-Code-of-Conduct.pdf>

Concerning human rights it explicitly states that NUNNER respects the opinion of other persons and their personal dignity, privacy and personal rights. NUNNER will not tolerate any type of discrimination, mobbing or harassment.

### 1.2 Implementation

All employees are subject to a detailed year-end-meeting with their manager. If requested, there is also the option to have this meeting with participation or face-to-face with a confidant representative of the Human Resources department. The company's Code of Conduct has been signed by the CEO, and was distributed on 26.05.2014 to every employee of the NUNNER group.

### 1.3 Measurement of outcomes

NUNNER Logistics has not received any complaints from employees, suppliers, business partners or customers in relation to any human rights violations, nor has it been involved in any investigation, legal case or incident involving human rights.

With the new Code of Conduct a specific contact and email address of the Compliance Office has been published. It can be addressed by every employee in case of questions or insecurities regarding the application of the Code of Conduct. Until 11.11.2014 no mails about non-compliance with ethic objectives have been received.

## 2 Labour

### 2.1 Assessment, Policy & Goals

All working conditions are defined not only through our detailed Human Resources handbook, but the legal framework is also given, where applicable, through the Dutch logistics union guidebook covering all workrelated topics like wages, working hours, benefits, workplace health & safety, etc. In addition to that we strive continually to assess our employees' skills, goals and training requirements and to provide guidance or training to support the personal development of each individual. Every single employee of NUNNER Logistics receives a minimum of 80 hours of training per year.

### 2.2 Implementation

Since the beginning of 2012 every staff member on all levels is trained in the NUNNER Total Performance Academy (warehouse staff, office staff, managers and directors). By 31.12.2013 all office and warehouse employees have completed the course and have reached the level of MBO (middelbaar beroepsonderwijs; "middle-level applied education"). Employees who were already qualified for MBO had the opportunity to complete the HBO-level (Hoger beroepsonderwijs; "higher professional education") This qualifies them for a professional master program in the

Netherlands. The company offers for all employees regularly professional, specific work-related training courses that are held during or right after office hours in the company offices.

### 2.3 Measurement of outcomes

NUNNER Logistics has not been involved in any investigations or legal cases related to the UN Global Compact Labour principles and it has not been subject to any health and safety statutory notices in the last year. Despite the financial crisis in Europe and the challenges that logistic companies were facing since, the average duration of employment at NUNNER is, despite its relatively young staff, > 10 year, which we regard as a clear sign of workforce stability and mutual trust.

## 3 Environment

### 3.1 Assessment, Policy & Goals

NUNNER Logistics has a detailed environmental policy that is communicated to staff, customers, suppliers and other stakeholders on all levels. Focus on sustainability is a fundamental part of the company's mission and vision. It is lived throughout the company and is present at all levels.

### 3.2 Implementation

NUNNER is member of Green Freight Europe, an initiative of European shippers and transport companies that aims for creating a neutral platform for analyzing and evaluating GHG-emission measure and reduction initiatives.

NUNNER is participating in several workgroups and sends delegates to various meetings and exhibitions to be up-to-date about new developments in the logistics market.

NUNNER operates a subcontracted fleet of more than 1.500 trucks, which are since Q3 2012 all classified according to the latest lowest emission classes Euro V and VI.

All subcontractors are regularly audited on a regular basis. Moreover all subcontractors mandatorily need to report on the emission classes utilized in their fleet and the fuel consumption based on actual figures. Fuel consumption is reported on a monthly basis and the composition of the subcontractors' fleets biannually.

The outcome is captured in a trend graph for all main customers and reported and analyzed in business reviews

NUNNER moved one of its X-docks in March 2014 to the distribution facility of one of its major customers in a common effort to reduce truck movements between the distribution centre and NUNNERs X-dock. This has lead to a tremendous reduction of the carbon footprint for this particular customer

### 3.3 Measurement of outcomes

We promote and support environmentally friendly modes of transport, such as rail, barge and short-sea, and we achieved Co2-emission-savings in several areas and for various customers. In October 2014 NUNNER had a new assessment by an independent party on NUNNER's environmental impact from operations. The assessment included detailed questions about:

- Energy consumption, water, biodiversity, local pollution, hazardous materials and waste management
- Environmental impacts from product use and product end-of-life (e.g. dismantling)
- Health & Safety Issues with customers and consumers
- Promotion of sustainable mode of consumption with customers and consumers

NUNNER's score in this assessment area was once again classified as "advanced", with strengths in all main areas. Findings in areas that were highlighted for potential improvements were tackled with detailed action plans.

## 4 Anti-Corruption

### 4.1 Assessment, Policy & Goals

NUNNER's Code of Conduct makes a clear statement:

#### *Bribery and Anti-Corruption*

*"Many countries have bribery and other anti-corruption laws that are intended to prevent companies and individuals from gaining an unfair advantage and from undermining the rule of law. We must never offer or accept bribes or kickbacks, and must not participate in or facilitate corrupt activities of any kind. This prohibition on offering or paying bribes also applies to third parties acting on Nunner's behalf, such as contractors or consultants. We must never engage a third party who we believe may attempt to offer a bribe to conduct company business."*

It addresses detailed guidelines on related topics, such as e.g.:

- Direct and indirect bribery
- Gifts and invitations
- Expenses, donations, charitable benefits and sponsoring
- Money laundering
- Market abuse or manipulation

### 4.2 Implementation

The Code of Conduct was distributed to every single employee on 26.05.2014. The Compliance Office contact details are applicable for questions concerning any part of

the Code of Conduct. As check for appropriateness, NUNNER advises employees to ask themselves the following questions when in doubt:

- Are my actions legally permitted and are they in line with the objectives of NUNNER group?
- Does my “subjective feeling” tell me that my actions are correct?
- Would I be able to justify my actions before the board of NUNNER or before authorities?

Special emphasis is made on business brokers, intermediaries and other third parties who act on behalf of NUNNER Logistics, to ensure that these principles are communicated and applied by them accordingly.

#### 4.3 Measurement of outcomes

NUNNER Logistics has agreed Codes of Conduct with many business partners and customers, that often include clauses about anti-corruption and are always accepted and signed by the management.

National rules of anti-corruption are strictly monitored by Dutch tax authorities. NUNNER Logistics has never been involved in any investigations or cases of corruption or bribery. Until now, no suspected breach of rules has been reported to the NUNNER Compliance Office.
