

EarthCheck Environmental and Social Sustainability Policy

EarthCheck is the world's leading scientific benchmarking, certification and advisory group for travel and tourism. Since 1987, we have helped businesses, communities and governments to deliver clean, safe, prosperous and healthy destinations for travellers to visit, live, work and play. We understand the value of big ideas and the importance of clear communication. We know that what can be good for the planet is also good for business. We work with governments, businesses and destinations to deliver clean, safe and prosperous destinations through our strategic consulting services and technology solutions as well as through our certification and capacity building programs.

EarthCheck Headquarters is located within a business building in the CBD of Brisbane, Australia with close proximity to the Brisbane River. This location provides no known threats to the surrounding environment in the city.

We are committed to following the criteria contained in the EarthCheck Company Standard. We encourage our staff to maintain this commitment to environmental responsibility in our daily operations and we seek support from our customers, service providers, business partners, contractors and suppliers to deliver improved environmental outcomes.

EarthCheck is committed to ensure local and fair trade goods and services are purchased where available. Additionally, we sponsor graduate students from local universities, give special consideration to employing and empowering staff from the local community and source products and services where possible from local producers and suppliers.

We have appointed an EarthCheck Coordinator, who has the responsibility and skills for ensuring ongoing environmental performance, identification of environmental risks, recording and monitoring of impacts and implementing environmental and social sustainability measures. A dedicated Green Team has also been established to assist in the reporting on the organisation's environmental performance, mitigation of environmental risks and monitoring environmental initiatives and sustainability programs.

EarthCheck is committed to continually improve its environmental and social sustainability performance by an annual benchmarking evaluation and certification through the EarthCheck program. EarthCheck will comply with all relevant legislations and regulations regarding sustainability and will strive to achieve international best practice in any of our organisational sustainability requirements.

Stewart Moore,
CEO EarthCheck
August 2015

NOTE: This policy is a public document to be on display, a copy may be given to anyone. The organisation invites staff, landowners, guests and the community to suggest ways to further achieve best practice environmental and social sustainability. This policy will be reviewed annually.
