We recognize that a key requirement for participation in the UN Global Compact is the annual preparation and posting of a Communication on Progress (COP) that comprises of a CEO statement of continued support for the UN Global Compact, a description of practical actions with regard to the principles of the UN Global Compact, and a measurement of outcomes or expected outcomes.

We are late in creating, sharing and posting our COP report due to the following:

- the early retirement of one of our senior officers who was previously designated to and had undertaken the annual task of leading the preparation of the COP.
- my own inability to participate in leading the preparation of the COP in the last several weeks owing to the urgent requirement to travel extensively in this region over the same period.

We hereby ask for an extension period in order to be able to post a COP that describes our company's efforts and progress to implement the principles of the UN Global Compact. Our new COP report will be posted on the UN Global Compact website by 15<sup>th</sup> May 2015 at the latest.
