Declaration for constant support for Global Contract by the General manager

We joined Global Contract because of principles support of Global Contract and their sphere effect on our operation, with special review on environment protection and working conditions improvement.

We are ready towards constant working conditions improvement, environment protection and in that direction are introduced systems ISO 9001-2000 and ISO 14001-2004, and Declaration on Safety at Work with workplace risk assessments.

The mission of ADING AD is to stimulate progress of employees regarding respect of tenth principles support of Global Contract with simultaneous creating of possibilities for dialogue between more interested parties and for collective actions.

**General manager
Blagoj Donchev, B.SC.civ.eng.**

Principle 1: Businesses should support and respect protection of international proclaimed human's rights.

Principle 2: To provide their not collaboration in violating of human's rights

Principles: 1 and 2 that is human's rights protection are implemented in Business plan for **2013 and 2014** where are anticipated resources and systems for instruction and specialization of employees.

Practical action I

The elements stated previously are contained in the annual report for 2013 through the letter to shareholders for estimation for 2013; Report by the Supervisory; report by the independent auditors; balanced state; statement of income; consolidated balance sheet; consolidated statement of income; parameters of profitability; sale of ready mix product and etc.

LETTER TO SHAREHOLDERS For the work in 2013

Previously announced tough 2013 in annual report to shareholders unfortunately become reality. The crisis has deepened, particularly affecting ADING's exports in all countries and in some, such as Romania, Ukraine, Albania and Iran (introduced harsh sanctions by the UN and the EU) even completely stopped.

" Minus" in the realization of January and February which are not remembered in the history of ADING ("force majeure" because of unfavorable weather conditions in the region), stricter sales policy due to difficult and uncertain recovery and insolvency still high in the region contribute 2013 annual plan to be fulfilled with a positive but relatively small gain, same as in 2012.

What we planned, and what we fulfilled Sales and profit

- The planned sales was - at the domestic market 96 % of the planned and 93 % compared to 2012; at the foreign market with 51 % of the plan and 65 % compared to 2012
- Total sales of domestic and foreign market was EUR 3,871,257 and is lower by 22 % compared to 2011. Domestic market share was 55 % and the foreign 45 % of total sales
- Profit after tax EUR 121 487 or 2.95 % sales while for 2012 was 9.93 % or 476,201 Euros .
- Sales in 2013 compared to 2012 fall down, except for Bulgaria and Bosnia where went up. We can be relatively satisfied with the domestic market, but in all other countries we deliver much less than planned .
- At the Kazakhstan project, completed in 2012, we continue to remove flaws and it was delivered on 20/01/2014 Year. Warranty period of 2 years began for

what investor retain an amount of EUR 153.000 or 5 % of the total project amount according to the contract .

- In 2012 in Kazakhstan two new projects were agreed where ADING just gave know-how, which is more favorable variant then the first project where we had a full contracting. These two projects continued in 2014 the same way with instructors and opportunity to sale our products to major contractors
- Problems with the collection were present in almost all countries and is deepening even in Kosovo, which for us was a reliable market .

Billing and debt

- insolvency market in 2013 threaten the company . It led to drastically increased financial costs for bank loans , borrowings and late payments towards suppliers . And due to high interest rates , exchange rates and commission .
- In the absence of liquidity in the domestic market return and compensation for forced that thought in the past . They are now in adverse conditions because of high competition in products with low prices and long days of recovery reduce profits . All this in terms of lower realization reflect the profit is significantly reduced .

investments

Despite the difficult year ading continue to invest as follows:

- The technological lines and thermal improvements to facilities in plant in Skopje worth 47.000 Euro
- The adaptation of the store the BCA and the facility in Avtokomanda valued by the 46.000 Euro

Salaries and incentives

Crisis measures continued in 2013 with reduced pay of employees with management contracts to 10 months and they are regularly paid. All employees receive hot meals, transportation, and other annual income according to the collective agreement .

Organizational and personnel changes

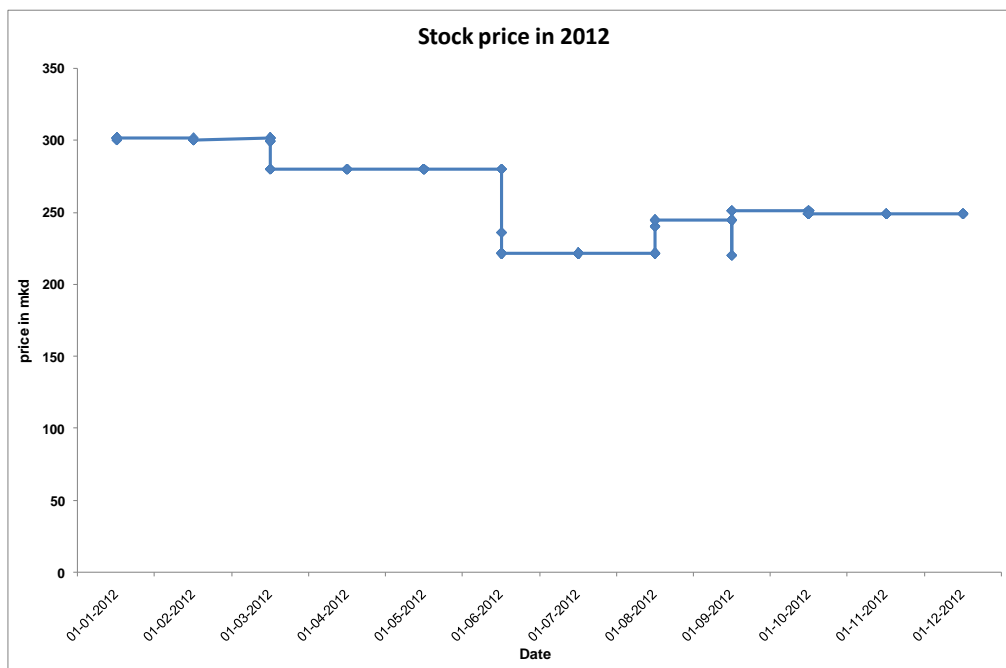

- There have been minor changes in the organizational structure in ADING .
- It should be noted that the Board worked all year with 4 members. Fifth member was not appointed because of financial savings.
- During the year there was a rearrangement in the Business System and new employment in INVEST A where two new engineers and two new

Global Contract - Communication and progress

construction workers were employed on fixed-term and four employees left on ground of retirement and two left the company.

Stock movement

Stock exchange in 2013 stagnated and trading was minimized. Total of 2850 shares were traded with a total turnover of 771.322,00 mkd or 12.542 €. Shares are traded on the Macedonian Stock Exchange and their price varied from day 220-300 mkd per share . ADING in 2013 do not redeem shares and on 31.12.2013 had 3,342 shares same as the previous year .

Evaluation of associated companies

- Board assesses that all associates, except INVEST A and ADING-BELGRADE showed positive result
- It is positive that INVEST A lower their loss from the previous year .
- ADING-BELGRADE show negative results as a result of negative FX factor and lower sales
- GRADITEL-ADING - In agreement with Serbian partner who owned 51 %, the firm was liquidated due to the inability to exist on the market in Macedonia . Because GRADITELJ - Novi Sad is divided into several parts and lose more of the foreign brands partnership for construction machinery, existence of the company has become pointless and was closed.

How we started in 2014

Global Contract - Communication and progress

In the starting two months of 2014 sale was achieved more than expected especially in the domestic market, but in March sale went down on domestic and much more on foreign markets as a result on failed sales in Serbia , Kosovo and Russia.

Some major projects in Macedonia and Kosovo was put off and in Serbia we have uncertain sales especially because of stopped delivery of products to our larger customers (PUTEVI - Uzice , MOSTOGRADNJA and others) who owe large amounts from previous deliveries .

We expect sales in Kazakhstan to increase mainly because of continuing projects with our KNOW-HOW and sales of products for what we engaged an application engineer presence for longer period. Also, realization of INVEST-A's projects that were agreed last year - multi-storey car parks in Skopje (with Granit and Beton) will increase sales. Inability to increase sales to foreign markets in several countries because of the great financial crisis and increased competition this year and the inability to pick markets in Iran , Ukraine, concern us and hints that 2013 will be even more difficult than the previous .

To improve this situation, this year, as underused opportunity for better quality and higher ranking in the domestic market, more aggressive approach was taken in retail.

In the meantime a special project team "New profitable businesses" was established which on a long-term have to bring hope in overcoming the consequences of the global economic crisis .

The current activities of the engineering team that works daily on boosting the competitiveness of ADING's program, new formulations to obtain more profitable products and also reducing costs in all segments in the Business System, we aspect that even with reduced sales to maintain stability of company.

April, 2014

Chairman of the Board
and G.M.
Blagoja Doncev grad.civ.eng

Practical action XXII

"Grant Thornton ,independent auditors, for 2013 for the management and the shareholders of ADING AD points out that:

To the management and shareholders
of ADING AD, Skopje

We have audited the accompanying financial statements of Ading AD Skopje ("The Company"), which comprise of the Statement of financial position as of 31 December 2012 and the Statements of comprehensive income, Statement of changes in equity and Statement of cash flows for the year that ended and summary of significant accounting policies and other explanatory notes included on pages 3 to 38.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the International Financial Reporting Standards, and for such internal control as Management determines is necessary to enable the preparation of financial statements, that are free from material mis-statements whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free of material misstatements. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatements of the financial statements whether due to fraud or error.

In making those risks assessments, the auditor considers the internal control relevant to the Company's preparation and fair presentation of financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also include evaluating the appropriateness of accounting polices used and reasonableness of accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.

We believe that audit evidence we have obtained is sufficient and appropriate to provide e basis for our opinion.

Opinion

In our opinion, the financial statements of the Company present fairly, in all material respects, the financial position as of 31 December 2013, and its financial performance and its cash flows for the year then ended, in accordance with the International Financial Reporting Standards.
