

Statement of Commitment

30 March 2015

As Founder of Acre Resources, I am proud that we continue to be an active member of the UN Global Compact. Acre fully supports all of the principals of the Global Compact, and will continue to advance standards for human rights, environment, labour, and anti-corruption through our business activities.

Acre recognises the importance of each of the UN Global Compact principles, and regularly reviews and updates policies within the business in accordance with these.

We are actively developing the Acre Foundation and look forward to implementing exciting new initiatives that further benefit our community, and strive to have a positive impact on all those that we work with.

Andy Cartland
Founder and Director
